UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff,

Case No. 20-cv-1771-pp

v.

WISCONSIN ELECTIONS COMMISSION, *et al.*,

Defendants.

ORDER GRANTING MOTION BY PROPOSED *AMICUS CURIAE* WISCONSIN STATE CONFERENCE NAACP, DOROTHY HARRELL, WENDELL J. HARRIS, SR., AND EARNESTINE MOSS FOR LEAVE TO FILE *AMICUS CURIAE* BRIEF (DKT. NO. 56)

The plaintiff filed this lawsuit on December 1, 2020. Dkt. Nos. 1. The named defendants have filed motions to dismiss the case with supporting briefs—dkt. nos. 51 (Governor Tony Evers) and 53 (Wisconsin Elections Commission and its members). Defendant Evers' brief has fifteen attachments, several of which are decisions from other federal district courts and from the Wisconsin Supreme Court.

On December 7, the Wisconsin State Conference NAACP and three of its members—Dorothy Harrell, Wendell J. Harris, Sr. and Earnestine Moss—filed a motion for permission to file an *amicus* brief on the question of whether the court ought to dismiss the lawsuit. Dkt. No. 56. In the opening paragraphs of the proposed brief, the movants state that "[p]laintiff has already placed a significant enough burden on the Court, so [they] will endeavor not to repeat the substantive arguments that [they] expect the parties will make." Id. at 8-9.

They state that instead, they "seek to highlight some of the stronger reasons why this Court should summarily dismiss this action." Id. at 9. They state that they will rely on decisions from federal courts in other districts and the Wisconsin Supreme Court. Id. Finally, the movants state:

> Wisconsin NAACP is not simply an organization whose mission includes ensuring that voters' votes are counted, important as that mission is. It is dedicated specifically to advancing the interests of Black voters in our democracy. To that end, the national NAACP has partnered with one of the country's leading civil rights organizations, the Lawyers' Committee for Civil Rights Under Law, to work with experienced local counsel in several states, including Wisconsin, to ensure that the votes of Black voters are not invalidated in this election. It is no accident that Plaintiff's focus in this case is on the voters of Milwaukee County, home to Wisconsin's largest city and Black population. This follows a pattern wherein the Trump Campaign and its allies have singled out alleged "corruption" in other cities with large Black populations.
>
> Wisconsin NAACP respectfully asks this Court to scrutinize Plaintiff's claims in that light, and to recognize them not only as an existential threat to our democracy—which they are—but also as a particular threat to the votes of members of minority populations whose access to the ballot box has been historically obstructed.
>
> Plaintiff's complaint does not deserve a day in court.

Id. at 9-10.

Recently Seventh Circuit judge Michael Scudder issued a thoughtful consideration of the purpose of an *amicus*, or "friend of the court," brief. In considering whether to accept three proposed *amicus* briefs, Judge Scudder explained:

> The guidance for prospective *amici* is sparing. The Federal Rules of Appellate Procedure say only that a prospective friend of the court must explain "why an amicus brief is desirable and why the matters asserted are relevant to the disposition of the case." FED. R. APP. P. 29(a)(3)(B). [The Seventh Circuit's] *Practitioner's Handbook for*

Appeals adds that, in deciding whether to accept an *amicus* brief, the court looks at whether the submission "will assist the judges by presenting ides, arguments, theories, insights, factors, or data that are not found in the briefs of the parties." See *Practitioner's Handbook for Appeals to the United States Court of Appeals for the Seventh Circuit*, XXII.B "Amicus Briefs" (2020 ed.) (citing *Voices for Choices v. Illinois Bell Telephone Co.*, 339 F.3d 542, 544-45 (7th Cir. 2003) (Posner, J., in chambers)).

At times individual judges have rightly observed that too many *amicus* briefs do not even pretend to offer value and instead merely repeat (literally or through conspicuous paraphrasing) a party's position. See, *e.g.*, *Voices for Choices*, 339 F.3d at 545 ("[I]t is very rare for an *amicus curiae* brief to do more than repeat in somewhat different language the arguments in the brief of the party whom the amicus is supporting."); *Ryan v. CFTC*, 125 F.3d 1062, 1063 (7th Cir. 1997) (Posner, C.J., in chambers) ("[T]he vast majority of [*amicus curiae* briefs] have not assisted the judges . . . ."). Nobody benefits from a copycat *amicus* brief and indeed our practice is to reject them. See *Nat'l Org. for Women, Inc. v. Scheidler*, 223 F.3d 615, 617 (7th Cir. 2000). Nor should *amicus* briefs serve only as a show of hands on what interest groups are rooting for what outcome. See *Sierra Club, Inc. v. E.P.A.*, 358 F.3d 516, 518 (7th Cir. 2004) ("Courts value submissions not to see how the interest groups line up, but to learn about facts and legal perspectives that the litigants have not adequately developed.").

Rather, a true friend of the court will seek to add value to [the court's] evaluation of the issues presented on appeal. To be sure, the fiction that an *amicus* acts as a neutral information broker, and not an advocate, is long gone. See Samuel Krislov, *The Amicus Curiae Brief: From Friendship to Advocacy*, 72 YALE L.J. 694, 703-704 (1963). But even a friend of the court interested in a particular outcome can contribute in clear and distinct ways, by, for example:

- Offering a different analytical approach to the legal issues before the court;

- Highlighting factual, historical, or legal nuance glossed over by the parties;

- Explaining the broader regulatory or commercial context in which a question comes to the court;

- Providing practical perspectives on the consequences of potential outcomes;

- Relaying views on legal questions by employing the tools of social science;

- Supplying empirical data informing one or another question implicated by an appeal;

- Conveying instruction on highly technical, scientific, or specialized subjects beyond the ken of most generalist federal judges;

- Identifying how other jurisdictions—cities, states, or even foreign countries—have approached one or another aspect of a legal question or regulatory challenge.

The point, of course, is that an *amicus curiae* brief should be additive—it should strive to offer something different, new, and important. See *Scheidler*, 223 F.3d at 617.

Prairie Rivers Network v. Dynegy Midwest Generation, LLC, 976 F.3d 761, 762-64 (7th Cir. Sept. 24, 2020).

It is a close call whether the brief proposed by the movants adds anything new or different. The movants concede that they seek only to highlight what they characterize as the stronger of the arguments they anticipated the defendants would make. The court has reviewed the movants' brief—in the main, it relies on cases cited by the defendants and makes arguments made by the defendants.

What the proposed brief *does* do that is different from the other briefs the court has received is ask the court to consider the suit from the perspective of Black voters. It also provides verified declarations from three individuals—the African-American president of the Beloit Branch of the Wisconsin NAACP (and

resident of Beloit, Wisconsin) who voted by in-person early voting in the November 3, 2020 general election and who asserts that the relief the plaintiff requests would invalidate her vote, dkt. no. 56 at 22-23; the current president of the Wisconsin State Conference NAACP who voted by absentee ballot in the November 3, 2020 general election due to having been diagnosed with COVID-19 and who asserts that some of the relief the plaintiff requests would disenfranchise members of the Wisconsin NAACP who voted absentee and would depress future voter turnout, dkt. no. 56 at 25-28; and an African-American member of the Dane County branch of the NAACP who voted in person in the November 3, 2020 election and who alleges that the relief the plaintiff requests would invalidate her vote, dkt. no. 56 at 30-31.

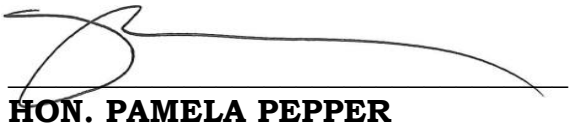
One might argue that the movant's proposed brief is a "show of hands" brief—another interest group expressing its agreement with the arguments made by the defendants in their briefs supporting their motions to dismiss. But because it does shed light on perspectives the defendants may not have—perspectives of members of the NAACP; of Black or African-American voters; of voters who were forced to vote absentee; of voters who used the in-person, early voting option—the court will grant the motion and accept the movant's proposed brief.

The court **GRANTS** the Motion by Proposed Amicus Curiae Wisconsin State Conference NAACP, Dorothy Harrell, Wendell J. Harris, Sr., and

Earnestine Moss for Leave to File Amicus Curiae Brief. Dkt. No. 56.

Dated in Milwaukee, Wisconsin this 8th day of December, 2020.

BY THE COURT:



HON. PAMELA PEPPER
Chief United States District Judge

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

Court Minutes and Order

DATE:	December 8, 2020
JUDGE:	Pamela Pepper
CASE NO:	2020-cv-1771
CASE NAME:	William Feehan, *et al.* v. Wisconsin Elections Commission, *et al.*
NATURE OF HEARING:	Status Conference
APPEARANCES:	Howard Kleinhendler – Attorney for plaintiff Jody Schmelzer – Attorney for the Wisconsin Elections Commission and members S. Michael Murphy – Attorney for the Wisconsin Elections Commission And members Davida Brook – Attorney for Governor Tony Evers Jeffrey Mandell – Attorney for Governor Tony Evers David Lesser – Attorney for Amicus Democratic National Committee John Devaney – Attorney for Amicus Democratic National Committee
COURTROOM DEPUTY:	Kristine Wrobel
TIME:	11:08 a.m. – 12:01 p.m.

AUDIO OF THIS HEARING AT DKT. NO. 70

For reasons it explained in detail on the record, the court denied the plaintiffs' motion for a consolidated evidentiary hearing and trial on the merits. Dkt. No. 44.

After explaining that it need to decide the justiciability questions raised by the defendants and *amici* before it could consider the merits of the plaintiff's request for injunctive relief, the court asked the plaintiff's counsel whether the plaintiff needed time to respond to the defendants' motions to dismiss (Dkt. Nos. 51 and 53). Counsel responded that the plaintiff would file both his reply in support of the motion for injunctive relief and his brief in opposition to the motions to dismiss by 5:00 p.m. CST today. When the court enquired when the plaintiff needed a decision from the court (in order to avoid extinguishment of any appellate rights), counsel responded that he would like the court to rule by tomorrow (December 9, 2020). After hearing from the defendants and amicus the DNC regarding when they could file reply briefs, the court ordered that the deadline for the defendants and *amici* to file reply briefs in support of the motions to dismiss was December 9, 2020 at 3 p.m. CST. The court indicated that it will try to get a decision out as soon as possible.

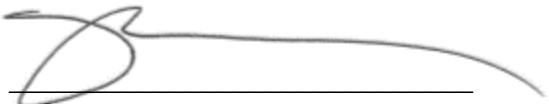
The court **DENIES** the plaintiffs' motion for consolidated evidentiary hearing and trial on the merits. Dkt. No. 44.

The court **ORDERS** the plaintiff to file his responses to the motions to dismiss (Dkt. Nos. 51 and 53) and reply brief in support of his motion for injunctive relief (Dkt. No. 10) by December 8, 2020 at 5 p.m. CST.

The court **ORDERS** that if the defendants and *amici* wish to file reply briefs in support of the motions to dismiss, they must do so by December 9, 2020 at 3 p.m. CST.

Dated in Milwaukee, Wisconsin this 8th day of December, 2020.

BY THE COURT:



HON. PAMELA PEPPER
Chief United States District Judge

IN THE UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN

Plaintiff,

v. **CASE NO. 20-cv-1771**

WISCONSIN ELECTIONS COMMISSION, and its members ANN S. JACOBS, MARLC L. THOMSEN, MARGE BOSTELMAN, JULIE M. GLANCEY, DEAN HUDSON, ROBERT F. SPINDELL, JR., in their official capacities, GOVERNOR TONY EVERS, in his official capacity,

Defendants.

PLAINTIFF'S CONSOLIDATED RESPONSES TO DEFENDANTS' MOTIONS TO DISMISS AND REPLIES TO RESPONSES OF DEFENDANTS AND *AMICI* IN OPPOSITION TO MOTION FOR DECLARATORY, EMERGENCY, AND PERMANENT INJUNCTIVE RELIEF AND MEMORANDUM IN SUPPORT THEREOF

COMES NOW Plaintiff, Michael Feehan, by and through undersigned counsel, and files this Consolidated[1] Response, and Memorandum of Law In Support Thereof, to Defendants Motions to Dismiss Plaintiff's December 3, 2020 Amended Complaint ("Amended Complaint"), ECF No. 9, and Defendants Responses to Plaintiffs' December 3, 2020 Emergency Motion for Declaratory, Emergency and Permanent Injunctive Relief ("TRO Motion"). ECF No. 10.

[1] The Court granted Plaintiff's request to file separate Replies to Defendants. In light of the multiple Motions to Dismiss, Responses and submissions of Amici, most of which are duplicative and repetitive, and given the time constraints, Plaintiff believes it is more efficient to submit a single consolidated response and reply.

INTRODUCTION

Plaintiff seeks to preserve election integrity in Wisconsin by requesting that this Court order Defendants to rescind or reverse their certification of the 2020 General Election, which included hundreds of thousands of illegal, ineligible, fraudulent and fictitious votes that Defendant Governor Evers and the members of the Wisconsin Elections Commission ("WEC") knowingly facilitated and permitted to be cast, through intentionally weakening, or disregarding altogether, the Wisconsin Election Code's many safeguards against absentee ballot voter fraud, for the purpose of ensuring the election of Joe Biden as President.

Defendants, along with Wisconsin state courts, have refused to initiate an investigation into other glaring "irregularities" strongly indicative of brazen election fraud, such as the nearly simultaneous halt in vote counting in Milwaukee and Madison (as well as in five other swing states) in the early morning of November 4 when President Trump had significant lead, followed by the addition of over 140,000 votes for Biden when counting resumed a couple of hours later, giving Biden the narrow lead that he has now. Defendants now seek to run out the clock to cover-up the evidence of their complicity in the stolen election of 2020. In doing so, it is Defendants, not Plaintiff, that would disenfranchise millions of Wisconsin voters who cast lawful ballots and thereby overturned the results of the 2020 General Election.

Plaintiff has provided ample evidence of constitutional election fraud as set forth by the Seventh Circuit in *Kasper v. Bd. of Election Com'rs of the City of Chicago*, 814 F.2d 332, 343 (7th Cir. 1987) ("section 1983 is implicated only when there is willful conduct which undermines the organic process by which candidates are elected"):

- Third parties, whether foreign actors, local officials and/or Defendant WEC, corrupted election results.

- Defendants' knowing refusal to rescind certification and delivery of corrupted results to the Electoral College will deny Plaintiff equal protection.

- Plaintiff is entitled to injunctive relief to prevent defendants from delivering corrupted results the deny him due process and equal protection, and the ability to cast his vote in the Electoral College on December 14, 2020 for President Trump..

This case therefore turns on the question whether Plaintiff can carry his burden of proof that the results are corrupt. Tellingly, Defendants have not propounded *any* declarations or affidavits contesting Plaintiff's extensive sworn testimony and documentary evidence.

STATEMENT OF FACTS

In *Celsis In Vitro, Inc. v. CellzDirect, Inc.*, 664 F.3d 922 (Fed. Cir. 2012), the Court upheld the district court's entry of a preliminary injunction based on defendant's failure to offer any evidence controverting the plaintiff's sworn testimony and documentary evidence.

> Based on the record before the district court, this court sees no error in the district court's finding that Celsis would suffer irreparable harm absent a preliminary injunction. . . . .
>
> Celsis offered testimony from its expert Mark Peterson on irreparable harm. In contrast, LTC did not offer expert testimony in rebuttal. This court sees no error in the district court's reliance on Celsis' unrebutted expert testimony. To substantiate its claims, Celsis presented fact and expert testimony as well as specific financial records.

Id. 930–31.[2]

The following facts are unrebutted by any countervailing evidence.

WEC uses the same Dominion Voting Systems Corporation ("Dominion") election software and hardware designed by Smartmatic Corporation (Sequoia in the United States). Amd. Cplt. ECF

[2] In its opposition to Plaintiff's request for Evidentiary Hearing, WEC complained that Plaintiff has "sandbagged," and will likely make a variant of that same complaint in response to Plaintiff's position that the Court may determine Plaintiff's TRO/PI Motion on the unrebutted record before the Court. Plaintiff's evidence submitted in this case is substantially similar to that submitted in parallel actions in other jurisdictions referenced by Defendants because the same three voting technology companies that control voting in those jurisdictions (along with 90% of the US market) also control substantial voting operations in Wisconsin.

Plaintiff's proof was filed with his Complaint December 1. Further, Counsel for Defendants and Intervenor/Amicus Democratic National Committee have also appeared in those other actions and have been well aware of Plaintiff's proof for weeks.

9 (hereafter, "Amd. Cplt."), Pars. 6 - 8. Dominion and Smartmatic were founded and employed to conduct computerized ballot-stuffing and vote manipulation. The Smartmatic software ensured that ensured Venezuelan dictator Hugo Chavez never lost an election. Exhs. 1 and 8 (member Chavez's security detail and a 25-year member of the Supreme Electoral Council, which oversees all Venezuela elections.)[3]

Smartmatic software design adopted by Dominion for Wisconsin's elections provides the ability to hide vote manipulation votes from any audit. It allows an unauthorized user to add, modify, or remove log entries, causing the machine to log election events that do not reflect actual voting tabulation. Amd. Cplt. 9 – 10. Exh. 14.

For those reasons, the Texas Board of Elections rejected Dominion software and denied certification of the 2020 election results. Amd. Cplt. Pars. 10, n. 1, 12. (Exhs.17, 9, 11)

Texas has today filed with the United States Supreme Court its Motion for Leave to File Bill of Complaint. Exh. 2 to this Response/Reply The Motion includes allegations oof fraud and vote manipulation specific to Wisconsin. Id., pars. 106 – 124.

According to Princeton Professor of Computer Science and Election Security Expert Dr. Andrew Appel, he wrote a similar program that would enable someone to "hack a voting machine [with] 7 minutes alone with a screwdriver." Amd. Cplt. Par. 13. (Exh. 10).

The WEC itself issued patently unlawful "guidance" to county and municipal clerks not to reject "indefinitely confined" absentee voters for whom they had "reliable information" that the voters were not confined, and to fill in missing absentee ballot certification information themselves on envelope and at the polls. Amd. Cplt. Pars. 14, 37 – 45). (WEC May 13, 2020 Guidance Memorandum.)

[3] All Exhibit references are to the Amended Complaint.

The Dominion software was accessed by agents acting on behalf of China and Iran in order to monitor and manipulate elections, including the most recent US general election in 2020. Amd. Cplt. Par. 16 (Exh. 12, former military electronic intelligence analyst).

Many Wisconsin jurisdictions also used the Elections Systems & Software Election Management System, which is similarly compromised. Exh. 17, Pars. 7 – 11.

The WEC certified the Election results on November 30, 2020, showing a difference of 20,565 votes in favor of former Vice-President Joe Biden over President Trump. Amd. Cplt. Par. 35.[4]

Additional errors included voters receiving ballots who didn't request them and returned ballots that went missing. Dr. Briggs concluded that those errors affected almost 97,000 ballots in the state of Wisconsin, with tens of thousands of unrequested ballots being wrongfully, returned ballots not being counted, and others lost or destroyed. Amd.Cplt. Pars. 46 – 51.

Statistical analysis of voting pattern anomalies demonstrated statistically significant outperformance of Dominion machines on behalf of Joe Biden by 181,440. Amd. Cplt. Pars. 52 – 58 (Exh. 4)

The State of Wisconsin, in many locations, used either Sequoia, a subsidiary of Dominion Systems, and or Dominion Systems, Democracy Suite 4.14-D first, and then included Dominion Systems Democracy Suite 5.0-S on or about January 27, 2017, which added a fundamental modification: "dial-up and wireless results transmission capabilities to the Image Cast Precinct and results transmission using the Democracy Suite EMS Results Transfer Manager module." (*See* Exh. 5, attached hereto, a copy of the Equipment for WI election systems).

[4] Available at https://elections.wi.gov/sites/elections.wi.gov/files/Statewide%20Results%20All%20Offices%20%28pre-Presidential%20recount%29.pdf

Anomalous voting results occurred in voting jurisdictions throughout Wisconsin using software by Dominion and its subsidiary Sequoia, which included "dial-up and wireless results transmission capabilities." Amd.Cplt, Par. 60 - 62. Exh 5.

WEC continued using Dominion and Sequoia software despite numerous concerns expressed by federal and state agencies and courts throughout the country regarding multiple "acute security vulnerabilities." Amd.Cp.t, Par. 63 - 68. Exh. 7.

Dominion software has been compromised by actors in both China and Iran. Dominions systems are further vulnerable because hardware is manufactured by foreign companies with interests contrary to those of the United States. Amd. Cplt. 70-76 (Exh. 12).

Further, a Dominion

> ". . . algorithm looks to have been set to give Joe Biden a 52% win even with an initial 50K+ vote block allocation was provided initially as tallying began (as in case of Arizona too). In the am of November 4, 2020 the algorithm stopped working, therefore another "block allocation" to remedy the failure of the algorithm. This was done manually as ALL the SYSTEMS shut down NATIONWIDE to avoid detection."

Exh. 13, Par. 76 (emphasis original)

Dominion data feeds revealed "raw vote data coming directly that includes decimal places establishes selection by an algorithm, and not individual voter's choice. Otherwise, votes would be solely represented as whole numbers (votes cannot possibly be added up and have decimal places reported)." Amd. Cplt. Pars. 78 – 79, Exzh. 17. Statistical anomalies and impossibilities compel the conclusion that at least 119,430 must be disregarded. *Id.*

Smartmatic's inventors and key personnel are foreign nationals, and the Venezuelan official personally witnessed manipulation of petitions to prevent removal of President Chavez from office. Amd. Cplt. Pars. 80-81. (Exhs. 17 and 8).

In their October 30, 2020 advisory "Iranian Advanced Persistent Threat Actor Identified Obtained Voter Registration Data," both the FBIC and United States Cybersecurity and

Infrastructure Security Agency warned of Iranian influence in the 2020 election. Amd. Cplt. Par. 82, Exh. 18.

Dominion systems allow operators to "accept" or "discard" batches of votes on fed through tabulation machines, including through arbitrarily designating batches of ballots as "problem" batches. Amd. Cplt. Pars. 83 - 85.Exhs. 14 and 8.

Problems with Dominion systems have been widely reported and documented by individual citizens and expert academics. Amd Cplt. Pars. 86 - 89.

In particular, Democratic Senators Warren, Klobuchar, Wyden and Congressman Mark Pocan wrote to the hedge fund owners of voting systems about their concerns that trouble plagued companies owning voting systems were compromising on security and concentrating ownership in only three large companies - Election Systems & Software, Dominion Voting Systems, & Hart InterCivic – which collectively serve over 90% of all eligible voters in the U.S." Amd. Cplt. Par. 88. Exh. 16.

Of particular concern, Dominion's Security Director Eric Coomer, who invented critical dominion software, is a vehement, virulent and frequent opponent of President Trump who, besides intemperate and obscene attacks on the President, has posted videos how Dominion systems may be compromised and boasted publicly he was "f**ing sure" the President was "not going to win." . Amd. Cplt. Par. 88-99

Additional facts relevant to this Consolidated Response and Reply are set forth in the December 3, 2020 Amended Complaint, ECF No. 9, filed in the above-captioned proceeding, and its accompanying exhibits, and the TRO Motion.

DISCUSSION

The Amended Complaint lays out in detail factual allegations and violations of the U.S. Constitution and the Wisconsin Election Code, supported by more than a dozen sworn affidavits from fact and expert witnesses. Yet Defendants dismiss the Amended Complaint as a "mishmash of speculation, conjecture, and conspiracy theories, all without a shred of evidence." ECF No. 59 at 1. Defendants and *Amicus* filings have not presented any facts or witness testimony that responds to, much less rebuts, Plaintiffs' factual allegations and witnesses. Accordingly, Plaintiff's allegation and witness testimony remains unrebutted and unchallenged and must be accepted as true for the purpose of this response.

In Section I, Plaintiff will first review the legal standard for granting injunctive relief, and the evidentiary standards applicable to the TRO Motion where, as here, defendants fail to offer any rebutting evidence. Thereafter, Plaintiff will again demonstrate that it has met the requirements for injunctive relief, which are: (1) substantial likelihood of success on the merits, and in particular that Plaintiffs have adequately pled their Constitutional and statutory claims; (2) irreparable injury, (3) the balance of equities tips in their favor, and (4) the requested relief is in the public interest.

In Section II, Plaintiff will demonstrate that he has met the applicable pleading standard for constitutional election fraud and other constitutional claims under 42 U.S.C. § 1983, in particular, under Federal Rules of Civil Procedure Rule 9(b) and Rule 12(b)(6). As an initial matter, we would note that dismissal of election-related challenges is inappropriate before the development of the evidentiary record.

Finally, Section III will respond to, and dispose of, specious legal arguments by Defendants and *Amicus* for denial of Plaintiffs' TRO Motion, and/or dismissal of the Amended Complaint, on

grounds of: (1) standing, (2) laches, (3) mootness, (4) the Eleventh Amendment, (5) administrative exhaustion and exclusive state jurisdiction, and (6) abstention

I. PLAINTIFF IS ENTITLED TO INJUNCTIVE RELIEF

A. Legal Standard for Injunctive Relief.

"To obtain a preliminary injunction, a plaintiff must show three things: (1) without such relief, he will suffer irreparable harm before his claim is finally resolved; (2) he has no adequate remedy at law; and (3) he has some likelihood of success on the merits. *Harlan v. Scholz*, 866 F.3d 754, 758 (7th Cir. 2017) (*citing Girl Scouts of Manitou Council, Inc. v. Girl Scouts of U.S. of Am*., Inc., 549 F.3d 1079, 1086 (7th Cir. 2008)." "If the plaintiff can do that much, the court must then weigh the harm the plaintiff will suffer without an injunction against the harm the defendant will suffer with one." *Harlin*, 866 F.3d at 758 (*citing Ty, Inc. v. Jones Grp., Inc*., 237 F.3d 891, 895 (7th Cir. 2001). In addition, the court must ask whether the preliminary injunction is in the public interest. *Jones v. Markiewicz-Qualkinbush*, 842 F.3d 1053, 1058 (7th Cir. 2016).

All elements are met here, under either standard, and Defendants' and *Amicus* responses have not shown otherwise. Further, this Court can grant the requested injunctive relief on the pleadings, without an evidentiary hearing, because Defendants have failed to provide any fact or expert witness testimony whatsoever to rebut Plaintiff's fact and expert witnesses. *See, e.g., Celsis In Vitro, Inc. v. CellzDirect, Inc.*, 663 F.3d 922, 930-31 (Fed. Cir. 2012) (affirming district court grant of preliminary injunction that relied on plaintiff's unrebutted expert testimony).

Of course, as an initial matter, "[w]hen the acts sought to be enjoined have been declared unlawful or clearly are against the public interest, plaintiff need show neither irreparable injury nor a balance of hardship in his favor." 11 Wright & Miller, Federal Practice & Proc. ¶ 2948 (3d ed. 1998)) (internal quotation marks omitted); *see also Current-Jacks Fork Canoe Rental Ass'n v. Clark*, 603 F. Supp. 421, 427 (E.D. Mo. 1985) (stating that "[i]n actions to enjoin continued

violations of federal statutes, once a movant establishes the likelihood of prevailing on the merits, irreparable harm to the public is presumed."). Certifying election results tainted by election fraud and failing to retract such a certification is clearly unlawful and against the public interest. Hence, Plaintiffs discuss irreparable hardship and the public interest only in the alternative.

B. Plaintiff Has Satisfied Requirements for Preliminary Injunction and TRO.

1. Plaintiff has a substantial likelihood of success.

The Plaintiff does not need to demonstrate a likelihood of absolute success on the merits. "Instead, [it] must only show that [its] chances to succeed on his claims are 'better than negligible.'" *Whitaker v. Kenosha Unified Sch. Dist. No. 1 Bd. of Educ.*, 858 F.3d 1034, 1046 (7th Cir. 2017). (*quoting Cooper v. Salazar*, 196 F.3d 809, 813 (7th Cir. 1999)). "This is a low threshold," *id.*, that Plaintiff has easily passed.

Through detailed fact and expert testimony including documentary evidence contained in the Amended Complaint and its exhibits, Plaintiff has made a compelling showing that Defendants' intentional actions jeopardized the rights of Wisconsin citizens to select their leaders under the process set out by the Wisconsin Legislature through the commission of election frauds that violated Wisconsin laws, including multiple provisions of the Wisconsin election laws. These acts also violated the Equal Protection and Due Process Clauses of the United States Constitution. U.S. Const. Amend XIV. And pursuant to 42 U.S.C. § 1983, plaintiffs must demonstrate by a preponderance of the evidence that their constitutional rights to equal protection or fundamental right to vote were violated. *See, e.g., Radentz v. Marion Cty.*, 640 F.3d 754, 756-757 (7th Cir. 2011).

Defendants and *Amicus* misrepresent Plaintiff's constitutional claims. Plaintiff alleges both vote dilution and voter disenfranchisement, both of which are claims under the Equal Protection and Due Process Clause, due to the actions of Defendants in collusion with public

employees and voting systems like Dominion. The Amended Complaint describes in great detail Defendants' actions to dilute the votes of Republican voters through counting and even manufacturing hundreds of thousands of illegal, ineligible, duplicative or outright fraudulent ballots.

While the U.S. Constitution itself accords no right to vote for presidential electors, "[w]hen the state legislature vests the right to vote for President in its people, the right to vote as the legislature has prescribed is fundamental; and one source of its fundamental nature lies in the equal weight accorded to each vote and the equal dignity owed to each voter." *Bush v. Gore*, 531 U.S. 98, 104 (2000) (emphasis added). The evidence shows not only that Defendants failed to administer the November 3, 2020 election in compliance with the manner prescribed by the Wisconsin Legislature, but they administered the voter registration, absentee ballot rules, and subsequent ballot processing and counting in a manner that facilitated fraudulent and illegal voter registration and ballot tabulation by election workers, Dominion, Democratic Party officials and activists and other third parties making certain the election of Joe Biden as President of the United States. This conduct violated Equal Protection and Due Process rights of Plaintiff and other similarly situated voters, as well rights under the Wisconsin election laws. *See Kasper v. Bd. of Election Com'rs of the City of Chicago*, 814 F.2d 332, 343 (7th Cir. 1987) (state officials "casting (or approving) of fictitious votes can violate the Constitution and other federal laws.").

But Defendants' actions also disenfranchised Republican voters in violation of the U.S. Constitution's "one person, one vote" requirement by:

- **Republican Ballot Destruction**: "1 Person, 0 Votes." Fact and witness expert testimony alleges and provides strong evidence that tens or even hundreds of thousands of Republican votes were destroyed, thus completely disenfranchising that voter.

- **Republican Vote Switching**: "1 Person, -1 Votes." Plaintiff's fact and expert witnesses further alleged and provided supporting evidence that in many cases, Trump/Republican votes were switched or counted as Biden/Democrat votes. Here, the Republican voter was not only disenfranchised by not having his vote counted for his chosen candidates, but the constitutional injury is compounded by adding his or her vote to the candidates he or she opposes.

- **Dominion Algorithmic Manipulation**: For Republicans, "1 Person, 0.5 Votes," while for Democrats "1 Person, 1.5 Votes. Plaintiff presented evidence in the Complaint regarding Dominion's algorithmic manipulation of ballot tabulation, such that Republican voters in a given geographic region, received less weight per person, than Democratic voters in the same or other geographic regions. See ECF No. 6, Ex. 104. This unequal treatment is the 21st century of the evil that the Supreme Court sought to remedy in the apportionment cases beginning with *Baker v. Carr*, 369 U.S. 186 (1962), and *Reynolds v. Sims*, 377 U.S. 533 (1964). Further, Dominion has done so in collusion with State actors, including Defendants, so this form of discrimination is under color of law.

This Court should consider the totality of the circumstances in evaluating Plaintiff's constitutional and voting rights claims, *see, e.g., Chisom v. Roemer*, 111 S.Ct 2354, 2368 (1991), and thus the cumulative effect of the Defendants' voter dilution, disenfranchisement, fraud and manipulation, in addition to the effects of specific practices. Taken together, these various forms of unlawful and unconstitutional conduct destroyed or shifted tens or hundreds of thousands of Trump votes, and illegally added tens or hundreds of thousand of Biden votes, changing the result of the election, and effectively disenfranchising the majority of Wisconsin voters. Defendant (and *Amicus*) were fully aware of these constitutional violations, and did nothing to stop it.

While Plaintiff alleges several categories of traditional "voting fraud", Plaintiff has also alleged new forms of voting dilution and disenfranchisement made possible by new technology. The potential for voter fraud inherent in electronic voting was increased as a direct result of Defendants' and *Amicus*'s efforts to transform traditional in-person paper voting – for which there are significant protections from fraud in place – to near universal absentee voting with electronic tabulation – while at the same time eliminating through legislation or litigation. And when that failed by refusing to enforce – traditional protections against voting fraud (voter ID, signature

matching, witness and address requirements, etc.). Defendants' design and administration of the Wisconsin Election Code facilitated illegal and fraudulent voter registration and voting, and thus evinced a state "policy" that "honest voting is unnecessary or unimportant." *Kasper*, 814 F.2d at 344. Defendants' filing in this proceeding – where they seek to cover up the illegal conduct of state officials and other third parties and prevent the evidence from ever seeing the light of day – provide further proof that Defendants are complicit in the massive election fraud scheme described in the Amended Complaint.

Thus, while Plaintiff's claims include novel elements due to changes in technology and voting practices, that does not nullify the Constitution or Plaintiff's rights thereunder. Defendants and Defendant-Intervenors have implemented likely the most wide-ranging and comprehensive scheme of voting fraud yet devised, integrating new technology with old fashioned urban machine corruption and skullduggery. The fact that this scheme is novel does not make it legal, or prevent this Court from fashioning appropriate injunctive relief to protect Plaintiff's right and prevent Defendants from enjoying the benefits of their illegal conduct.

2. The Plaintiff Will Suffer Irreparable Harm.

Plaintiff will suffer an irreparable harm due to the Defendants' myriad violations of Plaintiff's rights under the U.S. Constitution, and Wisconsin Election Code, and Defendant and Defendant Intervenors have not shown otherwise.

Where, as here, plaintiff has demonstrated a likelihood of success on the merits as to a constitutional claim, such an injury has been held to constitute irreparable harm." *Democratic Nat'l Comm. v. Bostelmann*, 447 F.Supp.3d 757, 769 (W.D. Wis. 2020) (*citing Elrod v. Burns*, 427 U.S. 347, 373, 96 S.Ct. 2673, 49 L.Ed.2d 547 (1976) (where plaintiff had proven a probability of success on the merits, the threatened loss of First Amendment freedoms "unquestionably constitutes irreparable injury"); *see also Preston v. Thompson*, 589 F.2d 300, 303 n.4 (7th Cir.

1978) ("The existence of a continuing constitutional violation constitutes proof of an irreparable harm."). Moreover, courts have specifically held that infringement on the fundamental right to vote constitutes irreparable injury. *See Obama for Am. v. Husted*, 697 F.3d 423, 435 (6th Cir. 2012) ("A restriction on the fundamental right to vote ... constitutes irreparable injury."); *Williams v. Salerno*, 792 F.2d 323, 326 (2d Cir. 1986) (holding that plaintiffs "would certainly suffer irreparable harm if their right to vote were impinged upon")."

"Additionally, traditional legal remedies would be inadequate, since infringement on a citizens' constitutional right to vote cannot be redressed by money damages." *Bostelmann*, 447 F.Supp.3d at 769 (*citing Christian Legal Soc'y v. Walker*, 453 F.3d 853, 859 (7th Cir. 2006) ("The loss of First Amendment freedoms is presumed to constitute an irreparable injury for which money damages are not adequate."); *League of Women* Voters *of N. Carolina v. North Carolina*, 769 F.3d 224, 247 (4th Cir. 2014) ("[O]nce the election occurs, there can be no do-over and no redress.")."

In this Response, Plaintiff has refuted and rebutted Defendants' arguments in detail, in particular, regarding standing, equitable defenses, and jurisdictional claims, as well as establishing their substantial likelihood of success. Having disposed of those arguments, and shown a substantial likelihood of success, this Court should presume that the requirement to show irreparable injury has been satisfied.

3. The Balance of Equities & The Public Interest

Under Seventh Circuit law, a "sliding scale" approach is used for balancing of harms: "[t]he more likely it is that [the movant] will win its case on the merits, the less the balance of harms need weigh in its favor." *Girl Scouts of Manitou Council v. Girl Scouts of United States of Am., Inc.*, 549 F.3d 1079, 1100 (7th Cir. 2008). Plaintiff has shown a strong likelihood of success on the merits above.

Granting Plaintiff's primary request for injunctive relief, enjoining certification of the 2020 General Election results, or requiring Defendants to de-certify the results, would not only not impose a burden on Defendants, but would instead relieve Defendants of the obligation to take any further affirmative action. The result would be to place the decision regarding certification and the selection of Presidential Electors back into the hands of the Wisconsin Legislature, which is the ultimate decision maker under the Elections and Electors Clause of the U.S. Constitution.

Conversely, permitting Defendants' certification of an election so tainted by fraud and Defendants' own unlawful conduct that it would impose a certain and irreparable injury not only on Plaintiff, but would also irreparably harm the public interest insofar as it would undermine "[c]onfidence in the integrity of our electoral processes," which "is essential to the functioning of our participatory democracy." *Purcell v. Gonzalez*, 127 S.Ct. 5, 7 (2006) (per curiam).

II. PLAINTIFF SATISFIES APPLICABLE PLEADING STANDARDS

Defendants urge this Court to dismiss the Amended Complaint for failure to state a claim under Rule 12(b)(6) or to plead with particularity under Rule 9(b). *See* ECF No. 54 at 2; ECF No. 59 at 21-22; ECF No. 57 at 21-26.

The pleading requirements for stating a constitutional election fraud claim in the Seventh Circuit under Section 1983 are set forth in *Kasper*, a case addressing widespread voter fraud in Chicago on a scale similar to what occurred in the 2020 General Election. 814 F.2d at 342-344. While "intent is an essential ingredient of a constitutional election fraud case under § 1983," *id.* at 343, it is not the same intent as required in a common law fraud claim under Federal Rules of Civil Procedure 9(b). Instead, "section 1983 is implicated only when there is willful conduct which undermines the organic process by which candidates are elected." *Id.* (internal citations and quotation omitted).

In *Kasper*, Republican plaintiffs alleged a range of illegal conduct strikingly similar to what has occurred in Wisconsin and other state in the 2020 General Election, in particular, maintenance of voter lists with ineligible voters, fictitious or fraudulent votes, and failure to enforce safeguards against voting fraud. Their complaint did not allege active state participation in vote dilution or other illegal conduct, but rather that the state defendants were aware that a substantial number of registrations are bogus and [had] not alleviated the situation." *Id.* The *Kasper* held that "casting (or approval) of fictitious votes can violate the Constitution and other federal laws," and that for the purposes of Section 1983, it is sufficient to allege that this conduct was permitted pursuant to a state "'policy" of diluting votes" that "may be established by a demonstration" state officials who "despite knowing of the practice, [have] done nothing to make it difficult." *Id.* at 344. This "policy" may also lie in the "design and administration" of the voting system that is "incapable of producing an honest vote," in which case "[t]he resulting fraud may be attributable" to state officials "because the whole system is in [their] care and therefore is state action." *Id.*

Accordingly, Plaintiff is not required to allege that Defendants directly participated in illegal conduct, or to meet Rule 9(b) requirements to plead with particularity facts demonstrating their active participation. Instead, it is sufficient, both for purposes of Rule 9(b) and Rule 12(b)(6) that Defendants' administration of the Wisconsin Election Code, in particular their guidance that nullified express provisions intend to prevent absentee voter fraud, certification of and reliance on Dominion voting machines, and their certification of results tainted by widespread fraud, in a manner that facilitated voter fraud and resulted in the constitutional violations set forth in the Compliant. "In a system of notice pleading, judges should read complaints generously," *id.* at 343, and Plaintiff's Amended Complaint, detailing several distinct types of voter fraud and constitutional violations, supported by over a dozen sworn affidavits from fact and expert

witnesses providing evidence of voter fraud, easily exceeds the applicable pleading requirements under the Federal Rules of Civil Procedure.

III. DEFENDANTS' JURISDICTIONAL AND OTHER GROUNDS FOR DISMISSAL.

A. Plaintiff Has Standing.

Plaintiff is a lawfully registered Wisconsin voter, who voted for President Trump in the 2020 General Election, and a nominee of the Republican Party to be a Presidential Elector on behalf of the State of Wisconsin. See ECF No. 1, "Parties" and Exh. 1, Declaration of William Feehan.

1. Plaintiff Elector Has Standing under Electors and Elections Clause.

Defendants arguments on standing rely on the Third Circuit's decision in *Bognet v. Sec'y of Commonwealth*, No. 20-2314, 2020 WL 6686120 (3d Cir. Nov. 13, 2020), *see* ECF No. 52 at 7; ECF No. 59 at 7-8, as well as a recent district court decision in Michigan that followed *Bognet*. ECF No. 59 at 8. (*citing King v. Whitmer*, No. 2:20-vc-13134 (E.D. Mich. Dec. 7, 2020). The *Bognet* court addressed a complaint by Pennsylvania voters and a congressional candidate, but not by a Presidential Elector.

Plaintiff Feehan has standing for the same reason that the Eighth Circuit held that Minnesota Electors had standing in *Carson v. Simon*, 978 F.3d 1051 (8th Cir. 2020). The *Carson* court affirmed that Presidential Electors have both Article III and Prudential standing under the Electors and Elections Clauses, "was rooted heavily in the court's interpretation of Minnesota law." Defendants neglect to mention is that the Carson court relied on provisions of Minnesota law treating electors as candidates for office are just like the corresponding provision of the Wisconsin Election Code because in both States an elector is a candidate for office nominated by a political party, and a vote cast for a party's candidate for President and Vice-President is cast for

that party's Electors. The Carson court concluded that, "[b]ecause Minnesota law plainly treats presidential electors as a candidate, we do, too." *Carson*, 978 F.3d at 1057.

Like the Minnesota statute addressed by the *Carson* court, Wisconsin statutes provide, first, that electors are candidates for office nominated by their political party at their state convention held "on the first Tuesday in October of each year in which there is a Presidential election." Wis. Stat. § 8.18.

More importantly, Wisconsin voters do not vote directly for the office of President and Vice-President, but instead vote for Electors like Mr. Feehan:

> Presidential electors. By general ballot at the general election for choosing the president and vice president of the United States there shall be elected as many electors of president and vice president as this state is entitled to elect senators and representatives in congress. ***A vote for the president and vice president nominations of any party is a vote for the electors of the nominees.***
>
> Wis. Stat. §8.25.
>
> When presidential electors … are to be voted for, ***a vote cast for the party candidate for president and vice-president shall be deemed a vote cast for that party's electors*** … as filed with the secretary of state.
>
> Minn. Stat. § 208.04(1) (emphasis added).

In Wisconsin as in Minnesota, the President and Vice-President are not directly elected by voters. Instead, voters elect the Presidential Electors, who in turn elect the President and Vice-President A vote for President Trump and Vice-President Pence in Wisconsin ***was*** a vote for Plaintiff and his fellow Republican Presidential Electors. It goes without saying that Presidential Electors play a unique – and central – role in Presidential elections, a role expressly spelled out in the Electors Clause of the U.S. Constitution. As such, election fraud or other violations of state election law impacting federal Presidential elections, have a unique and distinct impact on Presidential Electors, and illegal conduct aimed at harming candidates for President similarly

injures Presidential Electors. As such, Plaintiff Elector has "a cognizable interest in ensuring that the final vote tally reflects the legally valid votes cast," as "[a]n inaccurate vote tally is a concrete and particularized injury to candidates such as the Electors." *Carson*, 978 F.3d at 1058. *See also McPherson v. Blacker*, 146 U.S. 1, 27 (1892); *Bush v. Palm Beach Cty. Canvassing Bd.*, 531 U.S. 70, 76 (2000) (*per curiam*).

2. Plaintiff Has Standing for Equal Protection and Due Process Claims as a Registered Voter on His Own Behalf and on Behalf Similarly Situated Voters for Republican Candidates

Defendants misrepresent Plaintiff's Equal Protection and Due Process claims, both in terms of substance and for standing purposes, insofar as they claim that Plaintiffs' claims are based solely on a theory of vote dilution, and therefore is a "generalized grievance," rather than the concrete and particularized injury required for Article III standing. *See* ECF No. 52 at 6; ECF No. 4 at 6: ECF No. 59 at 9.[5] Defendants also cite the Eleventh Circuit's decision in *Wood v. Raffensperger*, No. 20-14418 (D.C. Cir. Dec. 5, 2020). *See* ECF No. 57 at 14. But they fail to recognize that The Eleventh Circuit's decision in *Wood* supports Plaintiff's standing argument, and refutes theirs. The court dismissed plaintiff Wood's claim because he was not a candidate. "[I]f Wood were a political candidate," like the Plaintiff here, "he would satisfy this requirement because he could assert a personal, distinct injury." ECF No. 55-4 at *4 (citations omitted).

Plaintiff, on behalf of himself and other similarly situated voters allege, first, and with great particularity, that Defendants have both violated Wisconsin law and applied Wisconsin law, in an arbitrary and disparate manner, to dilute the votes of (or voters for Republican candidates) with

[5] *Amicus* also cites *Donald J. Trump for President, Inc. v. Boockvar*, No. 4:20-cv-02078, 2020 WL 6821992 (M.D. Penn Nov. 21, 2020). *See* ECF No. 57 at 13. This case addressed a number of theories for standing -- associational, organizational, and standing of a political party based on harm to that party's candidates -- that are not present here because each Plaintiff bring suit in their personal capacity as registered Arizona voters and 11 of the Plaintiffs as Presidential Electors.

illegal, ineligible, duplicate or fictitious votes. The fact and expert witness testimony describes and quantifies the myriad means by which Defendants and their collaborators illegally inflated the vote tally for Biden and other Democrats. See ECF No. 9, Section II and III. Thus, the vote dilution resulting from this systemic and illegal conduct did not affect all Wisconsin voters equally; it had the intent and effect of inflating the number of votes for Democratic candidates and reducing the number of votes for Trump and Republican candidates.

Further, Plaintiff has presented evidence that, not only did Defendants dilute the votes of Plaintiff and similarly-situated voters for Republican candidates, they sought to actively disenfranchise such voters to reduce their voting power, in clear violation of "one person, one vote." *See generally Baker v. Carr*, 369 U.S. 186 (1962); *Reynolds v. Sims*, 377 U.S. 533 (1964). The Constitution protects "the right of all qualified citizens to vote in state and federal elections ... and [ ] the right to have votes counted without dilution as compared to the votes of others." *Bodine v. Elkhart Cty. Election Bd.*, 788 F.2d 1270, 1271 (7th Cir. 1986). Similarly, federal courts in Wisconsin have held that voters have standing to challenge state laws that collectively reduce the value of one party's impose an injury that is statewide. *See Whitford v. Nichol*, 151 F.Supp.3d 918, 926 (W.D. Wis. 2015).

Defendants engaged in several schemes to devalue Republican votes as detailed in the Amended Complaint, including Republican ballots being destroyed or discarded, or "1 person, 0 votes," vote switching "1 person, -1 votes," (Dominion and election workers switching votes from Trump/Republican to Biden/Democrat), and Dominion algorithmic manipulation, or for Republicans, "1 person, 1/2 votes," and for Democrats, "1 person, 1.5 votes." *See e.g.,* ECF No. 9, Section II.C (ballot destruction/discarding) Ex. 2 (Dr. Briggs Testimony regarding potential ballot destruction), Ex. 17 (Ramsland testimony regarding additive algorithm), Section IV

(multiple witnesses regarding Dominion vote manipulation). Plaintiff's injury is that the relative value of his particular votes was devalued, or eliminated altogether, and as such, it is not a "generalized grievance," as Defendants claim.

It is hard to square Defendants' argument that a candidate Plaintiff—whose interests and injury are identical to that of President Trump—lacks standing to raise Equal Protection and Due Process claims of similarly situated Republican voters, with the Supreme Court's 7-2 decision in *Bush v. Gore*, 531 U.S. 98 (200), "then-candidate George W. Bush of Texas had standing to raise the equal protection rights of Florida voters that a majority of the Supreme Court deemed decisive" in that case. *Hawkins v. Wayne Twp. Bd. of Marion Cty., IN*, 183 F. Supp. 2d 1099, 1103 (S.D. Ind. 2002).

Plaintiff can also establish that the alleged particularized injury in fact is causally connected to Defendants' actions. Specifically, "WEC's administration of Wisconsin's elections, including the enforcement of its current election laws, is the cause of plaintiff['s] alleged injuries. Moreover, the WEC has the authority to implement a federal court order relating to election law to redress these alleged injuries." *Democratic Nat'l Comm. v. Bostelmann*, No. 20-CV-249-WMC, 2020 WL 5627186, at *12 (W.D. Wis. Sept. 21, 2020). Defendant Evers can also provide partial redress in terms of the requested injunctive relief, namely, by refusing to certify or transmit the election results, and providing access to voting machines, records and other "election materials." ECF No. 9 ¶142(4).

Plaintiff thus meets the requirements for standing: (1) the injuries of their rights under the Equal Protection and Due Process clauses that concrete and particularized for themselves, and similarly situated voters, whose votes have been devalued or disregarded altogether (2) that are actual or imminent and (3) are causally connected to Defendants conduct because the debasement

of their votes is a direct and intended result of the conducts of the Defendants and the public employee election workers they supervise. *See generally Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560-561 (1992).

B. Laches

Defendants assert that Plaintiff's claims are barred by laches. See ECF No. 52 at 8; ECF No. 59 at 16-20. To establish laches a defendant must prove both an unreasonable delay by the plaintiff and prejudice to itself. *See ,e.g*., *Lingenfelter v. Keystone Consolidated Indus., Inc.,* 691 F.2d 339, 340 (7th Cir.1982).

First off, "ordinarily a motion to dismiss is not the appropriate vehicle to address the defense of laches," *American Commercial Barge Lines, LLC v. Reserve FTL, Inc.*, 2002 WL 31749171 (N.D. Ill. Dec. 3, 2002) (*citing Farries v. Stanadyne/Chicago Div.*, 832 F.2d 374, 376 (7th Cir. 1987)), because "the defense of laches … involves more than the mere lapse of time and depends largely on questions of fact." *Id.* (*quoting* 5 Wright & Miller, Federal Practice and Procedure § 1277 (2d ed. 1987). Accordingly, most courts have found the defense "unsuitable for resolution at the pleading stage." *Id.* (citation omitted).

Defendant Evers relies on *Soules v. Kauians for Nukolii Campaign Comm.*, 849 F.2d 1176, 1180 (9th Cir. 1988), ECF No. 59 at 17, a case with entirely different facts. There, the Ninth Circuit held that plaintiff Equal Protection claim was barred by laches because they "knew the basis of their equal claim well in advance" of the election, months in advance in fact, *Soules*, 849 F.2d at 1181, and failed to provide any explanation for their failure to press their claim before the election. *Id*. at 1182.

Here, by contrast to Defendants' assertions, all of the unlawful conduct occurred during the course of the election and in the post-election vote counting, manipulation, and even fabrication. Plaintiff could not have known the basis of these claims, or presented evidence

substantiating their claim, until after the election. Further, because Wisconsin election officials and other third parties involved did not announce or publicize their misconduct, and in fact prevented Republican poll watchers from observing the ballot counting and handling, it took Plaintiff additional time post-election to gather the fact and expert witness testimony presented in the Amended Complaint. Had they filed before the election, as the Defendant Secretary asserts, it would have been dismissed as speculative--because the injuries asserted had not occurred--and on ripeness grounds.

Any "delay" in filing after Election Day is almost entirely due to Defendants failure to promptly complete counting until weeks after November 3, 2020. Wisconsin did not complete counting at the same time it certified results, which was not until November 30, 2020, and Plaintiff filed the initial complaint (which is materially the same as the Amended Complaint filed December 3, 2020), and TRO motion the ***very next day*** on December 1, 2020. Defendants cannot now assert the equitable affirmative defense of laches, when there is no unreasonable delay nor is there any genuine prejudice to the Defendants.

C. Mootness

Defendant Evers' mootness argument is similarly without merit. *See* ECF No. 59 at 13-14. This argument is based on the false premise that this Court cannot order any of the relief requested in the Amended Complaint or the TRO Motion because the "requests for relief relate to the general election held on November 3, 2020, and its results," *id.* at 13, and "[b]ecause Wisconsin has already certified its results." *Id.* at 14.

It is well settled that "the passage of an election does not necessarily render an election-related challenge moot and that such challenges may fall within the 'capable of repetition yet evading review' exception to the mootness doctrine." *Tobin for Governor v. Illinois State Bd. of Elections*, 268 F.3d 517, 528 (7th Cir. 2001) (citations omitted). This exception applies where:

"(1) the challenged action is too short in duration to be fully litigated prior to its cessation or expiration, and (2) there is a reasonable expectation that the same complaining party will be subjected to the same action again." *Id*. at 529 (citations omitted). Plaintiff's claims regarding Defendants' arbitrary and disparate implementation of Wisconsin law, in a manner that directly contravenes Wisconsin Election Code provisions governing absentee voting—in particular their guidance relating to "indefinitely confined" (*see* Wis. Stat. § 6.86 & Amended Complaint, Section I.A) voters and witness address verification requirements (*see* Wis. Stat. § 6.87 & Amended Complaint Section I.B—where officials have violated statute in this election, and further assert that it was proper to do so, their conduct will certainly continue in the next election.

In any case, the certification of election results render Plaintiff's election-related claims moot. In *Siegel v. Lepore*, 234 F.3d 1163 (11th Cir. 2000), a case arising from the 2000 General Election, the Eleventh Circuit addressed post-certification election challenges:

> This Court has held that "[a] claim for injunctive relief may become moot if: (1) it can be said with assurance that there is no reasonable expectation that the alleged violation will recur and (2) interim relief or events have completely and irrevocably eradicated the effects of the alleged violation.
>
> We conclude that neither of these elements is satisfied in this case. The Democratic candidate, Vice President Gore, and others are currently contesting the election results in various lawsuits in numerous Florida state courts. There are still manual recount votes from at least Volusia and Broward Counties in the November 26th official election results of the Florida Secretary of State. **In view of the complex and ever-shifting circumstances of the case, we cannot say with any confidence that no live controversy is before us.**

Id. at 1172-73 (emphasis added). *See also Common Cause*, 347 F.Supp.3d at 1291 (holding that certification of election results did not moot post-election claim for emergency injunctive relief). The cutoff for election-related challenges, at least in the Seventh Circuit, appears to be the date that the electors meet, rather than the date of certification: "even though the ***election*** has passed,

the meeting of electors obviously has not, so plaintiff's claim here is hardly moot." *Swaffer v. Deininger*, No. 08-CV-208, 2008 WL 5246167, at *4 (E.D. Wis. Dec. 17, 2008).

A recent decision by this very Court appears to have applied the *Swaffer* court's interpretation—that the relevant date for federal election-related claims is the December 14, 2020 meeting of the electors, rather than the date of certification—from which it follows that Plaintiff's request for relief are not moot. *See* ECF No. 29, *William Feehan v. Wisconsin Elections Commission*, et al., Case No. 20-cv-1771-pp (E.D. Wis. Dec. 4, 2020) ("*Feehan*"). In response to Plaintiff's request for an expedited briefing schedule, this Court explained that, under 3 U.S.C §5, while the "Safe Harbor" date is December 8, 2020, the Electoral College does not vote for president and vice president until December 14, 2020. *Id.* at 7. While "December 8 is a critical date for resolution of any *state court litigation* involving an aggrieved candidate," like Plaintiff, it is not necessary for this federal Court to grant or deny the injunctive relief requested "before the safe harbor deadline for *state* courts to resolve alleged violations of" Wisconsin election laws. *Id.* at 8 (emphasis in original). Implicit in this Court's determination that—because the "electors do not meet until December 14, 2020," a less "truncated briefing schedule" is appropriate—this Court can still grant some or perhaps all of the relief requested and this Plaintiff's claims are not moot.

Finally, Defendant Evers cites the Eleventh Circuit case in *Wood* as authority in his mootness argument, ECF No. 57 at 14, but fails to acknowledge the significant differences between Mr. Feehan's requests for relief in the Amended Complaint and Mr. Wood's in that proceeding. Unlike Plaintiff, Mr. Wood did not ask the district court to de-certify the election (instead asking for a delay in certification), nor did he assert claims under the Elections and Electors Clause. The *Wood* court held that Georgia's certification of results mooted Mr. Wood's request to delay certification, so the court could not consider a request for de-certification "made for the first time

on appeal." *Id.* at 18. Plaintiff made his request for de-certification and other injunctive relief in the Amended Complaint, Compl. at ¶¶ 142-145, and this request is not mooted by Defendants' certification of the results. While the *Wood* court finds that the mootness exception for "capable of repetition yet evading review," discussed above, was not applicable, their denial was based on the specific "posture of [his] appeal" and the specific relief requested (delay of certification), *id.* at *7, which are not applicable to Plaintiff's claims and requested relief.

This Court can grant the primary relief requested by Plaintiff – de-certification of Wisconsin's election results and an injunction prohibiting State Defendants from transmitting the results – as discussed in Section I.F. on abstention below. There is also no question that this Court can order other types of declaratory and injunctive relief requested by Plaintiff, in particular, impounding Dominion voting machines and software for inspection, nor have State Defendants claimed otherwise.

D. Eleventh Amendment

Defendants assert that Plaintiff's claims are barred by the Eleventh Amendment. *See* ECF No. 52 at 10-11; ECF No. 59 at 14-16. Defendants fail, however, to acknowledge that the Eleventh Amendment permits claims for prospective and injunctive relief enjoining state officials from ongoing violations of federal law or the U.S. Constitution. At this stage of the proceeding, this Court "need only conduct a straightforward inquiry into whether the complaint alleges an ongoing violation of federal law and seeks relief properly characterized as prospective." *Council 31 of the Am. Fed'n of State, Cty. & Mun. Employees, AFL-CIO v. Quinn*, 680 F.3d 875, 882 (7th Cir. 2012) (citations omitted).

Plaintiff's requests for relief in the Amended Complaint meet both requirements. First, Plaintiff has identified ongoing violations of federal law, among other things by certifying results of the 2020 General Election that are tainted not only by widespread fraud, but by ongoing

violations of the Electors and Elections Clauses, the Equal Protection and Due Process Clauses, as well as likely violations of federal law including the Voting Rights Act and the Help America Vote Act. Second, the declaratory and injunctive relief requested is prospective including: an order directing Defendants to de-certify the election results, enjoining Defendants from transmitting the currently certified election results to the Electoral College, TRO to seize and impound servers, voting machines and other "election materials" for forensic audit and inspection by Plaintiff. ECF No. 9 ¶142. Moreover, the Amended Complaint requests that this Court prospectively enjoin Defendants to take actions that are specifically in the scope of their statutory authority. *See Bostelmann*, 2020 WL 5627186, at *12 (finding that WEC is responsible for "administration of Wisconsin's elections," and "WEC has the authority to implement a federal court order relating to election law to redress [Plaintiff's] alleged injuries.").

E. Administrative Exhaustion and Exclusive State Jurisdiction

Defendant Evers asserts that Plaintiff's claims are barred alternately because he failed to exhaust administrative remedies (namely, a complaint to Defendant WEC under Wis. Stat. § 5.06) and because Wisconsin's recount statute, Wis. Stat. § 9.01(11), "'constitutes the exclusive judicial remedy' for such claims under ***state*** law." ECF No. 59 at 10 (emphasis added) (*citing Trump v. Evers*, No. 2020AP1971-OA, Order at *2 (Wis. Dec. 3, 2020)). Irrespective of whether the cited Wisconsin statutes set forth exclusive ***state*** administrative or judicial remedies, these provisions do not bar the Plaintiff's claims under the U.S. Constitution.

The Elections and Electors Clauses of the U.S. Constitution delegate to the Wisconsin Legislature the power to determine the manner of holding federal elections and selecting Presidential Electors:

> But in the case of a law enacted by a state legislature applicable not only to elections to state offices, but also to the selection of Presidential electors, the legislature is not acting solely under the authority given it by the people of the State, but by virtue

> of a direct grant of authority made under Art. II, § 1, cl. 2, of the United States Constitution.

Bush v. Palm Beach Cty. Canvassing Bd., 531 U.S. 70, 76 (2000). As such, the state laws – and the implementation thereof by the State's executive and judicial branches – are inherently a federal question, and a "significant departure from the legislative scheme for appointing Presidential electors presents a federal constitutional question." *Bush v. Gore*, 531 U.S. 98, 113 (2000) (finding that state court's recount standards violated the Equal Protection and Due Process Clauses). Accordingly, the Wisconsin statutes cited above cannot bar Plaintiff's federal constitutional claims, or impose an administrative exhaustion requirement where Plaintiff is not seeking review of state administrative action.

This Court has subject matter jurisdiction for Plaintiff's federal constitutional claims under 28 U.S.C. § 1331, which provides that "[t]he district courts shall have original jurisdiction of all civil actions arising under the Constitution, laws, or treaties of the United States." This Court also has subject matter jurisdiction under 28 U.S.C. § 1343 because this action involves a federal election for President of the United States. The jurisdiction of the Court to grant declaratory relief is conferred by 28 U.S.C. §§ 2201 and 2202 and by Rule 57, Fed. R. Civ. P. "The right to vote is protected in more than the initial allocation of the franchise.

To the extent the Amended Complaint implicates Wisconsin statutory or constitutional law, jurisdiction remains appropriate under 28 U.S.C. § 1367. As a threshold matter, the supplemental jurisdiction statute, section 1367, says that district courts "shall have" jurisdiction over the non-federal claims forming part of the same case or controversy, ... if state law claims are asserted as part of the same case or controversy with a federal claim, the district court has discretion to exercise supplemental jurisdiction over the remaining state law claims and the mandatory remand provision of the procedure after removal statute does not apply.

F. Abstention

Defendant Evers urges this Court to dismiss the Amended Complaint and abstain from taking jurisdiction over the claims raised in the Amended Complaint. ECF No. 59 at 11-12. The standard for federal abstention in the voting rights and state election law context, *Harman v. Forssenius*, 380 U.S. 528, 534, (1965), where the Supreme Court explained that abstention may be appropriate where "the federal constitutional question is dependent upon, or may be materially altered by, the determination of an uncertain issue of state law," and "deference to state court adjudication only be made where the issue of state law is uncertain." *Harman*, 380 U.S. at 534 (citations omitted). But if state law in question "is not fairly subject to an interpretation which will render unnecessary or substantially modify the federal constitutional question," then "it is the duty of the federal court to exercise its properly invoked jurisdiction." *Id.* (citation omitted).

Governor Evers claims that the "state law issues underlying Plaintiff's claims are sufficiently uncertain to warrant abstention," and points to the order of the Supreme Court of Wisconsin addressing a petition alleging misconduct by WEC during the 2020 General Election that "raises time-sensitive questions of state-wide concern." ECF No. 59 at 12 (*citing Wisconsin Voters Alliance v. Wisconsin Elections Commission*, No. 2020AP1930-OA, at *1 (Wis. Dec. 4, 2020) ("*Wisconsin Voters Alliance*"). What he neglects to mention is that the Wisconsin Supreme Court ***denied*** the petition, "the third time that a majority of [the Wisconsin Supreme Court] has turned its back on pleas from the public to address a matter of state-wide concern," involving alleged wrongdoing by Defendant WEC during the 2020 General Election, "that requires a declaration of what the statutes require for absentee voting." *Wisconsin Voters Alliance* at *5 (Roggensack, C.J., dissenting). Abstention requires more than uncertainty about state law – and notably, the majority asserted only that the petition required resolution of "disputed factual claims," *id.* at 3, not any uncertainty regarding the interpretation of the statutes – it requires the

likelihood that a state court will resolve that uncertainty. Here, the relevant state court has repeatedly refused to address these issues; by accepting jurisdiction this Court is not "injecting itself into the middle of [a] dispute," ECF No. 59 at 12, as there is no current state court proceeding addressing these issues (or at least not any identified by Defendant).

Respectfully submitted, this 8th day of December, 2020.

No. _____, Original

In the Supreme Court of the United States

STATE OF TEXAS,

Plaintiff,

v.

COMMONWEALTH OF PENNSYLVANIA, STATE OF GEORGIA, STATE OF MICHIGAN, AND STATE OF WISCONSIN,

Defendants.

MOTION FOR LEAVE TO FILE BILL OF COMPLAINT

Pursuant to 28 U.S.C. § 1251(a) and this Court's Rule 17, the State of Texas respectfully seeks leave to file the accompanying Bill of Complaint against the States of Georgia, Michigan, and Wisconsin and the Commonwealth of Pennsylvania (collectively, the "Defendant States") challenging their administration of the 2020 presidential election.

As set forth in the accompanying brief and complaint, the 2020 election suffered from significant and unconstitutional irregularities in the Defendant States:

- Non-legislative actors' purported amendments to States' duly enacted election laws, in violation of the Electors Clause's vesting State legislatures with plenary authority regarding the appointment of presidential electors.

- Intrastate differences in the treatment of voters, with more favorable allotted to voters – whether lawful or unlawful – in areas administered by local government under Democrat control and with populations with higher ratios of Democrat voters than other areas of Defendant States.
- The appearance of voting irregularities in the Defendant States that would be consistent with the unconstitutional relaxation of ballot-integrity protections in those States' election laws.

All these flaws – even the violations of *state* election law – violate one or more of the federal requirements for elections (*i.e.*, equal protection, due process, and the Electors Clause) and thus arise under federal law. *See Bush v Gore*, 531 U.S. 98, 113 (2000) ("significant departure from the legislative scheme for appointing Presidential electors presents a federal constitutional question") (Rehnquist, C.J., concurring). Plaintiff State respectfully submits that the foregoing types of electoral irregularities exceed the hanging-chad saga of the 2000 election in their degree of departure from both state and federal law. Moreover, these flaws cumulatively preclude knowing who legitimately won the 2020 election and threaten to cloud all future elections.

Taken together, these flaws affect an outcome-determinative numbers of popular votes in a group of States that cast outcome-determinative numbers of electoral votes. This Court should grant leave to file the complaint and, ultimately, enjoin the use of unlawful election results without review and ratification by the Defendant States' legislatures and remand to the Defendant States' respective

legislatures to appoint Presidential Electors in a manner consistent with the Electors Clause and pursuant to 3 U.S.C. § 2.

"[T]hat form of government which is best contrived to secure an impartial and exact execution of the law, is the best of republics."

—John Adams

BILL OF COMPLAINT

Our Country stands at an important crossroads. Either the Constitution matters and must be followed, even when some officials consider it inconvenient or out of date, or it is simply a piece of parchment on display at the National Archives. We ask the Court to choose the former.

Lawful elections are at the heart of our constitutional democracy. The public, and indeed the candidates themselves, have a compelling interest in ensuring that the selection of a President—any President—is legitimate. If that trust is lost, the American Experiment will founder. A dark cloud hangs over the 2020 Presidential election.

Here is what we know. Using the COVID-19 pandemic as a justification, government officials in the defendant states of Georgia, Michigan, and Wisconsin, and the Commonwealth of Pennsylvania (collectively, "Defendant States"), usurped their legislatures' authority and unconstitutionally revised their state's election statutes. They accomplished these statutory revisions through executive fiat or friendly lawsuits, thereby weakening ballot integrity. Finally, these same government officials flooded the Defendant States with millions of ballots to be sent through the mails, or placed in drop boxes, with little

or no chain of custody[1] and, at the same time, weakened the strongest security measures protecting the integrity of the vote—signature verification and witness requirements.

Presently, evidence of material illegality in the 2020 general elections held in Defendant States grows daily. And, to be sure, the two presidential candidates who have garnered the most votes have an interest in assuming the duties of the Office of President without a taint of impropriety threatening the perceived legitimacy of their election. However, 3 U.S.C. § 7 requires that presidential electors be appointed on December 14, 2020. That deadline, however, should not cement a potentially illegitimate election result in the middle of this storm—a storm that is of the Defendant States' own making by virtue of their own unconstitutional actions.

This Court is the only forum that can delay the deadline for the appointment of presidential electors under 3 U.S.C. §§ 5, 7. To safeguard public legitimacy at this unprecedented moment and restore public trust in the presidential election, this Court should extend the December 14, 2020 deadline for Defendant States' certification of presidential electors to allow these investigations to be completed. Should one of the two leading candidates receive an absolute majority of the presidential electors' votes to be cast on December 14, this would finalize the selection of our President. The only date that is mandated under

---

[1] *See* https://georgiastarnews.com/2020/12/05/dekalb-county-cannot-find-chain-of-custody-records-for-absentee-ballots-deposited-in-drop-boxes-it-has-not-been-determined-if-responsive-records-to-your-request-exist/

the Constitution, however, is January 20, 2021. U.S. CONST. amend. XX.

Against that background, the State of Texas ("Plaintiff State") brings this action against Defendant States based on the following allegations:

NATURE OF THE ACTION

1. Plaintiff State challenges Defendant States' administration of the 2020 election under the Electors Clause of Article II, Section 1, Clause 2, and the Fourteenth Amendment of the U.S. Constitution.

2. This case presents a question of law: Did Defendant States violate the Electors Clause (or, in the alternative, the Fourteenth Amendment) by taking—or allowing—non-legislative actions to change the election rules that would govern the appointment of presidential electors?

3. Those unconstitutional changes opened the door to election irregularities in various forms. Plaintiff State alleges that each of the Defendant States flagrantly violated constitutional rules governing the appointment of presidential electors. In doing so, seeds of deep distrust have been sown across the country. In the spirit of *Marbury v. Madison*, this Court's attention is profoundly needed to declare what the law is and to restore public trust in this election.

4. As Justice Gorsuch observed recently, "Government is not free to disregard the [Constitution] in times of crisis. … Yet recently, during the COVID pandemic, certain States seem to have ignored these long-settled principles." *Roman Catholic Diocese of Brooklyn, New York v. Cuomo*, 592 U.S. ____ (2020) (Gorsuch, J., concurring). This case is no different.

5. Each of Defendant States acted in a common pattern. State officials, sometimes through pending litigation (*e.g.*, settling "friendly" suits) and sometimes unilaterally by executive fiat, announced new rules for the conduct of the 2020 election that were inconsistent with existing state statutes defining what constitutes a lawful vote.

6. Defendant States also failed to segregate ballots in a manner that would permit accurate analysis to determine which ballots were cast in conformity with the legislatively set rules and which were not. This is especially true of the mail-in ballots in these States. By waiving, lowering, and otherwise failing to follow the state statutory requirements for signature validation and other processes for ballot security, the entire body of such ballots is now constitutionally suspect and may not be legitimately used to determine allocation of the Defendant States' presidential electors.

7. The rampant lawlessness arising out of Defendant States' unconstitutional acts is described in a number of currently pending lawsuits in Defendant States or in public view including:

- *Dozens of witnesses testifying under oath about*: the physical blocking and kicking out of Republican poll challengers; thousands of the same ballots run multiple times through tabulators; mysterious late night dumps of thousands of ballots at tabulation centers; illegally backdating thousands of ballots; signature verification procedures ignored; more

than 173,000 ballots in the Wayne County, MI center that cannot be tied to a registered voter;[2]

- *Videos of*: poll workers erupting in cheers as poll challengers are removed from vote counting centers; poll watchers being blocked from entering vote counting centers—despite even having a court order to enter; suitcases full of ballots being pulled out from underneath tables after poll watchers were told to leave.
- *Facts for which no independently verified reasonable explanation yet exists*: On October 1, 2020, in Pennsylvania a laptop and several USB drives, used to program Pennsylvania's Dominion voting machines, were mysteriously stolen from a warehouse in Philadelphia. The laptop and the USB drives were the *only* items taken, and potentially could be used to alter vote tallies; In Michigan, which also employed the same Dominion voting system, on November 4, 2020, Michigan election officials have admitted that a purported "glitch" caused 6,000 votes for President Trump to be wrongly switched to Democrat Candidate Biden. A flash drive containing tens of thousands of votes was left unattended in the Milwaukee tabulations center in the early morning hours of Nov. 4, 2020, without anyone aware it was not in a proper chain of custody.

---

[2] All exhibits cited in this Complaint are in the Appendix to the Plaintiff State's forthcoming motion to expedite ("App. 1a-151a"). *See* Complaint (Doc. No. 1), *Donald J. Trump for President, Inc. v. Benson*, 1:20-cv-1083 (W.D. Mich. Nov. 11, 2020) at ¶¶ 26-55 & Doc. Nos. 1-2, 1-4.

8. Nor was this Court immune from the blatant disregard for the rule of law. Pennsylvania itself played fast and loose with its promise to this Court. In a classic bait and switch, Pennsylvania used guidance from its Secretary of State to argue that this Court should not expedite review because the State would segregate potentially unlawful ballots. A court of law would reasonably rely on such a representation. Remarkably, before the ink was dry on the Court's 4-4 decision, Pennsylvania changed that guidance, breaking the State's promise to this Court. *Compare Republican Party of Pa. v. Boockvar*, No. 20-542, 2020 U.S. LEXIS 5188, at *5-6 (Oct. 28, 2020) ("we have been informed by the Pennsylvania Attorney General that the Secretary of the Commonwealth issued guidance today directing county boards of elections to segregate [late-arriving] ballots") (Alito, J., concurring) *with Republican Party v. Boockvar*, No. 20A84, 2020 U.S. LEXIS 5345, at *1 (Nov. 6, 2020) ("this Court was not informed that the guidance issued on October 28, which had an important bearing on the question whether to order special treatment of the ballots in question, had been modified") (Alito, J., Circuit Justice).

9. Expert analysis using a commonly accepted statistical test further raises serious questions as to the integrity of this election.

10. The probability of former Vice President Biden winning the popular vote in the four Defendant States—Georgia, Michigan, Pennsylvania, and Wisconsin—independently given President Trump's early lead in those States as of 3 a.m. on November 4, 2020, is less than one in a quadrillion, or 1 in 1,000,000,000,000,000. For former Vice President Biden to win these four States collectively, the odds of

that event happening decrease to less than one in a quadrillion to the fourth power (*i.e.*, 1 in 1,000,000,000,000,000[4]). *See* Decl. of Charles J. Cicchetti, Ph.D. ("Cicchetti Decl.") at ¶¶ 14-21, 30-31. *See* App. 4a-7a, 9a.

11. The same less than one in a quadrillion statistical improbability of Mr. Biden winning the popular vote in the four Defendant States—Georgia, Michigan, Pennsylvania, and Wisconsin—independently exists when Mr. Biden's performance in each of those Defendant States is compared to former Secretary of State Hilary Clinton's performance in the 2016 general election and President Trump's performance in the 2016 and 2020 general elections. Again, the statistical improbability of Mr. Biden winning the popular vote in these **four** States collectively is 1 in 1,000,000,000,000,000[5]. *Id.* 10-13, 17-21, 30-31.

12. Put simply, there is substantial reason to doubt the voting results in the Defendant States.

13. By purporting to waive or otherwise modify the existing state law in a manner that was wholly *ultra vires* and not adopted by each state's legislature, Defendant States violated not only the Electors Clause, U.S. CONST. art. II, § 1, cl. 2, but also the Elections Clause, *id.* art. I, § 4 (to the extent that the Article I Elections Clause textually applies to the Article II process of selecting presidential electors).

14. Plaintiff States and their voters are entitled to a presidential election in which the votes from each of the states are counted only if the ballots are cast and counted in a manner that complies with the pre-existing laws of each state. *See Anderson v. Celebrezze*, 460 U.S. 780, 795 (1983) ("for the

President and the Vice President of the United States are the only elected officials who represent all the voters in the Nation."). Voters who cast lawful ballots cannot have their votes diminished by states that administered their 2020 presidential elections in a manner where it is impossible to distinguish a lawful ballot from an unlawful ballot.

15. The number of absentee and mail-in ballots that have been handled unconstitutionally in Defendant States greatly exceeds the difference between the vote totals of the two candidates for President of the United States in each Defendant State.

16. In addition to injunctive relief for this election, Plaintiff State seeks declaratory relief for all presidential elections in the future. This problem is clearly capable of repetition yet evading review. The integrity of our constitutional democracy requires that states conduct presidential elections in accordance with the rule of law and federal constitutional guarantees.

JURISDICTION AND VENUE

17. This Court has original and exclusive jurisdiction over this action because it is a "controvers[y] between two or more States" under Article III, § 2, cl. 2 of the U.S. Constitution and 28 U.S.C. § 1251(a) (2018).

18. In a presidential election, "the impact of the votes cast in each State is affected by the votes cast for the various candidates in other States." *Anderson*, 460 U.S. at 795. The constitutional failures of Defendant States injure Plaintiff States because "'the right of suffrage can be denied by a debasement or dilution of the weight of a citizen's vote just as

effectively as by wholly prohibiting the free exercise of the franchise.'" *Bush v. Gore*, 531 U.S. 98, 105 (2000) (quoting *Reynolds v. Sims*, 377 U. S. 533, 555 (1964)) (*Bush II*). In other words, Plaintiff State is acting to protect the interests of its respective citizens in the fair and constitutional conduct of elections used to appoint presidential electors.

19. This Court's Article III decisions indicate that only a state can bring certain claims. *Lance v. Coffman*, 549 U.S. 437, 442 (2007) (distinguishing citizen plaintiffs from citizen relators who sued in the name of a state); *cf. Massachusetts v. EPA,* 549 U.S. 497, 520 (2007) (courts owe states "special solicitude in standing analysis"). Moreover, redressability likely would undermine a suit against a single state officer or State because no one State's electoral votes will make a difference in the election outcome. This action against multiple State defendants is the only adequate remedy for Plaintiff States, and this Court is the only court that can accommodate such a suit.

20. Individual state courts do not—and under the circumstance of contested elections in multiple states, *cannot*—offer an adequate remedy to resolve election disputes within the timeframe set by the Constitution to resolve such disputes and to appoint a President via the electoral college. No court—other than this Court—can redress constitutional injuries spanning multiple States with the sufficient number of states joined as defendants or respondents to make a difference in the Electoral College.

21. This Court is the sole forum in which to exercise the jurisdictional basis for this action.

PARTIES

22. Plaintiff is the State of Texas, which is a sovereign State of the United States.

23. Defendants are the Commonwealth of Pennsylvania and the States of Georgia, Michigan, and Wisconsin, which are sovereign States of the United States.

LEGAL BACKGROUND

24. Under the Supremacy Clause, the "Constitution, and the laws of the United States which shall be made in pursuance thereof … shall be the supreme law of the land." U.S. CONST. Art. VI, cl. 2.

25. "The individual citizen has no federal constitutional right to vote for electors for the President of the United States unless and until the state legislature chooses a statewide election as the means to implement its power to appoint members of the electoral college." *Bush II*, 531 U.S. at 104 (citing U.S. CONST. art. II, § 1).

26. State legislatures have plenary power to set the process for appointing presidential electors: "Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors." U.S. CONST. art. II, §1, cl. 2; *see also Bush II*, 531 U.S. at 104 ("[T]he state legislature's power to select the manner for appointing electors is *plenary*." (emphasis added)).

27. At the time of the Founding, most States did not appoint electors through popular statewide elections. In the first presidential election, six of the ten States that appointed electors did so by direct legislative appointment. *McPherson v. Blacker*, 146 U.S. 1, 29-30 (1892).

28. In the second presidential election, nine of the fifteen States that appointed electors did so by direct legislative appointment. *Id.* at 30.

29. In the third presidential election, nine of sixteen States that appointed electors did so by direct legislative appointment. *Id.* at 31. This practice persisted in lesser degrees through the Election of 1860. *Id.* at 32.

30. Though "[h]istory has now favored the voter," *Bush II*, 531 U.S. at 104, "there is no doubt of the right of the legislature to resume the power [of appointing presidential electors] at any time, for *it can neither be taken away nor abdicated*." *McPherson*, 146 U.S. at 35 (emphasis added); *cf.* 3 U.S.C. § 2 ("Whenever any State has held an election for the purpose of choosing electors, and has failed to make a choice on the day prescribed by law, the electors may be appointed on a subsequent day in such a manner as the legislature of such State may direct.").

31. Given the State legislatures' constitutional primacy in selecting presidential electors, the ability to set rules governing the casting of ballots and counting of votes cannot be usurped by other branches of state government.

32. The Framers of the Constitution decided to select the President through the Electoral College "to afford as little opportunity as possible to tumult and disorder" and to place "every practicable obstacle [to] cabal, intrigue, and corruption," including "foreign powers" that might try to insinuate themselves into our elections. THE FEDERALIST NO. 68, at 410-11 (C. Rossiter, ed. 1961) (Madison, J.).

33. Defendant States' applicable laws are set out under the facts for each Defendant State.

FACTS

34. The use of absentee and mail-in ballots skyrocketed in 2020, not only as a public-health response to the COVID-19 pandemic but also at the urging of mail-in voting's proponents, and most especially executive branch officials in Defendant States. According to the Pew Research Center, in the 2020 general election, a record number of votes—about 65 million—were cast via mail compared to 33.5 million mail-in ballots cast in the 2016 general election—an increase of more than 94 percent.

35. In the wake of the contested 2000 election, the bipartisan Jimmy Carter-James Baker commission identified absentee ballots as "the largest source of potential voter fraud." BUILDING CONFIDENCE IN U.S. ELECTIONS: REPORT OF THE COMMISSION ON FEDERAL ELECTION REFORM, at 46 (Sept. 2005).

36. Concern over the use of mail-in ballots is not novel to the modern era, Dustin Waters, *Mail-in Ballots Were Part of a Plot to Deny Lincoln Reelection in 1864*, WASH. POST (Aug. 22, 2020),[3] but it remains a *current* concern. *Crawford v. Marion Cty. Election Bd.*, 553 U.S. 181, 194-96 & n.11 (2008); *see also* Texas Office of the Attorney General, *AG Paxton Announces Joint Prosecution of Gregg County Organized Election Fraud in Mail-In Balloting Scheme* (Sept. 24, 2020); Harriet Alexander & Ariel Zilber, *Minneapolis police opens investigation into reports that Ilhan Omar's supporters illegally harvested Democrat ballots in Minnesota*, DAILY MAIL, Sept. 28, 2020.

---

[3] https://www.washingtonpost.com/history/2020/08/22/mail-in-voting-civil-war-election-conspiracy-lincoln/

37. Absentee and mail-in voting are the primary opportunities for unlawful ballots to be cast. As a result of expanded absentee and mail-in voting in Defendant States, combined with Defendant States' unconstitutional modification of statutory protections designed to ensure ballot integrity, Defendant States created a massive opportunity for fraud. In addition, the Defendant States have made it difficult or impossible to separate the constitutionally tainted mail-in ballots from all mail-in ballots.

38. Rather than augment safeguards against illegal voting in anticipation of the millions of additional mail-in ballots flooding their States, Defendant States *all* materially weakened, or did away with, security measures, such as witness or signature verification procedures, required by their respective legislatures. Their legislatures established those commonsense safeguards to prevent—or at least reduce—fraudulent mail-in ballots.

39. Significantly, in Defendant States, Democrat voters voted by mail at two to three times the rate of Republicans. Former Vice President Biden thus greatly benefited from this unconstitutional usurpation of legislative authority, and the weakening of legislative mandated ballot security measures.

40. The outcome of the Electoral College vote is directly affected by the constitutional violations committed by Defendant States. Plaintiff State complied with the Constitution in the process of appointing presidential electors for President Trump. Defendant States violated the Constitution in the process of appointing presidential electors by unlawfully abrogating state election laws designed to

protect the integrity of the ballots and the electoral process, and those violations proximately caused the appointment of presidential electors for former Vice President Biden. Plaintiff State will therefore be injured if Defendant States' unlawfully certify these presidential electors.

Commonwealth of Pennsylvania

41. Pennsylvania has 20 electoral votes, with a statewide vote tally currently estimated at 3,363,951 for President Trump and 3,445,548 for former Vice President Biden, a margin of 81,597 votes.

42. The number of votes affected by the various constitutional violations exceeds the margin of votes separating the candidates.

43. Pennsylvania's Secretary of State, Kathy Boockvar, without legislative approval, unilaterally abrogated several Pennsylvania statutes requiring signature verification for absentee or mail-in ballots. Pennsylvania's legislature has not ratified these changes, and the legislation did not include a severability clause.

44. On August 7, 2020, the League of Women Voters of Pennsylvania and others filed a complaint against Secretary Boockvar and other local election officials, seeking "a declaratory judgment that Pennsylvania existing signature verification procedures for mail-in voting" were unlawful for a number of reasons. *League of Women Voters of Pennsylvania v. Boockvar*, No. 2:20-cv-03850-PBT, (E.D. Pa. Aug. 7, 2020).

45. The Pennsylvania Department of State quickly settled with the plaintiffs, issuing revised guidance on September 11, 2020, stating in relevant part: "The Pennsylvania Election Code does not

authorize the county board of elections to set aside returned absentee or mail-in ballots based solely on signature analysis by the county board of elections."

46. This guidance is contrary to Pennsylvania law. First, Pennsylvania Election Code mandates that, for non-disabled and non-military voters, all applications for an absentee or mail-in ballot "shall be signed by the applicant." 25 PA. STAT. §§ 3146.2(d) & 3150.12(c). Second, Pennsylvania's voter signature verification requirements are expressly set forth at 25 PA. STAT. 350(a.3)(1)-(2) and § 3146.8(g)(3)-(7).

47. The Pennsylvania Department of State's guidance unconstitutionally did away with Pennsylvania's statutory signature verification requirements. Approximately 70 percent of the requests for absentee ballots were from Democrats and 25 percent from Republicans. Thus, this unconstitutional abrogation of state election law greatly inured to former Vice President Biden's benefit.

48. In addition, in 2019, Pennsylvania's legislature enacted bipartisan election reforms, 2019 Pa. Legis. Serv. Act 2019-77, that set *inter alia* a deadline of 8:00 p.m. on election day for a county board of elections to receive a mail-in ballot. 25 PA. STAT. §§ 3146.6(c), 3150.16(c). Acting under a generally worded clause that "Elections shall be free and equal," PA. CONST. art. I, § 5, cl. 1, a 4-3 majority of Pennsylvania's Supreme Court in *Pa. Democratic Party v. Boockvar*, 238 A.3d 345 (Pa. 2020), extended that deadline to three days after Election Day and adopted a presumption that even *non-postmarked ballots* were presumptively timely.

49. Pennsylvania's election law also requires that poll-watchers be granted access to the opening, counting, and recording of absentee ballots: "Watchers shall be permitted to be present when the envelopes containing official absentee ballots and mail-in ballots are opened and when such ballots are counted and recorded." 25 PA. STAT. § 3146.8(b). Local election officials in Philadelphia and Allegheny Counties decided not to follow 25 PA. STAT. § 3146.8(b) for the opening, counting, and recording of absentee and mail-in ballots.

50. Prior to the election, Secretary Boockvar sent an email to local election officials urging them to provide opportunities for various persons—including political parties—to contact voters to "cure" defective mail-in ballots. This process clearly violated several provisions of the state election code.

- Section 3146.8(a) requires: "The county boards of election, upon receipt of official absentee ballots in sealed official absentee ballot envelopes as provided under this article and mail-in ballots as in sealed official mail-in ballot envelopes as provided under Article XIII-D,1 shall safely keep the ballots in sealed or locked containers until they are to be canvassed by the county board of elections."
- Section 3146.8(g)(1)(ii) provides that mail-in ballots shall be canvassed (if they are received by eight o'clock p.m. on election day) in the manner prescribed by this subsection.
- Section 3146.8(g)(1.1) provides that the first look at the ballots shall be "no earlier than seven o'clock a.m. on election day." And the hour for this "pre-canvas" must be publicly announced at least

48 hours in advance. Then the votes are counted on election day.

51. By removing the ballots for examination prior to seven o'clock a.m. on election day, Secretary Boockvar created a system whereby local officials could review ballots without the proper announcements, observation, and security. This entire scheme, which was only followed in Democrat majority counties, was blatantly illegal in that it permitted the illegal removal of ballots from their locked containers prematurely.

52. Statewide election officials and local election officials in Philadelphia and Allegheny Counties, aware of the historical Democrat advantage in those counties, violated Pennsylvania's election code and adopted the differential standards favoring voters in Philadelphia and Allegheny Counties with the intent to favor former Vice President Biden. *See* Verified Complaint (Doc. No. 1), *Donald J. Trump for President, Inc. v. Boockvar*, 4:20-cv-02078-MWB (M.D. Pa. Nov. 18, 2020) at ¶¶ 3-6, 9, 11, 100-143.

53. Absentee and mail-in ballots in Pennsylvania were thus evaluated under an illegal standard regarding signature verification. It is now impossible to determine which ballots were properly cast and which ballots were not.

54. The changed process allowing the curing of absentee and mail-in ballots in Allegheny and Philadelphia counties is a separate basis resulting in an unknown number of ballots being treated in an unconstitutional manner inconsistent with Pennsylvania statute. *Id.*

55. In addition, a great number of ballots were received after the statutory deadline and yet

were counted by virtue of the fact that Pennsylvania did not segregate all ballots received after 8:00 pm on November 3, 2020. Boockvar's claim that only about 10,000 ballots were received after this deadline has no way of being proven since Pennsylvania broke its promise to the Court to segregate ballots and co-mingled perhaps tens, or even hundreds of thousands, of illegal late ballots.

56. On December 4, 2020, fifteen members of the Pennsylvania House of Representatives led by Rep. Francis X. Ryan issued a report to Congressman Scott Perry (the "Ryan Report," App. 139a-144a) stating that "[t]he general election of 2020 in Pennsylvania was fraught with inconsistencies, documented irregularities and improprieties associated with mail-in balloting, pre-canvassing, and canvassing that the reliability of the mail-in votes in the Commonwealth of Pennsylvania is impossible to rely upon."

57. The Ryan Report's findings are startling, including:

- Ballots with NO MAILED date. That total is 9,005.
- Ballots Returned on or BEFORE the Mailed Date. That total is 58,221.
- Ballots Returned one day after Mailed Date. That total is 51,200.

Id. 143a.

58. These nonsensical numbers alone total 118,426 ballots and exceed Mr. Biden's margin of 81,660 votes over President Trump. But these discrepancies pale in comparison to the discrepancies in Pennsylvania's reported data concerning the

number of mail-in ballots distributed to the populace—now with no longer subject to legislated mandated signature verification requirements.

59. The Ryan Report also states as follows:

> [I]n a data file received on November 4, 2020, the Commonwealth's PA Open Data sites reported over 3.1 million mail in ballots sent out. The CSV file from the state on November 4 depicts 3.1 million mail in ballots sent out but on November 2, the information was provided that only 2.7 million ballots had been sent out. ***This discrepancy of approximately 400,000 ballots from November 2 to November 4 has not been explained***.

Id. at 143a-44a. (Emphasis added).

60. These stunning figures illustrate the out-of-control nature of Pennsylvania's mail-in balloting scheme. Democrats submitted mail-in ballots at more than two times the rate of Republicans. This number of constitutionally tainted ballots far exceeds the approximately 81,660 votes separating the candidates.

61. This blatant disregard of statutory law renders all mail-in ballots constitutionally tainted and cannot form the basis for appointing or certifying Pennsylvania's presidential electors to the Electoral College.

62. According to the U.S. Election Assistance Commission's report to Congress *Election Administration and Voting Survey: 2016 Comprehensive Report*, in 2016 Pennsylvania received 266,208 mail-in ballots; 2,534 of them were rejected (.95%). *Id.* at p. 24. However, in 2020, Pennsylvania received more than 10 times the number of mail-in ballots compared to 2016. As explained *supra*, this

much larger volume of mail-in ballots was treated in an unconstitutionally modified manner that included: (1) doing away with the Pennsylvania's signature verification requirements; (2) extending that deadline to three days after Election Day and adopting a presumption that even *non-postmarked ballots* were presumptively timely; and (3) blocking poll watchers in Philadelphia and Allegheny Counties in violation of State law.

63. These non-legislative modifications to Pennsylvania's election rules appear to have generated an outcome-determinative number of unlawful ballots that were cast in Pennsylvania. Regardless of the number of such ballots, the non-legislative changes to the election rules violated the Electors Clause.

State of Georgia

64. Georgia has 16 electoral votes, with a statewide vote tally currently estimated at 2,458,121 for President Trump and 2,472,098 for former Vice President Biden, a margin of approximately 12,670 votes.

65. The number of votes affected by the various constitutional violations exceeds the margin of votes dividing the candidates.

66. Georgia's Secretary of State, Brad Raffensperger, without legislative approval, unilaterally abrogated Georgia's statute governing the signature verification process for absentee ballots.

67. O.C.G.A. § 21-2-386(a)(2) prohibits the opening of absentee ballots until after the polls open on Election Day: In April 2020, however, the State Election Board adopted Secretary of State Rule 183-1-14-0.9-.15, Processing Ballots Prior to Election Day.

That rule purports to authorize county election officials to begin processing absentee ballots up to three weeks before Election Day.

68. Georgia law authorizes and requires a single registrar or clerk—after reviewing the outer envelope—to reject an absentee ballot if the voter failed to sign the required oath or to provide the required information, the signature appears invalid, or the required information does not conform with the information on file, or if the voter is otherwise found ineligible to vote. O.C.G.A. § 21-2-386(a)(1)(B)-(C).

69. Georgia law provides absentee voters the chance to "cure a failure to sign the oath, an invalid signature, or missing information" on a ballot's outer envelope by the deadline for verifying provisional ballots (*i.e.*, three days after the election). O.C.G.A. §§ 21-2-386(a)(1)(C), 21-2-419(c)(2). To facilitate cures, Georgia law requires the relevant election official to notify the voter in writing: "The board of registrars or absentee ballot clerk shall promptly notify the elector of such rejection, a copy of which notification shall be retained in the files of the board of registrars or absentee ballot clerk for at least two years." O.C.G.A. § 21-2-386(a)(1)(B).

70. On March 6, 2020, in *Democratic Party of Georgia v. Raffensperger*, No. 1:19-cv-5028-WMR (N.D. Ga.), Georgia's Secretary of State entered a Compromise Settlement Agreement and Release with the Democratic Party of Georgia (the "Settlement") to materially change the statutory requirements for reviewing signatures on absentee ballot envelopes to confirm the voter's identity by making it far more difficult to challenge defective signatures beyond the

express mandatory procedures set forth at GA. CODE § 21-2-386(a)(1)(B).

71. Among other things, before a ballot could be rejected, the Settlement required a registrar who found a defective signature to now seek a review by two other registrars, and only if a majority of the registrars agreed that the signature was defective could the ballot be rejected but not before all three registrars' names were written on the ballot envelope along with the reason for the rejection. These cumbersome procedures are in direct conflict with Georgia's statutory requirements, as is the Settlement's requirement that notice be provided by telephone (*i.e.*, not in writing) if a telephone number is available. Finally, the Settlement purports to require State election officials to consider issuing guidance and training materials drafted by an expert retained by the Democratic Party of Georgia.

72. Georgia's legislature has not ratified these material changes to statutory law mandated by the Compromise Settlement Agreement and Release, including altered signature verification requirements and early opening of ballots. The relevant legislation that was violated by Compromise Settlement Agreement and Release did not include a severability clause.

73. This unconstitutional change in Georgia law materially benefitted former Vice President Biden. According to the Georgia Secretary of State's office, former Vice President Biden had almost double the number of absentee votes (65.32%) as President Trump (34.68%). *See* Cicchetti Decl. at ¶ 25, App. 7a-8a.

74. The effect of this unconstitutional change in Georgia election law, which made it more likely that ballots without matching signatures would be counted, had a material impact on the outcome of the election.

75. Specifically, there were 1,305,659 absentee mail-in ballots submitted in Georgia in 2020. There were 4,786 absentee ballots rejected in 2020. This is a rejection rate of .37%. In contrast, in 2016, the 2016 rejection rate was 6.42% with 13,677 absentee mail-in ballots being rejected out of 213,033 submitted, which more than *seventeen times greater* than in 2020. *See* Cicchetti Decl. at ¶ 24, App. 7a.

76. If the rejection rate of mailed-in absentee ballots remained the same in 2020 as it was in 2016, there would be 83,517 less tabulated ballots in 2020. The statewide split of absentee ballots was 34.68% for Trump and 65.2% for Biden. Rejecting at the higher 2016 rate with the 2020 split between Trump and Biden would decrease Trump votes by 28,965 and Biden votes by 54,552, which would be a net gain for Trump of 25,587 votes. This would be more than needed to overcome the Biden advantage of 12,670 votes, and Trump would win by 12,917 votes. *Id*. Regardless of the number of ballots affected, however, the non-legislative changes to the election rules violated the Electors Clause.

State of Michigan

77. Michigan has 16 electoral votes, with a statewide vote tally currently estimated at 2,650,695 for President Trump and 2,796,702 for former Vice President Biden, a margin of 146,007 votes. In Wayne County, Mr. Biden's margin (322,925 votes) significantly exceeds his statewide lead.

78. The number of votes affected by the various constitutional violations exceeds the margin of votes dividing the candidates.

79. Michigan's Secretary of State, Jocelyn Benson, without legislative approval, unilaterally abrogated Michigan election statutes related to absentee ballot applications and signature verification. Michigan's legislature has not ratified these changes, and its election laws do not include a severability clause.

80. As amended in 2018, the Michigan Constitution provides all registered voters the right to request and vote by an absentee ballot without giving a reason. MICH. CONST. art. 2, § 4.

81. On May 19, 2020, however, Secretary Benson announced that her office would send unsolicited absentee-voter ballot applications by mail to all 7.7 million registered Michigan voters prior to the primary and general elections. Although her office repeatedly encouraged voters to vote absentee because of the COVID-19 pandemic, it did not ensure that Michigan's election systems and procedures were adequate to ensure the accuracy and legality of the historic flood of mail-in votes. In fact, it did the opposite and did away with protections designed to deter voter fraud.

82. Secretary Benson's flooding of Michigan with millions of absentee ballot applications prior to the 2020 general election violated M.C.L. § 168.759(3). That statute limits the procedures for requesting an absentee ballot to three specified ways:

> An application for an absent voter ballot under this section may be made in *any of the following ways*:
>
> (a) By a written request signed by the voter.

> (b) On an absent voter ballot application form provided for that purpose by the clerk of the city or township.
>
> (c) On a federal postcard application.

M.C.L. § 168.759(3) (emphasis added).

83. The Michigan Legislature thus declined to include the Secretary of State as a means for distributing absentee ballot applications. *Id.* § 168.759(3)(b). Under the statute's plain language, the Legislature explicitly gave *only local clerks* the power to distribute absentee voter ballot applications. *Id.*

84. Because the Legislature declined to explicitly include the Secretary of State as a vehicle for distributing absentee ballots applications, Secretary Benson lacked authority to distribute even a single absentee voter ballot application—much less the *millions* of absentee ballot applications Secretary Benson chose to flood across Michigan.

85. Secretary Benson also violated Michigan law when she launched a program in June 2020 allowing absentee ballots to be requested online, *without* signature verification as expressly required under Michigan law. The Michigan Legislature did not approve or authorize Secretary Benson's unilateral actions.

86. MCL § 168.759(4) states in relevant part: "An applicant for an absent voter ballot shall sign the application. Subject to section 761(2), a clerk or assistant clerk shall not deliver an absent voter ballot to an applicant who does not sign the application."

87. Further, MCL § 168.761(2) states in relevant part: "The qualified voter file must be used to determine the genuineness of a signature on an application for an absent voter ballot", and if "the

signatures do not agree sufficiently or [if] the signature is missing" the ballot must be rejected.

88. In 2016 only 587,618 Michigan voters requested absentee ballots. In stark contrast, in 2020, 3.2 million votes were cast by absentee ballot, about 57% of total votes cast – and more than *five times* the number of ballots *even requested* in 2016.

89. Secretary Benson's unconstitutional modifications of Michigan's election rules resulted in the distribution of millions of absentee ballot applications without verifying voter signatures as required by MCL §§ 168.759(4) and 168.761(2). This means that *millions* of absentee ballots were disseminated in violation of Michigan's statutory signature-verification requirements. Democrats in Michigan voted by mail at a ratio of approximately two to one compared to Republican voters. Thus, former Vice President Biden materially benefited from these unconstitutional changes to Michigan's election law.

90. Michigan also requires that poll watchers and inspectors have access to vote counting and canvassing. M.C.L. §§ 168.674-.675.

91. Local election officials in Wayne County made a conscious and express policy decision not to follow M.C.L. §§ 168.674-.675 for the opening, counting, and recording of absentee ballots.

92. Michigan also has strict signature verification requirements for absentee ballots, including that the Elections Department place a written statement or stamp on each ballot envelope where the voter signature is placed, indicating that the voter signature was in fact checked and verified

with the signature on file with the State. *See* MCL § 168.765a(6).

93. However, Wayne County made the policy decision to ignore Michigan's statutory signature-verification requirements for absentee ballots. Former Vice President Biden received approximately 587,074, or 68%, of the votes cast there compared to President Trump's receiving approximate 264,149, or 30.59%, of the total vote. Thus, Mr. Biden materially benefited from these unconstitutional changes to Michigan's election law.

94. Numerous poll challengers and an Election Department employee whistleblower have testified that the signature verification requirement was ignored in Wayne County in a case currently pending in the Michigan Supreme Court.[4] For example, Jesse Jacob, a decades-long City of Detroit employee assigned to work in the Elections Department for the 2020 election testified that:

> Absentee ballots that were received in the mail would have the voter's signature on the envelope. While I was at the TCF Center, I was instructed not to look at any of the signatures on the absentee ballots, and I was instructed not to compare the signature on the absentee ballot with the signature on file.[5]

---

[4] *Johnson v. Benson*, Petition for Extraordinary Writs & Declaratory Relief filed Nov. 26, 2020 (Mich. Sup. Ct.) at ¶¶ 71, 138-39, App. 25a-51a.

[5] *Id.*, Affidavit of Jessy Jacob, Appendix 14 at ¶15, attached at App. 34a-36a.

95. The TCF was the only facility within Wayne County authorized to count ballots for the City of Detroit.

96. These non-legislative modifications to Michigan's election statutes resulted in a number of constitutionally tainted votes that far exceeds the margin of voters separating the candidates in Michigan.

97. Additional public information confirms the material adverse impact on the integrity of the vote in Wayne County caused by these unconstitutional changes to Michigan's election law. For example, the Wayne County Statement of Votes Report lists 174,384 absentee ballots out of 566,694 absentee ballots tabulated (about 30.8%) as counted without a registration number for precincts in the City of Detroit. *See* Cicchetti Decl. at ¶ 27, App. 8a. The number of votes not tied to a registered voter by itself exceeds Vice President Biden's margin of margin of 146,007 votes by more than 28,377 votes.

98. The extra ballots cast most likely resulted from the phenomenon of Wayne County election workers running the same ballots through a tabulator multiple times, with Republican poll watchers obstructed or denied access, and election officials ignoring poll watchers' challenges, as documented by numerous declarations. App. 25a-51a.

99. In addition, a member of the Wayne County Board of Canvassers ("Canvassers Board"), William Hartman, determined that 71% of Detroit's Absent Voter Counting Boards ("AVCBs") were unbalanced—*i.e.*, the number of people who checked in did not match the number of ballots cast—without explanation. *Id*. at ¶ 29.

100. On November 17, 2020, the Canvassers Board deadlocked 2-2 over whether to certify the results of the presidential election based on numerous reports of fraud and unanswered material discrepancies in the county-wide election results. A few hours later, the Republican Board members reversed their decision and voted to certify the results after severe harassment, including threats of violence.

101. The following day, the two Republican members of the Board *rescinded their votes* to certify the vote and signed affidavits alleging they were bullied and misled into approving election results and do not believe the votes should be certified until serious irregularities in Detroit votes are resolved. *See* Cicchetti Decl. at ¶ 29, App. 8a.

102. Regardless of the number of votes that were affected by the unconstitutional modification of Michigan's election rules, the non-legislative changes to the election rules violated the Electors Clause.

State of Wisconsin

103. Wisconsin has 10 electoral votes, with a statewide vote tally currently estimated at 1,610,151 for President Trump and 1,630,716 for former Vice President Biden (*i.e.*, a margin of 20,565 votes). In two counties, Milwaukee and Dane, Mr. Biden's margin (364,298 votes) significantly exceeds his statewide lead.

104. In the 2016 general election some 146,932 mail-in ballots were returned in Wisconsin out of more than 3 million votes cast.[6] In stark contrast, 1,275,019 mail-in ballots, nearly a 900

[6] Source: U.S. Elections Project, *available at*: http://www.electproject.org/early_2016.

percent increase over 2016, were returned in the November 3, 2020 election.[7]

105. Wisconsin statutes guard against fraud in absentee ballots: "[V]oting by absentee ballot is a privilege exercised wholly outside the traditional safeguards of the polling place. The legislature finds that the privilege of voting by absentee ballot must be carefully regulated to prevent the potential for fraud or abuse[.]" WISC. STAT. § 6.84(1).

106. In direct contravention of Wisconsin law, leading up to the 2020 general election, the Wisconsin Elections Commission ("WEC") and other local officials unconstitutionally modified Wisconsin election laws—each time taking steps that weakened, or did away with, established security procedures put in place by the Wisconsin legislature to ensure absentee ballot integrity.

107. For example, the WEC undertook a campaign to position hundreds of drop boxes to collect absentee ballots—including the use of unmanned drop boxes.[8]

108. The mayors of Wisconsin's five largest cities—Green Bay, Kenosha, Madison, Milwaukee, and Racine, which all have Democrat majorities—joined in this effort, and together, developed a plan use purportedly "secure drop-boxes to facilitate return

---

[8] Wisconsin Elections Commission Memoranda, To: All Wisconsin Election Officials, Aug. 19, 2020, *available at*: https://elections.wi.gov/sites/elections.wi.gov/files/2020-08/Drop%20Box%20Final.pdf. at p. 3 of 4.

of absentee ballots." Wisconsin Safe Voting Plan 2020, at 4 (June 15, 2020).[9]

109. It is alleged in an action recently filed in the United States District Court for the Eastern District of Wisconsin that over five hundred unmanned, illegal, absentee ballot drop boxes were used in the Presidential election in Wisconsin.[10]

110. However, the use of *any* drop box, manned or unmanned, is directly prohibited by Wisconsin statute. The Wisconsin legislature specifically described in the Election Code "Alternate absentee ballot site[s]" and detailed the procedure by which the governing body of a municipality may designate a site or sites for the delivery of absentee ballots "other than the office of the municipal clerk or board of election commissioners as the location from which electors of the municipality may request and vote absentee ballots and to which voted absentee ballots shall be returned by electors for any election." Wis. Stat. 6.855(1).

111. Any alternate absentee ballot site "shall be staffed by the municipal clerk or the executive director of the board of election commissioners, or employees of the clerk or the board of election commissioners." Wis. Stat. 6.855(3). Likewise, Wis.

[9] Wisconsin Safe Voting Plan 2020 Submitted to the Center for Tech & Civic Life, June 15, 2020, by the Mayors of Madison, Milwaukee, Racine, Kenosha and Green Bay *available at*: https://www.techandciviclife.org/wp-content/uploads/2020/07/Approved-Wisconsin-Safe-Voting-Plan-2020.pdf.

[10] *See* Complaint (Doc. No. 1), *Donald J. Trump, Candidate for President of the United States of America v. The Wisconsin Election Commission*, Case 2:20-cv-01785-BHL (E.D. Wisc. Dec. 2, 2020) (Wisconsin Trump Campaign Complaint") at ¶¶ 188-89.

Stat. 7.15(2m) provides, "[i]n a municipality in which the governing body has elected to an establish an alternate absentee ballot sit under s. 6.855, the municipal clerk shall operate such site as though it were his or her office for absentee ballot purposes and shall ensure that such site is adequately staffed."

112. Thus, the unmanned absentee ballot drop-off sites are prohibited by the Wisconsin Legislature as they do not comply with Wisconsin law expressly defining "[a]lternate absentee ballot site[s]". Wis. Stat. 6.855(1), (3).

113. In addition, the use of drop boxes for the collection of absentee ballots, positioned predominantly in Wisconsin's largest cities, is directly contrary to Wisconsin law providing that absentee ballots may only be "mailed by the elector, or delivered *in person* to the municipal clerk issuing the ballot or ballots." Wis. Stat. § 6.87(4)(b)1 (emphasis added).

114. The fact that other methods of delivering absentee ballots, such as through unmanned drop boxes, are *not* permitted is underscored by Wis. Stat. § 6.87(6) which mandates that, "[a]ny ballot not mailed or delivered as provided in this subsection may not be counted." Likewise, Wis. Stat. § 6.84(2) underscores this point, providing that Wis. Stat. § 6.87(6) "shall be construed as mandatory." The provision continues—"Ballots cast in contravention of the procedures specified in those provisions may not be counted. *Ballots counted in contravention of the procedures specified in those provisions may not be included in the certified result of any election*." Wis. Stat. § 6.84(2) (emphasis added).

115. These were not the only Wisconsin election laws that the WEC violated in the 2020

general election. The WEC and local election officials also took it upon themselves to encourage voters to unlawfully declare themselves "indefinitely confined"—which under Wisconsin law allows the voter to avoid security measures like signature verification and photo ID requirements.

116. Specifically, registering to vote by absentee ballot requires photo identification, except for those who register as "indefinitely confined" or "hospitalized." WISC. STAT. § 6.86(2)(a), (3)(a). Registering for indefinite confinement requires certifying confinement "because of age, physical illness or infirmity or [because the voter] is disabled for an indefinite period." *Id.* § 6.86(2)(a). Should indefinite confinement cease, the voter must notify the county clerk, *id.*, who must remove the voter from indefinite-confinement status. *Id.* § 6.86(2)(b).

117. Wisconsin election procedures for voting absentee based on indefinite confinement enable the voter to avoid the photo ID requirement and signature requirement. *Id.* § 6.86(1)(ag)/(3)(a)(2).

118. On March 25, 2020, in clear violation of Wisconsin law, Dane County Clerk Scott McDonnell and Milwaukee County Clerk George Christensen both issued guidance indicating that all voters should mark themselves as "indefinitely confined" because of the COVID-19 pandemic.

119. Believing this to be an attempt to circumvent Wisconsin's strict voter ID laws, the Republican Party of Wisconsin petitioned the Wisconsin Supreme Court to intervene. On March 31, 2020, the Wisconsin Supreme Court unanimously confirmed that the clerks' "advice was legally incorrect" and potentially dangerous because "voters

may be misled to exercise their right to vote in ways that are inconsistent with WISC. STAT. § 6.86(2)."

120. On May 13, 2020, the Administrator of WEC issued a directive to the Wisconsin clerks prohibiting removal of voters from the registry for indefinite-confinement status if the voter is no longer "indefinitely confined."

121. The WEC's directive violated Wisconsin law. Specifically, WISC. STAT. § 6.86(2)(a) specifically provides that "any [indefinitely confined] elector [who] is no longer indefinitely confined … shall so notify the municipal clerk." WISC. STAT. § 6.86(2)(b) further provides that the municipal clerk "shall remove the name of any other elector from the list upon request of the elector or upon receipt of reliable information that an elector no longer qualifies for the service."

122. According to statistics kept by the WEC, nearly 216,000 voters said they were indefinitely confined in the 2020 election, nearly a fourfold increase from nearly 57,000 voters in 2016. In Dane and Milwaukee counties, more than 68,000 voters said they were indefinitely confined in 2020, a fourfold increase from the roughly 17,000 indefinitely confined voters in those counties in 2016.

123. Under Wisconsin law, voting by absentee ballot also requires voters to complete a certification, including their address, and have the envelope witnessed by an adult who also must sign and indicate their address on the envelope. *See* WISC. STAT. § 6.87. The sole remedy to cure an "improperly completed certificate or [ballot] with no certificate" is for "the clerk [to] return the ballot to the elector[.]" *Id.* § 6.87(9). "If a certificate is missing the address of a

witness, the ballot *may not be counted*." *Id.* § 6.87(6d) (emphasis added).

124. However, in a training video issued April 1, 2020, the Administrator of the City of Milwaukee Elections Commission unilaterally declared that a "witness address may be written in red and that is because we were able to locate the witnesses' address for the voter" to add an address missing from the certifications on absentee ballots. The Administrator's instruction violated WISC. STAT. § 6.87(6d). The WEC issued similar guidance on October 19, 2020, in violation of this statute as well.

125. In the Wisconsin Trump Campaign Complaint, it is alleged, supported by the sworn affidavits of poll watchers, that canvas workers carried out this unlawful policy, and acting pursuant to this guidance, in Milwaukee used red-ink pens to alter the certificates on the absentee envelope and then cast and count the absentee ballot. These acts violated WISC. STAT. § 6.87(6d) ("If a certificate is missing the address of a witness, the ballot may not be counted"). *See also* WISC. STAT. § 6.87(9) ("If a municipal clerk receives an absentee ballot with an improperly completed certificate or with no certificate, the clerk may return the ballot to the elector . . . whenever time permits the elector to correct the defect and return the ballot within the period authorized.").

126. Wisconsin's legislature has not ratified these changes, and its election laws do not include a severability clause.

127. In addition, Ethan J. Pease, a box truck delivery driver subcontracted to the U.S. Postal Service ("USPS") to deliver truckloads of mail-in ballots to the sorting center in Madison, WI, testified

that USPS employees were backdating ballots received after November 3, 2020. Decl. of Ethan J. Pease at ¶¶ 3-13. Further, Pease testified how a senior USPS employee told him on November 4, 2020 that "[a]n order came down from the Wisconsin/Illinois Chapter of the Postal Service that 100,000 ballots were missing" and how the USPS dispatched employees to "find[] . . . the ballots." *Id.* ¶¶ 8-10. One hundred thousand ballots supposedly "found" after election day would far exceed former Vice President Biden margin of 20,565 votes over President Trump.

COUNT I: ELECTORS CLAUSE

128. Plaintiff State repeats and re-alleges the allegations above, as if fully set forth herein.

129. The Electors Clause of Article II, Section 1, Clause 2, of the Constitution makes clear that only the legislatures of the States are permitted to determine the rules for appointing presidential electors. The pertinent rules here are the state election statutes, specifically those relevant to the presidential election.

130. Non-legislative actors lack authority to amend or nullify election statutes. *Bush II*, 531 U.S. at 104 (quoted *supra*).

131. Under *Heckler v. Chaney*, 470 U.S. 821, 833 n.4 (1985), conscious and express executive policies—even if unwritten—to nullify statutes or to abdicate statutory responsibilities are reviewable to the same extent as if the policies had been written or adopted. Thus, conscious and express actions by State or local election officials to nullify or ignore requirements of election statutes violate the Electors

Clause to the same extent as formal modifications by judicial officers or State executive officers.

132. The actions set out in Paragraphs 41-128 constitute non-legislative changes to State election law by executive-branch State election officials, or by judicial officials, in Defendant States Pennsylvania, Georgia, Michigan, and Wisconsin, in violation of the Electors Clause.

133. Electors appointed to Electoral College in violation of the Electors Clause cannot cast constitutionally valid votes for the office of President.

COUNT II: EQUAL PROTECTION

134. Plaintiff State repeats and re-alleges the allegations above, as if fully set forth herein.

135. The Equal Protection Clause prohibits the use of differential standards in the treatment and tabulation of ballots within a State. *Bush II*, 531 U.S. at 107.

136. The one-person, one-vote principle requires counting valid votes and not counting invalid votes. *Reynolds*, 377 U.S. at 554-55; *Bush II*, 531 U.S. at 103 ("the votes eligible for inclusion in the certification are the votes meeting the properly established legal requirements").

137. The actions set out in Paragraphs 66-73 (Georgia), 80-93 (Michigan), 44-55 (Pennsylvania), and 106-24 (Wisconsin) created differential voting standards in Defendant States Pennsylvania, Georgia, Michigan, and Wisconsin in violation of the Equal Protection Clause.

138. The actions set out in Paragraphs 66-73 (Georgia), 80-93 (Michigan), 44-55 (Pennsylvania), and 106-24 (Wisconsin) violated the one-person, one-

vote principle in Defendant States Pennsylvania, Georgia, Michigan, and Wisconsin.

139. By the shared enterprise of the entire nation electing the President and Vice President, equal protection violations in one State can and do adversely affect and diminish the weight of votes cast in States that lawfully abide by the election structure set forth in the Constitution. Plaintiff State is therefore harmed by this unconstitutional conduct in violation of the Equal Protection or Due Process Clauses.

COUNT III: DUE PROCESS

140. Plaintiff State repeats and re-alleges the allegations above, as if fully set forth herein.

141. When election practices reach "the point of patent and fundamental unfairness," the integrity of the election itself violates substantive due process. *Griffin v. Burns*, 570 F.2d 1065, 1077 (1st Cir. 1978); *Duncan v. Poythress*, 657 F.2d 691, 702 (5th Cir. 1981); *Florida State Conference of N.A.A.C.P. v. Browning*, 522 F.3d 1153, 1183-84 (11th Cir. 2008); *Roe v. State of Ala. By & Through Evans*, 43 F.3d 574, 580-82 (11th Cir. 1995); *Roe v. State of Ala.*, 68 F.3d 404, 407 (11th Cir. 1995); *Marks v. Stinson*, 19 F. 3d 873, 878 (3rd Cir. 1994).

142. Under this Court's precedents on procedural due process, not only intentional failure to follow election law as enacted by a State's legislature but also random and unauthorized acts by state election officials and their designees in local government can violate the Due Process Clause. *Parratt v. Taylor*, 451 U.S. 527, 537-41 (1981), *overruled in part on other grounds by Daniels v. Williams*, 474 U.S. 327, 330-31 (1986); *Hudson v. Palmer*, 468 U.S. 517, 532 (1984).

The difference between intentional acts and random and unauthorized acts is the degree of pre-deprivation review.

143. Defendant States acted unconstitutionally to lower their election standards—including to allow invalid ballots to be counted and valid ballots to not be counted—with the express intent to favor their candidate for President and to alter the outcome of the 2020 election. In many instances these actions occurred in areas having a history of election fraud.

144. The actions set out in Paragraphs 66-73 (Georgia), 80-93 (Michigan), 44-55 (Pennsylvania), and 106-24 (Wisconsin) constitute intentional violations of State election law by State election officials and their designees in Defendant States Pennsylvania, Georgia, Michigan, and Wisconsin, in violation of the Due Process Clause.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff States respectfully request that this Court issue the following relief:

A. Declare that Defendant States Pennsylvania, Georgia, Michigan, and Wisconsin administered the 2020 presidential election in violation of the Electors Clause and the Fourteenth Amendment of the U.S. Constitution.

B. Declare that any electoral college votes cast by such presidential electors appointed in Defendant States Pennsylvania, Georgia, Michigan, and Wisconsin are in violation of the Electors Clause and the Fourteenth Amendment of the U.S. Constitution and cannot be counted.

C. Enjoin Defendant States' use of the 2020 election results for the Office of President to appoint presidential electors to the Electoral College.

D. Enjoin Defendant States' use of the 2020 election results for the Office of President to appoint presidential electors to the Electoral College and authorize, pursuant to the Court's remedial authority, the Defendant States to conduct a special election to appoint presidential electors.

E. If any of Defendant States have already appointed presidential electors to the Electoral College using the 2020 election results, direct such States' legislatures, pursuant to 3 U.S.C. § 2 and U.S. CONST. art. II, § 1, cl. 2, to appoint a new set of presidential electors in a manner that does not violate the Electors Clause and the Fourteenth Amendment, or to appoint no presidential electors at all.

F. Enjoin the Defendant States from certifying presidential electors or otherwise meeting for purposes of the electoral college pursuant to 3 U.S.C. § 5, 3 U.S.C. § 7, or applicable law pending further order of this Court.

G. Award costs to Plaintiff State.

H. Grant such other relief as the Court deems just and proper.

BRIEF IN SUPPORT OF MOTION FOR LEAVE TO FILE

Pursuant to S.Ct. Rule 17.3 and U.S. CONST. art. III, § 2, the State of Texas ("Plaintiff State") respectfully submits this brief in support of its Motion for Leave to File a Bill of Complaint against the Commonwealth of Pennsylvania and the States of Georgia, Michigan, and Wisconsin (collectively, "Defendant States").

STATEMENT OF THE CASE

Lawful elections are at the heart of our freedoms. "No right is more precious in a free country than that of having a voice in the election of those who make the laws under which, as good citizens, we must live. Other rights, even the most basic, are illusory if the right to vote is undermined." *Wesberry v. Sanders*, 376 U.S. 1, 10 (1964). Trust in the integrity of that process

is the glue that binds our citizenry and the States in this Union.

Elections face the competing goals of maximizing and counting *lawful* votes but minimizing and excluding *unlawful* ones. *Reynolds v. Sims*, 377 U.S. 533, 554-55 (1964); *Bush v. Gore*, 531 U.S. 98, 103 (2000) ("the votes eligible for inclusion in the certification are the votes meeting the properly established legal requirements") ("*Bush II*"); *compare* 52 U.S.C. § 20501(b)(1)-(2) (2018) *with id.* § 20501(b)(3)-(4). Moreover, "the right of suffrage can be denied by a debasement or dilution of the weight of a citizen's vote just as effectively as by wholly prohibiting the free exercise of the franchise." *Reynolds*, 377 U.S. at 555. Reviewing election results requires not only counting lawful votes but also eliminating unlawful ones.

It is an understatement to say that 2020 was not a good year. In addition to a divided and partisan national mood, the country faced the COVID-19 pandemic. Certain officials in Defendant States presented the pandemic as the justification for ignoring state laws regarding absentee and mail-in voting. Defendant States flooded their citizenry with tens of millions of ballot applications and ballots ignoring statutory controls as to how they were received, evaluated, and counted. Whether well intentioned or not, these unconstitutional and unlawful changes had the same *uniform effect*—they made the 2020 election less secure in Defendant States. Those changes were made in violation of relevant state laws and were made by non-legislative entities, without any consent by the state legislatures.

These unlawful acts thus directly violated the Constitution. U.S. CONST. art. I, § 4; *id.* art. II, § 1, cl. 2.

This case presents a question of law: Did Defendant States violate the Electors Clause by taking non-legislative actions to change the election rules that would govern the appointment of presidential electors? Each of these States flagrantly violated the statutes enacted by relevant State legislatures, thereby violating the Electors Clause of Article II, Section 1, Clause 2 of the Constitution. By these unlawful acts, Defendant States have not only tainted the integrity of their own citizens' votes, but their actions have also debased the votes of citizens in the States that remained loyal to the Constitution.

Elections for federal office must comport with federal constitutional standards, s*ee Bush II*, 531 U.S. at 103-105, and executive branch government officials cannot subvert these constitutional requirements, no matter their stated intent. For presidential elections, each State must appoint its electors to the electoral college in a manner that complies with the Constitution, specifically the Electors Clause requirement that only state *legislatures* may set the rules governing the appointment of electors and the elections upon which such appointment is based.[1]

---

[1] Subject to override by Congress, state legislatures have the exclusive power to regulate the time, place, and manner for electing Members of Congress, *see* U.S. CONST. art. I, § 4, which is distinct from legislatures' exclusive and plenary authority on the appointment of presidential electors. When non-legislative actors purport to set state election law for presidential elections, they violate both the Elections Clause and the Electors Clause.

Constitutional Background

The right to vote is protected by the by the Equal Protection Clause and the Due Process Clause. U.S. CONST. amend. XIV, § 1, cl. 3-4. Because "the right to vote is personal," *Reynolds*, 377 U.S. at 561-62 (alterations omitted), "[e]very voter in a federal … election, whether he votes for a candidate with little chance of winning or for one with little chance of losing, has a right under the Constitution to have his vote fairly counted." *Anderson v. United States*, 417 U.S. 211, 227 (1974); *Baker v. Carr*, 369 U.S. 186, 208 (1962). Invalid or fraudulent votes debase or dilute the weight of each validly cast vote. *Bush II*, 531 U.S. at 105. The unequal treatment of votes within a state, and unequal standards for processing votes raise equal protection concerns. *Id.* Though *Bush II* did not involve an action between States, the concern that illegal votes can cancel out lawful votes does not stop at a State's boundary in the context of a Presidential election.

The Electors Clause requires that each State "shall appoint" its presidential electors "in such Manner as the *Legislature thereof* may direct." U.S. CONST. art. II, § 1, cl. 2 (emphasis added); *cf. id.* art. I, § 4, cl. 1 (similar for time, place, and manner of federal legislative elections). "[T]he state legislature's power to select the manner for appointing electors is *plenary*," *Bush II*, 531 U.S. at 104 (emphasis added), and sufficiently *federal* for this Court's review. *Bush v. Palm Beach Cty. Canvassing Bd.*, 531 U.S. 70, 76 (2000) ("*Bush I*"). This textual feature of our Constitution was adopted to ensure the integrity of the presidential selection process: "Nothing was more

to be desired than that every practicable obstacle should be opposed to cabal, intrigue, and corruption." FEDERALIST NO. 68 (Alexander Hamilton). When a State conducts a popular election to appoint electors, the State must comply with all constitutional requirements. *Bush II*, 531 U.S. at 104. When a State fails to conduct a valid election—for any reason—"the electors may be appointed on a subsequent day in such a manner *as the legislature of such State may direct*." 3 U.S.C. § 2 (emphasis added).

Non-Legislative Changes Made in Violation of the Electors Clause

As set forth in the Complaint, executive and judicial officials made significant changes to the legislatively defined election rules in Defendant States. *See* Compl. at ¶¶ 66-73 (Georgia), 80-93 (Michigan), 44-55 (Pennsylvania), 106-24 (Wisconsin). Taken together, these non-legislative changes did away with statutory ballot-security measures for absentee and mail-in ballots such as signature verification, witness requirements, and statutorily authorized secure ballot drop-off locations.

Citing the COVID-19 pandemic, Defendant States gutted the safeguards for absentee ballots through non-legislative actions, despite knowledge that absentee ballots are "the largest source of potential voter fraud," BUILDING CONFIDENCE IN U.S. ELECTIONS: REPORT OF THE COMMISSION ON FEDERAL ELECTION REFORM, at 46 (Sept. 2005) (hereinafter, "CARTER-BAKER"), which is magnified when absentee balloting is shorn of ballot-integrity measures such as signature verification, witness requirements, or outer-envelope protections, or when absentee ballots

are processed and tabulated without bipartisan observation by poll watchers.

Without Defendant States' combined 62 electoral votes, President Trump presumably has 232 electoral votes, and former Vice President Biden presumably has 244. Thus, Defendant States' presidential electors will determine the outcome of the election. Alternatively, if Defendant States are unable to certify 37 or more presidential electors, neither candidate will have a majority in the electoral college, in which case the election would devolve to the House of Representatives under the Twelfth Amendment.

Defendant States experienced serious voting irregularities. *See* Compl. at ¶¶ 75-76 (Georgia), 97-101 (Michigan), 55-60 (Pennsylvania), 122-28 (Wisconsin). At the time of this filing, Plaintiff State continues to investigate allegations of not only unlawful votes being counted but also fraud. Plaintiff State reserves the right to seek leave to amend the complaint as those investigations resolve. *See* S.Ct. Rule 17.2; FED. R. CIV. P. 15(a)(1)(A)-(B), (a)(2). But even the *appearance* of fraud in a close election is poisonous to democratic principles: "Voters who fear their legitimate votes will be outweighed by fraudulent ones will feel disenfranchised." *Purcell v. Gonzalez,* 549 U.S. 1, 4 (2006); *Crawford v. Marion County Election Bd.,* 553 U.S. 181, 189 (2008) (States have an interest in preventing voter fraud and ensuring voter confidence)**.**

STANDARD OF REVIEW

This Court considers two primary factors when it decides whether to grant a State leave to file a bill of complaint against another State: (1) "the nature of the

interest of the complaining State," and (2) "the availability of an alternative forum in which the issue tendered can be resolved." *Mississippi v. Louisiana*, 506 U.S. 73, 77 (1992) (internal quotations omitted) Because original proceedings in this Court follow the Federal Rules of Civil Procedure, S.Ct. Rule 17.2, the facts for purposes of a motion for leave to file are the well-pleaded facts alleged in the complaint. *Hernandez v. Mesa*, 137 S.Ct. 2003, 2005 (2017).

ARGUMENT

I. THIS COURT HAS JURISDICTION OVER PLAINTIFF STATE'S CLAIMS.

In order to grant leave to file, this Court first must assure itself of its jurisdiction, *Steel Co. v. Citizens for a Better Env't.,* 523 U.S. 83, 95 (1998); *cf. Foman v. Davis*, 371 U.S. 178, 182 (1962) (courts deny leave to file amended pleadings that would be futile). That standard is met here. Plaintiff State's fundamental rights and interests are at stake. This Court is the *only* venue that can protect Plaintiff State's electoral college votes from being cancelled by the unlawful and constitutionally tainted votes cast by electors appointed and certified by Defendant States.

A. The claims fall within this Court's constitutional and statutory subject-matter jurisdiction.

The federal judicial power extends to "Controversies between two or more States." U.S. CONST. art. III, § 2, and Congress has placed the jurisdiction for such suits exclusively with the Supreme Court: "The Supreme Court shall have original *and exclusive* jurisdiction of all controversies between two or more States." 28 U.S.C. § 1251(a)

(emphasis added). This Court not only is a permissible court for hearing this action; it is the only court that can hear this action quickly enough to render relief sufficient to avoid constitutionally tainted votes in the electoral college and to place the appointment of Defendant States' electors before their legislatures pursuant to 3 U.S.C. § 2 in time for a vote in the House of Representatives on January 6, 2021. *See* 3 U.S.C. § 15. With that relief in place, the House can resolve the election on January 6, 2021, in time for the president to be selected by the constitutionally set date of January 20. U.S. CONST. amend. XX, § 1.

B. The claims arise under the Constitution.

When States violate their own election laws, they may argue that these violations are insufficiently federal to allow review in this Court. *Cf. Foster v. Chatman*, 136 S.Ct. 1737, 1745-46 (2016) (this Court lacks jurisdiction to review state-court decisions that "rest[] on an adequate and independent state law ground"). That attempted evasion would fail for two reasons.

First, in the election context, a state-court remedy or a state executive's administrative action purporting to alter state election statutes implicates the Electors Clause. *See Bush II*, 531 U.S. at 105. Even a plausible federal-law defense to state action arises under federal law within the meaning of Article III. *Mesa v. California*, 489 U.S. 121, 136 (1989) (holding that "it is the raising of a federal question in the officer's removal petition that constitutes the federal law under which the action against the federal officer arises for Art. III purposes"). Constitutional arising-under jurisdiction exceeds statutory federal-question

jurisdiction of federal district courts,[2] and—indeed—we did not even have federal-question jurisdiction until 1875. *Merrell Dow Pharm.,* 478 U.S. at 807. Plaintiff States' Electoral Clause claims arise under the Constitution and so are *federal*, even if the only claim is that Defendant States violated their own state election statutes. Moreover, as is explained below, Defendant States' actions injure the interests of Plaintiff State in the appointment of electors to the electoral college in a manner that is inconsistent with the Constitution.

Given this federal-law basis against these state actions, the state actions are not "independent" of the federal constitutional requirements that provide this Court jurisdiction. *Fox Film Corp. v. Muller*, 296 U.S. 207, 210-11 (1935); *cf. City of Chicago v. Int'l Coll. of Surgeons*, 522 U.S. 156, 164 (1997) (noting that "even though state law creates a party's causes of action, its case might still 'arise under' the laws of the United States if a well-pleaded complaint established that its right to relief under state law requires resolution of a substantial question of federal law" and collecting cases) (internal quotations and alterations omitted). Plaintiff State's claims therefore fall within this Court's jurisdiction.

Second, state election law is not purely a matter of state law because it applies "not only to elections to state offices, but also to the election of Presidential

---

[2] The statute for federal officer removal at issue in *Mesa* omits the well-pleaded complaint rule, *id.*, which is a *statutory* restriction on federal question jurisdiction under 28 U.S.C. § 1331. *See Merrell Dow Pharm., Inc. v. Thompson*, 478 U.S. 804, 808 (1986).

electors," meaning that state law operates, in part, "by virtue of a direct grant of authority made under Art. II, § 1, cl. 2, of the United States Constitution." *Bush I*, 531 U.S. at 76. Logically, "any state authority to regulate election to [federal] offices could not precede their very creation by the Constitution," meaning that any "such power had to be delegated to, rather than reserved by, the States." *Cook v. Gralike*, 531 U.S. 510, 522 (2001) (internal quotations omitted). "It is no original prerogative of State power to appoint a representative, a senator, or President for the Union." J. Story, 1 COMMENTARIES ON THE CONSTITUTION OF THE UNITED STATES § 627 (3d ed. 1858). For these reasons, any "significant departure from the legislative scheme for appointing Presidential electors presents a federal constitutional question." *Bush II*, 531 U.S. at 113 (Rehnquist, C.J., concurring).

Under these circumstances, this Court has the power both to review and to remedy a violation of the Constitution. Significantly, parties do not need winning hands to establish jurisdiction. Instead, jurisdiction exists when "the right of the petitioners to recover under their complaint will be sustained if the Constitution and laws of the United States are given one construction," even if the right "will be defeated if they are given another." *Bell v. Hood*, 327 U.S. 678, 685 (1946). At least as to *jurisdiction*, a plaintiff need survive only the low threshold that "the alleged claim under the Constitution or federal statutes [not] … be immaterial and made solely for the purpose of obtaining jurisdiction or … wholly insubstantial and frivolous." *Id.* at 682. The bill of complaint meets that test.

C. The claims raise a "case or controversy" between the States.

Like any other action, an original action must meet the Article III criteria for a case or controversy: "it must appear that the complaining State has suffered a wrong through the action of the other State, furnishing ground for judicial redress, or is asserting a right against the other State which is susceptible of judicial enforcement according to the accepted principles of the common law or equity systems of jurisprudence." *Maryland v. Louisiana*, 451 U.S. 725, 735-36 (1981) (internal quotations omitted). Plaintiff State has standing under those rules.[3]

With voting, "'the right of suffrage can be denied by a debasement or dilution of the weight of a citizen's vote just as effectively as by wholly prohibiting the free exercise of the franchise.'" *Bush II*, 531 U.S. at 105 (quoting *Reynolds*, 377 U.S. at 555). In presidential elections, "the impact of the votes cast in each State is affected by the votes cast for the various candidates in other States." *Anderson v. Celebrezze*, 460 U.S. 780, 795 (1983). Thus, votes in Defendant States affect the votes in Plaintiff State, as set forth in more detail below.

---

[3] At its constitutional minimum, standing doctrine measures the necessary effect on plaintiffs under a tripartite test: cognizable injury to the plaintiffs, causation by the challenged conduct, and redressable by a court. *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 561-62 (1992). The rules for standing in state-versus-state actions is the same as the rules in other actions under Article III. *See Maryland v. Louisiana*, 451 U.S. 725, 736 (1981).

1. Plaintiff State suffers an injury in fact.

The citizens of Plaintiff State have the right to demand that all other States abide by the constitutionally set rules in appointing presidential electors to the electoral college. "No right is more precious in a free country than that of having a voice in the election of those who make the laws under which, as good citizens, we must live. Other rights, even the most basic, are illusory if the right to vote is undermined." *Wesberry*, 376 U.S. at 10; *Yick Wo v. Hopkins*, 118 U.S. 356, 370 (1886) ("the political franchise of voting" is "a fundamental political right, because preservative of all rights"). "Every voter in a federal … election, whether he votes for a candidate with little chance of winning or for one with little chance of losing, has a right under the Constitution to have his vote fairly counted." *Anderson v. United States*, 417 U.S. at 227; *Baker*, 369 U.S. at 208. Put differently, "a citizen has a constitutionally protected right to participate in elections on an equal basis with other citizens in the jurisdiction," *Dunn v. Blumstein*, 405 U.S. 330, 336 (1972), and—unlike the residency durations required in *Dunn*—the "jurisdiction" here is the entire United States. In short, the rights at issue are congeable under Article III.

Significantly, Plaintiff State presses its own form of voting-rights injury *as States*. As with the one-person, one-vote principle for congressional redistricting in *Wesberry*, the equality of the States arises from the structure of the Constitution, not from the Equal Protection or Due Process Clauses. *See Wesberry*, 376 U.S. at 7-8; *id.* n.10 (expressly not

reaching claims under Fourteenth Amendment). Whereas the House represents the People proportionally, the Senate represents the States. *See* U.S. CONST. art. V, cl. 3 ("no state, without its consent, shall be deprived of its equal suffrage in the Senate"). While Americans likely care more about who is elected President, the States have a distinct interest in who is elected *Vice President* and thus who can cast the tie-breaking vote in the Senate. Through that interest, States suffer an Article III injury when another State violates federal law to affect the outcome of a presidential election. This injury is particularly acute in 2020, where a Senate majority often will hang on the Vice President's tie-breaking vote because of the nearly equal—and, depending on the outcome of Georgia run-off elections in January, possibly *equal*—balance between political parties. Quite simply, it is vitally important to the States who becomes Vice President.

Because individual citizens may arguably suffer only a generalized grievance from Electors Clause violations, States have standing where their citizen voters would not, *Lance v. Coffman*, 549 U.S. 437, 442 (2007) (distinguishing citizen plaintiffs from citizen relators who sued in the name of a state). In *Massachusetts v. Environmental Protection Agency*, 549 U.S. 497 (2007), this Court held that states seeking to protect their sovereign interests are "entitled to special solicitude in our standing analysis." *Id.* at 520. While *Massachusetts* arose in a different context—the same principles of federalism apply equally here to require special deference to the sovereign states on standing questions.

In addition to standing for their own injuries, States can assert *parens patriae* standing for their citizens who are presidential electors.[4] Like legislators, presidential electors assert "legislative injury" whenever allegedly improper actions deny them a working majority. *Coleman v. Miller*, 307 U.S. 433, 435 (1939). The electoral college is a zero-sum game. If Defendant States' unconstitutionally appointed electors vote for a presidential candidate opposed by the Plaintiff State's electors, that operates to defeat Plaintiff State's interests.[5] Indeed, even without an electoral college majority, presidential electors suffer the same voting-debasement injury as voters generally: "It must be remembered that 'the

---

[4] "The '*parens patriae*' doctrine … is a recognition of the principle that the state, when a party to a suit involving a matter of sovereign interest, 'must be deemed to represent all its citizens.'" *New Jersey v. New York*, 345 U.S. 369, 372-73 (1953) (quoting *Kentucky v. Indiana*, 281 U.S. 163, 173 (1930)).

[5] Because Plaintiff State appointed its electors consistent with the Constitution, they suffer injury if its electors are defeated by Defendant States' unconstitutionally appointed electors. This injury is all the more acute because Plaintiff State has taken steps to prevent fraud. For example, Texas does not allow no excuse vote by mail (Texas Election Code Sections 82.001-82.004); has strict signature verification procedures (Tex. Election Code §87.027(j); Early voting ballot boxes have two locks and different keys and other strict security measures (Tex. Election Code §§85.032(d) & 87.063); requires voter ID (House Comm. on Elections, Bill Analysis, Tex. H.B. 148, 83d R.S. (2013)); has witness requirements for assisting those in need (Tex. Election Code §§ 86.0052 & 86.0105), and does not allow ballot harvesting Tex. Election Code 86.006(f)(1-6). Unlike Defendant States, Plaintiff State neither weakened nor allowed the weakening of its ballot-integrity statutes by non-legislative means.

right of suffrage can be denied by a debasement or dilution of the weight of a citizen's vote just as effectively as by wholly prohibiting the free exercise of the franchise.'" *Bush II*, 531 U.S. at 105 (quoting *Reynolds v. Sims*, 377 U. S. 533, 555 (1964)) ("*Bush II*"). Finally, once Plaintiff State has standing to challenge Defendant States' unlawful actions, Plaintiff State may do so on any legal theory that undermines those actions. *Duke Power Co. v. Carolina Envtl. Study Group, Inc.,* 438 U.S. 59, 78-81 (1978); *DaimlerChrysler Corp. v. Cuno,* 547 U.S. 332, 353 & n.5 (2006). Injuries to Plaintiff State's electors serve as an Article III basis for a *parens patriae* action.

2. Defendant States caused the injuries.

Non-legislative officials in Defendant States either directly caused the challenged violations of the Electors Clause or, in the case of Georgia, acquiesced to them in settling a federal lawsuit. The Defendants thus caused the Plaintiff's injuries.

3. The requested relief would redress the injuries.

This Court has authority to redress Plaintiff State's injuries, and the requested relief will do so.

First, while Defendant States are responsible for their elections, this Court has authority to enjoin reliance on *unconstitutional* elections:

> When the state legislature vests the right to vote for President in its people, the right to vote as the legislature has prescribed is fundamental; and one source of its fundamental nature lies in the equal weight

> accorded to each vote and the equal dignity owed to each voter.

Bush II, 531 U.S. at 104; *City of Boerne v. Flores,* 521 U.S. 507, 524 (1997) ("power to interpret the Constitution in a case or controversy remains in the Judiciary"). Plaintiff State does not ask this Court to decide who won the election; they only ask that the Court enjoin the clear violations of the Electors Clause of the Constitution.

Second, the relief that Plaintiff State requests—namely, remand to the State legislatures to allocate electors in a manner consistent with the Constitution—does not violate Defendant States' rights or exceed this Court's power. The power to select electors is a plenary power of the State legislatures, and this remains so, without regard to state law:

> This power is conferred upon the legislatures of the States by the Constitution of the United States, and cannot be taken from them or modified by their State constitutions…. Whatever provisions may be made by statute, or by the state constitution, to choose electors by the people, there is no doubt of the right of the legislature to resume the power at any time, for it can neither be taken away nor abdicated.

McPherson v. Blacker, 146 U.S. 1, 35 (1892) (internal quotations omitted); *accord Bush I*, 531 U.S. at 76-77; *Bush II*, 531 U.S at 104.

Third, uncertainty of how Defendant States' legislatures will allocate their electors is irrelevant to the question of redressability:

> If a reviewing court agrees that the agency misinterpreted the law, it will set aside the agency's action and remand the case – even though the agency … might later, in the exercise of its lawful discretion, reach the same result for a different reason.

FEC v. Akins, 524 U.S. 11, 25 (1998). Defendant States' legislatures would remain free to exercise their plenary authority under the Electors Clause in any *constitutional* manner they wish. Under *Akins*, the simple act of reconsideration under lawful means is redress enough.

Fourth, the requested relief is consistent with federal election law: "Whenever any State has held an election for the purpose of choosing electors, and has failed to make a choice on the day prescribed by law, the electors may be appointed on a subsequent day in such a manner as the legislature of such State may direct." 3 U.S.C. § 2. Regardless of the statutory deadlines for the electoral college to vote, this Court could enjoin reliance on the results from the constitutionally tainted November 3 election, remand the appointment of electors to Defendant States, and order Defendant States' legislatures to certify their electors in a manner consistent with the Constitution, which could be accomplished well in advance of the statutory deadline of January 6 for House to count the presidential electors' votes. 3 U.S.C. § 15.

D. This action is not moot and will not become moot.

None of the looming election deadlines are constitutional, and they all are within this Court's power to enjoin. Indeed, if this Court vacated a State's

appointment of presidential electors, those electors could not vote on December 14, 2020; if the Court vacated their vote after the fact, the House of Representatives could not count those votes on January 6, 2021. Moreover, any remedial action can be complete well before January 6, 2020. Indeed, even the swearing in of the next President on January 20, 2021, will not moot this case because review could outlast even the selection of the next President under "the 'capable of repetition, yet evading review' doctrine," which applies "in the context of election cases … when there are 'as applied' challenges as well as in the more typical case involving only facial attacks." *FEC v. Wisconsin Right to Life, Inc.*, 551 U.S. 449, 463 (2007) (internal quotations omitted); *accord Norman v. Reed*, 502 U.S. 279, 287-88 (1992). Mootness is not, and will not become, an issue here.

E. This matter is ripe for review.

Plaintiff State's claims are clearly ripe now, but they were not ripe before the election: "A claim is not ripe for adjudication if it rests upon contingent future events that may not occur as anticipated, or indeed may not occur at all." *Texas v. United States*, 523 U.S. 296, 300 (1998) (internal quotations and citations omitted). Prior to the election, there was no reason to know who would win the vote in any given State.

Ripeness also raises the question of laches, which Justice Blackmun called "precisely the opposite argument" from ripeness. *Lujan v. Nat'l Wildlife Fed'n*, 497 U.S. 871, 915 n.16 (1990) (Blackmun, J., dissenting). Laches is an equitable defense against unreasonable delay in commencing suit. *Petrella v. MGM*, 572 U.S. 663, 667 (2014). This action was

neither unreasonably delayed nor is prejudicial to Defendant States.

Before the election, Plaintiff States had no ripe claim against a Defendant State:

> "One cannot be guilty of laches until his right ripens into one entitled to protection. For only then can his torpor be deemed inexcusable."

What-A-Burger of Va., Inc. v. Whataburger, Inc., 357 F.3d 441, 449-50 (4th Cir. 2004) (quoting 5 J. Thomas McCarthy, MCCARTHY ON TRADEMARKS AND UNFAIR COMPETITION § 31: 19 (4th ed. 2003); *Gasser Chair Co. v. Infanti Chair Mfg. Corp.*, 60 F.3d 770, 777 (Fed. Cir. 1995) (same); *Profitness Physical Therapy Ctr. v. Pro-Fit Orthopedic & Sports Physical Therapy P.C.*, 314 F.3d 62, 70 (2d Cir. 2002) (same). Plaintiff State could not have brought this action before the election results. The extent of the county-level deviations from election statutes in Defendant States became evident well after the election. Neither ripeness nor laches presents a timing problem here.

F. This action does not raise a non-justiciable political question.

The "political questions doctrine" does not apply here. Under that doctrine, federal courts will decline to review issues that the Constitution delegates to one of the other branches—the "political branches"—of government. While picking electors involves political rights, the Supreme Court has ruled in a line of cases beginning with *Baker* that constitutional claims related to voting (other than claims brought under the Guaranty Clause) are justiciable in the federal courts. As the Court held in *Baker*, litigation over political rights is not the same as a political question:

> We hold that this challenge to an apportionment presents no nonjusticiable "political question." The mere fact that the suit seeks protection of a political right does not mean it presents a political question. Such an objection "is little more than a play upon words."

Baker, 369 U.S. at 209. This is no political question; it is a constitutional one that this Court should answer.

G. No adequate alternate remedy or forum exists.

In determining whether to hear a case under this Court's original jurisdiction, the Court has considered whether a plaintiff State "has another adequate forum in which to settle [its] claim." *United States v. Nevada*, 412 U.S. 534, 538 (1973). This equitable limit does not apply here because Plaintiff State cannot sue Defendant States in any other forum.

To the extent that Defendant States wish to avail themselves of 3 U.S.C. § 5's safe harbor, *Bush I*, 531 U.S. at 77-78, this action will not meaningfully stand in their way:

> The State, of course, after granting the franchise in the special context of Article II, can take back the power to appoint electors. … There is no doubt of the right of the legislature to resume the power at any time, for it can neither be taken away nor abdicated[.]

Bush II, 531 U.S. at 104 (citations and internal quotations omitted).[6] Defendant States' legislature

[6] Indeed, the Constitution also includes another backstop: "if no person have such majority [of electoral votes], then from the

will remain free under the Constitution to appoint electors or vote in any *constitutional* manner they wish. The only thing that they cannot do—and should not wish to do—is to rely on an allocation conducted in violation of the Constitution to determine the appointment of presidential electors.

Moreover, if this Court agrees with Plaintiff State that Defendant States' appointment of presidential electors under the recently conducted elections would be unconstitutional, then the statutorily created safe harbor cannot be used as a justification for a violation of the Constitution. The safe-harbor framework created by statute would have to yield in order to ensure that the Constitution was not violated.

It is of no moment that Defendants' *state laws* may purport to tether state legislatures to popular votes. Those state limits on a state legislature's exercising federal constitutional functions cannot block action because the federal Constitution "transcends any limitations sought to be imposed by the people of a State" under this Court's precedents. *Leser v. Garnett*, 258 U.S. 130, 137 (1922); *see also Bush I*, 531 U.S. at 77; *United States Term Limits v. Thornton*, 514 U.S. 779, 805 (1995) ("the power to regulate the incidents of the federal system is not a reserved power of the States, but rather is delegated by the Constitution").

As this Court recognized in *McPherson v. Blacker*, the authority to choose presidential electors:

---

persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot." U.S. CONST. amend. XII.

> is conferred upon the legislatures of the states by the Constitution of the United States, and cannot be taken from them or modified by their state constitutions. ... *Whatever provisions may be made by statute, or by the state constitution, to choose electors by the people, there is no doubt of the right of the legislature to resume the power at any time, for it can neither be taken away or abdicated*.

146 U.S. 1, 35 (1892) (emphasis added) (internal quotations omitted). Defendant States would suffer no cognizable injury from this Court's enjoining their reliance on an unconstitutional vote.

II. THIS CASE PRESENTS CONSTITUTIONAL QUESTIONS OF IMMENSE NATIONAL CONSEQUENCE THAT WARRANT THIS COURT'S DISCRETIONARY REVIEW.

Electoral integrity ensures the legitimacy of not just our governmental institutions, but the Republic itself. *See Wesberry*, 376 U.S. at 10. "Voters who fear their legitimate votes will be outweighed by fraudulent ones will feel disenfranchised." *Purcell,* 549 U.S. at 4. Against that backdrop, few cases could warrant this Court's review more than this one. In addition, the constitutionality of the process for selecting the President is of extreme national importance. If Defendant States are permitted to violate the requirements of the Constitution in the appointment of their electors, the resulting vote of the electoral college not only lacks constitutional legitimacy, but the Constitution itself will be forever sullied.

Though the Court claims "discretion when accepting original cases, even as to actions between States where [its] jurisdiction is exclusive," *Wyoming v. Oklahoma*, 502 U.S. 437, 450 (1992) (internal quotations omitted), this is not a case where the Court should apply that discretion "sparingly." *Id.* While Plaintiff State disputes that exercising this Court's original jurisdiction is discretionary, *see* Section III, *infra*, the clear unlawful abrogation of Defendant States' election laws designed to ensure election integrity by a few officials, and examples of material irregularities in the 2020 election cumulatively warrant this Court's exercising jurisdiction as this Court's "unsought responsibility to resolve the federal and constitutional issues the judicial system has been forced to confront." *Bush II*, 531 U.S. at 111; *see also Marbury v. Madison*, 5 U.S. (1 Cranch) 137, 177 (1803) ("It is emphatically the province and duty of the judicial department to say what the law is."). While isolated irregularities could be "garden-variety" election irregularities that do not raise a federal question,[7] the closeness of the presidential election results, combined with the unconstitutional setting-aside of state election laws by non-legislative actors call both the result and the process into question.

[7] "To be sure, 'garden variety election irregularities' may not present facts sufficient to offend the Constitution's guarantee of due process[.]" *Hunter v. Hamilton Cty. Bd. of Elections*, 635 F.3d 219, 232 (6th Cir. 2011) (quoting *Griffin*, 570 F.2d at 1077-79)).

A. The 2020 election suffered from serious irregularities that constitutionally prohibit using the reported results.

Defendant States' administration of the 2020 election violated several constitutional requirements and, thus, violated the rights that Plaintiff State seeks to protect. "When the state legislature vests the right to vote for President in its people, the *right to vote as the legislature has prescribed is fundamental*; and one source of *its fundamental nature lies in the equal weight accorded to each vote and the equal dignity owed to each voter*." *Bush II*, 531 U.S. at 104.[8] Even a State legislature vested with authority to regulate election procedures lacks authority to "abridg[e …] fundamental rights, such as the right to vote." *Tashjian v. Republican Party*, 479 U.S. 208, 217 (1986). As demonstrated in this section, Defendant States' administration of the 2020 election violated the Electors Clause, which renders invalid any appointment of electors based upon those election results, unless the relevant State legislatures review and modify or expressly ratify those results as sufficient to determine the appointment of electors. For example, even without fraud or nefarious intent, a mail-in vote not subjected to the State legislature's ballot-integrity measures cannot be counted.

It does not matter that a judicial or executive officer sought to bypass that screening in response to the COVID pandemic: the choice was not theirs to

[8] The right to vote is "a fundamental political right, because preservative of all rights." *Reynolds*, 377 U.S. at 561-62 (internal quotations omitted).

make. "Government is not free to disregard the [the Constitution] in times of crisis." *Roman Catholic Diocese of Brooklyn, New York v. Cuomo*, 592 U.S. ___ (Nov. 25, 2020) (Gorsuch, J., concurring). With all unlawful votes discounted, the election result is an open question that this Court must address. Under 3 U.S.C. § 2, the State legislatures may answer the question, but the question must be asked here.

1. Defendant States violated the Electors Clause by modifying their legislatures' election laws through non-legislative action.

The Electors Clause grants authority to *state legislatures* under both horizontal and vertical separation of powers. It provides authority to each State—not to federal actors—the authority to dictate the manner of selecting presidential electors. And within each State, it explicitly allocates that authority to a single branch of State government: to the "Legislature thereof." U.S. CONST. art. II, § 1, cl. 2. State legislatures' primacy *vis-à-vis* non-legislative actors—whether State or federal—is even more significant than congressional primacy *vis-à-vis* State legislatures.

The State legislatures' authority is plenary. *Bush II*, 531 U.S. at 104. It "cannot be taken from them or modified" even through "their state constitutions." *McPherson*, 146 U.S. at 35; *Bush I*, 531 U.S at 76-77; *Bush II*, 531 U.S at 104. The Framers allocated election authority to State legislatures as the branch closest—and most accountable—to the People. *See, e.g.*, Robert G. Natelson, *The Original Scope of the Congressional Power to Regulate Elections*, 13 U. PA.

J. CONST. L. 1, 31 (2010) (collecting Founding-era documents); *cf.* THE FEDERALIST NO. 57, at 350 (C. Rossiter, ed. 2003) (J. Madison) ("House of Representatives is so constituted as to support in its members a habitual recollection of their dependence on the people"). Thus, only the State legislatures are permitted to create or modify the respective State's rules for the appointment of presidential electors. U.S. CONST. art. II, § 1, cl. 2.

"[T]here must be a substantial regulation of elections if they are to be fair and honest and if some sort of order, rather than chaos, is to accompany the democratic processes." *Burdick v. Takushi*, 504 U.S. 428, 433 (1992) (interior quotations omitted). Thus, for example, deadlines are necessary, even if some votes sent via absentee ballot do not arrive timely. *Rosario v. Rockefeller*, 410 U.S. 752, 758 (1973). Even more importantly in this pandemic year with expanded mail-in voting, ballot-integrity measures—*e.g.*, witness requirements, signature verification, and the like—are an essential component of any legislative expansion of mail-in voting. *See* CARTER-BAKER, at 46 (absentee ballots are "the largest source of potential voter fraud"). Though it may be tempting to permit a breakdown of the constitutional order in the face of a global pandemic, the rule of law demands otherwise.

Specifically, because the Electors Clause makes clear that state legislative authority is exclusive, non-legislative actors lack authority to *amend* statutes. *Republican Party of Pa. v. Boockvar*, No. 20-542, 2020 U.S. LEXIS 5188, at *4 (Oct. 28, 2020) ("there is a strong likelihood that the State Supreme Court

decision violates the Federal Constitution") (Alito, J., concurring); *Wisconsin State Legis.*, No. 20A66, 2020 U.S. LEXIS 5187, at *11-14 (Oct. 26, 2020) (Kavanaugh, J., concurring in denial of application to vacate stay); *cf. Grayned v. City of Rockford,* 408 U.S. 104, 110 (1972) ("it is not within our power to construe and narrow state laws"); *Free Enter. Fund v. Pub. Co. Accounting Oversight Bd.*, 561 U.S. 477, 509-10 (2010) ("editorial freedom … [to "blue-pencil" statutes] belongs to the Legislature, not the Judiciary"). That said, courts can enjoin elections or even enforcement of *unconstitutional* election laws, but they cannot rewrite the law in federal presidential elections.

For example, if a state court enjoins or modifies ballot-integrity measures adopted to allow absentee or mail-in voting, that invalidates ballots cast under the relaxed standard unless the legislature has—prior to the election—ratified the new procedure. Without pre-election legislative ratification, results based on the treatment and tabulation of votes done in violation of state law cannot be used to appoint presidential electors.

Elections must be lawful contests, but they should not be mere *litigation contests* where the side with the most lawyers wins. As with the explosion of nation-wide injunctions, the explosion of challenges to State election law for partisan advantage in the lead-up to the 2020 election "is not normal." *Dep't of Homeland Sec. v. New York*, 140 S. Ct. 599, 600 (2020) (Gorsuch, J., concurring in the grant of stay). Nor is it healthy. Under the "*Purcell* principle," federal courts generally avoid enjoining state election laws in the period close to an election. *Purcell*, 549 U.S. at 4-5 (citing "voter

confusion and consequent incentive to remain away from the polls"). *Purcell* raises valid concerns about confusion in the run-up to elections, but judicial election-related injunctions also raise *post-election* concerns. For example, if a state court enjoins ballot-integrity measures adopted to secure absentee or mail-in voting, that invalidates ballots cast under the relaxed standard unless the State legislature has had time to ratify the new procedure. Without either pre-election legislative ratification or a severability clause in the legislation that created the rules for absentee voting by mail, the state court's actions operate to violate the Electors Clause.

2. State and local administrator's systemic failure to follow State election qualifies as an unlawful amendment of State law.

When non-legislative state and local executive actors engage in systemic or intentional failure to comply with their State's duly enacted election laws, they adopt by executive fiat a *de facto* equivalent of an impermissible amendment of State election law by an executive or judicial officer. *See* Section II.A.1, *supra*. This Court recognizes an executive's "consciously and expressly adopt[ing] a general policy that is so extreme as to amount to an abdication of its statutory responsibilities" as another form of reviewable final action, even if the policy is not a written policy. *Heckler v. Chaney*, 470 U.S. 821, 833 n.4 (1985) (interior quotations omitted); *accord id.* at 839 (Brennan, J., concurring). Without a *bona fide* amendment to State election law *by the legislature*, executive officers must follow state law. *Cf. Morton v.*

Ruiz, 415 U.S. 199, 235 (1974); *Service v. Dulles*, 354 U.S. 363, 388-89 (1957). The wrinkle here is that the non-legislative actors lack the authority under the federal Constitution to enact a *bona fide* amendment, regardless of whatever COVID-related emergency power they may have.

This form of executive nullification of state law by statewide, county, or city officers is a variant of impermissible amendment by a non-legislative actor. *See* Section II.A.1, *supra*. Such nullification is always unconstitutional, but it is especially egregious when it eliminates legislative safeguards for election integrity (*e.g.*, signature and witness requirements for absentee ballots, poll watchers[9]). Systemic failure by statewide, county, or city election officials to follow State election law is no more permissible than formal amendments by an executive or judicial actor.

3. Defendant States' administration of the 2020 election violated the Fourteenth Amendment.

In each of Defendant States, important rules governing the sending, receipt, validity, and counting of ballots were modified in a manner that varied from county to county. These variations from county to county violated the Equal Protection Clause, as this

---

[9] Poll watchers are "prophylactic measures designed to prevent election fraud," *Harris v. Conradi,* 675 F.2d 1212, 1216 n.10 (11th Cir. 1982), and "to insure against tampering with the voting process." *Baer v. Meyer,* 728 F.2d 471, 476 (10th Cir. 1984). For example, poll monitors reported that 199 Chicago voters cast 300 party-line Democratic votes, as well as three party-line Republican votes in one election. *Barr v. Chatman,* 397 F.2d 515, 515-16 & n.3 (7th Cir. 1968).

Court explained at length in *Bush II*. Each vote must be treated equally. "When the state legislature vests the right to vote for President in its people, the right to vote as the legislature has prescribed is fundamental; and one source of its fundamental nature lies in the equal weight accorded to each vote and the equal dignity owed to each voter." *Bush II*, 531 U.S. at 104. The Equal Protection Clause demands uniform "statewide standards for determining what is a legal vote." *Id*. at 110.

Differential intrastate voting standards are "hostile to the one man, one vote basis of our representative government." *Bush II*, 531 U.S. at 107 (internal quotations omitted). These variations from county to county also appear to have operated to affect the election result. For example, the obstruction of poll-watcher requirements that occurred in Michigan's Wayne County may have contributed to the unusually high number of more than 173,000 votes which are not tied to a registered voter and that 71 percent of the precincts are out of balance with no explanation. Compl. ¶ 97.

Regardless of whether the modification of legal standards in some counties in Defendant States tilted the election outcome in those States, it is clear that the standards for determining what is a legal vote varied greatly from county to county. That constitutes a clear violation of the Equal Protection Clause; and it calls into question the constitutionality of any Electors appointed by Defendant States based on such an unconstitutional election.

The Fourteenth Amendment's due process clause protects the fundamental right to vote against "[t]he

disenfranchisement of a state electorate." *Duncan v. Poythress*, 657 F.2d 691, 702 (5th Cir. 1981). Weakening or eliminating signature-validating requirements, then restricting poll watchers also undermines the 2020 election's integrity—especially as practiced in urban centers with histories of electoral fraud—also violates substantive due process. *Griffin v. Burns*, 570 F.2d 1065, 1077 (1st Cir. 1978) ("violation of the due process clause may be indicated" if "election process itself reaches the point of patent and fundamental unfairness"); *see also Florida State Conference of N.A.A.C.P. v. Browning*, 522 F.3d 1153, 1183-84 (11th Cir. 2008); *Roe v. State of Ala. By & Through Evans*, 43 F.3d 574, 580-82 (11th Cir. 1995); *Roe v. State of Ala.*, 68 F.3d 404, 407 (11th Cir. 1995); *Marks v. Stinson*, 19 F. 3d 873, 878 (3rd Cir. 1994). Defendant States made concerted efforts to weaken or nullify their legislatures' ballot-integrity measures for the unprecedented deluge of mail-in ballots, citing the COVID-19 pandemic as a rationale. But "Government is not free to disregard the [the Constitution] in times of crisis." *Roman Catholic Diocese of Brooklyn*, 592 U.S. at ___ (Gorsuch, J., concurring).

Similarly, failing to follow procedural requirements for amending election standards violates procedural due process. *Brown v. O'Brien*, 469 F.2d 563, 567 (D.C. Cir.), *vacated as moot*, 409 U.S. 816 (1972). Under this Court's precedents on procedural due process, not only intentional failure to follow election law as enacted by a State's legislature but also random and unauthorized acts by state election officials and their designees in local government can violate the Due Process Clause. *Parratt v. Taylor*, 451

U.S. 527, 537-41 (1981), *overruled in part on other grounds by Daniels v. Williams*, 474 U.S. 327, 330-31 (1986); *Hudson v. Palmer*, 468 U.S. 517, 532 (1984). Here, the violations all were intentional, even if done for the reason of addressing the COVID-19 pandemic.

While Plaintiff State disputes that exercising this Court's original jurisdiction is discretionary, *see* Section III, *infra*, the clear unlawful abrogation of Defendant States' election laws designed to ensure election integrity by a few officials, and examples of material irregularities in the 2020 election cumulatively warrant exercising jurisdiction. Although isolated irregularities could be "garden-variety" election disputes that do not raise a federal question,[10] the closeness of election results in swing states combines with unprecedented expansion in the use of fraud-prone mail-in ballots—millions of which were also mailed out—and received and counted—without verification—often in violation of express state laws by non-legislative actors, *see* Sections II.A.1-II.A.2, *supra*, call both the result and the process into question. For an office as important as the presidency, these clear violations of the Constitution, coupled with a reasonable inference of unconstitutional ballots being cast in numbers that far exceed the margin of former Vice President Biden's vote tally over President Trump demands the attention of this Court.

---

[10] "To be sure, 'garden variety election irregularities' may not present facts sufficient to offend the Constitution's guarantee of due process[.]" *Hunter*, 635 F.3d at 232 (quoting *Griffin*, 570 F.2d at 1077-79)).

While investigations into allegations of unlawful votes being counted and fraud continue, even the appearance of fraud in a close election would justify exercising the Court's discretion to grant the motion for leave to file. Regardless, Defendant States' violations of the Constitution would warrant this Court's review, even if no election fraud had resulted.

B. A ruling on the 2020 election would preserve the Constitution and help prevent irregularities in future elections.

In addition to ensuring that the 2020 presidential election is resolved in a manner consistent with the Constitution, this Court must review the violations that occurred in Defendant States to enable Congress and State legislatures to avoid future chaos and constitutional violations. Unless this Court acts to review this presidential election, these unconstitutional and unilateral violations of state election laws will continue in the future.

Regardless of how the 2020 election resolves and whatever this Court does with respect to the 2020 election, it is imperative for our system of government that elections follow the clear constitutional mandates for all future elections. Just as this Court in *Bush II* provided constitutional guidance to all states regarding the equal treatment of ballots from county to county in 2000, this Court should now provide a clear statement that non-legislative modification of rules governing presidential elections violate the Electors Clause. Such a ruling will discourage in the future the kind of non-legislative election modifications that proliferated in 2020.

III. REVIEW IS NOT DISCRETIONARY.

Although this Court's original jurisdiction precedents would justify the Court's hearing this matter under the Court's discretion, *see* Section II, *supra*, Plaintiff State respectfully submits that the Court's review is not discretionary. To the contrary, the plain text of § 1251(a) provides *exclusive* jurisdiction, not discretionary jurisdiction. *See* 28 U.S.C. § 1251(a). In addition, no other remedy exists for these interstate challenges, *see* Section I.G, *supra*, and *some* court must have jurisdiction for these weighty issues. *See Mostyn v. Fabrigas*, 98 Eng. Rep. 1021, 1028 (K.B. 1774) ("if there is no other mode of trial, that alone will give the King's courts a jurisdiction"). As individual Justices have concluded, the issue "bears reconsideration." *Nebraska v. Colorado*, 136 S.Ct. 1034, 1035 (2016) (Thomas, J., dissenting, joined by Alito, J.); *accord New Mexico v. Colorado*, 137 S.Ct. 2319 (2017) (Thomas, J., dissenting) (same). Plaintiff State respectfully submits that that reconsideration would be warranted to the extent that the Court does not elect to hear this matter in its discretion.

IV. THIS CASE WARRANTS SUMMARY DISPOSITION OR EXPEDITED BRIEFING.

The issues presented here are neither fact-bound nor complex, and their vital importance urgently needs a resolution. Plaintiff State will move this Court for expedited consideration but also suggest that this case is a prime candidate for summary disposition because the material facts—namely, that the COVID-19 pandemic prompted non-legislative actors to unlawfully modify Defendant States' election laws, and carry out an election in violation of basic voter

integrity statutes—are not in serious dispute. *California v. United States*, 457 U.S. 273, 278 (1982); *South Carolina v. Katzenbach*, 383 U.S. 301, 307 (1966). This case presents a pure and straightforward question of law that requires neither finding additional facts nor briefing beyond the threshold issues presented here.

CONCLUSION

Leave to file the Bill of Complaint should be granted.

December 7, 2020

Respectfully submitted,

Ken Paxton*

Attorneys for Defendant, Governor Tony Evers

December 9, 2020

INTRODUCTION

Plaintiff's response brief, like the Amended Complaint, is rampant with wild speculation and conspiratorial conclusions, and simply without any basis in law or fact. To make up for these deficiencies, Plaintiff makes egregious misstatements of the law, and simply ignores standards he does not like.

Starting with the "merits," Defendant Evers explained in great detail why Plaintiff's claims are not remotely plausible, including that the factual allegations have nothing specific to do with Wisconsin, are made by persons with no actual firsthand knowledge (of anything they allege, let alone anything that allegedly happened in Wisconsin), and are overwhelmingly conclusory assertions without any alleged plausible factual basis, while the "expert" allegations are made by persons without required expertise, using either no disclosed methodology at all or methodologies riddled with fatal flaws. (*See* Dkt. 59 at 20-28) Plaintiff responds to this detailed refutation of his allegations with…nothing. He offers not a word in substantive defense of the supposed "plausibility" of his fantastical allegations. He instead offers a short exploration of the pleading standard for intent under Rule 9(b) (Dkt. 72 at 15-17), but that discussion has nothing to do with Defendant Evers' eight pages explaining the many reasons why Plaintiff's allegations come nowhere close to meeting the *Twombly* and *Iqbal* "plausibility" standard. Plaintiff fails even to cite, let alone discuss, *Twombly* and *Iqbal*. This failure to even try to defend the "plausibility" of his allegations constitutes waiver on the Rule 12(b)(6) issue, and is itself sufficient grounds to dismiss.

Moving beyond the "merits issues" while Plaintiff does actually engage (to varying degrees) with Defendant Evers's other arguments for dismissal, Plaintiff's efforts fail. Plaintiff makes conflicting statements regarding standing, arguing that his standing stems from his status as a presidential elector and then switches to a voter when he perceives that status as more

convenient for standing purposes. He fails to realize that, either as a voter or a presidential elector, he has no standing. He even cites to a case to support standing, but fails to acknowledge that the Supreme Court overruled the decision. While he seeks to shrug aside laches, he cannot avoid the fact that he seeks to disenfranchise millions of Wisconsin voters who cast their votes in reliance on the voting procedures in place on Election Day. He does so despite having had ample opportunity—years, in some cases—to challenge those procedures, *including Wisconsin's use of Dominion voting machines* (though not nearly as widespread as he alleges (*see* Amend. Cmplt. Exh. 5) that he claims have long been susceptible to fraud, well before those votes were cast. Instead, Plaintiff lay in the weeds, allowing the election to take place and a full month thereafter to pass by, refraining from participating in any of the established state-law procedures for challenging the results, and even staying on the sidelines as Governor Evers transmitted the certified results to the National Archives confirming Wisconsin's Electors, before finally asserting these claims with the Electoral College set to meet on December 14, 2020. While he likewise gives short shrift to the mootness, Eleventh Amendment, abstention, and exclusive-jurisdiction principles raised in Governor Evers' motion, each provides an independent basis for dismissing his claims with prejudice. Ultimately, Plaintiff cannot and does not even try to differentiate his Wisconsin case from *King v. Whitmer* or *Pearson v. Kemp*, where judges shot down identical lawsuits by these same lawyers on all the grounds that Defendants have here too presented to the Court. The Wisconsin lawsuit must meet the same fate.

I. Plaintiff Misstated Applicable Pleading Standards.

Plaintiff misleadingly cites to a pre-*Twombly* and *Iqbal* case to argue he has sufficiently alleged constitutional violations. (Dkt. 72, at 15-16) He discusses that case, *Kasper v. Bd. of Election Com'rs of the City of Chicago*, 814 F.2d 332 (7th Cir. 1987), to make an argument about pleading standards for a defendant's intent that has nothing to do with Defendant Evers'

eight-page refutation of the "plausibility" of Plaintiff's allegations and claims. The entire discussion is thus irrelevant to Defendant Evers's *Twombly* and *Iqbal* arguments. By citing a pre-*Twombly* and *Iqbal* case, he completely ignores "the factual heft required to survive a motion to dismiss after *Twombly* and *Iqbal*." *McCauley v. City of Chicago*, 671 F.3d 611, 617 (7th Cir. 2011); *see also Diedrich v. Ocwen Loan Servicing, LLC*, 839 F.3d 583, 589 (7th Cir. 2016) (stating that *Twombly* and *Iqbal* established "heightened pleading requirements"); *Atkins v. City of Chicago*, 631 F.3d 823, 832 (7th Cir. 2011) (quoting *In re marchFIRST Inc.*, 589 F.3d 901, 905 (7th Cir. 2009)) ("After *Twombly* and *Iqbal* a plaintiff to survive dismissal 'must plead some facts that suggest a right to relief that is beyond the speculative level.'"); *Swanson v. Citibank, N.A.*, 614 F.3d 400, 404 (7th Cir. 2010) (after *Twombly* and *Iqbal*, the plaintiff must "present a story that holds together").

Twombly and *Iqbal* require more than traditional notice pleading. Instead, Plaintiff must provide particular facts that nudge his "claims across the line from conceivable to plausible." *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570 (2007). Plaintiff offers only wild conspiracy theories, rank speculation, and conjecture, and his Amended Complaint completely lacks any plausible first-hand factual or expert allegations, tied to the election *in Wisconsin*. Plaintiff thus fails to establish his claims as remotely conceivable. The leaps of logic and facially bogus theories underlying Plaintiff's claims of a globe-spanning conspiracy—allegations of rigged elections in Venezuela in 2009 to 2013 involving some company called "Smartmatic" that has no apparent connection to anything in Wisconsin in 2020; software algorithms in Dominion Voting machines that somehow (albeit without allegations providing any explanation at all, let alone a plausible explanation) affected votes in Wisconsin counties that were won by President Trump or used other companies' voting machines; assertions that the fact of election results that were

relatively favorable to Vice President Biden in Madison and Milwaukee as compared to Oshkosh or Stevens Point were the product of "statistical impossibilities" rather than the far more plausible explanation that those are predominantly Democratic parts of the states; and assertions that a so-called "survey" conducted by a former campaign staffer with no qualifications or experience and no showing that his methodologies comported with professional standards (to the contrary, a "survey" that on its face was methodologically fatally flawed) somehow provides a basis for throwing out hundreds of thousands of votes cast by Wisconsinites—rightly would be called out as ridiculous if suggested at a social event or in most Internet forums. They surely have no place in a complaint filed in federal court. Plaintiff completely failed to respond to Defendant Evers's detailed Rule 12(b)(6) and 9(b) arguments explaining the utter lack of plausibility of these allegations, and that failure alone constitutes waiver requiring dismissal. *See Bonte v. U.S. Bank, N.A.*, 624 F.3d 461, 465-66 (7th Cir. 2010) (complete failure to address Rule 12(b)(6) arguments constitutes waiver).

II. Plaintiff does not have standing.

A. *Carson* is irrelevant.

Plaintiff claims that an Eighth Circuit decision grants him standing to sue under the Electors and Elections Clauses. (*See* Dkt. 72 at 17) He relies upon *Carson v. Simon*, 978 F.3d 1051 (8th Cir. 2020), a non-binding case that was specific to Minnesota law and involved a *pre-election* challenge to Minnesota election procedures that were modified by a state court. Nothing in *Carson* suggests that the Electors and Elections Clauses create *post-election* rights to challenge the results of an election.

Plaintiff's counsel made a similar argument in *King v. Whitmer*, 2020 WL 7134198 (E.D. Mich.) (Dec. 7, 2020) (provided at Dkt. 51-5). The judge in *King* rejected that argument, specifically finding that the *Carson* majority was not as persuasive as the dissenting judge. *King*

at *11. The dissent in *Carson* argued against standing because "the Electors are not candidates for public office as that term is commonly understood." 978 F.3d at 1063 Kelly, J., dissenting). It went on to argue that presidential electors

> are not presented to and chosen by the voting public for their office, but instead automatically assume that office based on the public's selection of entirely different individuals. But even if we nonetheless assume the Electors should be treated like traditional political candidates for standing purposes, I question whether these particular candidates have demonstrated the "concrete and particularized" injury necessary for Article III standing. *Lujan v. Defs. of Wildlife*, 504 U.S. 555, 560 (1992). To the contrary, their claimed injury—a potentially "inaccurate vote tally"—appears to be "precisely the kind of undifferentiated, generalized grievance about the conduct of government" that the Supreme Court has long considered inadequate for standing.

Id. In *King*, the court found this more convincing and stated that even if Michigan and Minnesota law were similar, "Plaintiffs lack standing to sue under the Elections and Electors Clauses." *King* at *11. And Plaintiff only glosses over the fact that in *Bognet* the court found no standing despite a plaintiff being a congressional candidate. *Bognet v. Sec'y of Commonwealth*, 2020 WL 6686120 at *4, *6-8 (provided at Dkt. 51-9).

Regardless of how Minnesota law treats electors, Wisconsin law makes clear that the presidential electors have a purely ministerial role. The presidential electors do not appear on the ballot. Contrary to Plaintiff's misleading assertion, voters submit ballots for their presidential candidate, not the presidential elector.

Yet even if Plaintiff were correct, and he has standing as a surrogate for President Trump or a "candidate" himself, that does not help him because then he undoubtedly would have had to utilize state law remedies and intervened in the recount petition that President Trump filed. Thus, his failure to utilize state law remedies would foreclose him from bringing his claims.

B. Plaintiff's equal protection and due process standing arguments are in error.

Plaintiff's argument for standing for Due Process and Equal Protection would normally not merit any response. However, two points must be refuted. For the first time, Plaintiff says in

his response brief that he voted for Donald Trump. (Dkt. 72 at 17) His Amended Complaint contains no reference to whom he voted for in the presidential election. Thus, he cannot bring a claim as a voter, because his Amended Complaint does not allege that he voted for Trump. Nonetheless, if he brings his state claims (which he tries to disguise as constitutional claims) as a voter, then he must exhaust his exclusive, state-administrative remedy under Wis. Stat. § 5.06.

Second, Plaintiff cites *Whitford v. Nichol*, 151 F.Supp.3d 918 (W.D. Wis. 2015), to argue voters have standing for "state laws that collectively reduce the value of one party[]." (Dkt. 72 at 20) He neglects to mention that the case was appealed and the *Supreme Court* rejected the same theory of Article III standing as plaintiff advances. *See Gill v. Whitford,* 138 S. Ct. 1916, 1921 (U.S. 2018). Arguing that the case somehow creates standing for Plaintiff in this case is an egregious misstatement of the law. Consequently, he can point to no decision where similar plaintiffs had standing. Again, *Bognet* is instructive because it found a similar concept of vote dilution as argued by Plaintiff here "is not a concrete harm under the Equal Protection Clause of the Fourteenth Amendment." *Bognet* at *11.

III. Plaintiff's Complaint is Barred by Laches

As a foundational matter, Plaintiff asserts that "*ordinarily*, a motion to dismiss is not the appropriate vehicle to address the defense of laches." (Dkt. 72 at 22 (quoting *Am. Commercial Barge Lines, LLC v. Reserve FTL, Inc.*, 2002 WL 31749171, at *1 (N.D. Ill. Dec. 3, 2002))[1] (emphasis added)) But what Plaintiff ignores is that the same case qualifies this statement, noting that most courts have found the defense of laches unsuitable at the pleading stage "unless laches is apparent on the face of the complaint." *Am. Commercial Barge Lines, LLC*, 2002 WL

[1] Pursuant to Civil L. R. 7(j)(2), all unpublished cases, orders, and dispositions cited are filed in conjunction with this brief.

31749171, at *1 (citation omitted). In this case, laches is most certainly apparent on the face of the complaint, and the circumstances giving rise to this case are far from ordinary.

Despite Plaintiff's assertion that he could not have known the basis of his claims earlier than he did (Dkt. 72 at 22-23), Plaintiff's own pleadings prove that assertion is false. Plaintiff's Amended Complaint is based on alleged violations of Wisconsin election laws stemming from the use of Dominion Voting Machines and guidance issued by the Wisconsin Elections Commission. It is apparent on the face of the Amended Complaint that Plaintiff knew about these longstanding practices, including the use of Dominion Voting Machines, for months and, in some cases, years before the general election on November 3, 2020. (*See* Amend. Cmplt. ¶¶37-45, 64-68; *see also* Dkt. 59 at 17-18) Plaintiff's claims are based on assumptions Plaintiff makes about how alleged problems with these machines and this guidance must have resulted in improper counting of votes. Yet having known about these alleged problems with the machines and the guidance well before the election, Plaintiff was obligated to raise his complaints about the machines and the guidance then, before millions of voters had cast their ballots in reliance on the guidance and using these machines.

Moreover, the nature of the allegations in the Amended Complaint and the audacity of the requested relief compel the conclusion that this case is certainly not ordinary. In several other recent cases like this one, the lateness of the filings and the prejudice to the defendants and to the voting public have been so obvious that courts around the country are dismissing on the bases of laches. *King*, Op. & Order, at *6; *Wood v. Raffensberger*, No. 1:2020-cv-04651-SDG, 2020 WL 6817513, at *8 (N.D. Ga. Nov. 20, 2020), *aff'd*, 2020 WL 7094866, at *6 (11th Cir. Dec. 5, 2020) (provided at Dkt. 51-3, 51-4).

Finally, Plaintiff's attempt to attribute delay to Defendants' failure to promptly complete ballot counting after Election Day is preposterous. First, Wisconsin did not certify the election results until November 30, 2020, because a recount was requested by the Trump campaign and promptly conducted by Dane and Milwaukee Counties. To the extent that Plaintiff asserts his standing is the same as the candidate for whom he is a presidential elector (which it is not), any delay caused by the recount must be attributed to the candidate, and by extension to Plaintiff. Second, Plaintiff points to no law that required him to wait until after completion of the recount and certification to file *this federal court lawsuit*. To be sure, this lawsuit is entirely improper, as Plaintiff should have used the available, exclusive state-law procedures. But having wrongly eschewed those procedures, Plaintiff cannot point to their unique requirements to justify his own hugely prejudicial delay in filing this lawsuit (especially given that one of the two procedures—the administrative complaint procedure available to regular voters—does *not* require that the voter wait until after certification to file a complaint, Wis. Stat. § 5.06(1)). Having decided to file in federal court rather than in either of the proper exclusive state forums, and having known about the basis for his claims for weeks, months, and sometimes years, Plaintiff's lengthy delay in filing is wholly unjustified and ample grounds for invoking laches to dismiss this case.

IV. Plaintiff's Requests for Relief are Moot.

Despite Plaintiff's assertions to the contrary, "a case is moot where the court lacks 'the ability to give meaningful relief[.]'" *King*, Op. & Order, at *13 (citing *Sullivan v. Benningfield*, 920 F.3d 401, 410 (6th Cir. 2019)). Presumably, all of Plaintiff's requests for relief are targeted to invalidate the results of the general election in order to declare President Trump the winner of Wisconsin's electoral votes. From that perspective, it is apparent that Plaintiff's requests for relief are moot. In part, Plaintiff asks this Court to "de-certify the election results," to enjoin "Governor Evers from transmitting the currently certified election results [to] the Electoral

College," and to order "Governor Evers to transmit certified election results that state President Donald Trump is the winner of the election." (Amend. Cmplt. ¶42) But, the Court has no authority to simply declare an alternative winner of an election; an injunction cannot stop the Governor from transmitting the election results to the federal government because that was already done before Plaintiff filed his Amended Complaint; and there is no legal mechanism for the de-certification of the election results. While the exclusive state procedure for contesting election results holds open the possibility for relief, *see* Wis. Stat. §§ 9.01(6) & (9), any efforts to obtain relief *in federal court* are not only barred by the exclusive state procedure, but were rendered moot by the certification of election results.

V. The Eleventh Amendment Bars Plaintiff's Complaint.

Governor Evers does not dispute that the Eleventh Amendment permits prospective injunctive relief against state officials on the basis of federal law. But Plaintiff ignores the requisite latter part of that sentence. Where claims are based on *state law*, the Eleventh Amendment bars all relief, "whether prospective or retroactive." *Pennhurst State Sch. & Hosp. v. Halderman*, 465 U.S. 89, 106 (1984). That restriction applies even where, as here, Plaintiff cloaks his state-law claims in federal garb. (Dkt. 59 at 15 (citing cases)) Plaintiff's Elections and Electors Clause claim is based on Defendants purportedly exercising electoral authority in ways that "conflict with existing legislation" enacted by the Wisconsin Legislature. (Amend. Cmplt. ¶103) Likewise, his Equal Protection Clause claim hinges on Defendants' alleged failure to "enforce[] fairly and uniformly" Wisconsin's election laws, claiming that because "Defendants failed to comply with the requirements of the *Wisconsin Election Code*," his vote was diluted in violation of the Equal Protection Clause. (*Id.* ¶¶115-16 (emphasis added)) Count III alleges a Due Process Clause violation based on so-called "vote dilution." This, too, has no actual basis in federal law; rather, it is grounded in Plaintiff's state-law-based allegations regarding ballot

counting. (*Id.* ¶¶123-29) In short, Plaintiffs cannot escape the Eleventh Amendment's bar by simply slapping a "federal claim" label on what are ultimately questions of state law.

VI. Plaintiff's Remedies are Controlled by State Law.

The Wisconsin Legislature has prescribed the process for the filing, review, and adjudication of claims of election-related misconduct, which begins with administrative review by the WEC. Wis. Stat. §§ 5.05(2m), 5.06. The Wisconsin Legislature has also determined that claims challenging the results of an election based on alleged irregularities and defects in the voting process are exclusively determined through the recount statute. Wis. Stat. § 9.01(11). Plaintiff attempts to circumvent these procedures and inappropriately invoke federal jurisdiction. In Count IV of his Amended Complaint, Plaintiff states that "Defendants intentionally violated multiple provisions of the *Wisconsin Election Code* to elect Biden and other Democratic candidates and defeat President Trump and other Republican candidates." (Amend. Cmplt. ¶137 (emphasis added)) Moreover, Section I of the Amended Complaint, which is incorporated into Counts I through III of the Amended Complaint (*see id.* ¶¶104-06, 116, 129) details only state law violations (*see id.* ¶¶37-45).

Plaintiff could have filed a complaint with the WEC under Wis. Stat. §§ 5.05(2m) or 5.06. Or, to the extent that Plaintiff alleges that he has standing on par with candidate President Trump (which he does not), he should have intervened in the recount requested by President Trump, the results of which are currently being appealed. Plaintiff's allegations here are precisely the sorts of claims captured by the Wisconsin statutory processes review. He alleges election official misconduct, which is subject to review under Wis. Stat. § 5.06, and he alleges irregularities or defects in the voting process, which are subject to challenge only via the recount process under Wis. Stat. § 9.01.

Federal jurisdiction is not available to circumvent the Wisconsin Legislature's designated forums for challenging the conduct of an election or its results simply by bootstrapping concerns about the constitutional right to vote onto any election-related cause of action. Moreover, if Plaintiff is not required to avail himself of state requirements for challenging election conduct and instead may proceed in federal court, what is there to stop other disappointed voters or candidates from filing lawsuit after lawsuit until January 20 (if not beyond)? Such a result would further destabilize our democracy and undermine the will of Congress, the Wisconsin Legislature, and, above all, the will of Wisconsin's voters.

VII. Abstention Doctrines Apply to Plaintiff's Complaint.

Plaintiff asserts that abstention is not appropriate here because the Wisconsin Supreme Court declined to grant original jurisdiction over a separately filed case that alleges many of the same state law violations alleged by Plaintiff. (Dkt. 72 at 29) He concludes that because the Wisconsin Supreme Court issued its denial, the Court refuses to resolve the state law issues. (*Id.* at 29-30) Thus, he argues, it is entirely appropriate for this federal Court to exercise jurisdiction over this matter because "there is no current state court proceeding addressing these issues." (*Id.* at 30) This conclusion is wrong for two reasons. First, Plaintiff ignores the fact that the Wisconsin Supreme Court refused to exercise original jurisdiction over the claims not because it refused to interpret state law, but because the petition was "woefully deficient" and therefore not appropriate for the Court to take up. *Wis. Voters Alliance v. Wis. Elections Comm'n*, No. 2020AP1930-OA, Order at *3 (Wis. Dec. 4, 2020) (Hagedorn, J. concurring in denial of petition for original action, joined by a majority of the Justices) (noting that one reason petition for original action was "woefully deficient" was because it failed to "consider the import of election statutes that may provide the 'exclusive remedy,'" namely, Wis. Stat. §§ 5.05(2m) and 9.01)

(provided at Dkt. 55-1). Failure on the part of petitioners in a state case to sufficiently plead does not render the doctrine of abstention inapplicable.

Second, as noted above, while the Wisconsin Supreme Court refused original jurisdiction, it is simply not true that *no* Wisconsin court is willing to review these state-law issues. To the contrary, a recount which alleges many of the same state law claims is currently being appealed in a Wisconsin trial court. Thus, state courts are currently addressing the issues cited by Plaintiff, and this Court should abstain from exercising jurisdiction over Plaintiff's complaint.

CONCLUSION

As the Third Circuit recently held, "[v]oters, not lawyers, choose the President. Ballots, not briefs, decide election." *Donald J. Trump for President, Inc. v. Sec'y of the Commonwealth of Pa.*, No. 20-3371, 2020 WL 7012522, at *9 (3d Cir. Nov. 27, 2020). Like other cases that have been brought in the wake of the 2020 election, Plaintiff's case is nothing more than an effort to win through litigation or legislative fiat a result that could not be won at the polls. This unconscionable attack on American democracy cannot be permitted to proceed any further. Plaintiff's claims should be dismissed with prejudice.

Respectfully submitted this 9th day of December 2020.

AMERICAN COMMERCIAL BARGE LINES, LLC., a Delaware Limited Liability Company, Plaintiff,
v.
RESERVE FTL, INC., an Ohio corporation, d/b/a Reserve Marine Terminal, Defendant.

No. 01 C 5858.
|
Dec. 3, 2002.

MEMORANDUM OPINION AND ORDER

HIBBLER, J.

***1** This admiralty and maritime action arises out of the sinking of a barge owned by Plaintiff American Commercial Barge Lines, L.L.C. ("ACBL"), while docked in a wharf operated by Defendant Reserve FTL, Inc. ("Reserve"). Although the sinking incident occurred in 1994, ACBL did not file this lawsuit against Reserve, alleging negligence, breach of Stevedore's duty and bailment, until July 2001. Reserve now moves to dismiss ACBL's complaint pursuant to Fed.R.Civ.P. 12(b)(6) based on the equitable defense of laches. For the following reasons, the Court concludes Reserve's motion to dismiss must be converted to a motion for summary judgment under Fed.R.Civ.P. 56(c), and holds that, at this stage in the litigation, the request for summary judgment is premature.

STANDARD OF REVIEW

Before turning to the particulars of the case, it is necessary to first consider whether Reserve's motion seeks relief under Rule 12(b)(6) or Rule 56(c). Ordinarily a motion to dismiss is not the appropriate vehicle to raise the defense of laches. *See Farries v. Stanadyne/Chicago Div.,* 832 F.2d 374, 376 (7th Cir.1987) (upholding district court's conversion of Rule 12(b)(6) motion to a Rule 56(c) motion); *Svec v. Board of Trustees of Teamsters Local Union No. 727 Pension Fund,* No., 02C1640, 2002 WL 1559640, at *2 (N.D.Ill. July 16, 2002); *Abbott Labs. v. CVS Pharmacy, Inc.,* Nos. 01C2772 & 01C2784, 2001 WL 777060, at *3 (N.D.Ill. July 11, 2001). Indeed, "the defense of laches ... involves more than the mere lapse of time and depends largely upon questions of fact." 5 CHARLES ALAN WRIGHT & ARTHUR R. MILLER, FEDERAL PRACTICE AND PROCEDURE § 1277 (2d ed.1987). As such, unless laches is apparent on the face of the complaint, most courts have found the defense "unsuitable for resolution at the pleading stage." *Abbott Labs.,* 2001 WL 777060, at *3–4.

While Reserve styled its motion as a request for dismissal for failure to state a claim, in support of the argument that the elements of laches (i.e., inexcusable delay and undue prejudice) are present in this case, Reserve also submitted for consideration documents that fall outside the four corners of the complaint. According to Rule 12(b), whenever "matters outside the pleadings are presented to and not excluded by the court, [a 12(b)(6)] motion shall be treated as one for summary judgment and disposed of as provided in Rule 56, and all parties shall be given reasonable opportunity to present all material made pertinent to such motion by Rule 56." ACBL then responded to Reserve's motion by presenting two volumes of exhibits in its defense, as well as a First Amended Complaint setting forth further details about the events that transpired between the parties prior to the filing of this lawsuit. Reserve, in its reply, noted that ACBL appeared to be treating the motion as one for summary judgment, and thus explained that it intended to attack the sufficiency of ACBL's pleadings. Nevertheless, Reserve attached several exhibits—deposition transcripts and affidavits—to the reply in support of its motion.

***2** It is clear, then, that regardless of the title on the motion, the parties have proceeded as if the Court were considering the propriety of summary judgment. Indeed, each side has relied heavily upon discovery materials to substantiate its argument on the laches question. Consequently, the Court believes it appropriate to convert Reserve's motion to dismiss to a motion for summary judgment, and decide if the record shows there is no genuine issue as to any material fact and Reserve is entitled to judgment as a matter of law on its claim that ACBL's suit is barred by laches. *See Celotex Corp. v. Catrett,* 477 U.S. 317, 322 (1986); Fed.R.Civ.P. 56(c). In making this determination, the Court views all facts and inferences in the light most favorable to the non-moving party.

Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 246 (1986). Further, a genuine issue of material fact will be found to exist where the dispute over facts might affect the outcome of the lawsuit and there is sufficient evidence to support a jury verdict for the nonmoving party. *Id.* at 248.

BACKGROUND[1]

This controversy arose on October 26, 1994, when a barge owned by ACBL that was docked at or near Reserve's wharf and under Reserve's exclusive care, custody and control for the purpose of loading cargo of metal slag, sank. Shortly thereafter, ACBL prepared a notice of claim and sent it to Mr. Hal Tolin ("Tolin") at Reserve. In addition, ACBL engaged the law firm of Keck, Mahin and Cate ("Keck") to represent its interests in the claims process.

In April 1995, Paul Tobin ("Tobin"), a claims adjuster at MG Bush & Associates, Inc. ("MG Bush"), informed ACBL's assigned claims representative for the file, Larry Grieb ("Grieb"), that all matters concerning the Barge sinking should be directed to his attention, as MG Bush was adjusting the claim on behalf of Reserve's insurer. Tobin also stated that he expected the parties should be able to resolve the claim "amicably." Tobin likewise indicated to Michael Ash, Grieb's supervisor, that he believed Reserve's underwriters intended to resolve the claim without litigation. In June and September 1995, Tobin wrote to ACBL inquiring if its claim for damages had been formulated, and stating that Reserve "would like every opportunity to amicably resolve this claim short of litigation, if at all possible."

It appears that ACBL and MG Bush did not correspond further concerning the claim until December 1997, when ACBL finally sent a claims package to Tobin. Receiving no response from Tobin at MG Bush, ACBL forwarded the claims package directly to Tolin at Reserve in January 1998. In early March 1998, John Stickling, a senior adjuster at MG Bush, wrote ACBL requesting further information with respect to the damages claim.

In July 1999, ACBL sent MG Bush the additional materials sought and responded to the questions posed. MG Bush replied that the claim was being forwarded to defense counsel for review, and reiterated a desire to settle the matter without resorting to litigation. After further unsuccessful attempts to follow up with MG Bush regarding the status of the claim, ACBL filed this action in July 2001.

ANALYSIS

***3** "The doctrine of laches is derived from the maxim that those who sleep on their rights, lose them." *Chattanoga Mfg., Inc. v. Nike, Inc.,* 301 F.3d 789, 792 (7th Cir.2002). Indeed, the equitable defense of laches is "concerned principally with the fairness of permitting a claim to be enforced." *Zelazny v. Lyng,* 853 F.2d 540, 541 (7th Cir.1988). Illinois law imposes a five year statute of limitations for suits to recover for property damages. *See* 735 ILCS 5/13–205. Further, the cause of action accrues and the statute of limitations begins to run when there is actual knowledge that both a physical problem exists and that someone may be at fault for its existence. *See Carey v. Kerr–McGee Chem. Corp.,* 999 F.Supp. 1109, 1115 (N.D.Ill.1998).

It is undisputed that ACBL submitted notice to Reserve of a possible claim shortly after the sinking of the barge in October 1994, but that ACBL did not file this lawsuit until July 2001, six years and nine months later. Because the analogous state statute of limitations governing ACBL's damages claim has run, there is a presumption that this action is barred under the doctrine of laches. *See Hot Wax, Inc. v. Turtle Wax, Inc.,* 191 F.3d 813, 821 (7th Cir.1999); *Conopco, Inc. v. Campbell Soup Co.,* 95 F.3d 187, 191 (2d Cir.1996). Nevertheless, to prevail on its laches defense here, Reserve must demonstrate: 1) an unreasonable lack of diligence by ACBL in bringing suit; and 2) prejudice arising from that delay. *See e.g., Hot Wax, Inc.,* 191 F.3d at 822.

A. Unreasonable Lack of Diligence

Reserve argues that ACBL's delay in filing this lawsuit—almost two years after the expiration of the analogous state limitations period—is inexcusable. ACBL counters that its delay should be excused because it was lulled into inaction by the representations of MG Bush, on behalf of Reserve, of an intent to resolve the dispute without resorting to litigation. ACBL focuses primarily on the July 1999 letter, which states not only that the additional information requested had been received and the claim was under review, but also expresses a desire to settle rather than litigate the matter. ACBL maintains Reserve should be equitably estopped from raising the laches defense because this representation, made only three months prior to the expiration of the five year statute of limitations, induced ACBL to forgo filing a lawsuit.

ACBL correctly states that the Seventh Circuit has indicated "attempts to resolve a dispute without resorting to a court do not constitute unreasonable delay." *Leonard v. United Air Lines, Inc.,* 972 F.2d 155, 158 (7th Cir.1992). However, that rule was invoked in a case where the court specifically noted that the time plaintiff spent pursuing internal administrative remedies to recover lost pension benefits should be excluded from the delay analysis. *See id.* The situation here is clearly distinguishable. Consequently, ACBL must produce sufficient evidence to demonstrate it was induced to forbear litigation until after the statute of limitations had expired.

***4** Even construing all the facts in ACBL's favor as it must, the Court finds ACBL's claim of excusable delay weak. The representations ACBL claims to have relied upon express nothing more than a desire for amicable settlement. Unlike *United States v. Continental Cas. Co.,* 357 F.Supp. 795, 800 (E.D.La.1983), a case relied upon by ACBL, the record does not reflect any promises by Reserve to pay out the claim at the conclusion of its investigation. Nor is there any evidence of actual settlement efforts or negotiations between the parties concerning the amount of damages, as in *Windjammer Cruises, Inc. v. Paradise Cruises, Ltd.,* No. 93–00190ACK, 1993 WL 732431, at *3 (D. Hawaii June 8, 1993), another case ACBL points to as supporting authority for its position. Furthermore, those representations were first made within a year after Reserve received notice of the claim, and then again almost four years later after MG Bush had finally obtained all of the information it needed to fully consider the damages claim. Thus, there is no evidence of ongoing discussions throughout the limitations period about forthcoming payment or settlement that would permit the Court to infer ACBL was induced not to act until almost two years after the statute of limitations had expired. *See e.g., United States v. Reliance Ins. Co.,* 436 F.2d 1366, 1370 (10th Cir.1971). However, notwithstanding the Court's concerns about ACBL's diligence in asserting its legal rights here, it is not necessary to decide if the delay was excusable since laches will not apply, even in the face of inexcusable delay, unless there is also a showing of prejudice as a result of the delay. *See Hot–Wax,* 191 F.3d at 824.

B. Resultant Prejudice

Prejudice "ensues when a defendant has changed his position in a way that would have occurred if the plaintiff had not delayed." *Conopco, Inc. v. Campbell Soup Co.,* 95 F.3d 187, 192 (2nd Cir.1996). Reserve maintains that due to ACBL's delay in filing its lawsuit, an evidentiary prejudice arises because it will be unable to put on a fair defense in light of the passage of time. Specifically, Reserves argues that it has changed its records storage systems, facilities and most of its employees since these claims accrued, and that necessary records have been lost or destroyed in the regular course of business. As a result, Reserve claims, it has been unable to identify and locate both documents and witnesses.

In response, ACBL counters that MG Bush thoroughly investigated the claim when the barge sank and the results of that investigation have been preserved in a written report which was produced in discovery. Indeed, the report identifies all employees who were involved in any fashion in the incident, and sets forth detailed interviews of the witnesses, thereby preserving their recollection of the events, as well as their dates of birth and social security numbers. Moreover, Carrier Marine, Inc., which acted as a marine surveyor on behalf of Reserve after the sinking and was present throughout the salvage efforts of the barge, also took detailed notes concerning the damage to the barge, the position of the barge after sinking, and the disposition of the cargo in the barge as a result of the incident, all of which have been produced in discovery.

***5** Given the availability of the written report and surveyor's notes, the Court cannot say, as a matter of law, that Reserve has established an inability to defend this action. *See e.g., Turner v.. American Dredging Co.,* 407 F.Supp. 1047, 1053 (E.D.Penn.1976). Certainly there are some witnesses whose memories of this incident will have dimmed, but that possibility, standing alone, is not enough to find resultant prejudice, particularly since detailed statements from many key witnesses have been preserved.

The Court recognizes discovery has only begun in this case and that other facts may come to light that bear on the issue of prejudice to Reserve. Consequently, the Court will not preclude Reserve from asserting a laches defense at a more appropriate time when the record has been developed further. However, upon consideration of the limited record that currently exists, the Court finds it insufficient to demonstrate that ACBL's delay in filing this lawsuit to recover damages for the sunken barge warrants application of the laches defense. Reserve's motion for summary judgment is therefore denied.

IT IS SO ORDERED.

DONALD J. TRUMP FOR PRESIDENT, INC.; Lawrence Roberts; David John Henry, Appellants

v.

SECRETARY Commonwealth OF PENNSYLVANIA; Allegheny County Board of Elections; Centre County Board of Elections; Chester County Board of Elections; Delaware County Board of Elections; Montgomery County Board of Elections; Northampton County Board of Elections; Philadelphia County Board of Elections

No. 20-3371
|
Submitted Under Third Circuit
L.A.R. 34.1(a) on November 25, 2020
|
(Filed: November 27, 2020)

Synopsis

Background: Voters and President's reelection campaign brought action against Secretary of the Commonwealth of Pennsylvania and county boards of elections, seeking to invalidate millions of votes cast by Pennsylvanians in presidential election during COVID-19 pandemic based on allegations that Secretary's authorization of notice-and-cure procedure for procedurally defective mail-in ballots violated the Equal Protection Clause and that poll watchers were impermissibly excluded from canvass. The United States District Court for the Middle District of Pennsylvania, Matthew W. Brann, J., 2020 WL 6821992, granted motion by Secretary and county boards of elections to dismiss. Voters and campaign appealed.

Holdings: The Court of Appeals, Bibas, Circuit Judge, held that:

delay by President's reelection campaign in moving to amend complaint second time was undue;

second amendment of complaint would have been futile;

county-to-county variations in processing votes from election did not show discrimination;

failure of President's reelection campaign to request injunction pending appeal from district court or show that it could not have made that request barred campaign from pursuing that motion on appeal;

campaign likely could not succeed on merits;

campaign likely would not suffer irreparable harm; and

granting relief would not have been equitable.

Affirmed.

On Appeal from the United States District Court for the Middle District of Pennsylvania (D.C. No. 4:20-cv-02078), District Judge: Honorable Matthew W. Brann

OPINION[*]

BIBAS, Circuit Judge.

***1** Free, fair elections are the lifeblood of our democracy. Charges of unfairness are serious. But calling an election unfair does not make it so. Charges require specific allegations and then proof. We have neither here.

The Trump Presidential Campaign asserts that Pennsylvania's 2020 election was unfair. But as lawyer Rudolph Giuliani stressed, the Campaign "doesn't plead fraud. ... [T]his is not a fraud case." Mot. to Dismiss Hr'g Tr. 118:19–20, 137:18. Instead, it objects that Pennsylvania's Secretary of State and some counties restricted poll watchers and let voters fix technical defects in their mail-in ballots. It offers nothing more.

This case is not about whether those claims are true. Rather, the Campaign appeals on a very narrow ground: whether the District Court abused its discretion in not letting the Campaign amend its complaint a second time. It did not.

Most of the claims in the Second Amended Complaint boil down to issues of state law. But Pennsylvania law is willing to overlook many technical defects. It favors counting votes as long as there is no fraud. Indeed, the Campaign has already litigated and lost many of these issues in state courts.

The Campaign tries to repackage these state-law claims as unconstitutional discrimination. Yet its allegations are vague and conclusory. It never alleges that anyone treated the Trump campaign or Trump votes worse than it treated the Biden campaign or Biden votes. And federal law does not require poll watchers or specify how they may observe. It also says nothing about curing technical state-law errors in ballots. Each of these defects is fatal, and the proposed Second Amended Complaint does not fix them. So the District Court properly denied leave to amend again.

Nor does the Campaign deserve an injunction to undo Pennsylvania's certification of its votes. The Campaign's claims have no merit. The number of ballots it specifically challenges is far smaller than the roughly 81,000-vote margin of victory. And it never claims fraud or that any votes were cast by illegal voters. Plus, tossing out millions of mail-in ballots would be drastic and unprecedented, disenfranchising a huge swath of the electorate and upsetting all down-ballot races too. That remedy would be grossly disproportionate to the procedural challenges raised. So we deny the motion for an injunction pending appeal.

I. Background

A. Pennsylvania election law

In Pennsylvania, each county runs its own elections. 25 Pa. Stat. § 2641(a). Counties choose and staff polling places. § 2642(b), (d). They buy their own ballot boxes and voting booths and machines. § 2642(c). They even count the votes and post the results. § 2642(k), (*l*). In all this, counties must follow Pennsylvania's Election Code and regulations. But counties can, and do, adopt rules and guidance for election officers and electors. § 2642(f). And they are charged with ensuring that elections are "honestly, efficiently, and uniformly conducted." § 2642(g).

1. *Poll watchers and representatives*. Counties must admit qualified poll "watchers" to observe votes being tallied. 25 Pa. Stat. § 2650(a). Poll watchers must be registered to vote in the county where they will serve. § 2687(b). Each candidate can pick two poll watchers per election district; each political party, three. § 2687(a). The poll watchers remain at the polling place while election officials count in-person ballots. § 2687(b). They can ask to check voting lists. *Id.* And they get to be present when officials open and count all the mail-in ballots. § 3146.8(b). Likewise, candidates' and political parties' "representatives" may be present when absentee and mail-in ballots are inspected, opened, or counted, or when provisional ballots are examined. §§ 2602(a.1), (q.1), 3050(a.4)(4), 3146.8(g)(1.1) & (2); *see also* § 3050(a.4)(12) (defining provisional ballots as those cast by voters whose voter registration cannot be verified right away).

***2** Still, counties have some control over these poll watchers and representatives. The Election Code does not tell counties how they must accommodate them. Counties need only allow them "in the polling place" or "in the room" where ballots are being inspected, opened, or counted. §§ 2687(b), 3050(a.4)(4), 3146.8(g)(1.1) & (2). Counties are expected to set up "an enclosed space" for vote counters at the polling place, and poll watchers "shall remain outside the enclosed space." § 2687(b). So the counties decide where the watchers stand and how close they get to the vote counters.

2. *Mail-in ballots*. For decades, Pennsylvania let only certain people, like members of the military and their families, vote by mail. *See, e.g.*, 25 Pa. Stat. § 3146.1. But last year, as part of a bipartisan election reform, Pennsylvania expanded mail-in voting. Act of Oct. 31, 2019, Pub. L. No. 552, sec. 8, § 1310-D, 2019 Pa. Legis. Serv. Act 2019-77 (S.B. 421). Now, any Pennsylvania voter can vote by mail for any reason. *See* 25 Pa. Stat. §§ 2602(t), 3150.11(a).

To vote by mail, a Pennsylvania voter must take several steps. First, he (or she) must ask the State (Commonwealth) or his county for a mail-in ballot. 25 Pa. Stat. § 3150.12(a). To do that, he must submit a signed application with his name, date of birth, address, and other information. § 3150.12(b)–(c). He must also provide a driver's license number, the last four digits of his Social Security number, or the like. §§ 2602(z.5), 3150.12b(a), (c). Once the application is correct and complete, the county will approve it. *See* §§ 3150.12a(a), 3150.12b.

Close to the election, the county will mail the voter a mail-in ballot package. § 3150.15. The package has a ballot and two envelopes. The smaller envelope (also called the secrecy envelope) is stamped "Official Election Ballot." § 3150.14(a). The larger envelope is stamped with the county board of election's name and address and bears a printed voter declaration. *Id.*

Next, the voter fills out the ballot. § 3150.16(a). He then folds the ballot; puts it into the first, smaller secrecy envelope; and seals it. *Id.* After that, he puts the secrecy envelope inside the larger envelope and seals that too. *Id.* He must also "fill out,

date and sign the declaration printed" on the outside of the larger envelope. §§ 3150.16(a), 3150.14(b). The declaration for the November 2020 election read thus:

> I hereby declare that I am qualified to vote from the below stated address at this election; that I have not already voted in this election; and I further declare that I marked my ballot in secret. I am qualified to vote the enclosed ballot. I understand I am no longer eligible to vote at my polling place after I return my voted ballot. However, if my ballot is not received by the county, I understand I may only vote by provisional ballot at my polling place, unless I surrender my balloting materials, to be voided, to the judge of elections at my polling place.

In re: Canvass of Absentee and Mail-in Ballots of November 3, 2020 General Election, Nos. 31–35 EAP & 29 WAP 2020,—— A.3d ——, ——, 2020 WL 6875017, at *4 (Pa. Nov. 23, 2020). Once the voter assembles the ballot packet, he can mail it back or deliver it in person. 25 Pa. Stat. § 3150.16(a).

Not every voter can be expected to follow this process perfectly. Some forget one of the envelopes. Others forget to sign on the dotted line. Some major errors will invalidate a ballot. For instance, counties may not count mail-in ballots that lack secrecy envelopes. *Pa. Dem. Party v. Boockvar*, 238 A.3d 345, 378–80 (Pa. 2020). But the Election Code says nothing about what should happen if a county notices these errors before election day. Some counties stay silent and do not count the ballots; others contact the voters and give them a chance to correct their errors.

B. Facts and procedural history

***3** On appeal from the dismissal of a complaint, we take the factual allegations as true:

1. *Mail-in voting*. For months, Pennsylvanians went to the polls, so to speak. The first batch of mail-in ballots went out to voters in late September. As they trickled back in, election officials noticed that some voters had not followed the rules. Some ballots were not in secrecy envelopes, so those packages were lighter and thinner than complete ballot packages. Others had declarations that voters had not completed. Some counties did not notify voters about these defective ballots. Others, including the counties named in this suit, decided to reach out to these voters to let them cure their mistakes by voting provisionally on Election Day or asking for a replacement ballot.

2. *Election Day*. Though more than two million Pennsylvanians voted by mail, even more voted in person. On Election Day, November 3, the Campaign set up poll watchers at polling places around the Commonwealth. Appellees' election officials kept poll watchers and representatives away from where ballots were opened, counted, and tallied. In Philadelphia, for instance, poll watchers were kept six to twenty-five feet back from officials. In comparison, other, "Republican[-]controlled" counties did give the Campaign's poll watchers and representatives full access. Second Am. Compl. ¶¶ 151, 154.

In all, nearly seven million Pennsylvanians voted, more than a third of them by mail. *Unofficial Returns for the 2020 Presidential Election*, Pa. Dep't of State, https://www.electionreturns.pa.gov/ (last visited Nov. 27, 2020). As of today, former Vice President Biden leads President Trump in Pennsylvania by 81,660 votes. *Id.*

Pennsylvania's counties certified their election results by the November 23 certification deadline. 25 Pa. Stat. § 2642(k). The next morning, the Secretary of State (technically, Secretary of the Commonwealth) certified the vote totals, and the Governor signed the Certificate of Ascertainment and sent it to the U.S. Archivist. *Department of State Certifies Presidential Election Results*, PA Media, https://www.media.pa.gov/Pages/State-details.aspx?newsid=435 (last visited Nov. 27, 2020). The certified margin of victory was 80,555 votes. *Id.*

3. *This lawsuit*. Almost a week after the election, the Campaign (as well as two voters) sued seven Pennsylvania counties and Secretary of State Kathy Boockvar. It alleged that they had violated the Due Process, Equal Protection, and Electors and Elections Clauses of the U.S. Constitution by taking two basic actions: First, the counties (encouraged

by Secretary Boockvar) identified defective mail-in ballots early and told voters how to fix them. Second, they kept poll watchers and representatives from watching officials count all ballots.

So far, the Campaign has filed or tried to file three complaints. The original Complaint, filed November 9, set out six counts (plus a duplicate). After Boockvar and the counties moved to dismiss, on November 15 the Campaign filed a First Amended Complaint as of right, dropping four of the six counts (plus the duplicate), including all the counts relating to poll watchers and representatives. The Campaign sought a preliminary injunction to block certifying the election results. Boockvar and the counties again moved to dismiss. On November 18, the Campaign sought to file a Second Amended Complaint, resurrecting four dropped claims from the original Complaint and adding three more about how Philadelphia had blocked poll watching.

***4** The District Court ended these volleys, denying leave to file the Second Amended Complaint. Instead, it dismissed the First Amended Complaint with prejudice and denied the Campaign's motion for a preliminary injunction as moot. *Donald J. Trump for President, Inc. v. Boockvar*, No. 4:20-cv-02078, —— F. Supp. 3d ——, 2020 WL 6821992 (M.D. Pa. Nov. 21, 2020). In doing so, it held that the individual voters lacked standing. *Id.* at ——, at *5–6. We commend the District Court for its fast, fair, patient handling of this demanding litigation.

4. *This appeal*. The Campaign filed this appeal on Sunday, November 22, and we granted its motion to expedite. The Campaign filed its brief and another motion November 23; opposing briefs and filings arrived the next day. We are issuing this opinion nonprecedentially so we can rule by November 27.

The Campaign does not challenge the District Court's finding that the voters lacked standing, so we do not consider their claims. On appeal, it seeks only narrow relief: to overturn the District Court's decision not to let it amend its complaint again. We address that claim in Part II. Separately, the Campaign asks us for an injunction to prevent the certified vote totals from taking effect. We address that claim in Part III.

II. The District Court Properly Denied Leave To Amend the Complaint Again

After one amendment, the District Court denied the Campaign's motion to amend the complaint a second time. We review that denial for abuse of discretion. *Premier Comp. Sol., LLC v. UPMC*, 970 F.3d 316, 318–19 (3d Cir. 2020). But on any standard of review, the court got it right.

Courts should grant leave to amend "freely ... when justice so requires." Fed. R. Civ. P. 15(a)(2). In civil-rights cases, that means granting leave unless "amendment would be futile or inequitable." *Vorchheimer v. Phila. Owners Ass'n*, 903 F.3d 100, 113 (3d Cir. 2018); *Cureton v. NCAA*, 252 F.3d 267, 272–73 (3d Cir. 2001) (giving undue delay as an example of inequity). Here, the Campaign's request fails as both inequitable and futile.

A. The Campaign's delay was undue, given its stress on needing to resolve the case by November 23

When the Campaign was before the District Court, it focused its arguments on the need to resolve the case by Pennsylvania's deadline for counties to certify their votes: Monday, November 23. Indeed, all three iterations of the complaint focused their prayers for relief on blocking the certification of the vote tally. The Campaign said it could get no "meaningful remedy" after that date. Br. in Supp. of Mot. for TRO & PI, Dkt. 89-1, at 4.

The Campaign filed its First Amended Complaint on November 15, eight days before the certification deadline. In response to several pending motions to dismiss, it dropped many of the challenged counts from the original Complaint. It did not then move to file a Second Amended Complaint until November 18, when its opposition to the new motions to dismiss was due. And it did not file a brief in support of that motion until Friday, November 20. Certification was three days away.

As the District Court rightly noted, amending that close to the deadline would have delayed resolving the issues. True, delay alone is not enough to bar amendment. *Cureton*, 252 F.3d at 273. But "at some point, the delay will become 'undue,' placing an unwarranted burden on the court." *Id.* (quoting *Adams v. Gould, Inc.*, 739 F.2d 858, 868 (3d Cir. 1984)). The Campaign's motion would have done just that. It would have mooted the existing motions to dismiss and required new

briefing, possibly new oral argument, and a reasoned judicial opinion within seventy-two hours over a weekend. That is too much to ask—especially since the proposed Second Amended Complaint largely repleaded many claims abandoned by the first one. *Cf. Rolo v. City Investing Co. Liquidating Tr.*, 155 F.3d 644, 654–55 (3d Cir. 1998) (affirming denial of leave to amend because the movant sought largely to "replead facts and arguments that could have been pled much earlier").

***5** Having repeatedly stressed the certification deadline, the Campaign cannot now pivot and object that the District Court abused its discretion by holding the Campaign to that very deadline. It did not.

B. Amending the Complaint again would have been futile

The Campaign focuses on critiquing the District Court's discussion of undue delay. Though the court properly rested on that ground, we can affirm on any ground supported by the record. Another ground also supports its denial of leave to amend: it would have been futile.

1. *The Campaign had to plead plausible facts, not just conclusory allegations*. Plaintiffs must do more than allege conclusions. Rather, "a complaint must contain sufficient factual matter, accepted as true, to 'state a claim to relief that is plausible on its face.' " *Ashcroft v. Iqbal*, 556 U.S. 662, 678, 129 S.Ct. 1937, 173 L.Ed.2d 868 (2009) (quoting *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570, 127 S.Ct. 1955, 167 L.Ed.2d 929 (2007)). "Threadbare recitals of the elements of a cause of action, supported by mere conclusory statements, do not suffice." *Id.* The Second Amended Complaint does not meet *Twombly* and *Iqbal*'s baseline standard of specifics.

To start, note what it does not allege: fraud. Indeed, in oral argument before the District Court, Campaign lawyer Rudolph Giuliani conceded that the Campaign "doesn't plead fraud." Mot. to Dismiss Hr'g Tr. 118:19–20 (Nov. 17, 2020). He reiterated: "If we had alleged fraud, yes, but this is not a fraud case." *Id.* at 137:18.

Though it alleges many conclusions, the Second Amended Complaint is light on facts. Take the nearly identical paragraphs introducing Counts One, Two, Four, and Six: "Democrats who controlled the Defendant County Election Boards engaged in a deliberate scheme of intentional and purposeful discrimination ... by excluding Republican and Trump Campaign observers from the canvassing of the mail ballots in order to conceal their decision not to enforce [certain ballot] requirements." Second Am. Compl. ¶¶167, 193, 222, 252. That is conclusory. So is the claim that, "[u]pon information and belief, a substantial portion of the approximately 1.5 million absentee and mail votes in Defendant Counties should not have been counted." *Id.* ¶¶168, 194, 223, 253. "Upon information and belief" is a lawyerly way of saying that the Campaign does not know that something is a fact but just suspects it or has heard it. "While legal conclusions can provide the framework of a complaint, they must be supported by factual allegations." *Iqbal*, 556 U.S. at 679, 129 S.Ct. 1937. Yet the Campaign offers no specific facts to back up these claims.

2. *The Campaign has already litigated and lost most of these issues*. Many of the Second Amended Complaint's claims have already had their day in court. The Campaign cannot use this lawsuit to collaterally attack those prior rulings. On Counts One, Two, Four, and Six, the Campaign has already litigated whether ballots that lack a handwritten name, address, or date on the outer envelope must be disqualified. *See In re: Canvass of Absentee and Mail-in Ballots*, —— A.3d at ——, 2020 WL 6875017, at *1. The Pennsylvania Supreme Court ruled against the Campaign, holding: "[T]he Election Code does not require boards of elections to disqualify mail-in or absentee ballots submitted by qualified electors who signed the declaration on their ballot's outer envelope but did not handwrite their name, their address, and/or date, where no fraud or irregularity has been alleged." *Id.* at ——, at *1. That holding undermines the Campaign's suggestions that defective ballots should not have been counted.

***6** Counts One and Two also challenge the requirement that poll watchers be registered electors of the county they wish to observe and that observers be Pennsylvania lawyers. But a federal district court has already held "that the county-residency requirement for poll watching does not, as applied to the particular circumstances of this election, burden any of [the Campaign's] fundamental constitutional rights." *Donald J. Trump for President, Inc. v. Boockvar*, No. 2:20-cv-966, —— F. Supp. 3d ——, ——, 2020 WL 5997680, at *66 (W.D. Pa. Oct. 10, 2020). The Campaign never appealed that decision, so it is bound by it.

Count Seven alleges that Philadelphia's Board of Elections violated due process by obstructing poll watchers and representatives. But nothing in the Due Process Clause requires having poll watchers or representatives, let alone watchers from outside a county or less than eighteen feet away from the nearest table. The Campaign cites no authority for

those propositions, and we know of none. (Ditto for notice-and-cure procedures.) And the Campaign litigated and lost that claim under state law too. The Pennsylvania Supreme Court held that the Election Code requires only that poll watchers be in the room, not that they be within any specific distance of the ballots. *In re Canvassing Observation Appeal of: City of Phila. Bd. of Electors*, No. 30 EAP 2020, —— A.3d ——, ——, 2020 WL 6737895, at *8–9 (Pa. Nov. 17, 2020).

The Campaign does not even challenge the dismissal of Counts Three, Five, and Nine, the Electors and Elections Clause counts. It concedes that under our recent decision, it lacks standing to pursue alleged violations of those clauses. *Bognet v. Sec'y Commonwealth of Pa.*, No. 20-3214, —— F.3d ——, ——, 2020 WL 6686120, at *6–9 (3d Cir. Nov. 13, 2020). Given its concession, we need not consider the issue any more.

The Second Amended Complaint thus boils down to the equal-protection claims in Counts Two, Four, Six, and Eight. They require not violations of state law, but discrimination in applying it. Those claims fail too.

3. *The Campaign never pleads that any defendant treated the Trump and Biden campaigns or votes differently.* A violation of the Equal Protection Clause requires more than variation from county to county. It requires unequal treatment of similarly situated parties. But the Campaign never pleads or alleges that anyone treated it differently from the Biden campaign. Count One alleges that the counties refused to credential the Campaign's poll watchers or kept them behind metal barricades, away from the ballots. It never alleges that other campaigns' poll watchers or representatives were treated differently. Count Two alleges that an unnamed lawyer was able to watch all aspects of voting in York County, while poll watchers in Philadelphia were not. It also makes a claim about one Jared M. Mellott, who was able to poll watch in York County. Counts Four and Six allege that poll watcher George Gallenthin had no issues in Bucks County but was barred from watching in Philadelphia. And Count Eight alleges that Philadelphia officials kept Jeremy Mercer too far away to verify that ballots were properly filled out. None of these counts alleges facts showing improper vote counting. And none alleges facts showing that the Trump campaign was singled out for adverse treatment. The Campaign cites no authority suggesting that an actor discriminates by treating people equally while harboring a partisan motive, and we know of none.

These county-to-county variations do not show discrimination. "[C]ounties may, consistent with equal protection, employ entirely different election procedures and voting systems within a single state." *Donald J. Trump for President, Inc.*, —— F. Supp. 3d at ——, 2020 WL 5997680, at *44 (collecting cases). Even when boards of elections "vary ... considerably" in how they decide to reject ballots, those local differences in implementing statewide standards do not violate equal protection. *Ne. Ohio Coal. for the Homeless v. Husted*, 837 F.3d 612, 635–36 (6th Cir. 2016); *see also Wexler v. Anderson*, 452 F.3d 1226, 1231–33 (11th Cir. 2006) (recognizing that equal protection lets different counties use different voting systems).

***7** Nor does *Bush v. Gore* help the Campaign. 531 U.S. 98, 121 S.Ct. 525, 148 L.Ed.2d 388 (2000) (per curiam). There, the Florida Supreme Court had ratified treating ballots unequally. *Id.* at 107, 121 S.Ct. 525. That was because the principle it set forth, the "intent of the voter," lacked *any* "specific standards to ensure its equal application." *Id.* at 105–06, 121 S.Ct. 525. The lack of any standards at all empowered officials to treat ballots arbitrarily, violating equal protection. *Id.* Here, by contrast, Pennsylvania's Election Code gives counties specific guidelines. To be sure, counties vary in implementing that guidance, but that is normal. Reasonable county-to-county variation is not discrimination. *Bush v. Gore* does not federalize every jot and tittle of state election law.

4. *The relief sought—throwing out millions of votes—is unprecedented.* Finally, the Second Amended Complaint seeks breathtaking relief: barring the Commonwealth from certifying its results or else declaring the election results defective and ordering the Pennsylvania General Assembly, not the voters, to choose Pennsylvania's presidential electors. It cites no authority for this drastic remedy.

The closest the Campaign comes to justifying the relief it seeks is citing *Marks v. Stinson*, 19 F.3d 873 (3d Cir. 1994). But those facts were a far cry from the ones here. In *Marks*, the district court found that the Stinson campaign had orchestrated "massive absentee ballot fraud, deception, intimidation, harassment and forgery." *Id.* at 887 (quoting district court's tentative findings). It had lied to voters, deceived election officials, and forged ballots. *Id.* at 877. We remanded that case, instructing that "the district court should not direct the certification of a candidate unless it finds, on the basis of record evidence, that the designated candidate would have won the election but for wrongdoing." *Id.* at 889. And that seemed likely: the Stinson campaign had gotten about

600 net absentee-ballot applications (roughly 1000 minus 400 that were later rejected), more than the 461-vote margin of victory. *Id.* at 876–77.

Here, however, there is no clear evidence of massive absentee-ballot fraud or forgery. On the contrary, at oral argument in the District Court, the Campaign specifically disavowed any claim of fraud. And the margin of victory here is not nearly as close: not 461 votes, but roughly 81,000.

Though district courts should freely give leave to amend, they need not do so when amendment would be futile. Because the Second Amended Complaint would not survive a motion to dismiss, the District Court properly denied leave to file it.

III. No Stay or Injunction Is Warranted

We could stop here. Once we affirm the denial of leave to amend, this case is over. Still, for completeness, we address the Campaign's emergency motion to stay the effect of certification. No stay or injunction is called for.

Though the Campaign styles its motion as seeking a stay or preliminary injunction, what it really wants is an injunction pending appeal. But it neither requested that from the District Court during the appeal nor showed that it could not make that request, as required by Federal Rule of Appellate Procedure 8(a)(2)(A). That failure bars the motion.

Even if we could grant relief, we would not. Injunctions pending appeal, like preliminary injunctions, are "extraordinary remed[ies] never awarded as of right." *Winter v. NRDC*, 555 U.S. 7, 24, 129 S.Ct. 365, 172 L.Ed.2d 249 (2008). For a stay or injunction pending appeal, the movant must show both (1) a "strong" likelihood of success on the merits and (2) irreparable injury absent a stay or injunction. *Hilton v. Braunskill*, 481 U.S. 770, 776, 107 S.Ct. 2113, 95 L.Ed.2d 724 (1987). The first two factors are "the most critical." *Nken v. Holder*, 556 U.S. 418, 434, 129 S.Ct. 1749, 173 L.Ed.2d 550 (2009). After that, we also balance (3) whether a stay or injunction will injure other interested parties (also called the balance of equities) and (4) the public interest. *Hilton*, 481 U.S. at 776, 107 S.Ct. 2113; *In re Revel AC, Inc.*, 802 F.3d 558, 568–71 (3d Cir. 2015). None of the four factors favors taking this extraordinary step.

A. The Campaign has no strong likelihood of success on the merits

***8** As discussed, the Campaign cannot win this lawsuit. It conceded that it is not alleging election fraud. It has already raised and lost most of these state-law issues, and it cannot relitigate them here. It cites no federal authority regulating poll watchers or notice and cure. It alleges no specific discrimination. And it does not contest that it lacks standing under the Elections and Electors Clauses. These claims cannot succeed.

B. The Campaign faces no irreparable harm

The Campaign has not shown that denying relief will injure it. "Upon information and belief," it suspects that many of the 1.5 million mail-in ballots in the challenged counties were improperly counted. Second Am. Compl. ¶¶168, 194, 223, 253. But it challenges no specific ballots. The Campaign alleges only that at most three specific voters cast ballots that were not counted. *Id.* ¶237 (one voter); First Am. Compl. ¶¶15–16, 112 (three). And it never alleges that anyone except a lawful voter cast a vote. Of the seven counties whose notice-and-cure procedures are challenged, four (including the three most populous) represented that they gave notice to only about 6,500 voters who sent in defective ballot packages. Allegheny Cty. Opp. Mot. TRO & PI 7–8, D. Ct. Dkt. No. 193 (Nov. 20, 2020). The Campaign never disputed these numbers or alleged its own. Even if 10,000 voters got notice and cured their defective ballots, and every single one then voted for Biden, that is less than an eighth of the margin of victory.

Without more facts, we will not extrapolate from these modest numbers to postulate that the number of affected ballots comes close to the certified margin of victory of 80,555 votes. Denying relief will not move the needle.

Plus, states are primarily responsible for running federal elections. U.S. Const. art. I, § 4, cl. 1; 3 U.S.C. § 5. Pennsylvania law has detailed mechanisms for disputing election results. 25 Pa. Stat. §§ 3261–3474. Because the Campaign can raise these issues and seek relief through state courts and then the U.S. Supreme Court, any harm may not be irreparable. *Touchston v. McDermott*, 234 F.3d 1130, 1132–33 (11th Cir. 2000) (per curiam) (en banc).

C. The balance of equities opposes disenfranchising voters

Nor would granting relief be equitable. The Campaign has already litigated and lost most of these issues as garden-variety state-law claims. It now tries to turn them into federal constitutional claims but cannot. *See Bognet*, —— F.3d at ——, 2020 WL 6686120, at *11.

Even if it could, it has delayed bringing this suit. For instance, in proposed Count Four, it challenges giving voters notice and letting them cure ballot defects as violating equal protection. The Campaign could have disputed these practices while they were happening or during the canvassing period. Instead, it waited almost a week after Election Day to file its original complaint, almost another week to amend it, and then another three days to amend it again. Its delay is inequitable, and further delay would wreak further inequity.

And the Campaign's charges are selective. Though Pennsylvanians cast 2.6 million mail-in ballots, the Campaign challenges 1.5 million of them. It cherry-picks votes cast in "Democratic-heavy counties" but not "those in Republican-heavy counties." Second Am. Compl. ¶8. Without compelling evidence of massive fraud, not even alleged here, we can hardly grant such lopsided relief.

Granting relief would harm millions of Pennsylvania voters too. The Campaign would have us set aside 1.5 million ballots without even alleging fraud. As the deadline to certify votes has already passed, granting relief would disenfranchise those voters or sidestep the expressed will of the people. Tossing out those ballots could disrupt every down-ballot race as well. There is no allegation of fraud (let alone proof) to justify harming those millions of voters as well as other candidates.

D. The public interest favors counting all lawful voters' votes

***9** Lastly, relief would not serve the public interest. Democracy depends on counting all lawful votes promptly and finally, not setting them aside without weighty proof. The public must have confidence that our Government honors and respects their votes.

What is more, throwing out those votes would conflict with Pennsylvania election law. The Pennsylvania Supreme Court has long "liberally construed" its Election Code "to protect voters' right to vote," even when a ballot violates a technical requirement. *Shambach v. Bickhart*, 577 Pa. 384, 845 A.2d 793, 802 (2004). "Technicalities should not be used to make the right of the voter insecure." *Appeal of James*, 377 Pa. 405, 105 A.2d 64, 66 (1954) (internal quotation marks omitted). That court recently reiterated: "[T]he Election Code should be liberally construed so as not to deprive, *inter alia*, electors of their right to elect a candidate of their choice." *Pa. Dem. Party*, 238 A.3d at 356. Thus, unless there is evidence of fraud, Pennsylvania law overlooks small ballot glitches and respects the expressed intent of every lawful voter. *In re: Canvass of Absentee and Mail-in Ballots*, 2020 WL 6875017, at *1 (plurality opinion). In our federalist system, we must respect Pennsylvania's approach to running elections. We will not make more of ballot technicalities than Pennsylvania itself does.

* * * * *

Voters, not lawyers, choose the President. Ballots, not briefs, decide elections. The ballots here are governed by Pennsylvania election law. No federal law requires poll watchers or specifies where they must live or how close they may stand when votes are counted. Nor does federal law govern whether to count ballots with minor state-law defects or let voters cure those defects. Those are all issues of state law, not ones that we can hear. And earlier lawsuits have rejected those claims.

Seeking to turn those state-law claims into federal ones, the Campaign claims discrimination. But its alchemy cannot transmute lead into gold. The Campaign never alleges that any ballot was fraudulent or cast by an illegal voter. It never alleges that any defendant treated the Trump campaign or its votes worse than it treated the Biden campaign or its votes. Calling something discrimination does not make it so. The Second Amended Complaint still suffers from these core defects, so granting leave to amend would have been futile.

And there is no basis to grant the unprecedented injunction sought here. First, for the reasons already given, the Campaign is unlikely to succeed on the merits. Second, it shows no irreparable harm, offering specific challenges to many fewer ballots than the roughly 81,000-vote margin of victory. Third, the Campaign is responsible for its delay and repetitive litigation. Finally, the public interest strongly favors finality, counting every lawful voter's vote, and not disenfranchising millions of Pennsylvania voters who voted by mail. Plus, discarding those votes could disrupt every other election on the ballot.

We will thus affirm the District Court's denial of leave to amend, and we deny an injunction pending appeal. The Campaign asked for a very fast briefing schedule, and we have

granted its request. Because the Campaign wants us to move as fast as possible, we also deny oral argument. We grant all motions to file overlength responses, to file amicus briefs, and to supplement appendices. We deny all other outstanding motions as moot. This Court's mandate shall issue at once.

End of Document

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff,

Case No. 20-cv-1771-pp

v.

WISCONSIN ELECTIONS COMMISSION, *et al.*,

Defendants.

ORDER DENYING JAMES GESBECK'S MOTION TO INTERVENE (DKT. NO. 14) AND GRANTING IN PART AND DENYING IN PART INTERVENOR-DEFENDANT CIVIL L.R. 7(H) EXPEDITED NONDISPOSITIVE MOTION TO INTERVENE (DKT. NO. 33)

The plaintiff's amended complaint alleges that the 2020 election process "is so riddled with fraud, illegality, and statistical impossibility that this Court, and Wisconsin's voters, courts, and legislators, cannot rely on, or certify, any numbers resulting from this election." Dkt. No. 9 at ¶5. It states that the court "must set aside the results of the 2020 General Election and grant the declaratory and injunctive relief requested herein." Id.

The amended complaint first asserts that the election software and hardware used by defendant the Wisconsin Elections Commission were subject to hacking and manipulation and that "Wisconsin officials" disregarded widely reported concerns to this effect in utilizing the hardware and software. Id. at ¶¶6-13, 52-99. Next, it asserts that the Wisconsin Elections Commission issued improper guidance to clerks and election officials in violation of Wisconsin law. Id. at ¶¶14, 37-45. Third, it alleges that mail-in ballots either

were lost or were fraudulently recorded for voters who did not request them. Id. at ¶¶46-50. Fourth, it asserts that voters who were ineligible to vote because they were registered in other states nonetheless voted in Wisconsin. Id. at ¶51.

The plaintiff requests the following relief:

> 1. An order directing Governor Evers and the Wisconsin Elections Commission to de-certify the election results;
>
> 2. An order enjoining Governor Evers from transmitting the currently certified election results [to] the Electoral College;
>
> 3. An order requiring Governor Evers to transmit certified election results that state that President Donald Trump is the winner of the election;
>
> 4. An immediate temporary restraining order to seize and impound all servers, software, voting machines, tabulators, printers, portable media, logs, ballot applications, ballot return envelopes, ballot images, paper ballots, and all "election materials" referenced in Wisconsin Statutes § 9.01(1)(b)11. related to the November 3, 2020 Wisconsin election for forensic audit and inspection by the Plaintiff;
>
> 5. An order that no votes received or tabulated by machines that were not certified as required by federal and state law be counted;
>
> 6. A declaratory judgment declaring that Wisconsin's failed system of signature verification violates the Electors and Elections Clause by working a de facto abolition of the signature verification requirement;
>
> 7. A declaratory judgment declaring that currently certified election results violate the Due Process Clause, U.S. CONST. Amend. XIV;
>
> 8. A declaratory judgment declaring that mail-in and absentee ballot fraud must be remedied with a Full Manual Recount or statistically valid sampling that properly verifies the signatures on absentee ballot envelopes and that invalidates the certified results if the recount or sampling analysis shows a sufficient number of ineligible absentee ballots were counted;

> 9. A declaratory judgment declaring absentee ballot fraud occurred in violation of Constitutional rights, Election laws and under state law;
>
> 10. A permanent injunction prohibiting the Governor and Secretary of State from transmitting the currently certified results to the Electoral College based on the overwhelming evidence of election tampering;
>
> 11. Immediate production of 48 hours of security camera recordings of all voting central count facilities and processes in Milwaukee and Dane Counties for November 3, 2020 and November 4, 2020.

Id. at ¶142.

The same day the plaintiff filed the amended complaint, movant James Gesbeck filed a motion to intervene. Dkt. No. 14. The movant describes himself as a Wisconsin citizen and a licensed attorney (although he is not admitted to practice before this court). Id. at 1. He indicates that he voted in the 2020 general election, and that he voted in Wisconsin. Dkt. No. 15 at 1. He asserts that if the court grants the relief the plaintiff requests, it will disenfranchise his vote. Id.

The movant first argues that he is entitled to intervene as of right under Fed. R. Civ. P. 24(a). Id. at 2. He argues that his motion is timely filed and that he has a personal and individual interest in the outcome of the litigation. Id. He asserts that his interest would be impaired if the court were to grant the plaintiff's proposed relief. Id. at 3. He asserts that his interests are not adequately protected by the named defendants. Id. at 3-4. The movant asserts that he also meets the requirements for permissive intervention under Fed. R. Civ. P. 24(b). Id. at 4.

The movant later filed a Rule 7(h) expedited, non-dispositive motion; that motion did not add to the substance of his arguments, focusing on the movant's request that the court rule by 5:00 p.m. on Friday, December 4. Dkt. No. 33.

The court grants the movant's request for an expedited ruling (although not as expedited as he requested) and denies the motion to intervene.

A. Intervention As of Right

Fed. R. Civ. P. 24(a) provides that "[o]n timely motion, the court *must* permit anyone to intervene" if the party seeking to intervene "claims an interest relating to the . . . transaction that is the subject of the action, and is so situated that disposing of the action may as a practical matter impair or impede the movant's ability to protect its interest, unless existing parties adequately represent that interest." (Emphasis added.) The Seventh Circuit has described the rule as "straightforward:"

> [T]he court *must* permit intervention if (1) the motion is timely; (2) the moving party has an interest relating to the property or transaction at issue in the litigation; and (3) that interest may, as a practical matter, be impaired or impeded by disposition of the case. A proposed intervenor who satisfies these three elements is *entitled* to intervene *unless* existing parties adequately represent his interests.

Driftless Area Land Conservancy v. Huebsch, 969 F.3d 742, 746 (7th Cir. 2019) (emphasis in the original).

1. *Timeliness of the Motion*

"The test for timeliness is essentially one of reasonableness: 'potential intervenors need to be reasonably diligent in learning of a suit that might affect

their rights, and upon so learning they need to act promptly.'" Reich v. ABC/York-Estes Corp., 64 F.3d 316, 321 (7th Cir. 1995 (quoting Nissei Sangyo Am., Ltd. v. United States, 31 F.3d 435, 438 (7th Cir. 1994)). In determining whether the potential intervenor was reasonably diligent, courts "also consider the prejudice to the original party if intervention is permitted and the prejudice to the intervenor if his motion is denied." Id. The Seventh Circuit has expressed these concepts in the form of a four-factor test:

> (1) the length of time the intervenor knew or should have known of his interest in the case; (2) the prejudice caused to the original parties by the delay; (3) the prejudice to the intervenor if the motion is denied; (4) any other unusual circumstances.

State v. City of Chi., 912 F.3d 979, 984 (7th Cir. 2019) (quoting Grochinski v. Mayer Brown Rowe & Maw, LLP, 719 F.3d 785, 797-90 (7th Cir. 2013)).

The movant filed his motion to intervene two days after the original complaint was filed and the same day as the amended complaint. There would be no prejudice to the original parties in allowing the movant to intervene, particularly because he represented that he was prepared to oppose the plaintiff's motion for injunctive relief by whatever deadline the court set. The movant did not address the third and fourth factors—the prejudice to the movant if the court did not allow him to intervene and any other unusual circumstances. Because the movant filed his motion the same day the plaintiff filed the original complaint, however, the court concludes that the motion is timely.

2. *The Moving Party's Interest*

The movant next must demonstrate that he has an interest relating to the property or transaction at issue in the litigation. The "transactions" at issue in this litigation are the decisions of defendants the Wisconsin Elections Commission and its members to sign the canvass statement for the 2020 general election and the recount in Dane and Milwaukee Counties and the action of defendant Governor Tony Evers in signing the Certificate of Ascertainment certifying the results of the 2020 general election.

The question of whether the movant, a Wisconsin resident who voted in the 2020 general election in Wisconsin, has an "interest" in those transactions is not as straightforward as one might imagine.

> Rule 24(a)(2) requires that the applicant claim "an interest relating to the property or transaction that is the subject of the action." "Interest" is not defined, but the case law makes clear that more than the minimum Article III interest is required. Cases say for example that a mere "economic interest" is not enough. E.g., *In re Lease Oil Antitrust Litigation*, 570 F.3d 244, 250-52 (5th Cir. 2009); *Mountaintop Condominium Ass'n v. Dave Stabbert Master Builder, Inc.*, 72 F.3d 361, 366 (3d Cir. 1995); cf. *Reich v. ABC/York-Estes Corp.*, 64 F.3d 316, 322-23 (7th Cir. 1995). While that is a confusing formulation—most civil litigation is based on nothing more than an "economic interest"—all that the cases mean is that the fact that you might anticipate a benefit from a judgment in favor of one of the parties to the lawsuit—maybe you're a creditor of one of them—does not entitle you to intervene in their suit.

Flying J, Inc. v. Van Hollen, 578 F.3d 569, 571 (7th Cir. 2009).

The movant contends that the litigation "directly concerns [his] vote that was [cast] in the 2020 General Election in Wisconsin," and argues that both the right to vote and the right to have the vote count is fundamental. Dkt. No.

15 at 2. The movant could anticipate benefits from a judgment in favor of the defendants; because he says that granting the relief the plaintiff requests would invalidate his vote or disenfranchise him, he could anticipate a benefit if the court denied that relief.

Related to—possibly entangled with—the concept of "interest" is the question of standing. The Seventh Circuit has held that "[n]o one can maintain an action in a federal court . . . unless he has standing to sue, in the sense required by Article III of the Constitution—that is, unless he can show injury . . . and that he would benefit from a decision in his favor." Flying J, Inc., 578 F.3d at 571. "Standing to sue" implies that it is only the plaintiff who must have standing. In most cases, the question of whether a defendant has standing does not arise because the plaintiff has sought relief against the plaintiff. But a party who seeks to intervene as a *defendant* seeks to intervene in a lawsuit brought by a plaintiff who has not sought relief against it. See Matthew I. Hall, *Standing of Intervenor-Defendants in Public Law Litigation*, 80 Fordham L. Rev. 1539, 1552 (2012). Whether such a defendant—particularly when the defendant represents a broad public interest (as, arguably, the movant does)—must have Article III standing is unclear. See, *e.g.*, Diamond v. Charles, 476 U.S. 54, 68 (1986) (concluding that it need not decide whether a party seeking to intervene due to public concerns must have Article III standing); Gregory R. Manring, *It's Time for an Intervention: Resolving the Conflict Between Rule 24(a)(2) and Article III Standing*, 85 Fordham L. Rev. 2525 (2017).

The movant's motion does not address his standing to intervene as a defendant. Courts recently have found that a registered voter did not have standing to sue an election board for allegedly denying his preferred candidate's campaign access to observe and monitor the voting process, *see* Wood v. Raffensperger, No. 20-14418, 2020 WL 7094866, at *4-6 (11th Cir. Dec. 5, 2020); did not have standing to raise claims of vote dilution, *see* Moore v. Circosta, Nos. 1:20CV911, 1:20CV912, 2020 WL 6063332, at *14 (M.D. N.C. Oct. 14, 2020); and did not have standing to challenge a Secretary of State's directive that election ballots be mailed to every active voter on a statewide voter checklist, *see* Martel v. Condos, No. 5:20-cv-131, 2020 WL 5755289, at *3-5 (D. Vermont Sept. 16, 2020). Each of these courts concluded that the voter plaintiffs had not identified the kind of concrete, particularized injury required to establish standing.

While the court could engage in an extensive analysis of whether the movant's argument that his vote will not count if the court rules in the plaintiff's favor constitutes such a concrete and particularized injury, it suffices to say that the question of whether a defendant-intervenor must have Article III standing, and what that standing might look like when the potential defendant-intervenor is a voter who asserts that the court's action invalidates his vote, is fraught. Without deciding today whether a defendant-intervenor must have Article III standing or what would constitute such standing under the movant's circumstances, the court assumes that the movant has an interest in the

transactions that give rise to the litigation and will move to the next two factors.

3. *Impairment of the Movant's Interest*

"The existence of 'impairment' depends on whether the decision of a legal question involved in the action would as a practical matter foreclose rights of the proposed intervenors in a subsequent proceeding." Meridian Homes Corp. v. Nicholas W. Prassas & Co., 683 F.2d 201, 204 (7th Cir. 1982). (Citation omitted). The "foreclosure" of the proposed intervenor's rights "is measured by the general standards of stare decisis." Id. (Citations omitted.) In other words, whether or not the defendants succeed in this suit, is the movant free to initiate its own suit? See Shea v. Angulo, 19 F.3d 343, 347 (7th Cir. 1994).

Because the movant's interest is in having his vote count, as opposed to having a court direct the result of the 2020 general election, a decision granting the relief the plaintiff requests—decertifying the results of Wisconsin's 2020 general election and ordering the defendants to certify a different result—likely would foreclose the movant's rights in a subsequent suit. The movant cannot bring suit as a plaintiff because he has no complaint with the *status quo*. Because the electoral college will meet and vote in five days, the movant likely would not have time to mount his own suit in the event this court rules in favor of the plaintiff.

The movant has demonstrated that as a practical matter, his interests may be impaired or impeded by disposition of case, depending on that disposition.

4. *Adequacy of Representation*

The movant asserts that his interests are not adequately represented by the existing parties. Dkt. No. 15 at 3. He asserts that his interest is to defend his constitutional right to vote and that the Wisconsin Elections Commission, its members and Governor Tony Evers are not tasked with protecting that right. Id. He also asserts that the defendants are responsible for representing the state of Wisconsin as a whole and not individual voters. Id. He asserts that the right to vote is an individual right and argues that the court should not assume that it is the role of the governor or the elections commission to protect that individual right. Id. at 4. He says that there may be times when the defendants are averse to the individual right to vote, "as occurs during lawsuits over felon disenfranchisement." Id.

The Seventh Circuit has spoken extensively on this factor of the Rule 24(a) test in the past year. Most recently, in Driftless, the court explained that

> "[t]he most important factor in determining adequacy of representation is how the interest of the absentee compares with the interests of the present parties." 7C CHARLES ALAN WRIGHT & ARTHUR MILLER & MARY KAY KANE, FEDERAL PRACTICE AND PROCEDURE § 1909 (3d ed. 2007). Our recent decision in *Planned Parenthood of Wisconsin, Inc. v. Kaul* describes our circuit's three-tiered methodology for evaluating adequacy of representation under Rule 24(a)(2). 942 F.3d 793, 799 (7th Cir. 2019). "The default rule," we explained, "is a liberal one." *Id.* It derives from the Supreme Court's decision in *Trbovich v. United Mine Workers of America*, which explained that "the requirement of the Rule is satisfied if the

> applicant shows that representation of his interest 'may be' inadequate; and the burden of making that showing should be treated as minimal." 404 U.S. 528, 538 n.10 . . . (1972).
>
> However, if the interest of the absentee is identical to that of an existing party, or if a governmental party is charged by law with representing the absentee's interest, then the standard for measuring adequacy of representation changes. In both situations—where the absentee and an existing party have identical interests, or the existing party is a governmental agency or official with a legal duty to represent the absentee's interest—a rebuttable presumption of adequate representation arises, and the prospective intervenor must carry a heightened burden to establish inadequacy of representation. The degree of this heightened burden varies.

Driftless Area Land Conservancy, 969 F.3d at 747.

So—if the movant's interest is not identical to that of an existing party or if there is no governmental party charged by law with representing the movant's interest, the movant has only the minimal burden of showing that the party's representation "may be" inadequate. But if the movant's interest is identical to that of an existing party, "there is a rebuttable presumption of adequate representation that requires a showing of 'some conflict' to warrant intervention." Planned Parenthood, 942 F.3d at 799 (quoting Wis. Ed. Ass'n Council v. Walker ("WEAC"), 705 F.3d 640, 659 (7th Cir. 2013)). And if one of the existing parties is a governmental body charged by law with protecting the interests of the movant, the presumption is even stronger and the standard for rebutting the presumption higher. Id.

Defendant the Wisconsin Elections Commission is a governmental body; its members and defendant Governor Tony Evers are representatives of government bodies. The movant asserts, however, that the court should not assume that any of these defendants are responsible for protecting his

interests. Dkt. No. 15 at 3. The Wisconsin Elections Commission "administers and enforces Wisconsin elections law." https://elections.wi.gov/about. It appears that neither the WEC nor its members are charged with protecting the interests of individual voters beyond the voter's interest in seeing Wisconsin's election laws enforced. But its mission would appear to include ensuring that the valid ballot of every voter—Democratic, Republican or other—is counted. In the narrower context of the lawsuit, the court presumes the WEC's interest and that of its members is in defending its actions in administering and enforcing Wisconsin's election laws, particularly in signing the canvass statement for the 2020 Presidential general election results after the recount in Milwaukee and Dane Counties. And the interest of defendant Governor Evers presumably will be to defend his signing of the Certificate of Ascertainment certifying the results of that election.

The court agrees that none of the defendants are "charged by law with protecting the interests of the proposed intervenor[]," Planned Parenthood, 942 F.3d at 799, to the extent that the movant's interests go beyond his interest in the proper administration and enforcement of state and federal election laws and procedures. This means the movant need not rebut the most heightened presumption of adequacy.

But the movant and the defendants have "the same goal." WEAC, 705 F.3d at 659 (citing Shea, 19 F.3d at 347). The movant and the defendants both seek to defend the certified results of the Wisconsin 2020 Presidential general election. Both oppose the relief the plaintiff seeks—the decertification of the

election and the certification of a different result. Both seek to defend the certification on the ground that the election was lawful and the results valid.

The fact that the movant and the defendants share the same goal may not necessarily give rise to the presumption of adequate representation. In her concurrence in Planned Parenthood, now-Chief Judge Sykes explained that in WEAC, the court had stated that an intervenor's interest must be "unique;" Judge Sykes sought to clarify:

> *WEAC* cited *Keith v. Daley*, 764 F.2d 1265, 1268 (7th Cir. 1985), as support for the uniqueness requirement. The relevant passage in *Keith*, however, doesn't use the term "unique." It says this: "The [intervenor's] interest must be based on a right that belongs to the proposed intervenor rather than to an existing party in the suit." *Id.* In other words, the intervenor's interest must be based on a right that is *direct* and *independent*. That much is clear from the immediately preceding sentence: "A proposed intervenor must demonstrate a direct, significant[,] and legally protectable interest in the property [or transaction] at issue in the lawsuit."
>
> "Unique" is a suitable word to describe the nature of the required interest, but as used in this context, "unique" means an interest that is *independent of* an existing party's, not *different from* an existing party's. If the intervenor has a significant independent interest but shares the same goal as an existing party (that is, if their interests align), then the standard for measuring the adequacy of existing representation changes, as *WEAC* later explains. 705 F.3d at 659 (explaining that a presumption of adequate representation arises when goals align). But sharing the same goal as an existing party doesn't defeat "uniqueness," properly understood.

Planned Parenthood, 942 F.3d at 806.

Given this clarification, Judge Sykes concluded that the Legislature had an independent right from the Attorney General because it had an independent, statutory right to intervene under Wis. Stat. §803.09(2m). Id.

The movant does not have a right, independent of the defendants, to defend the certification of the 2020 election results. He has different *reasons* for defending the certification. As a registered voter, he wants to make sure the winner of the election is decided by a count of the valid votes cast, not by a decision of an appointed federal judge. But the movant seeks to defend the certification because he believes it was lawful and because he believes it utilized his vote—it resulted in his vote "counting." The movant is more concerned about *his* vote being disregarded. But his concern about *any* votes being disregarded aligns with the defendants' interests in defending the legality of the certification.

Because the movant has the same goal as the defendants and has identified no right independent of the defendants, the movant must rebut the presumption of adequate representation by "show[ing] that some conflict exists." WEAC, 705 F.3d at 659. The movant has not identified such a conflict.

5. *Conclusion*

The court concludes that because the movant has not rebutted the presumption that the defendants will adequately represent his interests, he is not entitled to intervene as of right.

B. Permissive Intervention

The movant also says that he is qualified to intervene under Rule 24(b). Dkt. No. 15 at 4. He says that if his vote is not counted, he would "have a cause of action to seek a court order requiring these defendants to honor [his]

vote," and argues that this would not further judicial economy because his suit would rely on the same facts and issues of law as this case. Id.

Rule 24(b)(1)(B) gives a court the discretion to allow a party to intervene if that party "has a claim or defense that shares with the main action a common question of law or fact." The Planned Parenthood decision sheds light on the distinction between Rules 24(a) and 24(b):

> Rule 24(b) is vague about the factors relevant to permissive intervention, but it is not just a repeat of Rule 24(a)(2). We have thus cautioned courts not to deny permissive intervention solely because a proposed intervenor failed to prove an element of intervention as of right. *See City of Chi. v. FEMA*, 660 F.3d 980, 987 (7th Cir. 2011); *Solid Waste Agency of N. Cook Cty. v. U.S. Army Corps of Eng'rs*, 101 F.3d 503, 509 (7th Cir. 1996). Still, we have never gone so far as confining the district court's discretion to only the two mandatory factors in Rule 24(b)(3) or to prohibit consideration of the elements of intervention as of right as discretionary factors. Even when a district court "did not explicitly break out its reasoning" on the two requests, we have affirmed so long as the "decision shows a thorough consideration of the interests of all the parties." *Ligas [ex rel. Foster v. Maram]*, 478 F.3d [771] at 776 [7th Cir. 2007)].

Planned Parenthood, 942 F.3d at 804.

The court will not exercise its discretion to grant permissive intervention. First, as the court has noted, the issue of standing for defendant-intervenors is murky. While the Seventh Circuit has speculated that permissive intervention may not require standing "if the existing parties present a case or controversy," it has not decided the question. Id. at 803 n.5. Second, the court has noted that the movant has not identified any conflict that would prevent the current defendants from adequately representing his interests. Third, the court already has granted the movant leave to file an *amicus* brief, dkt. no. 37, and he has

done so, dkt. no. 47. The court has the benefit of the movant's perspective; he does not need to become a party to ensure that the court takes into account the perspective of an individual voter.

C. Conclusion

The court **GRANTS** the Intervenor-Defendant Civil L.R. 7(h) Expedited Nondispositive Motion to Intervene, to the extent that it asks the court to expedite its ruling on his December 3, 2020 motion to intervene. Dkt. No. 33.

The court **DENIES** James Gesbeck's Motion to Intervene. Dkt. No. 14.

The court **DENIES** the Intervenor-Defendant Civil L.R. 7(h) Expedited Nondispositive Motion to Intervene, to the extent that it asks the court to grant the movant's December 3, 2020 motion to intervene. Dkt. No. 33.

Dated in Milwaukee, Wisconsin this 9th day of December, 2020.

BY THE COURT:

HON. PAMELA PEPPER
Chief United States District Judge

IN THE UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff, **CASE NO. 2:20-cv-1771**

v.

WISCONSIN ELECTIONS COMMISSION, and its members ANN S. JACOBS, MARK L. THOMSEN, MARGE BOSTELMAN, JULIE M. GLANCEY, DEAN KNUDSON, ROBERT F. SPINDELL, JR., in their official capacities, GOVERNOR TONY EVERS, in his official capacity,

Defendants.

PLAINTIFF'S MOTION TO FILE UNREDACTED COPIES OF (1) EXHIBITS 1 AND 12 TO PLAINTIFF'S AMENDED COMPLANT UNDER SEAL AND (2) EXHIBITS 4, 13 AND 19 UNDER PROTECTIVE ORDER

COMES NOW Plaintiff, William Feehan by and through his undersigned counsel, and respectfully moves that the Court grant him permission to File Copies of (1) Exhibits 1 and 12 to Plaintiff's Amended Complaint Under Seal and (2) Exhibits 4, 13 and 19 Under Protective Order. This motion is made pursuant to General L. R. 79 and Eastern District of Wisconsin ECF Policies and Procedures.[1]

Pursuant to the Policies and Procedures, Plaintiff designates Exhibits 1 and 12 as "Sealed," to be "only by the judge."[2] Plaintiff has designated Exhibits 4, 13, and 19 as "Restricted to Case Participant," allowing "all attorneys of record to view the document" using an "e-filing log-in and password" provided by the Court."[3] Plaintiff's Memorandum in support is filed herewith.

---

[1] https://www.wied.uscourts.gov/e-filing-restricted-and-sealed-documents

[2] *Id.* , § 1.

[3] *Id.*

As General L. R. 79(d)(2) the Policies and Procedures direct, this Motion and Memorandum are being filed "publicly" by "**separate motion"** "PRIOR" to filing the unredacted Exhibits themselves.[4]

Respectfully submitted, this 9th day of December, 2020.

Subject: RE: Motion to Seal/Restrict Identities Feehan v. Wisconsin Elections Commission et al 2:20-cv-1771

Mike –

The Governor opposes your motion.

First, Judge Pepper could not have been clearer yesterday that she is not entertaining evidentiary issues until and unless she has resolved the justiciability and dismissal arguments. Continuing to press forward with evidentiary issues at this point is prejudicial to Governor Evers, whose counsel are working around the clock to satisfy Plaintiffs' request for expedited resolution of this case.

Second, we object to the notion that Plaintiff can rely upon anonymous declarants or witnesses. Can you provide any authority showing that a federal court has allowed such an approach anywhere at any time in a civil matter?

Third, even if you proceed and the Court allows these revised filings, it remains our position, as I outlined on yesterday's call, that the Court cannot and should not consider any declarations, affidavits, or reports that Defendants have not had a full and fair opportunity to test through live cross-examination. We also reserve the right to object to any testimony being introduced via declaration or affidavit, depending on how a hearing, if ever scheduled, is structured.

Subject: Motion to Seal/Restrict Identities Feehan v. Wisconsin Elections Commission et al 2:20-cv-1771

Mike and Jeff

For housekeeping on the exhibits, we would like to submit unredacted copies of

(1) Exhs. 1 and 12 to Plaintiff's Amended Complaint as "Sealed" so that the identities of the affiants will be available to the court only and

(2) Exhibits 4, 13 and 19 as "Restricted" so that identifies of the affiants will be available only to counsel through a court-generated password.

https://www.wied.uscourts.gov/e-filing-restricted-and-sealed-documents

General L. R. 79(d)(4) requires that a motion to seal be accompanied by a "certification that the parties have conferred in a good faith attempt to avoid the motion or to limit the scope of the documents or materials subject to sealing under the motion," so I am communicating with you only as lead counsel for the current "parties" to the case.

The motion and supporting memo are attached, also a short declaration as an exhibit. There's some precedent in the 7th Cir. that the court can't leave it to parties to stipulate to seal, so I think I have to file the motion regardless.

Please let me whether you concur with the Motion so I can note that in the Motion and Certification.

Thanks much.

****

I am writing this statement in regard to my identity being known. I have worked in areas that have made me a known target, have had death threats and even a price put on my head by foreign terrorist organizations. For the safety of myself and my family, I have requested to remain redacted. I have found listening devices in my home and have had attempts on myself.

Because of work I have done as a Confidential Human source/ Confidential informant as well as work investigating spy's across the globe, my identity is redacted. Not just work I have done here in America but also working with foreign nations, where even currently I am working to get Smartmatic out of other nations elections systems and doing election fraud mitigation.

I request that these extreme cases be taken into consideration for my personal safety, my families safety, the safety of sources I have worked with, I respectfully request that my persona remain redacted.

I declare under penalty of perjury that the forgoing is true and correct to the best of my knowledge. Executed this December 3, 2020.

IN THE UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff, **CASE NO. 2:20-cv-1771**

v.

WISCONSIN ELECTIONS COMMISSION, and its members ANN S. JACOBS, MARK L. THOMSEN, MARGE BOSTELMAN, JULIE M. GLANCEY, DEAN KNUDSON, ROBERT F. SPINDELL, JR., in their official capacities, GOVERNOR TONY EVERS, in his official capacity,

Defendants.

PLAINTIFF'S MEMORANDUM IN SUPPORT OF MOTION TO FILE UNREDACTED COPIES OF (1) EXHIBITS 1 AND 12 TO PLAINTIFF'S AMENDED COMPLANT UNDER SEAL AND (2) EXHIBITS 4, 13 AND 19 UNDER PROTECTIVE ORDER

This Memorandum is in support of Plaintiff's Motion to File Copies of (1) Exhibits 1 and 12 to Plaintiff's Amended Complaint Under Seal and (2) Exhibits 4, 13 and 19 Under Protective Order. Gen. L. R. 79.(d)(3).[1]

Eastern District of Wisconsin ECF Policies and Procedures[2] allow a "filer to choose between restricting the document to case participants or completely sealing the document so that it is available only to the judge." [3]

[1] References to "Exhibits" are to the Amended Complaint Exhibits.

[2] https://www.wied.uscourts.gov/e-filing-restricted-and-sealed-documents

[3] *Id.* , INTRODUCTION.

Plaintiff has designated unredacted Exhibits 1 and 12 as "Sealed," to be "only by the judge."[4] Plaintiff's Motion designates unredacted Exhibits 4, 13, and 19 as "Restricted to Case Participant," allowing "all attorneys of record to view the document" using an "e-filing log-in and password" provided by the Court."[5]

Plaintiff brings this Motion so that the identities of the Exhs. 1 and 12 affiants will be available to the court only and the identities of the Exhs. 4, 13 and 19 affiants will be available only to counsel through a court-generated password. For ease of reference, this Memorandum refers to the Various Affiants by their Exhibit numbers – "Affiant Ex. 1," etc.

In support of his Amended Complaint, ECF Doc. # 9, Plaintiff has previously filed redacted copies of Exhibits 1, 4, 12, 13, and 19 as ECF Doc. ## 9-1, 9-4, 9-12, 9-13, and 9-19. Gen. L. R. 79.(d)(1). Those Exhibits conceal only the Affiants' personally identifying information – all of their other testimony is public and unredacted.

"Good cause" exists to so restrict disclosure of the affiants' identities. *Citizens First Nat. Bank of Princeton v. Cincinnati Ins. Co.*, 178 F.3d 943, 944 (7th Cir. 1999).

Defendant's Objection. As indicated in Counsel's Certification accompanying the Motion, Defendant Gov. Evers objects to the Motion on grounds that the Court should not consider declarations or testimony from "anonymous" affiants or declarants and that the Court indicated at

---

[4] *Id.* , § 1. "Sealed."

- Sealed. Documents which are designated as sealed are viewable only by the judge. No attorney of record, not even the filing attorney, will be able to view this document unless given permission by the court. Although a notice of electronic filing will be generated, no attorney will be able to access the document and the filing attorney must serve opposing counsel in paper format. A motion to restrict/seal must be filed prior to filing any document designated as sealed.

[5] *Id.* , § 1. "Restricted to case participants."

- Restricted to case participants. This option allows all attorneys of record to view the document, but not the general public. A notice of electronic filing will be generated from which each attorney can view the document using their **e-filing** log-in and password. Although not sealed, this type of restriction still requires that a motion to restrict/seal be filed prior to the filing of any restricted documents.

the December 8 status conference that it will not consider "evidentiary" issues until an evidentiary hearing is held, if one is ever held at all. Motion Exhibit 1.

First, sealing submission to protect identities is routine. *E.g.*, *Hicklin Eng'g, L.C. v. Bartell*, 439 F.3d 346, 348–49 (7th Cir. 2006) ("identities of undercover agents"), *abrogated on other grounds by RTP LLC v. ORIX Real Estate Capital*, 827 F.3d 689, 691–92 (7th Cir. 2016). *See also, e.g., Roe v. City of Milwaukee*, 37 F. Supp. 2d 1127 (E.D. Wis. 1999) (plaintiff allowed to proceed anonymously under pseudonym).

More to the point, Gov. Evers' counsel conflates the narrow issue raised by the Motion with subsequent issues regarding reliance on the Affiants' Exhibits in relation to Defendants' Motions to Dismiss and a subsequent evidentiary hearing, if one is scheduled at all.

The narrow issue raised by the Motion is only whether the Court will accept filing of Exhibits 1 and 12 under "Seal" and Exhibits 4, 13 and 19 Under Protective Order. Gen. L. R. 79.(d)(3). Whether and to what extent the Court considers the redacted or unredacted Exhibits in relation to Defendants' motions to dismiss or at a possible future evidentiary hearing are different questions.

Accordingly, "anonymity" is not the issue at all. The very purpose of the Motion is to provide the Court with identities of *all* Affiants and defense counsel with restricted identities of three Affiants – in which case none of the witnesses would be anonymous to the Court, and only two would be anonymous to defense counsel.

As to reliance on either the redacted or unredacted Exhibits in relation to the motions to dismiss, Gov. Evers bases his motion to dismiss in part on grounds the Affiants are anonymous. Now he opposes Plaintiff's motion to disclose their identities to the Court, yet continues to maintain the Amended Complaint should be dismissed because the Affiants are anonymous. Gov. Evers can't have it both ways.

Again, the Court's ruling on Plaintiff's Motion to Seal/Restrict is a different question than whether and to what extent the Court will consider Affiants' declarations, either in relation to the motions to dismiss or later at an evidentiary hearing, if one is scheduled.[6] The Court need reach those questions to resolve the present Motion to Seal/Restrict.

Background. This case brings a challenge to the November 3, 2020 Presidential election. Plaintiffs' evidence shows ballot fraud and illegality, *i.e.* including counting fraud and illegality in the Dominion Voting Systems machines and software.

Witnesses Would Be Prejudiced by Disclosure. As explained hereafter, Affiants are in reasonable fear of harassment and threats to their physical safety and their livelihoods in retaliation for their coming forward with their testimony. As election controversies have unfolded around the country, there have been multiple incidents of harassment and threats to destroy the careers of or physically harm witnesses who come forward with evidence of election fraud and illegality. There was an organized campaign by The Lincoln Project to destroy the business relationships of major law firms with their clients for having the temerity to represent the President of the United States in these controversies. One Pennsylvania law firm withdrew from representing the President only days after filing a lawsuit on his behalf because of such harassment, abuse, threats, pressure and economic coercion. Other lawyers for the President have been physically threatened and verbally abused and forced to obtain personal security to protect them. Therefore, the apprehensions of Plaintiffs' witnesses are serious and well-founded. Moreover, the testimony of these witnesses is

[6] Objections raised by Gov. Evers' counsel regarding evidentiary hearings are premature at this stage of the case, where the Court is considering threshold motions to dismiss. However, as stated in Plaintiff's Motion for Evidentiary Hearing, the Affiants themselves would appear in person at such a hearing, if one were ever scheduled. And though they would file a request for the hearing to be conducted *in camera* under pseudonyms, they would obviously not be "anonymous" to the Court or parties

, only to the public.

consequential to the matter before this court, namely a legal challenge to the outcome of the Presidential election in Wisconsin.

Sealed Affiant Exh. 1: Venezuela Whistleblower. Affiant Exh. 1 is a Venezuelan whistleblower, who is not an American citizen, and swears under oath that "I was selected for the national security guard detail of the President of Venezuela." At great risk to himself, he further reveals that

> Importantly, I was a direct witness to the creation and operation of an electronic voting system in a conspiracy between a company known as Smartmatic and the leaders of conspiracy with the Venezuelan government. This conspiracy specifically involved President Hugo Chavez Frias, the person in charge of the National Electoral Council named Jorge Rodriguez, and principals, representatives, and personnel from Smartmatic which included … The purpose of this conspiracy was to create and operate a voting system that could change the votes in elections from votes against persons running the Venezuelan government to votes in their favor in order to maintain control of the government.

Exh. 1, ¶ 10.

Sealed Affiant Exh. 12: "Spider". Affiant Exh. 12, called "Spider," sets forth evidence in his sworn affidavit regarding his findings of foreign interference in this election, and his background:

> I was an electronic intelligence analyst under 305th Military Intelligence with experience gathering SAM missile system electronic intelligence. I have extensive experience as a white hat hacker used by some of the top election specialists in the world. The methodologies I have employed represent industry standard cyber operation toolkits for digital forensics and OSINT, which are commonly used to certify connections between servers, network nodes and other digital properties and probe to network system vulnerabilities.
>
> …
>
> In my professional opinion, this affidavit presents unambiguous evidence that Dominion Voter Systems and Edison Research have been accessible and were certainly compromised by rogue actors, such as Iran and China. By using servers and employees connected with rogue actors and hostile foreign influences combined with numerous easily discoverable leaked credentials, these organizations neglectfully allowed foreign adversaries to access data and intentionally provided access to their infrastructure in order to monitor and manipulate elections, including the most recent one in 2020. This represents a complete failure of their duty to provide basic cyber security. This is not a technological issue, but rather a governance and basic security issue: if it is not corrected, future elections in the United States and beyond will not be secure and citizens will not have confidence in the results.

Exh. 12, ¶¶ 1, 21.

Spider's sworn testimony is further supported by the evidence of a recent October 30, 2020 FBI and CISSA Joint advisory, which identified the hostile nation and foreign interference activity seen in late October prior to the Presidential election, which stated:

> This joint cybersecurity advisory was coauthored by the Cybersecurity and Infrastructure Security Agency (CISA) and the Federal Bureau of Investigation (FBI). CISA and the FBI are aware of an Iranian advanced persistent threat (APT) actor targeting U.S. state websites to include election websites. CISA and the FBI assess this actor is responsible for the mass dissemination of voter intimidation emails to U.S. citizens and the dissemination of U.S. election-related disinformation in mid-October 2020.1 (Reference FBI FLASH message ME-000138-TT, disseminated October 29, 2020). Further evaluation by CISA and the FBI has identified the targeting of U.S. state election websites was an intentional effort to influence and interfere with the 2020 U.S. presidential election.

Exhibit 18.

The Advisory further states, "[f]ollowing the review of web server access logs, CISA analysts, in coordination with the FBI, found instances of the URL and FDM User Agents sending GET requests to a web resource associated with voter registration data. The activity occurred between September 29 and October 17, 2020. Suspected scripted activity submitted several hundred thousand queries iterating through voter identification values and retrieving results with varying levels of success [Gather Victim Identity Information (T1589)]. A sample of the records identified by the FBI reveals they match information in the aforementioned propaganda video. *Id.*

Affiants Exhs. 1 and 12 have shown great courage in coming forward at a critical moment to deliver the truth to the Court about matters of great importance to our country. They need the Court's protection from the readily foreseeable harms of harassment online, and similarly many federal agents such as CBP officers have recently been "doxed,' which includes harassed at home, and in relation to their work, which would accrue to them if their identities were made public. Thus, good cause exists for the relief requested.

Restricted Affiant Exh. 4: Statistical Analyst. Affiant Exh. 4 is a statistical analyst with a Bachelor of Science degree in mathematics and a Master of Science degree in statistics. He opines at great risk to himself:

> The p-value of statistical analysis regarding the centerline for the red dots (Wisconsin counties with Dominion machines) is 0.000000049, pointing to a statistical impossibility that this is a "random" statistical anomaly. Some external force caused this anomaly. (par. 10)… *and*
>
> The results of the analysis and the pattern seen in the included graph strongly suggest a systemic, system-wide algorithm was enacted by an outside agent, causing the results of Wisconsin's vote tallies to be inflated by somewhere between three and five point six percentage points.

Exh. 4, Par. 13.

For thirty years, Affiant Exh. 4 has performed statistical analysis for major companies and organizations. For the reasons stated regarding prejudice from disclosure, Affiant he rightly fears attacks against his reputation, professional career and personal safety.

Restricted Affiant Exh. 13: Voting Systems Analyst. Affiant Exh. 13 explains in technical detail the lack of proper verification of Wisconsin's voting machines and systems:

> The importance of VSTLs in underrated to protect up from foreign interference by way of open access via COTS software. Pro V& V who's EAC certification EXPIRED on 24 FEB 2017 was contracted with the state of WISCONSIN.

Exh. 13.

Affiant Exh. 13 can explain the foreign relationships in the hardware used by Dominion Voting Systems and its subsidiary Sequoia and explains specifically the port that Dominion uses, which is called Edge Gateway and that is a part of Akamai Technologies based in Germany and China. She explains that Dominion Voting Systems works with SCYTL, and that votes on route, before reporting, go to SCYTL in foreign countries. On the way, they get mixed and an algorithm is applied, which is done through a secretive process. Among other things, when staying in Washington, D.C. shortly before the Complaint was filed in this case, an intruder broke into her hotel room and ransacked it.

For the reasons stated regarding prejudice from disclosure, Affiant Exh. 13 also fears attacks against his reputation, professional career and personal safety.

Restricted Affiant Exh. 19: Mathematics and Electrical Engineering Analyst. Affiant Exh. 19 is also fearful for his career and personal safety. He has a Masters Degree in Mathematics and PhD. In Electrical Engineering. He opines:

> Given the same data sources, I also assert that Milwaukee precincts exhibit statistical anomalies that are not normally present in fair elections.. The fraud model hypothesis in Milwaukee has a posterior probability of 100% to machine precision. This model predicts 105,639 fraudulent Biden ballots in Milwaukee.

Exh. 19, Par. 1. Affiant Exh. 19 makes further sensitive statements regarding conduct of the election in Milwaukee at Par. 5. For the reasons stated regarding prejudice from disclosure, Affiant Exh. 19 also fears attacks against his reputation, professional career and personal safety.

Generally. Testimony of Affiants Exh. 1, 4, 12, 13, and 19 have been given at great risk of these Affiants who hold positions and/or training and experience to obtain such information related to foreign interference in the 2020 election.

The privacy, reputation, and personal and financial security interests of each Affiant is at grave risk of if his identity is disclosed. Their interests, as well as those of the parties and the Court, vastly outweigh the interests of the public in having access to the Affiant's personally identifying information, and no less drastic alternatives other than sealing or restricting their unredacted affidavits to conceal or restrict their identities will provide adequate protection to the them and the proper functioning of this Court. The common law right of public access to Court filings must yield to countervailing interests of the Affiants in keeping their identities undisclosed beyond the parties and the Court to protect them from readily foreseeable threats.

CONCLUSION

Wherefore, the Plaintiffs respectfully request leave of Court to submit Exhibits 1 and 12 under Seal and Exhibits 4, 13 and 19 Restricted to access by Parties' counsel only.

Respectfully submitted, this 9th day of December, 2020.

IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff,

v. Case No. 20-CV-1771

WISCONSIN ELECTIONS COMMISSION, and its members ANN S. JACOBS, MARK L. THOMSEN, MARGE BOSTELMAN, JULIE M. GLANCEY, DEAN KNUDSON, ROBERT F. SPINDELL, JR., in their official capacities, GOVERNOR TONY EVERS, in his official capacity,

Defendants.

DEFENDANTS WISCONSIN ELECTIONS COMMISSION AND ITS MEMBERS' REPLY IN SUPPORT OF MOTION TO DISMISS

INTRODUCTION

This lawsuit is the Wisconsin version of cookie-cutter litigation that has been brought in multiple district courts in different states in an effort to overturn the outcome of the November 2020 presidential election and disregard the will of the electorate. It makes wild and anonymous claims about a Venezuelan election conspiracy in an attempt to spread generalized and speculative doubt about the Wisconsin election. Plaintiff's unfortunate attempt in Wisconsin fails as a matter of law, just as other plaintiff's attempts are uniformly failing across the country, and this case should be dismissed.

Earlier this week two other district courts rejected essentially identical cases for reasons that are applicable here. First, the Eastern District of Michigan denied preliminary injunctive relief in *King v. Whitmer,* No. 20-13134, 2020 WL 7134198, *3–13. (E.D. MI. December 7, 2020). That case was filed by the same lead attorneys as here and included the same federal legal theories and allegations of problems with voting machines. In its ruling, the court rejected the same arguments that the Plaintiff makes here. *King*, 2020 WL 7134198 at *1. The court found that the case failed on the Eleventh Amendment, mootness, laches, abstention, and standing. *Id.* at *3–13.

Of particular note, the court found that the alleged federal claims rested on state-law issues, implicating the Eleventh Amendment. *Id.* at *3–5. The court observed that what the plaintiffs were really requesting was an order to ignore the outcome of the election. *Id.* at *5–6. Laches barred the claim because the plaintiffs waited until after the election and the vote certification to file a claim. *Id.* at *6–7.

The court rejected the plaintiffs' standing arguments based on equal protection because "Plaintiffs' alleged injury does not entitle them to seek their requested remedy because the harm of having one's vote invalidated or diluted is not remedied by denying millions of others *their* right to vote." *Id.* at *9 (emphasis in original). And it held that the plaintiffs had no standing under the Elections and Electors Clauses because such claims belong to state legislatures, if anyone. *Id.* at *10–11.

Finally, the court found that the plaintiffs had no likelihood of success on the merits. Alleged deviations from state law do not state a claim for violations of the

Elections or Electors Clauses. *Id.* at *11–12. On the widespread fraud theory, it held that "[w]ith nothing but speculation and conjecture that votes for President Trump were destroyed, discarded or switched to votes for Vice President Biden, Plaintiffs' equal protection claim fails." *Id.* at *13.

The district court in Michigan closed its decision with a poignant comment that applies here as well:

> this lawsuit seems to be less about achieving the relief Plaintiffs seek—as much of that relief is beyond the power of this Court—and more about the impact of their allegations on People's faith in the democratic process and their trust in our government. Plaintiffs ask this Court to ignore the orderly statutory scheme established to challenge elections and to ignore the will of millions of voters. This, the Court cannot, and will not, do.
>
> The People have spoken.

Id.

Second, the Northern District of Georgia dismissed the case of *Pearson et al v. Kemp et al.*, No. 20-cv-04809-TCB (N.D. GA. December 7, 2020.) That was another case by the same lead attorneys making similar claims. (*Pearson* Dkt. 1.) Only a minute entry is docketed for the dismissal, but media has reported on the oral ruling from the court.[1] During the ruling, the court explained that "these types of cases are not properly before federal courts. These are state elections."[2] On laches, and particularly regarding the allegations about voting machines, the court explained

[1] Nicole Carr, *Federal judge dismisses Sidney Powell lawsuit seeking to decertify Georgia's elections,* WSB-TV2, (Dec. 7, 2020 6:57pm) https://www.wsbtv.com/news/local/federal-judge-dismisses-sidney-powell-lawsuit-seeking-decertify-georgias-elections/N7Z5MDKYRJAIZKCPQAXXEEP35Q/

[2] *Id.*

that "[t]his suit could have been filed months ago at the time these machines were adopted." Instead, the court noted, "the plaintiffs waited until over three weeks after the election to file the suit."[3]

Just as in Michigan and Georgia, this lawsuit fails and should be dismissed. Defendants Wisconsin Elections Commission and its member ("the Commission") explained in its opening brief that Plaintiff's claims are not justiciable under the doctrines of standing, laches, and Eleventh Amendment immunity, and his Amended Complaint fails to plead any plausible federal claim for which relief can be granted. (Dkt. 54.) In response, Plaintiff repeats his same string of allegations about a wide-ranging global conspiracy. He argues the untenable position that every supposed misapplication of state election law violates the Elections and Electors Clauses, the Equal Protection Clause, and the Due Process Clause—a view that conflicts with both decades of precedent and the Constitution's commitment of the times, places, and manner of holding elections to the States.

Plaintiff's response to the Commission's justiciability arguments are equally unavailing. Even as an elector to Donald Trump, Plaintiff lacks standing and suffers nothing different than a generalized harm. His attempts to cloak state law violations as federal claims cannot shield him from the Eleventh Amendment's bar. And waiting until your candidate loses to bring claims that materialized months, if not decades, before the November 3 election does not survive laches. Lastly, his proposed remedy disenfranchising the votes of hundreds of thousands of Wisconsinites is unlawful and

[3] *Id.*

violates due process. Nothing in Plaintiff's response sufficiently challenges the Commission's arguments, and the Amended Complaint should be dismissed.

ARGUMENT

I. This case is nonjusticiable because Plaintiff lacks standing.

Plaintiff's status as a voter and nominated presidential elector does not create rights reserved to state legislatures or support federal standing for claims of generalized election irregularities.

A. Plaintiff has no standing for a claim under the Elections or Electors Clauses.

The Elections and Electors Clauses of the U.S. Constitution give rights to "the Legislature" of each state for conducing elections and directing the selection of presidential electors. U.S. Const. art. I, § 4, cl. 1; U.S. Const. art. II, § 1, cl. 2. Rights under those clauses belong, therefore, to state legislatures, as courts have routinely held. *See, e.g., Lance v. Coffman*, 549 U.S. 437, 442 (2007) (holding individuals lacked Article III standing to bring claim under the Elections Clause); *Bognet v. Sec'y of the Comm. of Pennsylvania*, No. 20-3214, 2020 WL 6686120, *6–7 (3d Cir., Nov. 13, 2020) (same); *Hotze v. Hollins*, No. 4:20-cv-03709, 2020 WL 6437668, at *2 (S.D. Tex. Nov. 2, 2020) (holding candidate lacked standing under Elections Clause and concluding that Supreme Court's cases "stand for the proposition that only the state legislature (or a majority of the members thereof) have standing to assert a violation of the Elections Clause"). Plaintiff has no standing for a claim under those clauses.

Plaintiff relies exclusively on one case, *Carson,* for his contrary argument. (Dkt. 72:14 (citing *Carson v. Simon*, 978 F.3d 1051 (8th Cir. 2020) .) That case does

not even mention the Elections Clause. To the extent it found standing under the Electors Clause, it is a lone outlier, has no precedential value in this circuit, and is wrongly decided. The only two decisions that cite *Carson*, from the Third Circuit and the Eastern District of Michigan, do not follow it. *Bognet*, 2020 WL 6686120, *8 n.6 (noting departure from *Carson*); *King v. Whitmer*, No. CV 20-13134, 2020 WL 7134198, at *11 (E.D. Mich. Dec. 7, 2020) ("This Court, however, is as unconvinced about the majority's holding in *Carson* as the dissent."). *Carson* has never been adopted in the Seventh Circuit and should be unpersuaded by this Court.

Plaintiff's reliance on his status as a nominated elector is unpersuasive. As the dissent in *Carson* noted, nominated presidential electors are entirely derivative of the actual candidate and "[w]hether they ultimately assume the office of elector depends entirely on the outcome of the state popular vote for president." *Carson*, 978 F.3d at 1063. Indeed, under Wisconsin law, an elector has no discretion in what candidate to vote for or anything other than a ministerial job of delivering the outcome of the election. *See* Wis. Stat. § 7.75 (presidential elector "shall" vote by ballot for the persona or party who nominated them). Plaintiff Feehan's argument that his interests "are identical to that of President Trump" is meritless; Plaintiff was not running for President. (Dkt. 72:21.) And the person who was running for that office is conspicuously absent from this case. Simply put, "[e]lectors are not candidates for public office as that term is commonly understood." *Carson*, 978 F.3d at 1063.

Plaintiff here has no injury related to the Elections or Electors Clauses.

B. Plaintiff has no standing for a claim under due process or equal protection.

For reasons explained in the opening briefs, Plaintiff has no standing for a vote-dilution-theory constitutional claim. Generally, vote dilution occurs in apportionment or districting situations that improperly apportion population or representation. Plaintiff's alleged vote-counting violations are not federal vote dilution claims—they are garden-variety election disputes that do not implicate the constitution. (*See* Dkt. 54:11–15); *Shipley v. Chi. Bd. of Election Comm'rs*, 947 F.3d 1056, 1062 (7th Cir. 2020) ("A violation of state law does not state a claim under § 1983, and, more specifically, 'a deliberate violation of state election laws by state election officials does not transgress against the Constitution.'" (citation omitted)); *see also Donald J. Trump for President, Inc. v. Boockvar*, No. 20-CV-966, 2020 WL 5997680, *46 (W.D. Pa. Oct. 10, 2020) ("[I]t is well-established that even violations of state election laws by state officials, let alone violations by unidentified third parties, do not give rise to federal constitutional claims except in unusual circumstances.").

In briefing, Plaintiff retreats from the vote-dilution theory in his Amended Complaint. (Dkt. 72:19.) Instead, he claims that Defendants "sought to actively disenfranchise" certain voters in violation of the one person, one vote, doctrine. (Dkt. 72:20.) This is remarkable considering that "disenfranchise" does not appear a single time in his Amended Complaint, and his requested relief is to literally disenfranchise hundreds of thousands of people and reverse the outcome of the election. In any event, he has no "one person one vote" standing.

Plaintiff cites four cases for this novel disenfranchisement theory. (Dkt. 72:20.) Two are apportionment cases and one is a redistricting case, none of which have any applicability here. *Baker v. Carr*, 369 U.S. 186 (1962); (considering a 1901 apportioning the members of the General Assembly); *Reynolds v. Sims*, 377 U.S. 533 (1964) (considering Alabama legislative apportionment); *Whitford v. Nichol*, 151 F. Supp. 3d 918, 926 (W.D. Wis. 2015) (challenging the 2012 districting plan for the Wisconsin Assembly). Remarkably, the fourth is a case where claims alleging electronic vote-counting irregularities was dismissed as not rising to the level of a constitutional claim. *Bodine v. Elkhart Cty. Election Bd.*, 788 F.2d 1270, 1272 (7th Cir. 1986). *Bodine* cautioned that "If every state election irregularity were considered a federal constitutional deprivation, federal courts would adjudicate every state election dispute, and the elaborate state election contest procedures, designed to assure speedy and orderly disposition of the multitudinous questions that may arise in the electoral process, would be superseded by a section 1983 gloss." *Id.* (quoting *Gamza v. Aguirre*, 619 F.2d 449, 453 (5th Cir. 1980)) . This binding decision, and its warning, forecloses Plaintiff's claims here.

II. The Eleventh Amendment bars Plaintiff's claims.

Plaintiff argues that the Eleventh Amendment is not a bar because he is raising only federal claims and seeking prospective relief. (Dkt. 72:26.) This is a straw-man argument because Plaintiff's claims are based entirely on violations of state law.

Plaintiff' cannot escape the Eleventh Amendment by cloaking his state law claims in federal garb. *See*, *Balsam v. Sec'y of State*, 607 F. App'x 177, 183–84 (3d Cir. 2015) (finding Eleventh Amendment bars state law claims even when "premised on violations of the federal Constitution"); *Massey v. Coon*, No. 87-3768, 1989 WL 884, at *2 (9th Cir. Jan. 3, 1989) (affirming dismissal where "on its face the complaint states a claim under the due process and equal protection clauses of the Constitution, [but] these constitutional claims are entirely based on the failure of defendants to conform to state law").

Indeed, the introductory paragraph of Plaintiff's complaint expressly alleges "multiple violations of Wisconsin Statutes Chapters 5 – 12." (Dkt. 9:1.) He goes on to allege widespread fraud based on the "Defendants directing Wisconsin clerks and other election officials to ignore or violate the express requirements of the Wisconsin Election Code." (Dkt. 9 ¶ 14.) Plaintiff's Elections and Electors Clause claim is based entirely on "three separate instances where Defendants violated the Wisconsin Election Code" (Dkt. 9 ¶¶ 104–06); his Equal Protection Clause claim rests on how "Defendants failed to comply with the requirements of the Wisconsin Election Code" (Dkt. 9 ¶ 116); and his due process claim relies on "Defendants['] violation of the Wisconsin Election Code" (Dkt. 9 ¶ 129). His reliance on state law violations is echoed in his requested relief, where he seeks a declaration that "absentee ballot fraud occurred in violation of . . . Election laws and under state law." (Dkt. 9:49.) Plaintiff cannot camouflage these state law claims as federal violations simply to evade the Eleventh Amendment bar.

Further, it is not enough to escape the Eleventh Amendment that Plaintiff asks for prospective relief. (*See* Dkt. 72:26–27.) The Eleventh Amendment prohibits federal courts from granting "relief against state officials on the basis of state law, *whether prospective or retroactive*." *Pennhurst State Sch. & Hosp. v. Halderman*, 465 U.S. 89, 106 (1984) (emphasis added); *see also, Puerto Rico Aqueduct & Sewer Auth. v. Metcalf & Eddy, Inc.*, 506 U.S. 139, 146 (1993) ("[t]he doctrine of *Ex parte Young* . . . has no application in suits against the States and their agencies, which are barred regardless of the relief sought"); *Peirick v. Ind. Univ.-Purdue Univ. Indianapolis Athletics Dept.*, 510 F.3d 681, 696 (7th Cir. 2007) (Eleventh Amendment bars plaintiff's claim, "even [ ] her claims for prospective injunctive relief").

The Commission—comprised of its members, as pled here—is a state entity that has not consented to suit under § 1983; nor has Congress abrogated the State of Wisconsin's Eleventh Amendment immunity. *See, Will v. Mich. Dep't of State Police*, 491 U.S. 58, 66 (1989); *Joseph v. Bd. of Regents of Univ. of Wis. Sys.*, 432 F.3d 746, 748 (7th Cir. 2005). Plaintiff cannot masquerade his state law claims as a federal § 1983 action. Plaintiff's claims are, thus, barred by the Eleventh Amendment.

III. Laches bars this case.

Plaintiff's primary arguments against laches are (1) the application of laches is frequently fact-specific, and (2) he did not unreasonably delay in bringing this action. (Dkt. 72:22–23.) Neither argument is convincing.

First, courts can and do dismiss claims due to laches based on the pleadings or before trial, particularly when it is clear from the face of the complaint that laches

applies. *See, e.g.*, *King*, 2020 WL 7134198 at *7 ("The Court concludes that Plaintiffs' delay results in their claims being barred by laches."); *Aguila Mgmt. LLC v. Int'l Fruit Genetics, LLC*, No. CV-19-00173-PHX-DJH, 2020 WL 736303, at *3 (D. Ariz. Feb. 13, 2020) (Humetewa, J.) (noting that "[c]ourts in this district have previously applied laches in a motion to dismiss" because "where the elements of laches are apparent on the face of a complaint, it may be asserted on a motion to dismiss" (citation omitted)); *Solow Bldg. Co., LLC v. Nine West Group, Inc.*, No. 00 Civ. 7685(DC), 2001 WL 736794, at *3 (S.D.N.Y. June 29, 2001) (granting motion to dismiss based on laches, noting "When the defense of laches is clear on the face of the complaint, and where it is clear that the plaintiff can prove no set of facts to avoid the insuperable bar, a court may consider the defense on a motion to dismiss.") (citation omitted).

Second, Plaintiff's unreasonable delay in bringing this action is evident from the pleadings. He bases the claims related to election machines and software on "expert and fact witness" reports discussing "glitches" and other alleged vulnerabilities that occurred as far back as 2006. (*See* Dkt. 9 ¶ 88(A)–(H)). And Plaintiff's alleged injuries from the Commission's guidance on absentee ballot certification and indefinite confinement arose—and were ripe for challenge—long before the November 3, 2020 election. The basis of Plaintiff's claims regarding these issues is the Commission's guidance that was issued on October 18, 2016 (absentee ballot certification), May 13, 2020 (indefinite confinement), and October 19, 2020 (curing absentee ballot certification envelopes). (*See* Dkt. 9 ¶¶ 40, 44–45, 104–105.) If Plaintiff had legitimate concerns about the election machines and software, or the

Commission's guidance regarding absentee ballot and indefinite confinement status, he could have filed this lawsuit well before the November 3 election—yet he sat back and did nothing.

In his brief, Plaintiff argues that his delay was justified because "all of the unlawful conduct occurred during the course of the election and in the post-election vote counting, manipulation, and even fabrication." (Dkt. 72:22.) If this were the case, then Plaintiff fails to state a claim against *any* defendant in this case, since neither the Commission nor the Governor took part in any "post-election vote counting." Regardless, statements in Plaintiff's brief cannot change the allegations in his complaint, *see Car Carriers, Inc. v. Ford Motor Co.*, 745 F.2d 1101, 1107 (7th Cir. 1984) ("it is axiomatic that the complaint may not be amended by the briefs in opposition to a motion to dismiss"), which clearly outline claims stemming back months, if not decades. Given this, Plaintiff cannot overcome the doctrine of laches, which plainly bars the relief he seeks.

IV. Plaintiff has failed to state a claim for widespread fraud.

Plaintiff has not pled a plausible claim for fraud and falls short of the Rule 9(b) "particularity" requirement. Fed. R. Civ. P. 9(b). His allegations, even as supplemented by his briefing, do not connect his conspiracy theory involving foreign oligarchs and dictators, and a voting system called "Smartmatic," with any alleged mis-counted votes in Wisconsin. (Dkt. 9 ¶¶ 7–8; 9-1 ¶¶ 13–20.) Generally alleging a Venezuelan plot to reelect Hugo Chavez and speculating about conversations overheard in Colorado does not state a plausible claim for fraud. (*See* Dkt. 9 ¶¶ 8, 97.)

The Commission's opening brief detailed the absurdities underlying his factual allegations, including secret witnesses, Google research, and statistical analysis that would not even pass basics evidentiary reliability standards. (Dkt. 54:17–22.) Plaintiff says nothing in response. He makes no attempt to defend his facially implausible factual underpinnings and implausible theory. Instead, he claims that his factual bases are "unrebutted." (Dkt. 72:3.) This claim is wrong, but also misses the mark. This is briefing on a motion to dismiss, not summary judgment. Whether evidence has been factually rebutted is not at issue. The question is whether his claims are plausible and pled with particularity, which they are not.

He also ignores that his completely speculative theory about voting matching mis-counting is disproven by the publicly-available results of a hand-counted audit of election machines in Wisconsin. (*See* Dkt. 52:2–4.)[4] Over 140,000 ballots were hand counted and checked against voting machine results, including 28 Dominion machines, and no voting equipment issues were found. Likewise, a recount of Dane and Milwaukee counties did not materially change the vote tallies, which belies any speculation that election-day results were remotely manipulated. Lastly, Dominion has publicly responded these specific allegations, further demonstrating the

[4] Memorandum from Meagan Wolfe, Administrator of Wis. Elections Comm'n., to Wis. Elections Comm'n. (Dec. 1, 2020), https://elections.wi.gov/sites/elections.wi.gov/files/2020-12/2020%20Audit%20Program%20Update%20for%2012_1_2020%20Meeting%20FINAL.pdf

baselessness of Plaintiff's voter fraud claim.[5] Plaintiff offers no response, and his contrasting conspiracy theories fail plausibility and common sense.

V. The remedy the Plaintiff seeks is unlawful.

The Commission's brief in support of dismissal pointed out that this lawsuit fails in its premise because the relief that Plaintiff requests is unlawful. (Dkt. 54:22.) Plaintiff asks to disenfranchise hundreds of thousands of Wisconsinites who properly voted under election procedures that were in place for the November 2020 election. That retroactive disenfranchisement would violate voters' due process rights. Plaintiff offers no response. This lawsuit plainly cannot proceed.

Once a state legislature has directed that the state's electors are to be appointed by popular election, the people's "right to vote as the legislature has prescribed is fundamental." *Bush v. Gore*, 531 U.S. 98, 104 (2000) (per curiam). Conducting an election under procedures, and then changing those procedures in a way that disenfranchises voters violates due process. *Bennett v. Yoshina*, 140 F.3d 1218, 1227 (9th Cir. 1998) ("a court will strike down an election on substantive due process grounds if two elements are present: (1) likely reliance by voters on an established election procedure and/or official pronouncements about what the procedure will be in the coming election; and (2) significant disenfranchisement that results from a change in the election procedures.")

---

[5] *See* Dominion Voting, *Statement from Dominion on Sidney Powell's Charges, https://www.dominionvoting.com/dominion-statement-on-sidney-powell-charges/*. (Nov. 26, 2020).

And yet, that is exactly what Plaintiff asks here. The November election was held after months of careful preparation and public announcement of election procedures. Nearly 3.3 million Wisconsin voters casted their ballots.[6] Plaintiff did not challenge any of those procedures, or any of the voting equipment before the election. But, after the votes have been counted and certified, and the outcome is known, he wants to throw out those votes and reverse the outcome. Due process does not permit retroactively changing the election rules to reverse the will of the electorate.

CONCLUSION

Defendants Wisconsin Elections Commission and its members request that this case be dismissed.

Dated this 9th day of December, 2020.

Respectfully submitted,

JOSHUA L. KAUL
Attorney General of Wisconsin

OPINION AND ORDER DENYING PLAINTIFFS' "EMERGENCY MOTION FOR DECLARATORY, EMERGENCY, AND PERMANENT INJUNCTIVE RELIEF" (ECF NO. 7)

LINDA V. PARKER, U.S. DISTRICT JUDGE

***1** The right to vote is among the most sacred rights of our democracy and, in turn, uniquely defines us as Americans. The struggle to achieve the right to vote is one that has been both hard fought and cherished throughout our country's history. Local, state, and federal elections give voice to this right through the ballot. And elections that count each vote celebrate and secure this cherished right.

These principles are the bedrock of American democracy and are widely revered as being woven into the fabric of this country. In Michigan, more than 5.5 million citizens exercised the franchise either in person or by absentee ballot during the 2020 General Election. Those votes were counted and, as of November 23, 2020, certified by the Michigan Board of State Canvassers (also "State Board"). The Governor has sent the slate of Presidential Electors to the Archivist of the United States to confirm the votes for the successful candidate.

Against this backdrop, Plaintiffs filed this lawsuit, bringing forth claims of widespread voter irregularities and fraud in the processing and tabulation of votes and absentee ballots. They seek relief that is stunning in its scope and breathtaking in its reach. If granted, the relief would disenfranchise the votes of the more than 5.5 million Michigan citizens who, with dignity, hope, and a promise of a voice, participated in the 2020 General Election. The Court declines to grant Plaintiffs this relief.

I. Background

In the weeks leading up to, and on, November 3, 2020, a record 5.5 million Michiganders voted in the presidential election ("2020 General Election"). (ECF No. 36-4 at Pg ID 2622.) Many of those votes were cast by absentee ballot. This was due in part to the coronavirus pandemic and a ballot measure the Michigan voters passed in 2018 allowing for no-reason absentee voting. When the polls closed and the votes were counted, Former Vice President Joseph R. Biden, Jr. had secured over 150,000 more votes than President Donald J. Trump in Michigan. (*Id.*)

Michigan law required the Michigan State Board of Canvassers to canvass results of the 2020 General Election by November 23, 2020. Mich. Comp. Laws § 168.842. The State Board did so by a 3-0 vote, certifying the results "for the Electors of President and Vice President," among other offices. (ECF No. 36-5 at Pg ID 2624.) That same day, Governor Gretchen Whitmer signed the Certificates of Ascertainment for the slate of electors for Vice President Biden and Senator Kamala D. Harris. (ECF No. 36-6 at Pg ID 2627-29.) Those certificates were transmitted to and received by the Archivist of the United States. (*Id.*)

Federal law provides that if election results are contested in any state, and if the state, prior to election day, has enacted procedures to decide controversies or contests over electors and electoral votes, and if these procedures have been applied, and the decisions are made at least six days before the electors' meetings, then the decisions are considered conclusive and will apply in counting the electoral votes. 3 U.S.C. § 5. This date (the "Safe Harbor" deadline) falls on December 8, 2020. Under the federal statutory timetable for presidential elections, the Electoral College must meet on "the first Monday after the second Wednesday in December," 3 U.S.C. § 7, which is December 14 this year.

***2** Alleging widespread fraud in the distribution, collection, and counting of ballots in Michigan, as well as violations of state law as to certain election challengers and the manipulation of ballots through corrupt election machines and software, Plaintiffs filed the current lawsuit against Defendants at 11:48 p.m. on November 25, 2020—the eve of the Thanksgiving holiday. (ECF No. 1.) Plaintiffs are registered Michigan voters and nominees of the Republican Party to be Presidential Electors on behalf of the State of Michigan. (ECF No. 6 at Pg ID 882.) They are suing Governor Whitmer and Secretary of State Jocelyn Benson in their official capacities, as well as the Michigan Board of State Canvassers.

On November 29, a Sunday, Plaintiffs filed a First Amended Complaint (ECF No. 6), "Emergency Motion for Declaratory, Emergency, and Permanent Injunctive Relief and Memorandum in Support Thereof" (ECF No. 7), and Emergency Motion to Seal (ECF No. 8). In their First Amended Complaint, Plaintiffs allege three claims pursuant to 42 U.S.C. § 1983: (Count I) violation of the Elections and Electors Clauses; (Count II) violation of the Fourteenth Amendment Equal Protection Clause; and, (Count III) denial of the Fourteenth Amendment Due Process Clause. (ECF No. 6.) Plaintiffs also assert one count alleging violations of the Michigan Election Code. (*Id.*)

By December 1, motions to intervene had been filed by the City of Detroit (ECF No. 15), Robert Davis (ECF No. 12), and the Democratic National Committee and Michigan Democratic Party ("DNC/MDP") (ECF No. 14). On that date, the Court entered a briefing schedule with respect to the motions. Plaintiffs had not yet served Defendants with their pleading or emergency motions as of December 1. Thus, on December 1, the Court also entered a text-only order to hasten Plaintiffs' actions to bring Defendants into the case and enable the Court to address Plaintiffs' pending motions. Later the same day, after Plaintiffs filed certificates of service reflecting service of the summons and Amended Complaint on Defendants (ECF Nos. 21), the Court entered a briefing schedule with respect to Plaintiffs' emergency motions, requiring response briefs by 8:00 p.m. on December 2, and reply briefs by 8:00 p.m. on December 3 (ECF No. 24).

On December 2, the Court granted the motions to intervene. (ECF No. 28.) Response and reply briefs with respect to Plaintiffs' emergency motions were thereafter filed. (ECF Nos. 29, 31, 32, 34, 35, 36, 37, 39, 49, 50.) Amicus curiae Michigan State Conference NAACP subsequently moved and was granted leave to file a brief in support of Defendants' position. (ECF Nos. 48, 55.) Supplemental briefs also were filed by the parties. (ECF Nos. 57, 58.)

In light of the limited time allotted for the Court to resolve Plaintiffs' emergency motion for injunctive relief—which Plaintiffs assert "must be granted in advance of December 8, 2020" (ECF No. 7 at Pg ID 1846)—the Court has disposed of oral argument with respect to their motion pursuant to Eastern District of Michigan Local Rule 7.1(f).[1]

1 " '[W]here material facts are not in dispute, or where facts in dispute are not material to the preliminary injunction sought, district courts generally need not hold an evidentiary hearing.' " *Nexus Gas Transmission, LLC v. City of Green, Ohio*, 757 Fed. Appx. 489, 496-97 (6th Cir. 2018) (quoting *Certified Restoration Dry Cleaning Network, LLC v. Tenke Corp.*, 511 F.3d 535, 553 (6th Cir. 2007)) (citation omitted).

II. Standard of Review

A preliminary injunction is "an extraordinary remedy that may only be awarded upon a clear showing that the plaintiff is entitled to such relief." *Winter v. Nat. Res. Def. Council,*

Inc., 555 U.S. 7, 22, 129 S.Ct. 365, 172 L.Ed.2d 249 (2008) (citation omitted). The plaintiff bears the burden of demonstrating entitlement to preliminary injunctive relief. *Leary v. Daeschner*, 228 F.3d 729, 739 (6th Cir. 2000). Such relief will only be granted where "the movant carries his or her burden of proving that the circumstances clearly demand it." *Overstreet v. Lexington-Fayette Urban Cnty. Gov't*, 305 F.3d 566, 573 (6th Cir. 2002). "Evidence that goes beyond the unverified allegations of the pleadings and motion papers must be presented to support or oppose a motion for a preliminary injunction." 11A Mary Kay Kane, Fed. Prac. & Proc. § 2949 (3d ed.).

***3** Four factors are relevant in deciding whether to grant preliminary injunctive relief: " '(1) whether the movant has a strong likelihood of success on the merits; (2) whether the movant would suffer irreparable injury absent the injunction; (3) whether the injunction would cause substantial harm to others; and (4) whether the public interest would be served by the issuance of an injunction.' " *Daunt v. Benson*, 956 F.3d 396, 406 (6th Cir. 2020) (quoting *Bays v. City of Fairborn*, 668 F.3d 814, 818-19 (6th Cir. 2012)). "At the preliminary injunction stage, 'a plaintiff must show more than a mere possibility of success,' but need not 'prove his case in full.' " *Ne. Ohio Coal. for Homeless v. Husted*, 696 F.3d 580, 591 (6th Cir. 2012) (quoting *Certified Restoration Dry Cleaning Network, LLC v. Tenke Corp.*, 511 F.3d 535, 543 (6th Cir. 2007)). Yet, "the proof required for the plaintiff to obtain a preliminary injunction is much more stringent than the proof required to survive a summary judgment motion ...." *Leary*, 228 F.3d at 739.

III. Discussion

The Court begins by discussing those questions that go to matters of subject matter jurisdiction or which counsel against reaching the merits of Plaintiffs' claims. While the Court finds that any of these issues, alone, indicate that Plaintiffs' motion should be denied, it addresses each to be thorough.

A. Eleventh Amendment Immunity

The Eleventh Amendment to the United States Constitution provides:

> The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

U.S. Const. amend. XI. This immunity extends to suits brought by citizens against their own states. *See, e.g., Ladd v. Marchbanks*, 971 F.3d 574, 578 (6th Cir. 2020) (citing *Hans v. Louisiana*, 134 U.S. 1, 18-19, 10 S.Ct. 504, 33 L.Ed. 842 (1890)). It also extends to suits against state agencies or departments, *Pennhurst State Sch. & Hosp. v. Halderman*, 465 U.S. 89, 100, 104 S.Ct. 900, 79 L.Ed.2d 67 (1984) (citations omitted), and "suit[s] against state officials when 'the state is the real, substantial party in interest[,]' " *id.* at 101, 104 S.Ct. 900 (quoting *Ford Motor Co. v. Dep't of Treasury*, 323 U.S. 459, 464, 65 S.Ct. 347, 89 L.Ed. 389 (1945)).

A suit against a State, a state agency or its department, or a state official is in fact a suit against the State and is barred "regardless of the nature of the relief sought." *Pennhurst State Sch. & Hosp.*, 465 U.S. at 100-02, 104 S.Ct. 900 (citations omitted). " 'The general rule is that a suit is against the sovereign if the judgment sought would expend itself on the public treasury or domain, or interfere with the public administration, or if the effect of the judgment would be to restrain the Government from acting, or to compel it to act.' " *Id.* at 101 n.11, 104 S.Ct. 900 (quoting *Dugan v. Rank*, 372 U.S. 609, 620, 83 S.Ct. 999, 10 L.Ed.2d 15 (1963)) (internal quotation marks omitted).

Eleventh Amendment immunity is subject to three exceptions: (1) congressional abrogation; (2) waiver by the State; and (3) "a suit against a state official seeking prospective injunctive relief to end a continuing violation of federal law." *See Carten v. Kent State Univ.*, 282 F.3d 391, 398 (6th Cir. 2002) (citations omitted). Congress did not abrogate the States' sovereign immunity when it enacted 42 U.S.C. § 1983. *Will v. Mich. Dep't of State Police*, 491 U.S. 58, 66, 109 S.Ct. 2304, 105 L.Ed.2d 45 (1989). "The State of Michigan has not consented to being sued in civil rights actions in the federal courts." *Johnson v. Unknown Dellatifa*, 357 F.3d 539, 545 (6th Cir. 2004) (citing *Abick v. Michigan*, 803 F.2d 874, 877 (6th Cir. 1986)). The Eleventh Amendment therefore bars Plaintiffs' claims against the Michigan Board of State Canvassers. *See McLeod v. Kelly*, 304 Mich. 120, 7 N.W.2d 240, 242 (1942) ("The board of State canvassers is a State agency ..."); *see also Deleeuw v. State Bd. of Canvassers*, 263 Mich.App. 497, 688 N.W.2d 847, 850 (2004). Plaintiffs' claims are barred against Governor Whitmer and Secretary Benson unless the third exception applies.

***4** The third exception arises from the Supreme Court's decision in *Ex parte Young*, 209 U.S. 123, 28 S.Ct. 441, 52 L.Ed. 714 (1908). But as the Supreme Court has advised:

> To interpret *Young* to permit a federal-court action to proceed in every case where prospective declaratory and injunctive relief is sought against an officer, named in his individual capacity, would be to adhere to an empty formalism and to undermine the principle ... that Eleventh Amendment immunity represents a real limitation on a federal court's federal-question jurisdiction. The real interests served by the Eleventh Amendment are not to be sacrificed to elementary mechanics of captions and pleading. Application of the *Young* exception must reflect a proper understanding of its role in our federal system and respect for state courts instead of a reflexive reliance on an obvious fiction.

Idaho v. Coeur d'Alene Tribe of Idaho, 521 U.S. 261, 270, 117 S.Ct. 2028, 138 L.Ed.2d 438 (1997). Further, "the theory of *Young* has not been provided an expansive interpretation." *Pennhurst State Sch. & Hosp.*, 465 U.S. at 102, 104 S.Ct. 900. " 'In determining whether the doctrine of *Ex parte Young* avoids an Eleventh Amendment bar to suit, a court need only conduct a straightforward inquiry into whether [the] complaint alleges an ongoing violation of federal law and seeks relief properly characterized as prospective.' " *Verizon Md., Inc. v. Pub. Serv. Comm'n*, 535 U.S. 635, 645, 122 S.Ct. 1753, 152 L.Ed.2d 871 (2002) (quoting *Coeur d'Alene Tribe of Idaho*, 521 U.S. at 296, 117 S.Ct. 2028 (O'Connor, J., concurring)).

Ex parte Young does not apply, however, to *state law* claims against state officials, regardless of the relief sought. *Pennhurst State Sch. & Hosp.*, 465 U.S. at 106, 104 S.Ct. 900 ("A federal court's grant of relief against state officials on the basis of state law, whether prospective or retroactive, does not vindicate the supreme authority of federal law. On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law."); *see also In re Ohio Execution Protocol Litig.*, 709 F. App'x 779, 787 (6th Cir. 2017) ("If the plaintiff sues a state official under state law in federal court for actions taken within the scope of his authority, sovereign immunity bars the lawsuit regardless of whether the action seeks monetary or injunctive relief."). Unquestionably, Plaintiffs' state law claims against Defendants are barred by Eleventh Amendment immunity.

The Court then turns its attention to Plaintiffs' § 1983 claims against Defendants. Defendants and Intervenor DNC/MDP contend that these claims are not in fact federal claims as they are premised entirely on alleged violations of *state* law. (ECF No. 31 at Pg ID 2185 ("Here, each count of Plaintiffs' complaint—even Counts I, II, and III, which claim to raise violations of federal law—is predicated on the election being conducted contrary to Michigan law."); ECF No. 36 at Pg ID 2494 ("While some of [Plaintiffs'] allegations concern fantastical conspiracy theories that belong more appropriately in the fact-free outer reaches of the Internet[,] ... what Plaintiffs assert at bottom are violations of the Michigan Election Code.") Defendants also argue that even if properly stated as federal causes of action, "it is far from clear whether Plaintiffs' requested injunction is actually prospective in nature, as opposed to retroactive." (ECF No. 31 at Pg ID 2186.)

***5** The latter argument convinces this Court that *Ex parte Young* does not apply. As set forth earlier, " '[i]n order to fall with the *Ex parte Young* exception, a claim must seek prospective relief to end a continuing violation of federal law.' " *Russell v. Lundergan-Grimes*, 784 F.3d 1037, 1047 (6th Cir. 2015) (quoting *Diaz v. Mich. Dep't of Corr.*, 703 F.3d 956, 964 (6th Cir. 2013)). Unlike *Russell*, which Plaintiffs cite in their reply brief, this is not a case where a plaintiff is seeking to enjoin the continuing enforcement of a statute that is allegedly unconstitutional. *See id.* at 1044, 1047 (plaintiff claimed that Kentucky law creating a 300-foot no-political-speech buffer zone around polling location violated his free-speech rights). Instead, Plaintiffs are seeking to undo what has already occurred, as their requested relief reflects.[2] (*See* ECF No. 7 at Pg ID 1847; *see also* ECF No. 6 at Pg 955-56.)

2 To the extent Plaintiffs ask the Court to certify the results in favor of President Donald J. Trump, such relief is beyond its powers.

Before this lawsuit was filed, the Michigan Board of State Canvassers had already certified the election results and Governor Whitmer had transmitted the State's slate of electors to the United States Archivist. (ECF Nos. 31-4, 31-5.) There is no continuing violation to enjoin. *See Rios v. Blackwell*, 433 F. Supp. 2d 848 (N.D. Ohio, 2006); *see also King Lincoln Bronzeville Neighborhood Ass'n v. Husted*, No. 2:06-cv-00745, 2012 WL 395030, at *4-5 (S.D. Ohio Feb. 7, 2012); *cf. League of Women Voters of Ohio v. Brunner*, 548 F.3d 463, 475 (6th Cir. 2008) (finding that the plaintiff's claims fell within the *Ex parte Young* doctrine where it alleged that the problems that plagued the election "are chronic and will continue absent injunctive relief").

For these reasons, the Court concludes that the Eleventh Amendment bars Plaintiffs' claims against Defendants.

B. Mootness

This case represents well the phrase: "this ship has sailed." The time has passed to provide most of the relief Plaintiffs request in their Amended Complaint; the remaining relief is beyond the power of any court. For those reasons, this matter is moot.

" 'Under Article III of the Constitution, federal courts may adjudicate only actual, ongoing cases or controversies.' " *Kentucky v. U.S. ex rel. Hagel*, 759 F.3d 588, 595 (6th Cir. 2014) (quoting *Lewis v. Cont'l Bank Corp.*, 494 U.S. 472, 477, 110 S.Ct. 1249, 108 L.Ed.2d 400 (1990)). A case may become moot "when the issues presented are no longer live or the parties lack a legally cognizable interest in the outcome." *U.S. Parole Comm'n v. Geraghty*, 445 U.S. 388, 396, 410, 100 S.Ct. 1202, 63 L.Ed.2d 479 (1980) (internal quotation marks and citation omitted). Stated differently, a case is moot where the court lacks "the ability to give meaningful relief[.]" *Sullivan v. Benningfield*, 920 F.3d 401, 410 (6th Cir. 2019). This lawsuit was moot well before it was filed on November 25.

In their prayer for relief, Plaintiffs ask the Court to: (a) order Defendants to decertify the results of the election; (b) enjoin Secretary Benson and Governor Whitmer from transmitting the certified election results to the Electoral College; (c) order Defendants "to transmit certified election results that state that President Donald Trump is the winner of the election"; (d) impound all voting machines and software in Michigan for expert inspection; (e) order that no votes received or tabulated by machines not certified as required by federal and state law be counted; and, (f) enter a declaratory judgment that mail-in and absentee ballot fraud must be remedied with a manual recount or statistically valid sampling.[3] (ECF No. 6 at Pg ID 955-56, ¶ 233.) What relief the Court could grant Plaintiffs is no longer available.

3 Plaintiffs also seek an order requiring the impoundment of all voting machines and software in Michigan for expert inspection and the production of security camera footage from the TCF Center for November 3 and 4. (ECF No. 6 at Pg ID 956, ¶ 233.) This requested relief is not meaningful, however, where the remaining requests are no longer available. In other words, the evidence Plaintiffs seek to gather by inspecting voting machines and software and security camera footage only would be useful if an avenue remained open for them to challenge the election results.

***6** Before this lawsuit was filed, all 83 counties in Michigan had finished canvassing their results for all elections and reported their results for state office races to the Secretary of State and the Michigan Board of State Canvassers in accordance with Michigan law. *See* Mich. Comp. Laws § 168.843. The State Board had certified the results of the 2020 General Election and Governor Whitmer had submitted the slate of Presidential Electors to the Archivists. (ECF No. 31-4 at Pg ID 2257-58; ECF No. 31-5 at Pg ID 2260-63.) The time for requesting a special election based on mechanical errors or malfunctions in voting machines had expired. *See* Mich. Comp. Laws §§ 168.831, 168.832 (petitions for special election based on a defect or mechanical malfunction must be filed "no later than 10 days after the date of the election"). And so had the time for requesting a recount for the office of President. *See* Mich. Comp. Laws § 168.879.

The Michigan Election Code sets forth detailed procedures for challenging an election, including deadlines for doing so. Plaintiffs did not avail themselves of the remedies established by the Michigan legislature. The deadline for them to do so has passed. Any avenue for this Court to provide meaningful relief has been foreclosed. As the Eleventh Circuit Court of Appeals recently observed in one of the many other post-election lawsuits brought to specifically overturn the results of the 2020 presidential election:

> "We cannot turn back the clock and create a world in which" the 2020 election results are not certified. *Fleming v. Gutierrez*, 785 F.3d 442, 445 (10th Cir. 2015). And it is not possible for us to delay certification nor meaningful to order a new recount when the results are already final and certified.

Wood v. Raffensperger, — F.3d —, 2020 WL 7094866 (11th Cir. Dec. 5, 2020). And as one Justice of the Supreme Court of Pennsylvania advised in another 2020 post-election lawsuit: "there is no basis in law by which the courts may grant Petitioners' request to ignore the results of an election and recommit the choice to the General Assembly to substitute its preferred slate of electors for the one chosen by a majority of Pennsylvania's voters." *Kelly v. Commonwealth*, No. 68 MAP 2020, 2020 WL 7018314, at *3 (Pa. Nov. 28, 2020) (Wecht, J., concurring); *see also Wood v. Raffensperger*, No. 1:20-cv-04651, 2020 WL 6817513, at *13 (N.D. Ga. Nov. 20, 2020) (concluding that "interfer[ing] with the result of an election that has already concluded would be unprecedented and harm the public in countless ways").

In short, Plaintiffs' requested relief concerning the 2020 General Election is moot.

C. Laches

Defendants argue that Plaintiffs are unlikely to succeed on the merits because they waited too long to knock on the Court's door. (ECF No. 31 at Pg ID 2175-79; ECF No. 39 at Pg ID 2844.) The Court agrees.

The doctrine of laches is rooted in the principle that "equity aids the vigilant, not those who slumber on their rights." *Lucking v. Schram*, 117 F.2d 160, 162 (6th Cir. 1941); *see also United States v. Clintwood Elkhorn Min. Co.*, 553 U.S. 1, 9, 128 S.Ct. 1511, 170 L.Ed.2d 392 (2008) ("A constitutional claim can become time-barred just as any other claim can."). An action may be barred by the doctrine of laches if: (1) the plaintiff delayed unreasonably in asserting his rights and (2) the defendant is prejudiced by this delay. *Brown-Graves Co. v. Central States, Se. and Sw. Areas Pension Fund*, 206 F.3d 680, 684 (6th Cir. 2000); *Ottawa Tribe of Oklahoma v. Logan*, 577 F.3d 634, 639 n.6 (6th Cir. 2009) ("Laches arises from an extended failure to exercise a right to the detriment of another party."). Courts apply laches in election cases. *Detroit Unity Fund v. Whitmer*, 819 F. App'x 421, 422 (6th Cir. 2020) (holding that the district court did not err in finding plaintiff's claims regarding deadline for local ballot initiatives "barred by laches, considering the unreasonable delay on the part of [p]laintiffs and the consequent prejudice to [d]efendants"). *Cf. Benisek v. Lamone*, —— U.S. ——, 138 S. Ct. 1942, 1944, 201 L.Ed.2d 398 (2018) ("[A] party requesting a preliminary injunction must generally show reasonable diligence. That is as true in election law cases as elsewhere.").

***7** First, Plaintiffs showed no diligence in asserting the claims at bar. They filed the instant action on November 25—more than 21 days after the 2020 General Election—and served it on Defendants some five days later on December 1. (ECF Nos. 1, 21.) If Plaintiffs had legitimate claims regarding whether the treatment of election challengers complied with state law, they could have brought their claims well in advance of or on Election Day—but they did not. Michigan's 83 Boards of County Canvassers finished canvassing by no later than November 17 and, on November 23, both the Michigan Board of State Canvassers and Governor Whitmer certified the election results. Mich. Comp. Laws §§ 168.822, 168.842.0. If Plaintiffs had legitimate claims regarding the manner by which ballots were processed and tabulated on or after Election Day, they could have brought the instant action on Election Day or during the weeks of canvassing that followed—yet they did not. Plaintiffs base the claims related to election machines and software on "expert and fact witness" reports discussing "glitches" and other alleged vulnerabilities that occurred as far back as 2010. (*See e.g.*, ECF No. 6 at Pg ID 927-933, ¶¶ 157(C)-(E), (G), 158, 160, 167.) If Plaintiffs had legitimate concerns about the election machines and software, they could have filed this lawsuit well before the 2020 General Election—yet they sat back and did nothing.

Plaintiffs proffer no persuasive explanation as to why they waited so long to file this suit. Plaintiffs concede that they "would have preferred to file sooner, but [ ] needed some time to gather statements from dozens of fact witnesses, retain and engage expert witnesses, and gather other data supporting their Complaint." (ECF No. 49 at Pg ID 3081.) But according to Plaintiffs themselves, "[m]anipulation of votes was apparent *shortly after the polls closed on November 3, 2020.*" (ECF No. 7 at Pg ID 1837 (emphasis added).) Indeed, where there is no reasonable explanation, there can be no true justification. *See Crookston v. Johnson*, 841 F.3d 396, 398 (6th Cir. 2016) (identifying the "first and most essential" reason to issue a stay of an election-related injunction is plaintiff offering "no reasonable explanation for waiting so long to file this action"). Defendants satisfy the first element of their laches defense.

Second, Plaintiffs' delay prejudices Defendants. *See Kay v. Austin*, 621 F.2d 809, 813 (6th Cir. 1980) ("As time passes, the state's interest in proceeding with the election increases in importance as resources are committed and irrevocable decisions are made, and the candidate's claim to be a serious candidate who has received a serious injury becomes less credible by his having slept on his rights.") This is especially so considering that Plaintiffs' claims for relief are not merely last-minute—they are after the fact. While Plaintiffs delayed, the ballots were cast; the votes were counted; and the results were certified. The rationale for interposing the doctrine of laches is now at its peak. *See McDonald v. Cnty. of San Diego*, 124 F. App'x 588 (9th Cir. 2005) (citing *Soules v. Kauaians for Nukolii Campaign Comm.*, 849 F.2d 1176, 1180 (9th Cir. 1988)); *Soules*, 849 F.2d at 1180 (quoting *Hendon v. N.C. State Bd. of Elections*, 710 F.2d 177, 182 (4th Cir. 1983)) (applying doctrine of laches in post-election lawsuit because doing otherwise would, "permit, if not encourage, parties who could raise a claim to lay by and gamble upon receiving a favorable decision of the electorate and then, upon losing, seek to undo the ballot results in a court action").

Plaintiffs could have lodged their constitutional challenges much sooner than they did, and certainly not three weeks

after Election Day and one week after certification of almost three million votes. The Court concludes that Plaintiffs' delay results in their claims being barred by laches.

D. Abstention

As outlined in several filings, when the present lawsuit was filed on November 25, 2020, there already were multiple lawsuits pending in Michigan state courts raising the same or similar claims alleged in Plaintiffs' Amended Complaint. (*See, e.g.*, ECF No. 31 at Pg ID 2193-98 (summarizing five state court lawsuits challenging President Trump's defeat in Michigan's November 3, 2020 General Election).) Defendants and the City of Detroit urge the Court to abstain from deciding Plaintiffs' claims in deference to those proceedings under various abstention doctrines. (*Id.* at Pg ID 2191-2203; ECF No. 39 at Pg ID 2840-44.) Defendants rely on the abstention doctrine outlined by the Supreme Court in *Colorado River Water Conservation District v. United States*, 424 U.S. 800, 96 S.Ct. 1236, 47 L.Ed.2d 483 (1976). The City of Detroit relies on the abstention doctrines outlined in *Colorado River*, as well as those set forth in *Railroad Commission of Texas v. Pullman Co.*, 312 U.S. 496, 500-01, 61 S.Ct. 643, 85 L.Ed. 971 (1941), and *Burford v. Sun Oil Co.*, 319 U.S. 315, 63 S.Ct. 1098, 87 L.Ed. 1424 (1943). The City of Detroit maintains that abstention is particularly appropriate when resolving election disputes in light of the autonomy provided to state courts to initially settle such disputes.

***8** The abstention doctrine identified in *Colorado River* permits a federal court to abstain from exercising jurisdiction over a matter in deference to parallel state-court proceedings. *Colorado River*, 424 U.S. at 813, 817, 96 S.Ct. 1236. The exception is found warranted "by considerations of 'proper constitutional adjudication,' 'regard for federal-state relations,' or 'wise judicial administration.' " *Quackenbush v. Allstate Ins. Co.*, 517 U.S. 706, 716, 116 S.Ct. 1712, 135 L.Ed.2d 1 (1996) (quoting *Colorado River*, 424 U.S. at 817, 96 S.Ct. 1236). The Sixth Circuit has identified two prerequisites for abstention under this doctrine. *Romine v. Compuserve Corp.*, 160 F.3d 337, 339-40 (6th Cir. 1998).

First, the court must determine that the concurrent state and federal actions are parallel. *Id.* at 339. Second, the court must consider the factors outlined by the Supreme Court in *Colorado River* and subsequent cases:

> (1) whether the state court has assumed jurisdiction over any res or property; (2) whether the federal forum is less convenient to the parties; (3) avoidance of piecemeal litigation; ... (4) the order in which jurisdiction was obtained; ... (5) whether the source of governing law is state or federal; (6) the adequacy of the state court action to protect the federal plaintiff's rights; (7) the relative progress of the state and federal proceedings; and (8) the presence or absence of concurrent jurisdiction.

Romine, 160 F.3d at 340-41 (internal citations omitted). "These factors, however, do not comprise a mechanical checklist. Rather, they require 'a careful balancing of the important factors as they apply in a give[n] case' depending on the particular facts at hand." *Id.* (quoting *Moses H. Cone Mem'l Hosp. v. Mercury Constr. Corp.*, 460 U.S. 1, 16, 103 S.Ct. 927, 74 L.Ed.2d 765 (1983)).

As summarized in Defendants' response brief and reflected in their exhibits (*see* ECF No. 31 at Pg ID 2193-97; *see also* ECF Nos. 31-7, 31-9, 31-11, 31-12, 31-14), the allegations and claims in the state court proceedings and the pending matter are, at the very least, substantially similar, *Romine*, 160 F.3d at 340 ("Exact parallelism is not required; it is enough if the two proceedings are substantially similar." (internal quotation marks and citation omitted)). A careful balancing of the factors set forth by the Supreme Court counsel in favor of deferring to the concurrent jurisdiction of the state courts.

The first and second factor weigh against abstention. *Id.* (indicating that the weight is against abstention where no property is at issue and neither forum is more or less convenient). While the Supreme Court has stated that " 'the presence of federal law issues must always be a major consideration weighing against surrender of federal jurisdiction in deference to state proceedings[,]' " *id.* at 342 (quoting *Moses H. Cone*, 460 U.S. at 26, 103 S.Ct. 927), this " 'factor has less significance where the federal courts' jurisdiction to enforce the statutory rights in question is concurrent with that of the state courts.' "[4] *Id.* (quoting *Moses H. Cone*, 460 U.S. at 25, 103 S.Ct. 927). Moreover, the Michigan Election Code seems to dominate even Plaintiffs' federal claims. Further, the remaining factors favor abstention.

4 State courts have concurrent jurisdiction over § 1983 actions. *Felder v. Casey*, 487 U.S. 131, 139, 108 S.Ct. 2302, 101 L.Ed.2d 123 (1988).

"Piecemeal litigation occurs when different courts adjudicate the identical issue, thereby duplicating judicial effort and potentially rendering conflicting results." *Id.* at 341. The parallel proceedings are premised on similar factual allegations and many of the same federal and state claims.

The state court proceedings were filed well before the present matter and at least three of those matters are far more advanced than this case. Lastly, as Congress conferred concurrent jurisdiction on state courts to adjudicate § 1983 claims, *Felder v. Casey*, 487 U.S. 131, 139, 108 S.Ct. 2302, 101 L.Ed.2d 123 (1988), "[t]here can be no legitimate contention that the [Michigan] state courts are incapable of safeguarding [the rights protected under this statute]," *Romine*, 160 F.3d at 342.

***9** For these reasons, abstention is appropriate under the *Colorado River* doctrine. The Court finds it unnecessary to decide whether abstention is appropriate under other doctrines.

E. Standing

Under Article III of the United States Constitution, federal courts can resolve only "cases" and "controversies." U.S. Const. art. III § 2. The case-or-controversy requirement is satisfied only where a plaintiff has standing to bring suit. *See Spokeo, Inc. v. Robins*, ––– U.S. ––––, 136 S. Ct. 1540, 1547, 194 L.Ed.2d 635 (2016), *as revised* (May 24, 2016). Each plaintiff must demonstrate standing for each claim he seeks to press.[5] *DaimlerChrysler Corp. v. Cuno*, 547 U.S. 332, 352, 126 S.Ct. 1854, 164 L.Ed.2d 589 (2006) (citation omitted) ("[A] plaintiff must demonstrate standing separately for each form of relief sought."). To establish standing, a plaintiff must show that: (1) he has suffered an injury in fact that is "concrete and particularized" and "actual or imminent"; (2) the injury is "fairly ... trace[able] to the challenged action of the defendant"; and (3) it is "likely, as opposed to merely speculative, that the injury will be redressed by a favorable decision." *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560-62, 112 S.Ct. 2130, 119 L.Ed.2d 351 (1992) (internal quotation marks and citations omitted).

5 Plaintiffs assert a due process claim in their Amended Complaint and twice state in their motion for injunctive relief that Defendants violated their due process rights. (*See* ECF No. 7 at Pg ID 1840, 1844.) Plaintiffs do not pair either statement with anything the Court could construe as a developed argument. (*Id.*) The Court finds it unnecessary, therefore, to further discuss the due process claim. *McPherson v. Kelsey*, 125 F.3d 989, 995 (6th Cir. 1997) ("Issues adverted to in a perfunctory manner, unaccompanied by some effort at developed argumentation, are deemed waived.").

1. Equal Protection Claim

Plaintiffs allege that Defendants engaged in "several schemes" to, among other things, "destroy," "discard," and "switch" votes for President Trump, thereby "devalu[ing] Republican votes" and "diluting" the influence of their individual votes. (ECF No. 49 at Pg ID 3079.) Plaintiffs contend that "the vote dilution resulting from this systemic and illegal conduct did not affect all Michigan voters equally; it had the intent and effect of inflating the number of votes for Democratic candidates and reducing the number of votes for President Trump and Republican candidates." (ECF No. 49 at Pg ID 3079.) Even assuming that Plaintiffs establish injury-in-fact and causation under this theory,[6] their constitutional claim cannot stand because Plaintiffs fall flat when attempting to clear the hurdle of redressability.

6 To be clear, the Court does not find that Plaintiffs satisfy the first two elements of the standing inquiry.

Plaintiffs fail to establish that the alleged injury of vote-dilution can be redressed by a favorable decision from this Court. Plaintiffs ask this Court to de-certify the results of the 2020 General Election in Michigan. But an order de-certifying the votes of approximately 2.8 million people would not reverse the dilution of Plaintiffs' vote. To be sure, standing is not "dispensed in gross: A plaintiff's remedy must be tailored to redress the plaintiff's particular injury." *Gill v. Whitford*, ––– U.S. ––––, 138 S. Ct. 1916, 1934, 201 L.Ed.2d 313 (2018) (citing *Cuno*, 547 U.S. at 353, 126 S.Ct. 1854); *Cuno*, 547 U.S. at 353, 126 S.Ct. 1854 ("The remedy must of course be limited to the inadequacy that produced the injury in fact that the plaintiff has established.") (quoting *Lewis v. Casey*, 518 U.S. 343, 357, 116 S.Ct. 2174, 135 L.Ed.2d 606 (1996)). Plaintiffs' alleged injury does not entitle them to seek their requested remedy because the harm of having one's vote invalidated or diluted is not remedied by denying millions of others *their* right to vote. Accordingly, Plaintiffs have failed to show that their injury can be redressed by the relief they seek and thus possess no standing to pursue their equal protection claim.

2. Elections Clause & Electors Clause Claims

***10** The provision of the United States Constitution known as the Elections Clause states in part: "The Times, Places and Manner of holding Elections for Senators and

Representatives, shall be prescribed in each State by the Legislature thereof[.]" U.S. Const. art. I, § 4, cl. 1. "The Elections Clause effectively gives state governments the 'default' authority to regulate the mechanics of federal elections, *Foster v. Love*, 522 U.S. 67, 69, 118 S. Ct. 464, 139 L.Ed.2d 369 (1997), with Congress retaining 'exclusive control' to 'make or alter' any state's regulations, *Colegrove v. Green*, 328 U.S. 549, 554, 66 S. Ct. 1198, 90 L.Ed. 1432 (1946)." *Bognet*, 980 F.3d at ——, 2020 WL 6686120, *1. The "Electors Clause" of the Constitution states: "Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors ...." U.S. Const. art. II, § 1, cl. 2.

Plaintiffs argue that, as "nominees of the Republican Party to be Presidential Electors on behalf of the State of Michigan, they have standing to allege violations of the Elections Clause and Electors Clause because "a vote for President Trump and Vice-President Pence in Michigan ... is a vote for each Republican elector[ ], and ... illegal conduct aimed at harming candidates for President similarly injures Presidential Electors." (ECF No. 7 at Pg ID 1837-38; ECF No. 49 at Pg ID 3076-78.)

But where, as here, the only injury Plaintiffs have alleged is that the Elections Clause has not been followed, the United States Supreme Court has made clear that "[the] injury is precisely the kind of undifferentiated, generalized grievance about the conduct of government that [courts] have refused to countenance."[7] *Lance v. Coffman*, 549 U.S. 437, 442, 127 S.Ct. 1194, 167 L.Ed.2d 29 (2007). Because Plaintiffs "assert no particularized stake in the litigation," Plaintiffs fail to establish injury-in-fact and thus standing to bring their Elections Clause and Electors Clause claims. *Id.*; *see also Johnson v. Bredesen*, 356 F. App'x 781, 784 (6th Cir. 2009) (citing *Lance*, 549 U.S. at 441-42, 127 S.Ct. 1194) (affirming district court's conclusion that citizens did not allege injury-in-fact to support standing for claim that the state of Tennessee violated constitutional law).

7 Although separate constitutional provisions, the Electors Clause and Elections Clause share "considerable similarity," *Ariz. State Leg. v. Ariz. Indep. Redistricting Comm'n*, 576 U.S. 787, 839, 135 S.Ct. 2652, 192 L.Ed.2d 704, (2015) (Roberts, C.J., dissenting), and Plaintiffs do not at all distinguish the two clauses in their motion for injunctive relief or reply brief (ECF No. 7; ECF No. 49 at Pg ID 3076-78). *See also Bognet v. Sec'y Commonwealth of Pa.*, 980 F.3d at ——, 2020 WL 6686120, at *7 (3d Cir. 2020) (applying same test for standing under both Elections Clause and Electors Clause); *Wood*, 2020 WL 6817513, at *1 (same); *Foster*, 522 U.S. at 69, 118 S.Ct. 464 (characterizing Electors Clause as Elections Clauses' "counterpart for the Executive Branch"); *U.S. Term Limits, Inc. v. Thornton*, 514 U.S. 779, 804-05, 115 S.Ct. 1842, 131 L.Ed.2d 881 (1995) (noting that state's "duty" under Elections Clause "parallels the duty" described by Electors Clause).

This is so because the Elections Clause grants rights to "the Legislature" of "each State." U.S. Const. art. I, § 4, cl. 1. The Supreme Court interprets the words "the Legislature," as used in that clause, to mean the lawmaking bodies of a state. *Ariz. State Legislature*, 135 S.Ct. at 2673. The Elections Clause, therefore, grants rights to state legislatures and to other entities to which a State may delegate lawmaking authority. *See id.* at 2668. Plaintiffs' Elections Clause claims thus belong, if to anyone, Michigan's state legislature. *Bognet v. Secy. Commonwealth of Pa.*, 980 F.3d 336, ——, 2020 WL 6686120, *7 (3d Cir. 2020). Plaintiffs here are six presidential elector nominees; they are not a part of Michigan's lawmaking bodies nor do they have a relationship to them.

***11** To support their contention that they have standing, Plaintiffs point to *Carson v. Simon*, 978 F.3d 1051 (8th Cir. 2020), a decision finding that electors had standing to bring challenges under the Electors Clause. (ECF No. 7 at Pg ID 1839 (citing *Carson*, 978 F.3d at 1057).) In that case, which was based on the specific content and contours of Minnesota state law, the Eighth Circuit Court of Appeals concluded that because "the plain text of Minnesota law treats prospective electors as candidates," it too would treat presidential elector nominees as candidates. *Carson*, 978 F.3d at 1057. This Court, however, is as unconvinced about the majority's holding in *Carson* as the dissent:

> I am not convinced the Electors have Article III standing to assert claims under the Electors Clause. Although Minnesota law at times refers to them as "candidates," *see, e.g.*, Minn. Stat. § 204B.03 (2020), the Electors are not candidates for public office as that term is commonly understood. Whether they ultimately assume the office of elector depends entirely on the outcome of the state popular vote for president. *Id.* § 208.04 subdiv. 1 ("[A] vote cast for the party candidates for president and vice president shall be deemed a vote for that party's electors."). They are not presented to and chosen by the voting public for their office, but instead automatically assume that office based on the public's selection of entirely different individuals.

978 F.3d at 1063 (Kelly, J., dissenting).[8]

8 In addition, at least one Circuit Court, the Third Circuit Court of Appeals, has distinguished *Carson*'s holding, noting:

> Our conclusion departs from the recent decision of an Eighth Circuit panel which, over a dissent, concluded that candidates for the position of presidential elector had standing under *Bond* [*v. U.S.*, 564 U.S. 211, 131 S.Ct. 2355, 180 L.Ed.2d 269 (2011)] to challenge a Minnesota state-court consent decree that effectively extended the receipt deadline for mailed ballots.... The *Carson* court appears to have cited language from *Bond* without considering the context—specifically, the Tenth Amendment and the reserved police powers—in which the U.S. Supreme Court employed that language. There is no precedent for expanding *Bond* beyond this context, and the *Carson* court cited none.

Bognet, 980 F.3d at —— n.6, 2020 WL 6686120, at *8 n.6.

Plaintiffs contend that the Michigan Election Code and relevant Minnesota law are similar. (See ECF No. 49 at Pg ID 3076-78.) Even if the Court were to agree, it finds that Plaintiffs lack standing to sue under the Elections and Electors Clauses.

F. The Merits of the Request for Injunctive Relief

1. Likelihood of Success on the Merits

The Court may deny Plaintiffs' motion for injunctive relief for the reasons discussed above. Nevertheless, the Court will proceed to analyze the merits of their claims.

a. Violation of the Elections & Electors Clauses

Plaintiffs allege that Defendants violated the Elections Clause and Electors Clause by deviating from the requirements of the Michigan Election Code. (*See, e.g.*, ECF No. 6 at Pg ID 884-85, ¶¶ 36-40, 177-81, 937-38.) Even assuming Defendants did not follow the Michigan Election Code, Plaintiffs do not explain how or why such violations of state election procedures automatically amount to violations of the clauses. In other words, it appears that Plaintiffs' claims are in fact state law claims disguised as federal claims.

A review of Supreme Court cases interpreting these clauses supports this conclusion. In *Cook v. Gralike*, the Supreme Court struck down a Missouri law that required election officials to print warnings on the ballot next to the name of any congressional candidate who refused to support term limits after concluding that such a statute constituted a " 'regulation' of congressional elections," as used in the Elections Clause. 531 U.S. 510, 525-26, 121 S.Ct. 1029, 149 L.Ed.2d 44 (2001) (quoting U.S. Const. art. I, § 4, cl. 1). In *Arizona State Legislature v. Arizona Independent Redistricting Commission*, the Supreme Court upheld an Arizona law that transferred redistricting power from the state legislature to an independent commission after concluding that "the Legislature," as used in the Elections Clause, includes any official body with authority to make laws for the state. 576 U.S. 787, 824, 135 S.Ct. 2652, 192 L.Ed.2d 704 (2015). In each of these cases, federal courts measured enacted state election laws against the federal mandates established in the clauses—they did not measure *violations* of enacted state elections law against those federal mandates.

***12** By asking the Court to find that they have made out claims under the clauses due to alleged violations of the Michigan Election Code, Plaintiffs ask the Court to find that any alleged deviation from state election law amounts to a modification of state election law and opens the door to federal review. Plaintiffs cite to no case—and this Court found none—supporting such an expansive approach.

b. Violation of the Equal Protection Clause

Most election laws will "impose some burden upon individual voters." *Burdick v. Takushi*, 504 U.S. 428, 433, 112 S.Ct. 2059, 119 L.Ed.2d 245 (1992). But "[o]ur Constitution leaves no room for classification of people in a way that unnecessarily abridges this right [to vote]." *Reynolds v. Sims*, 377 U.S. 533, 559, 84 S.Ct. 1362, 12 L.Ed.2d 506 (1964) (quoting *Wesberry v. Sanders*, 376 U.S. 1, 17-18, 84 S.Ct. 526, 11 L.Ed.2d 481 (1964)). Voting rights can be impermissibly burdened "by a debasement or dilution of the weight of a citizen's vote just as effectively as by wholly prohibiting the free exercise of the franchise." *Id.* (quoting *Reynolds*, 377 U.S. at 555, 84 S.Ct. 1362).

Plaintiffs attempt to establish an Equal Protection claim based on the theory that Defendants engaged in "several schemes" to, among other things, "destroy," "discard," and "switch" votes for President Trump, thereby "devalu[ing] Republican votes" and "diluting" the influence of their individual votes. (ECF No. 49 at Pg ID 3079.)

But, to be perfectly clear, Plaintiffs' equal protection claim is not supported by any allegation that Defendants' alleged schemes caused votes for President Trump to be changed to votes for Vice President Biden. For example, the closest Plaintiffs get to alleging that physical ballots were altered in such a way is the following statement in an election challenger's sworn affidavit: "I believe some of these workers were changing votes that had been cast for Donald Trump and other Republican candidates."[9] (ECF No. 6 at Pg ID 902 ¶ 91 (citing Aff. Articia Bomer, ECF No. 6-3 at Pg ID 1008-1010).) But of course, "[a] belief is not evidence" and falls far short of what is required to obtain any relief, much less the extraordinary relief Plaintiffs request. *United States v. O'Connor*, 1997 WL 413594, at *1 (7th Cir. 1997); *see Brown v. City of Franklin*, 430 F. App'x 382, 387 (6th Cir. 2011) ("Brown just submits his belief that Fox's 'protection' statement actually meant "protection from retaliation.... An unsubstantiated belief is not evidence of pretext."); *Booker v. City of St. Louis*, 309 F.3d 464, 467 (8th Cir. 2002) ("Booker's "belief" that he was singled out for testing is not evidence that he was.").[10] The closest Plaintiffs get to alleging that election machines and software changed votes for President Trump to Vice President Biden in Wayne County is an amalgamation of theories, conjecture, and speculation that such alterations were *possible.* (*See e.g.*, ECF No. 6 at ¶¶ 7-11, 17, 125, 129, 138-43, 147-48, 155-58, 160-63, 167, 171.) And Plaintiffs do not at all explain how the question of whether the treatment of election challengers complied with state law bears on the validity of votes, or otherwise establishes an equal protection claim.

9 Plaintiffs allege in several portions of the Amended Complaint that election officials improperly tallied, counted, or marked ballots. But some of these allegations equivocate with words such as "believe" and "may" and none of these allegations identify which presidential candidate the ballots were allegedly altered to favor. (*See, e.g.*, ECF No. 6 at Pg ID 902, ¶ 91 (citing Aff. Articia Bomer, ECF No. 6-3 at Pg ID 1008-10 ("I *believe* some of these ballots *may* not have been properly counted.") (emphasis added))); Pg ID 902-03, ¶ 92 (citing Tyson Aff. ¶ 17) ("At least one challenger observed poll workers adding marks to a ballot where there was no mark for any candidate.").

10 As stated by the Circuit Court for the District of Columbia Circuit:

> The statement is that the complainant believes and expects to prove some things. Now his belief and expectation may be in good faith; but it has been repeatedly held that suspicion is not proof; and it is equally true that belief and expectation to prove cannot be accepted as a substitute for fact. The complainant carefully refrains from stating that he has any information upon which to found his belief or to justify his expectation; and evidently he has no such information. But belief, without an allegation of fact either upon personal knowledge or upon information reasonably sufficient upon which to base the belief, cannot justify the extraordinary remedy of injunction.

Magruder v. Schley, 18 App. D.C. 288, 292, 1901 WL 19131, at *2 (D.C. Cir. 1901).

***13** With nothing but speculation and conjecture that votes for President Trump were destroyed, discarded or switched to votes for Vice President Biden, Plaintiffs' equal protection claim fails.[11] *See Wood*, —— F.3d ——, 2020 WL 7094866 (quoting *Bognet*, 980 F.3d at ——, 2020 WL 6686120, at *12) (" '[N]o single voter is specifically disadvantaged' if a vote is counted improperly, even if the error might have a 'mathematical impact on the final tally and thus on the proportional effect of every vote.' ").

11 "[T]he Voter Plaintiffs cannot analogize their Equal Protection claim to gerrymandering cases in which votes were weighted differently. Instead, Plaintiffs advance an Equal Protection Clause argument based solely on state officials' alleged violation of state law that does not cause unequal treatment. And if dilution of lawfully cast ballots by the 'unlawful' counting of invalidly cast ballots were a true equal-protection problem, then it would transform every violation of state election law (and, actually, every violation of every law) into a potential federal equal-protection claim requiring scrutiny of the government's 'interest' in failing to do more to stop the illegal activity. That is not how the Equal Protection Clause works." *Bognet*, 980 F.3d at ——, 2020 WL 6686120, at *11.

2. Irreparable Harm & Harm to Others

Because "a finding that there is simply no likelihood of success on the merits is usually fatal[,]" *Gonzales v. Nat'l Bd. of Med. Examiners*, 225 F.3d 620, 625 (6th Cir. 2000) (citing *Mich. State AFL-CIO v. Miller*, 103 F.3d 1240, 1249 (6th Cir. 1997)), the Court will not discuss the remaining preliminary injunction factors extensively.

As discussed, Plaintiffs fail to show that a favorable decision from the Court would redress their alleged injury. Moreover, granting Plaintiffs' injunctive relief would greatly harm the

public interest. As Defendants aptly describe, Plaintiffs' requested injunction would "upend the statutory process for election certification and the selection of Presidential Electors. Moreover, it w[ould] disenfranchise millions of Michigan voters in favor [of] the preferences of a handful of people who [are] disappointed with the official results." (ECF No. 31 at Pg ID 2227.)

In short, none of the remaining factors weigh in favor of granting Plaintiffs' request for an injunction.

IV. Conclusion

For these reasons, the Court finds that Plaintiffs are far from likely to succeed in this matter. In fact, this lawsuit seems to be less about achieving the relief Plaintiffs seek—as much of that relief is beyond the power of this Court—and more about the impact of their allegations on People's faith in the democratic process and their trust in our government. Plaintiffs ask this Court to ignore the orderly statutory scheme established to challenge elections and to ignore the will of millions of voters. This, the Court cannot, and will not, do.

The People have spoken.

The Court, therefore, **DENIES** Plaintiffs' "Emergency Motion for Declaratory, Emergency, and Permanent Injunctive Relief" (ECF No. 7.)

IT IS SO ORDERED.

Democratic National Committee, Intervenor

No. 20-3214
|
Submitted Pursuant to Third Circuit L.A.R. 34.1(a) November 9, 2020
|
(Filed: November 13, 2020)

Synopsis

Background: Voters and congressional candidate brought action against Secretary of Commonwealth of Pennsylvania and county boards of elections, seeking to enjoin the counting of mail-in ballots received during the three-day extension of the ballot-receipt deadline ordered by the Pennsylvania Supreme Court, and seeking a declaration that the extension period and presumption of timeliness was unconstitutional. The United States District Court for the Western District of Pennsylvania, Kim R. Gibson, Senior District Judge, 2020 WL 6323121, denied voters' and candidate's motion for a temporary restraining order (TRO) and preliminary injunction. Voters and candidate appealed.

Holdings: The Court of Appeals, Smith, Chief Judge, held that:

the District Court's order was immediately appealable;

voters and candidate lacked standing to bring action alleging violation of Constitution's Elections Clause and Electors Clause;

voters lacked concrete injury for their alleged harm of vote dilution, and thus voters did not have standing for such claim;

voters lacked particularized injury for their alleged harm of vote dilution, and thus voters did not have standing for such claim;

voters failed to allege legally cognizable "preferred class," for purposes of standing to claim equal protection violation;

alleged harm from presumption of timeliness was hypothetical or conjectural, and thus voters did not have standing to challenge presumption; and

voters and candidate were not entitled to receive injunction so close to election.

Affirmed.

OPINION OF THE COURT

SMITH, Chief Judge.

***342** *A share in the sovereignty of the state, which is exercised by the citizens at large, in voting at elections is one of the most important rights of the subject, and in a republic ought to stand foremost in the estimation of the law.*—Alexander Hamilton[1]

The year 2020 has brought the country unprecedented challenges. The COVID-19 pandemic, which began early this year and continues today, has caused immense loss and vast disruption. As this is a presidential election year, the pandemic has also presented unique challenges regarding where and how citizens shall vote, as well as when and how their ballots shall be tabulated. The appeal on which we now rule stems from the disruption COVID-19 has wrought on the national elections. We reach our decision, detailed below, having carefully considered the full breadth of statutory law and constitutional authority applicable to this unique dispute over Pennsylvania election law. And we do so with commitment to a proposition indisputable in our democratic process: that the lawfully cast vote of every citizen must count.

***343** I. Background & Procedural History

A. The Elections and Presidential Electors Clause

The U.S. Constitution delegates to state "Legislature[s]" the authority to regulate the "Times, Places and Manner of holding Elections for Senators and Representatives," subject to Congress's ability to "make or alter such Regulations." U.S. Const. art. I, § 4, cl. 1. This provision is known as the "Elections Clause." The Elections Clause effectively gives state governments the "default" authority to regulate the mechanics of federal elections, *Foster v. Love*, 522 U.S. 67, 69, 118 S.Ct. 464, 139 L.Ed.2d 369 (1997), with Congress retaining "exclusive control" to "make or alter" any state's regulations, *Colegrove v. Green*, 328 U.S. 549, 554, 66 S.Ct. 1198, 90 L.Ed. 1432 (1946). Congress has not often wielded this power but, "[w]hen exercised, the action of Congress, so far as it extends and conflicts with the regulations of the State, necessarily supersedes them." *Ex Parte Siebold*, 100 U.S. 371, 384, 399, 25 L.Ed. 717 (1879) ("[T]he Constitution and constitutional laws of the [United States] are ... the supreme law of the land; and, when they conflict with the laws of the States, they are of paramount authority and obligation."). By statute, Congress has set "[t]he Tuesday next after the 1st Monday in November, in every even numbered year," as the day for the election. 2 U.S.C. § 7.

Much like the Elections Clause, the "Electors Clause" of the U.S. Constitution provides that "[e]ach State shall appoint, in such Manner as the Legislature thereof may direct, a Number of [Presidential] Electors." U.S. Const. art. II, § 1, cl. 2. Congress can "determine the Time of chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States." U.S. Const. art. II, § 1, cl. 4. Congress has set the time for appointing electors as "the Tuesday next after the first Monday in November, in every fourth year succeeding every election of a President and Vice President." 3 U.S.C. § 1.

This year, both federal statutes dictate that the day for the election was to fall on Tuesday, November 3 ("Election Day").

B. Pennsylvania's Election Code

In keeping with the Constitution's otherwise broad delegation of authority to states to regulate the times, places, and manner of holding federal elections, the Pennsylvania General Assembly has enacted a comprehensive elections code. In 2019, the General Assembly passed Act 77, which (among other things) established "no-excuse" absentee voting in Pennsylvania[2]: all eligible voters in Pennsylvania may vote by mail without the need to show their absence from their voting district on the day of the election. 25 Pa. Stat. and Cons. Stat. §§ 3150.11–3150.17. Under Act 77, "[a]pplications for mail-in ballots shall be processed if received not later than five o'clock P.M. of the first Tuesday prior to the day of any primary or election." *Id.* § 3150.12a(a). After Act 77, "a completed absentee [or mail-in] ballot must be received in the office of the county board of elections no later than eight o'clock P.M. on the day of the primary or election" for that vote to count. *Id.* §§ 3146.6(c), 3150.16(c).

C. The Pennsylvania Supreme Court Decision

Soon after Act 77's passage, Donald J. Trump for President, Inc., the Republican National Committee ("RNC"), and several Republican congressional candidates and ***344** voters brought suit against Kathy Boockvar, Secretary of the Commonwealth of Pennsylvania, and all of Pennsylvania's county boards of elections. That suit, filed in the Western District of Pennsylvania, alleged that Act 77's "no-excuse" mail-in voting regime violated both the federal and Pennsylvania constitutions. *Donald J. Trump for Pres., Inc. v. Boockvar*, No. 2:20-cv-966, —— F.Supp.3d ——, ——, 2020 WL 4920952, at *1 (W.D. Pa. Aug. 23, 2020). Meanwhile, the Pennsylvania Democratic Party and several Democratic elected officials and congressional candidates filed suit in Pennsylvania's Commonwealth Court, seeking declaratory and injunctive relief related to statutory-interpretation issues involving Act 77 and the Pennsylvania Election Code. *See Pa. Democratic Party v. Boockvar*, —— Pa. ——, 238 A.3d 345, 352 (2020). Secretary Boockvar asked the Pennsylvania Supreme Court to exercise extraordinary jurisdiction to allow it to immediately consider the case, and her petition was granted without objection. *Id.* at 354–55.

Pending resolution of the Pennsylvania Supreme Court case, Secretary Boockvar requested that the Western District of Pennsylvania stay the federal case. *Trump for Pres. v. Boockvar*, —— F.Supp.3d at ——, 2020 WL 4920952, at *1. The District Court obliged and concluded that it would abstain under *Railroad Commission of Texas v. Pullman Co.*, 312 U.S. 496, 61 S.Ct. 643, 85 L.Ed. 971 (1941). *See Trump for Pres. v. Boockvar*, —— F.Supp.3d at ——, 2020 WL 4920952, at *21. The RNC then filed a motion for limited preliminary injunctive relief asking that all mailed ballots be segregated, but the District Court denied the motion, finding that the plaintiffs' harm had "not yet materialized in any actualized or imminent way." *Donald J. Trump for Pres., Inc. v. Boockvar*, No. 2:20-cv-966, 2020 WL 5407748, at *1 (W.D. Pa. Sept. 8, 2020).

With the federal case stayed, the state court matter proceeded. The Pennsylvania Democratic Party argued that a combination of the COVID-19 pandemic and U.S. Postal Service ("USPS") mail-delivery delays made it difficult for absentee voters to timely return their ballots in the June 2020 Pennsylvania primary election. *Pa. Democratic Party*, 238 A.3d at 362. The Pennsylvania Democratic Party claimed that this voter disenfranchisement violated the Pennsylvania Constitution's Free and Equal Elections Clause, art I., § 5,[3] and sought, among other things, a weeklong extension of the deadline for receipt of ballots cast by Election Day in the upcoming general election—the same deadline for the receipt of ballots cast by servicemembers residing overseas. *Id.* at 353–54. Secretary Boockvar originally opposed the extension deadline; she changed her position after receiving a letter from USPS General Counsel which stated that Pennsylvania's ballot deadlines were "incongruous with the Postal Service's delivery standards," and that to ensure that a ballot in Pennsylvania would be received by 8:00 P.M. on Election Day, the voter would need to mail it a full week in advance, by October 27, which was also the deadline to *apply* for a mail-in ballot. *Id.* at 365–66; 25 Pa. Stat. and Cons. Stat. § 3150.12a(a). Secretary Boockvar accordingly recommended a three-day extension to the received-by deadline. *Pa. Democratic Party*, 238 A.3d at 364–65.

In a September 17, 2020 decision, the Pennsylvania Supreme Court concluded that USPS's existing delivery standards ***345** could not meet the timeline built into the Election Code and that circumstances beyond voters' control should not lead to their disenfranchisement. *Pa. Democratic Party*, 238 A.3d at 371. The Court accordingly held that the Pennsylvania Constitution's Free and Equal Elections Clause required a three-day extension of the ballot-receipt deadline for the November 3 general election. *Id.* at 371, 386–87. All ballots postmarked by 8:00 P.M. on Election Day and received by 5:00 P.M. on the Friday after Election Day, November 6, would be considered timely and counted ("Deadline Extension"). *Id.* at 386–87. Ballots postmarked or signed after Election Day, November 3, would be rejected. *Id.* If the postmark on a ballot received before the November 6 deadline was missing or illegible, the ballot would be presumed to be timely unless "a preponderance of the evidence demonstrates that it was mailed after Election Day" ("Presumption of Timeliness"). *Id.* Shortly after the ruling, Pennsylvania voters were notified of the Deadline Extension and Presumption of Timeliness.

D. Appeal to the U.S. Supreme Court, and This Litigation

The Republican Party of Pennsylvania and several intervenors, including the President pro tempore of the Pennsylvania Senate, sought to challenge in the Supreme Court of the United States the constitutionality of the Pennsylvania Supreme Court's ruling. Because the November election date was fast approaching, they filed an emergency application for a stay of the Pennsylvania Supreme Court's order pending review on the merits. The U.S. Supreme Court denied the emergency stay request in a 4-4 decision. *Republican Party of Pa. v. Boockvar*, No. 20A54, 592

U.S. ——, —— S.Ct. ——, —— L.Ed.2d ——, 2020 WL 6128193 (Oct. 19, 2020); *Scarnati v. Boockvar*, No. 20A53, 592 U.S. ——, —— S.Ct. ——, —— L.Ed.2d ——, 2020 WL 6128194 (Oct. 19, 2020). After denial of the stay, the petitioners moved for expedited consideration of their petition for certiorari. In denying that motion, Justice Alito noted that, per the Pennsylvania Attorney General, all county boards of elections would segregate ballots received during the Deadline Extension period from those received by 8:00 P.M. on Election Day. *Republican Party of Pa. v. Boockvar*, No. 20-542, 592 U.S. ——, —— S.Ct. ——, ——, —— L.Ed.2d ——, 2020 WL 6304626, at *2 (Oct. 28, 2020) (Alito, J., statement). Justice Alito later issued an order requiring that all county boards of elections segregate such ballots and count them separately. *Republican Party of Pa. v. Boockvar*, No. 20A84, —— U.S. ——, —— S.Ct. ——, —— L.Ed.2d ——, 2020 WL 6536912 (Mem.) (U.S. Nov. 6, 2020) (Alito, J.).

In the meantime, on October 22, 2020, three days after the U.S. Supreme Court declined to stay the Pennsylvania Supreme Court's order, Plaintiffs herein filed this suit in the Western District of Pennsylvania. Plaintiffs are four registered voters from Somerset County, Pennsylvania, who planned to vote in person on Election Day ("Voter Plaintiffs") and Pennsylvania congressional candidate Jim Bognet. Defendants are Secretary Boockvar and each Pennsylvania county's board of elections.

Bognet, the congressional candidate, claimed that the Deadline Extension and Presumption of Timeliness "allow[ ] County Boards of Elections to accept votes ... that would otherwise be unlawful" and "undermine[ ] his right to run in an election where Congress has paramount authority to set the 'times, places, and manner' " of Election Day. *Bognet v. Boockvar*, No. 3:20-cv-215, 2020 WL 6323121, at *2 (W.D. Pa. Oct. 28, 2020). The Voter Plaintiffs alleged that by voting in person, they had to comply with the single, uniform ***346** federal Election Day deadline, whereas mail-in voters could submit votes any time before 5:00 P.M. on November 6. *Id.* Thus, they alleged, the Pennsylvania Supreme Court treated them in an arbitrary and disparate way by elevating mail-in voters to a "preferred class of voters" in violation of the U.S. Constitution's Equal Protection Clause and the single, uniform, federal Election Day set by Congress. *Id.* The Voter Plaintiffs also asserted that counting ballots received after Election Day during the Deadline Extension period would unlawfully dilute their votes in violation of the Equal Protection Clause. *Id.*

All Plaintiffs sought to enjoin Defendants from counting ballots received during the Deadline Extension period. *Id.* They also sought a declaration that the Deadline Extension and Presumption of Timeliness are unconstitutional under the Elections Clause and the Electors Clause as well as the Equal Protection Clause. *Id.* Because Plaintiffs filed their suit less than two weeks before Election Day, they moved for a temporary restraining order ("TRO"), expedited hearing, and preliminary injunction. *Id.*

The District Court commendably accommodated Plaintiffs' request for an expedited hearing, then expeditiously issued a thoughtful memorandum order on October 28, denying the motion for a TRO and preliminary injunction. *Id.* at *7. The District Court held that Bognet lacked standing because his claims were too speculative and not redressable. *Id.* at *3. Similarly, the District Court concluded that the Voter Plaintiffs lacked standing to bring their Equal Protection voter dilution claim because they alleged only a generalized grievance. *Id.* at *5.

At the same time, the District Court held that the Voter Plaintiffs had standing to pursue their Equal Protection arbitrary-and-disparate-treatment claim. But it found that the Deadline Extension did not engender arbitrary and disparate treatment because that provision did not extend the period for mail-in voters to actually cast their ballots; rather, the extension only directed that the timely cast ballots of mail-in voters be counted. *Id.* As to the Presumption of Timeliness, the District Court held that the Voter Plaintiffs were likely to succeed on the merits of their arbitrary-and-disparate-treatment challenge. *Id.* at *6. Still, the District Court declined to grant a TRO because the U.S. Supreme Court "has repeatedly emphasized that ... federal courts should ordinarily not alter the election rules on the eve of an election." *Id.* at *7 (citing *Purcell v. Gonzalez*, 549 U.S. 1, 127 S.Ct. 5, 166 L.Ed.2d 1 (2006) (per curiam)). The District Court concluded that with "less than two weeks before the election. ... [g]ranting the relief Plaintiffs seek would result in significant voter confusion; precisely the kind of confusion that *Purcell* seeks to avoid." *Id.*

Plaintiffs appealed the denial of their motion for a TRO and preliminary injunction to this Court on October 29, less than a week before Election Day. Plaintiffs requested an expedited briefing schedule: specifically, their opening brief would be due on October 30 and the response briefs on November 2. Notably, Plaintiffs sought to file a reply brief on November 3 —Election Day. Appellants' Emergency Mot. for Expedited

Briefing, Dkt. No. 17. Defendants opposed the expedited briefing schedule, arguing that Plaintiffs' own delay had caused the case to reach this Court mere days before the election. Sec'y Boockvar's Opp. to Appellants' Emergency Mot. for Expedited Briefing, Dkt. No. 33. Defendants also contended that Plaintiffs sought to punish voters by invalidating the very rules mail-in voters had relied on when they cast their ballots. Defendants ***347** asked us to deny the motion for expedited briefing and offered to supply us with the actual numbers of mail-in ballots received during the Deadline Extension period together with an approximate count of how many of those mail-in ballots lacked legible postmarks. *Id.*

Even had we granted Plaintiffs' motion for expedited briefing, the schedule they proposed would have effectively foreclosed us from ruling on this appeal before Election Day. So we denied Plaintiffs' motion and instead ordered that their opening brief be filed by November 6. Order, No. 20-3214, Oct. 30, 2020, Dkt. No. 37. We directed Defendants to file response briefs by November 9, forgoing receipt of a reply brief.[4] *Id.* With the matter now fully briefed, we consider Plaintiffs' appeal of the District Court's denial of a TRO and preliminary injunction.

II. Standard of Review

The District Court exercised jurisdiction under 28 U.S.C. § 1331. We exercise jurisdiction under § 1292(a)(1).

Ordinarily, an order denying a TRO is not immediately appealable. *Hope v. Warden York Cnty. Prison*, 956 F.3d 156, 159 (3d Cir. 2020). Here, although Bognet and the Voter Plaintiffs styled their motion as an Emergency Motion for a TRO and Preliminary Injunction, *see Bognet v. Boockvar*, No. 3:20-cv-00215, Dkt. No. 5 (W.D. Pa. Oct. 22, 2020), the District Court's order plainly went beyond simply ruling on the TRO request.

Plaintiffs filed their motion for a TRO and a preliminary injunction on October 22, along with a supporting brief. Defendants then filed briefs opposing the motion, with Plaintiffs filing a reply in support of their motion. The District Court heard argument from the parties, remotely, during a 90-minute hearing. The next day, the District Court ruled on the merits of the request for injunctive relief. *Bognet*, 2020 WL 6323121, at *7. The District Court's Memorandum Order denied both Bognet and the Voter Plaintiffs the affirmative relief they sought to obtain prior to Election Day, confirming that the Commonwealth was to count mailed ballots received after the close of the polls on Election Day but before 5:00 P.M. on November 6.

In determining whether Bognet and the Voter Plaintiffs had standing to sue, we resolve a legal issue that does not require resolution of any factual dispute. Our review is de novo. *Blunt v. Lower Merion Sch. Dist.*, 767 F.3d 247, 266 (3d Cir. 2014). "When reviewing a district court's denial of a preliminary injunction, we review the court's findings of fact for clear error, its conclusions of law de novo, and the ultimate decision ... for an abuse of discretion." *Reilly v. City of Harrisburg*, 858 F.3d 173, 176 (3d Cir. 2017) (quoting *Bimbo Bakeries USA, Inc. v. Botticella*, 613 F.3d 102, 109 (3d Cir. 2010)) (cleaned up).

III. Analysis

A. Standing

Derived from separation-of-powers principles, the law of standing "serves to prevent the judicial process from being used to usurp the powers of the political branches." *Clapper v. Amnesty Int'l USA*, 568 U.S. 398, 408, 133 S.Ct. 1138, 185 L.Ed.2d 264 (2013) (citations omitted). Article III of the U.S. Constitution vests "[t]he judicial Power of the United States" in both the Supreme Court and "such inferior Courts as the Congress may from ***348** time to time ordain and establish." U.S. Const. art. III, § 1. But this "judicial Power" extends only to "Cases" and "Controversies." *Id.* art. III, § 2; *see also Spokeo, Inc. v. Robins*, —— U.S. ——, 136 S. Ct. 1540, 1547, 194 L.Ed.2d 635 (2016). To ensure that judges avoid rendering impermissible advisory opinions, parties seeking to invoke federal judicial power must first establish their standing to do so. *Spokeo*, 136 S. Ct. at 1547.

Article III standing doctrine speaks in jargon, but the gist of its meaning is plain enough. To bring suit, you—and you personally—must be injured, and you must be injured in a way that concretely impacts your own protected legal interests. If you are complaining about something that does not harm you—and does not harm you in a way that is concrete—then you lack standing. And if the injury that you claim is an injury that does no specific harm to you, or if it depends on a harm that may never happen, then you lack an injury for which you may seek relief from a federal court. As we will explain below, Plaintiffs here have not suffered a concrete, particularized, and non-speculative injury necessary

under the U.S. Constitution for them to bring this federal lawsuit.

The familiar elements of Article III standing require a plaintiff to have "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Id.* (citing *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560–61, 112 S.Ct. 2130, 119 L.Ed.2d 351 (1992); *Friends of the Earth, Inc. v. Laidlaw Env't Servs. (TOC), Inc.*, 528 U.S. 167, 180–81, 120 S.Ct. 693, 145 L.Ed.2d 610 (2000)). To plead an injury in fact, the party invoking federal jurisdiction must establish three sub-elements: first, the "invasion of a legally protected interest"; second, that the injury is both "concrete and particularized"; and third, that the injury is "actual or imminent, not conjectural or hypothetical." *Spokeo*, 136 S. Ct. at 1548 (quoting *Lujan*, 504 U.S. at 560, 112 S.Ct. 2130); *see also Mielo v. Steak 'n Shake Operations*, 897 F.3d 467, 479 n.11 (3d Cir. 2018). The second sub-element requires that the injury "affect the plaintiff in a personal and individual way." *Lujan*, 504 U.S. at 560 n.1, 112 S.Ct. 2130. As for the third, when a plaintiff alleges future injury, such injury must be "certainly impending." *Clapper*, 568 U.S. at 409, 133 S.Ct. 1138 (quoting *Lujan*, 504 U.S. at 565 n.2, 112 S.Ct. 2130). Allegations of "possible" future injury simply aren't enough. *Id.* (quoting *Whitmore v. Arkansas*, 495 U.S. 149, 158, 110 S.Ct. 1717, 109 L.Ed.2d 135 (1990)). All elements of standing must exist at the time the complaint is filed. *See Lujan,* 504 U.S. at 569 n.4, 112 S.Ct. 2130.

With these guideposts in mind, we turn to whether Plaintiffs have pleaded an Article III injury. They bring several claims under 42 U.S.C. § 1983, asserting deprivation of their constitutional rights. They allege that Defendants' implementation of the Pennsylvania Supreme Court's Deadline Extension and Presumption of Timeliness violates the Elections Clause of Article I, the Electors Clause of Article II, and the Equal Protection Clause of the Fourteenth Amendment. Because Plaintiffs lack standing to assert these claims, we will affirm the District Court's denial of injunctive relief.

1. Plaintiffs lack standing under the Elections Clause and Electors Clause.

Federal courts are not venues for plaintiffs to assert a bare right "to have the Government act in accordance with law." ***349** *Allen v. Wright*, 468 U.S. 737, 754, 104 S.Ct. 3315, 82 L.Ed.2d 556 (1984), *abrogated on other grounds by Lexmark Int'l, Inc. v. Static Control Components, Inc.*, 572 U.S. 118, 126–27, 134 S.Ct. 1377, 188 L.Ed.2d 392 (2014). When the alleged injury is undifferentiated and common to all members of the public, courts routinely dismiss such cases as "generalized grievances" that cannot support standing. *United States v. Richardson*, 418 U.S. 166, 173–75, 94 S.Ct. 2940, 41 L.Ed.2d 678 (1974). Such is the case here insofar as Plaintiffs, and specifically candidate Bognet, theorize their harm as the right to have government administered in compliance with the Elections Clause and Electors Clause.

To begin with, private plaintiffs lack standing to sue for alleged injuries attributable to a state government's violations of the Elections Clause. For example, in *Lance v. Coffman*, 549 U.S. 437, 127 S.Ct. 1194, 167 L.Ed.2d 29 (2007) (per curiam), four private citizens challenged in federal district court a Colorado Supreme Court decision invalidating a redistricting plan passed by the state legislature and requiring use of a redistricting plan created by Colorado state courts. *Id.* at 438, 127 S.Ct. 1194. The plaintiffs alleged that the Colorado Supreme Court's interpretation of the Colorado Constitution violated the Elections Clause "by depriving the state legislature of its responsibility to draw congressional districts." *Id.* at 441, 127 S.Ct. 1194. The U.S. Supreme Court held that the plaintiffs lacked Article III standing because they claimed harm only to their interest, and that of every citizen, in proper application of the Elections Clause. *Id.* at 442, 127 S.Ct. 1194 ("The only injury plaintiffs allege is that the law—specifically the Elections Clause—has not been followed."). Their relief would have no more directly benefitted them than the public at large. *Id.* The same is true here. If anything, Plaintiffs' "interest in the State's ability to 'enforce its duly enacted laws' " is even less compelling because Pennsylvania's "election officials support the challenged decree." *Republican Nat'l Comm. v. Common Cause R.I.*, No. 20A28, 591 U.S. ——, —— S.Ct. ——, ——, —— L.Ed.2d ——, 2020 WL 4680151 (Mem.), at *1 (Aug. 13, 2020) (quoting *Abbott v. Perez*, —— U.S. ——, 138 S. Ct. 2305, 2324 n.17, 201 L.Ed.2d 714 (2018)).

Because the Elections Clause and the Electors Clause have "considerable similarity," *Ariz. State Legislature v. Ariz. Indep. Redistricting Comm'n*, 576 U.S. 787, 839, 135 S.Ct. 2652, 192 L.Ed.2d 704 (2015) (Roberts, C.J., dissenting) (discussing how Electors Clause similarly vests power to determine manner of appointing electors in "the Legislature" of each State), the same logic applies to Plaintiffs' alleged injury stemming from the claimed violation

of the Electors Clause. *See also Foster*, 522 U.S. at 69, 118 S.Ct. 464 (characterizing Electors Clause as Elections Clause's "counterpart for the Executive Branch"); *U.S. Term Limits, Inc. v. Thornton*, 514 U.S. 779, 804–05, 115 S.Ct. 1842, 131 L.Ed.2d 881 (1995) (noting that state's "duty" under Elections Clause "parallels the duty" described by Electors Clause).

Even a party that meets Article III standing requirements must ordinarily rest its claim for relief on violation of its own rights, not those of a third party. *Pitt News v. Fisher*, 215 F.3d 354, 361–62 (3d Cir. 2000). Plaintiffs assert that the Pennsylvania Supreme Court's Deadline Extension and Presumption of Timeliness usurped the General Assembly's prerogative under the Elections Clause to prescribe "[t]he Times, Places and Manner of holding Elections." U.S. Const. art. I, § 4, cl. 1. The Elections Clause grants that right to "the Legislature" of "each State." *Id.* Plaintiffs' Elections Clause claims thus ***350** "belong, if they belong to anyone, only to the Pennsylvania General Assembly." *Corman v. Torres*, 287 F. Supp. 3d 558, 573 (M.D. Pa. 2018) (three-judge panel) (per curiam). Plaintiffs here are four individual voters and a candidate for federal office; they in no way constitute the General Assembly, nor can they be said to comprise any part of the law-making processes of Pennsylvania. *Ariz. State Legislature*, 576 U.S. at 824, 135 S.Ct. 2652.[5] Because Plaintiffs are not the General Assembly, nor do they bear any conceivable relationship to state lawmaking processes, they lack standing to sue over the alleged usurpation of the General Assembly's rights under the Elections and Electors Clauses. No member of the General Assembly is a party to this lawsuit.

That said, prudential standing can suspend Article III's general prohibition on a litigant's raising another person's legal rights. Yet Plaintiffs don't fit the bill. A plaintiff may assert the rights of another if he or she "has a 'close' relationship with the person who possesses the right" and "there is a 'hindrance' to the possessor's ability to protect his own interests." *Kowalski v. Tesmer*, 543 U.S. 125, 130, 125 S.Ct. 564, 160 L.Ed.2d 519 (2004) (citation omitted). Plaintiffs cannot invoke this exception to the rule against raising the rights of third parties because they enjoy no close relationship with the General Assembly, nor have they alleged any hindrance to the General Assembly's ability to protect its own interests. *See, e.g.*, *Corman*, 287 F. Supp. 3d at 573. Nor does Plaintiffs' other theory of prudential standing, drawn from *Bond v. United States*, 564 U.S. 211, 131 S.Ct. 2355, 180 L.Ed.2d 269 (2011), advance the ball.

In *Bond*, the Supreme Court held that a litigant has prudential standing to challenge a federal law that allegedly impinges on the state's police powers, "in contravention of constitutional principles of federalism" enshrined in the Tenth Amendment. *Id.* at 223–24, 131 S.Ct. 2355. The defendant in *Bond* challenged her conviction under 18 U.S.C. § 229, which Congress enacted to comply with a chemical weapons treaty that the United States had entered. *Id.* at 214–15, 131 S.Ct. 2355. Convicted under the statute she sought to challenge, Bond satisfied Article III's standing requirements. *Id.* at 217, 131 S.Ct. 2355 (characterizing Bond's sentence and incarceration as concrete, and redressable by invalidation of her conviction); *id.* at 224–25, 131 S.Ct. 2355 (noting that Bond was subject to "[a] law," "prosecution," and "punishment" she might not have faced "if the matter were left for the Commonwealth of Pennsylvania to decide"). She argued that her conduct was "local in nature" such that § 229 usurped the Commonwealth's reserved police powers. *Id.* Rejecting the Government's contention that Bond was barred as a third party from asserting the rights of the Commonwealth, *id.* at 225, 131 S.Ct. 2355, the Court held that "[t]he structural principles secured by the separation of powers protect the individual as well" as the State. ***351** *Id.* at 222, 131 S.Ct. 2355 ("Federalism also protects the liberty of all persons within a State by ensuring that laws enacted in excess of delegated governmental power cannot direct or control their actions. ... When government acts in excess of its lawful powers, that [personal] liberty is at stake.").

But the nub of Plaintiffs' argument here is that the Pennsylvania Supreme Court intruded on the authority delegated to the Pennsylvania General Assembly under Articles I and II of the U.S. Constitution to regulate federal elections. They do not allege any violation of the Tenth Amendment, which provides that "[t]he powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people." U.S. Const. amend. X. Nor could they. After all, states have no inherent or reserved power over federal elections. *U.S. Term Limits*, 514 U.S. at 804–05, 115 S.Ct. 1842. When "deciding issues raised under the Elections Clause," courts "need not be concerned with preserving a 'delicate balance' between competing sovereigns." *Gonzalez v. Arizona*, 677 F.3d 383, 392 (9th Cir. 2012). Either federal and state election law "operate harmoniously in a single procedural scheme," or they don't—and the federal law preempts ("alter[s]") state election law under the Elections Clause. *Id.* at 394. An assessment that the Pennsylvania Supreme Court lacked the legislative authority under the

state's constitution necessary to comply with the Elections Clause (Appellants' Br. 24–27) does not implicate *Bond*, the Tenth Amendment, or even Article VI's Supremacy Clause.[6] *See Gonzalez*, 677 F.3d at 390–92 (contrasting Elections Clause with Supremacy Clause and describing former as "unique," containing "[an] unusual delegation of power," and "unlike virtually all other provisions of the Constitution"). And, of course, third-party standing under *Bond* still presumes that the plaintiff otherwise meets the requirements of Article III; as discussed above, Plaintiffs do not.

Plaintiff Bognet, a candidate for Congress who is currently a private citizen, does not plead a cognizable injury by alleging a "right to run in an election where Congress has paramount authority," Compl. ¶ 69, or by pointing to a "threatened" reduction in the competitiveness of his election from counting absentee ballots received within three days after Election Day. Appellants' Br. 21. Bognet does not explain how that "right to run" affects him in a particularized way when, in fact, all candidates in Pennsylvania, including Bognet's opponent, are subject to the same rules. And Bognet does not explain how counting *more* timely cast votes would lead to a *less* competitive race, nor does he offer any evidence tending to show that a greater proportion of mailed ballots received after Election Day than on or before Election Day would be cast for Bognet's opponent. What's more, for Bognet to have standing to enjoin the counting of ballots arriving after Election Day, such votes would have to be sufficient in number ***352** to change the outcome of the election to Bognet's detriment. *See, e.g.*, *Sibley v. Alexander*, 916 F. Supp. 2d 58, 62 (D.D.C. 2013) ("[E]ven if the Court granted the requested relief, [plaintiff] would still fail to satisfy the redressability element [of standing] because enjoining defendants from casting the ... votes would not change the outcome of the election." (citing *Newdow v. Roberts,* 603 F.3d 1002, 1011 (D.C. Cir. 2010) (citations omitted)). Bognet does not allege as much, and such a prediction was inherently speculative when the complaint was filed. The same can be said for Bognet's alleged wrongfully incurred expenditures and future expenditures. Any harm Bognet sought to avoid in making those expenditures was not "certainly impending"—he spent the money to avoid a speculative harm. *See Donald J. Trump for Pres., Inc. v. Boockvar*, No. 2:20-cv-966, —— F.Supp.3d ——, ——, 2020 WL 5997680, at *36 (W.D. Pa. Oct. 10, 2020). Nor are those expenditures "fairly traceable" under Article III to the actions that Bognet challenges. *See, e.g.*, *Clapper*, 568 U.S. at 402, 416, 133 S.Ct. 1138 (rejecting argument that plaintiff can "manufacture standing by choosing to make expenditures based on hypothetical future harm that is not certainly impending").[7]

Plaintiffs therefore lack Article III standing to challenge Defendants' implementation of the Pennsylvania Supreme Court's Deadline Extension and Presumption of Timeliness under the Elections Clause and Electors Clause.

2. The Voter Plaintiffs lack standing under the Equal Protection Clause.

Stressing the "personal" nature of the right to vote, the Voter Plaintiffs assert two claims under the Equal Protection Clause.[8] First, they contend that the influence of their votes, cast in person on Election Day, is "diluted" both by (a) mailed ballots cast on or before Election Day but received between Election Day and the Deadline Extension date, ballots which Plaintiffs assert cannot be lawfully counted; and (b) mailed ballots that were unlawfully cast (*i.e.*, placed in the mail) after Election Day but are still counted because of the Presumption of Timeliness. Second, the Voter Plaintiffs allege that the Deadline Extension and the Presumption of Timeliness create a preferred class of voters based on "arbitrary and disparate treatment" that values "one person's vote over that of another." *Bush v. Gore*, 531 U.S. 98, 104–05, 121 S.Ct. 525, 148 L.Ed.2d 388 (2000). The Voter Plaintiffs lack Article III standing to assert either injury.

a. Vote Dilution

As discussed above, the foremost element of standing is injury in fact, which requires the plaintiff to show a harm that is both "concrete and particularized" and "actual or imminent, not conjectural or hypothetical." *Spokeo*, 136 S. Ct. at 1547–48 (citation omitted). The Voter Plaintiffs lack standing to redress their alleged vote dilution because that alleged injury is not concrete as to votes counted under the Deadline Extension, nor is it particularized for Article III purposes as to votes counted ***353** under the Deadline Extension or the Presumption of Timeliness.

i. No concrete injury from vote dilution attributable to the Deadline Extension.

The Voter Plaintiffs claim that Defendants' implementation of the Deadline Extension violates the Equal Protection Clause because "unlawfully" counting ballots received within three days of Election Day dilutes their votes. But the source of this purported illegality is necessarily a matter of state law, which makes any alleged harm abstract for purposes of the Equal Protection Clause. And the purported vote dilution is also not concrete because it would occur in equal proportion *without* the alleged procedural illegality—that is, had the *General Assembly* enacted the Deadline Extension, which the Voter Plaintiffs do not challenge substantively.[9]

The concreteness of the Voter Plaintiffs' alleged vote dilution stemming from the Deadline Extension turns on the federal and state laws applicable to voting procedures. Federal law does not provide for *when* or *how* ballot counting occurs. *See, e.g.*, *Trump for Pres., Inc. v. Way*, No. 20-cv-01753, —— F.Supp.3d ——, ——, 2020 WL 5912561, at *12 (D.N.J. Oct. 6, 2020) ("Plaintiffs direct the Court to no federal law regulating methods of determining the timeliness of mail-in ballots or requiring that mail-in ballots be postmarked."); *see also Smiley v. Holm*, 285 U.S. 355, 366, 52 S.Ct. 397, 76 L.Ed. 795 (1932) (noting that Elections Clause delegates to state lawmaking processes all authority to prescribe "procedure and safeguards" for "counting of votes"). Instead, the Elections Clause delegates to each state's lawmaking function the authority to prescribe such procedural regulations applicable to federal elections. *U.S. Term Limits*, 514 U.S. at 832–35, 115 S.Ct. 1842 ("The Framers intended the Elections Clause to grant States authority to create procedural regulations .... [including] 'whether the electors should vote by ballot or vivâ voce ....' " (quoting James Madison, 2 Records of the Federal Convention of 1787, at 240 (M. Farrand ed. 1911) (cleaned up)); *Smiley*, 285 U.S. at 366, 52 S.Ct. 397 (describing state authority under Elections Clause "to provide a complete code for congressional elections ... in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns"). That delegation of authority embraces all procedures "which experience shows are necessary in order to enforce the fundamental right involved." *Smiley*, 285 U.S. at 366, 52 S.Ct. 397. Congress exercises its power to "alter" state election regulations only if the state regime cannot "operate harmoniously" with federal election laws "in a single procedural scheme." *Gonzalez*, 677 F.3d at 394.

***354** The Deadline Extension and federal laws setting the date for federal elections can, and indeed do, operate harmoniously. At least 19 other States and the District of Columbia have post-Election Day absentee ballot receipt deadlines.[10] And many States also accept absentee ballots mailed by overseas uniformed servicemembers that are received after Election Day, in accordance with the federal Uniformed and Overseas Citizens Absentee Voting Act, 52 U.S.C. §§ 20301–20311. So the Voter Plaintiffs' only cognizable basis for alleging dilution from the "unlawful" counting of invalid ballots is state law defining lawful and unlawful ballot counting practices. *Cf. Wise v. Circosta*, 978 F.3d 93, 100–01 (4th Cir. 2020) ("Whether ballots are *illegally* counted if they are received more than three days after Election Day depends on an issue of state law from which we must abstain." (emphasis in original)), *application for injunctive relief denied sub nom. Moore v. Circosta*, No. 20A72, 592 U.S. ——, —— S.Ct. ——, —— L.Ed.2d ——, 2020 WL 6305036 (Oct. 28, 2020). The Voter Plaintiffs seem to admit as much, arguing "that counting votes that are unlawful under the General Assembly's enactments will unconstitutionally dilute the lawful votes" cast by the Voter Plaintiffs. Appellants' Br. 38; *see also id.* at 31. In other words, the Voter Plaintiffs say that the Election Day ballot receipt deadline in Pennsylvania's codified election law renders the ballots untimely and therefore unlawful to count. Defendants, for their part, contend that the Pennsylvania Supreme Court's extension of that deadline under the Free and Equal Elections Clause of the state constitution renders them timely, and therefore lawful to count.

This conceptualization of vote dilution—state actors counting ballots in violation of state election law—is not a concrete harm under the Equal Protection Clause of the Fourteenth Amendment. Violation of state election laws by state officials ***355** or other unidentified third parties is not always amenable to a federal constitutional claim. *See Shipley v. Chicago Bd. of Election Comm'rs*, 947 F.3d 1056, 1062 (7th Cir. 2020) ("A deliberate violation of state election laws by state election officials does not transgress against the Constitution.") (cleaned up); *Powell v. Power*, 436 F.2d 84, 88 (2d Cir. 1970) (rejecting Equal Protection Clause claim arising from state's erroneous counting of votes cast by voters unqualified to participate in closed primary). "It was not intended by the Fourteenth Amendment ... that all matters formerly within the exclusive cognizance of the states should become matters of national concern." *Snowden v. Hughes*, 321 U.S. 1, 11, 64 S.Ct. 397, 88 L.Ed. 497 (1944).

Contrary to the Voter Plaintiffs' conceptualization, vote dilution under the Equal Protection Clause is concerned with votes being weighed differently. *See Rucho v. Common Cause*, —— U.S. ——, 139 S. Ct. 2484, 2501, 204 L.Ed.2d 931 (2019) (" '[V]ote dilution' in the one-person, one-vote cases refers to the idea that each vote must carry *equal weight*." (emphasis added)); *cf. Baten v. McMaster*, 967 F.3d 345, 355 (4th Cir. 2020), *as amended* (July 27, 2020) ("[N]o vote in the South Carolina system is diluted. Every qualified person gets one vote and each vote is counted equally in determining the final tally."). As explained below, the Voter Plaintiffs cannot analogize their Equal Protection claim to gerrymandering cases in which votes were weighted differently. Instead, Plaintiffs advance an Equal Protection Clause argument based solely on state officials' alleged violation of state law that does not cause unequal treatment. And if dilution of lawfully cast ballots by the "unlawful" counting of invalidly cast ballots "were a true equal-protection problem, then it would transform every violation of state election law (and, actually, every violation of every law) into a potential federal equal-protection claim requiring scrutiny of the government's 'interest' in failing to do more to stop the illegal activity." *Trump for Pres. v. Boockvar,* —— F.Supp.3d at ——– – ——, 2020 WL 5997680, at *45–46. That is not how the Equal Protection Clause works.[11]

Even if we were to entertain an end-run around the Voter Plaintiffs' lack of Elections Clause standing—by viewing the *federal* Elections Clause as the source of "unlawfulness" of Defendants' vote counting—the alleged vote dilution would not be a concrete injury. Consider, as we've noted, that the Voter Plaintiffs take no issue with the content of the Deadline Extension; they concede that the General Assembly, as other state legislatures have done, could have enacted exactly the same Deadline Extension as a valid "time[ ], place[ ], and manner" regulation consistent with the Elections Clause. *Cf. Snowden*, 321 U.S. at 8, 64 S.Ct. 397 (concluding that alleged "unlawful administration by state officers of a state statute *fair on its face*, resulting in its unequal application to those who are entitled to be treated alike, is not a denial of equal protection" (emphasis added)); *Powell*, 436 F.2d at 88 ("Uneven or erroneous application of an *otherwise valid* statute constitutes a denial of equal protection ***356** only if it represents 'intentional or purposeful discrimination.' " (emphasis added) (quoting *Snowden*, 321 U.S. at 8, 64 S.Ct. 397)). Reduced to its essence, the Voter Plaintiffs' claimed vote dilution would rest on their allegation that federal law required a different state organ to issue the Deadline Extension. The Voter Plaintiffs have not alleged, for example, that they were prevented from casting their votes, *Guinn v. United States*, 238 U.S. 347, 35 S.Ct. 926, 59 L.Ed. 1340 (1915), nor that their votes were not counted, *United States v. Mosley*, 238 U.S. 383, 35 S.Ct. 904, 59 L.Ed. 1355 (1915). Any alleged harm of vote dilution that turns not on the proportional influence of votes, but solely on the federal illegality of the Deadline Extension, strikes us as quintessentially abstract in the election law context and "divorced from any concrete harm." *Spokeo*, 136 S. Ct. at 1549 (citing *Summers v. Earth Island Inst.*, 555 U.S. 488, 496, 129 S.Ct. 1142, 173 L.Ed.2d 1 (2009)). That the alleged violation here relates to election law and the U.S. Constitution, rather than the mine-run federal consumer privacy statute, does not abrogate the requirement that a concrete harm must flow from the procedural illegality. *See, e.g.*, *Lujan*, 504 U.S. at 576, 112 S.Ct. 2130 ("[T]here is absolutely no basis for making the Article III inquiry turn on the source of the asserted right.").

The Voter Plaintiffs thus lack a concrete Equal Protection Clause injury for their alleged harm of vote dilution attributable to the Deadline Extension.

ii. No particularized injury from votes counted under the Deadline Extension or the Presumption of Timeliness.

The opposite of a "particularized" injury is a "generalized grievance," where "the impact on plaintiff is plainly undifferentiated and common to all members of the public." *Id.* at 575, 112 S.Ct. 2130 (cleaned up); *see also Lance*, 549 U.S. at 439, 127 S.Ct. 1194. The District Court correctly held that the Voter Plaintiffs' "dilution" claim is a "paradigmatic generalized grievance that cannot support standing." *Bognet*, 2020 WL 6323121, at *4 (quoting *Carson v. Simon*, No. 20-cv-02030, —— F.Supp.3d ——, ——, 2020 WL 6018957, at *7 (D. Minn. Oct. 12, 2020), *rev'd on other grounds*, No. 20-3139, —— F.3d ——, 2020 WL 6335967 (8th Cir. Oct. 29, 2020)). The Deadline Extension and Presumption of Timeliness, assuming they operate to allow the illegal counting of unlawful votes, "dilute" the influence of all voters in Pennsylvania equally and in an "undifferentiated" manner and do not dilute a certain group of voters particularly.[12]

Put another way, "[a] vote cast by fraud or mailed in by the wrong person through mistake," or otherwise counted illegally, "has a mathematical impact on the final tally and thus on the proportional effect of every vote, but no

single voter is specifically disadvantaged." *Martel v. Condos*, No. 5:20-cv-00131, —— F.Supp.3d ——, ——, 2020 WL 5755289, at *4 (D. Vt. Sept. 16, 2020). Such an alleged "dilution" is suffered equally by all voters and is not "particularized" for standing purposes. ***357** The courts to consider this issue are in accord. *See id.*; *Carson*, —— F.Supp.3d at —— – ——, 2020 WL 6018957, at *7–8; *Moore v. Circosta*, Nos. 1:20-cv-00911, 1:20-cv-00912, —— F.Supp.3d ——, ——, 2020 WL 6063332, at *14 (M.D.N.C. Oct. 14, 2020), *emergency injunction pending appeal denied sub nom. Wise v. Circosta*, 978 F.3d 93 (4th Cir. 2020), *application for injunctive relief denied sub nom. Moore v. Circosta*, No. 20A72, 592 U.S. ——, —— S.Ct. ——, —— L.Ed.2d ——, 2020 WL 6305036 (U.S. Oct. 28, 2020); *Paher v. Cegavske*, 457 F. Supp. 3d 919, 926–27 (D. Nev. Apr. 30, 2020).

But the Voter Plaintiffs argue that their purported "vote dilution" is an injury in fact sufficient to confer standing, and *not* a generalized grievance belonging to all voters, because the Supreme Court has "long recognized that a person's right to vote is 'individual and personal in nature.' " *Gill v. Whitford*, —— U.S. ——, 138 S. Ct. 1916, 1929, 201 L.Ed.2d 313 (2018) (quoting *Reynolds v. Sims*, 377 U.S. 533, 561, 84 S.Ct. 1362, 12 L.Ed.2d 506 (1964)). "Thus, 'voters who allege facts showing disadvantage to themselves as individuals have standing to sue' to remedy that disadvantage." *Id.* (quoting *Baker v. Carr*, 369 U.S. 186, 206, 82 S.Ct. 691, 7 L.Ed.2d 663 (1962)).

The Voter Plaintiffs' reliance on this language from *Baker* and *Reynolds* is misplaced. In *Baker*, the plaintiffs challenged Tennessee's apportionment of seats in its legislature as violative of the Equal Protection Clause of the Fourteenth Amendment. 369 U.S. at 193, 82 S.Ct. 691. The Supreme Court held that the plaintiffs *did* have standing under Article III because "[t]he injury which appellants assert is that this classification disfavors the voters in the counties in which they reside, placing them in a position of constitutionally unjustifiable inequality *vis-à-vis* voters in irrationally favored counties." *Id.* at 207–08, 82 S.Ct. 691.

Although the *Baker* Court did not decide the merits of the Equal Protection claim, the Court in a series of cases—including *Gray v. Sanders*, 372 U.S. 368, 83 S.Ct. 801, 9 L.Ed.2d 821 (1963), and *Reynolds*—made clear that the Equal Protection Clause prohibits a state from "diluti[ng] ... the *weight* of the votes of certain ... voters merely because of where they reside[ ]," just as it prevents a state from discriminating on the basis of the voter's race or sex. *Reynolds*, 377 U.S. at 557, 84 S.Ct. 1362 (emphasis added). The Voter Plaintiffs consider it significant that the Court in *Reynolds* noted—though not in the context of standing—that "the right to vote" is "individual and personal in nature." *Id.* at 561, 84 S.Ct. 1362 (quoting *United States v. Bathgate*, 246 U.S. 220, 227, 38 S.Ct. 269, 62 L.Ed. 676 (1918)). The Court then explained that a voter's right to vote encompasses both the right to cast that vote and the right to have that vote counted without "debasement or dilution":

> The right to vote can neither be denied outright, *Guinn v. United States*, 238 U.S. 347 [35 S.Ct. 926, 59 L.Ed. 1340 (1915)], *Lane v. Wilson*, 307 U.S. 268 [59 S.Ct. 872, 83 L.Ed. 1281 (1939)], nor destroyed by alteration of ballots, see *United States v. Classic*, 313 U.S. 299, 315 [61 S.Ct. 1031, 85 L.Ed. 1368 (1941)], nor diluted by ballot-box stuffing, *Ex parte Siebold*, 100 U.S. 371 [25 L.Ed. 717 (1880)], *United States v. Saylor*, 322 U.S. 385 [64 S.Ct. 1101, 88 L.Ed. 1341 (1944)]. As the Court stated in *Classic*, "Obviously included within the right to choose, secured by the Constitution, is the right of qualified voters within a state to cast their ballots and have them counted ...." 313 U.S. at 315 [61 S.Ct. 1031].
>
> ...
>
> ***358** "The right to vote includes the right to have the ballot counted. ... It also includes the right to have the vote counted at full value without dilution or discount. ... That federally protected right suffers substantial dilution ... [where a] favored group has full voting strength ... [and] [t]he groups not in favor have their votes discounted."

Reynolds, 377 U.S. at 555 & n.29, 84 S.Ct. 1362 (alterations in last paragraph in original) (quoting *South v. Peters*, 339 U.S. 276, 279, 70 S.Ct. 641, 94 L.Ed. 834 (1950) (Douglas, J., dissenting)).

Still, it does not follow from the labeling of the right to vote as "personal" in *Baker* and *Reynolds* that *any* alleged illegality affecting voting rights rises to the level of an injury in fact. After all, the Court has observed that the harms underlying a racial gerrymandering claim under the Equal Protection Clause "are personal" in part because they include the harm of a voter "being personally subjected to a racial classification." *Ala. Legis. Black Caucus v. Alabama*, 575 U.S. 254, 263, 135 S.Ct. 1257, 191 L.Ed.2d 314 (2015) (cleaned up). Yet a voter "who complains of gerrymandering, but who does not live in a gerrymandered district, 'assert[s] only a generalized grievance against governmental conduct of which he or she

does not approve.' " *Gill*, 138 S. Ct. at 1930 (quoting *United States v. Hays*, 515 U.S. 737, 745, 115 S.Ct. 2431, 132 L.Ed.2d 635 (1995)) (alteration in original). The key inquiry for standing is whether the alleged violation of the right to vote arises from an invidious classification—including those based on "race, sex, economic status, or place of residence within a State," *Reynolds*, 377 U.S. at 561, 84 S.Ct. 1362—to which the plaintiff is subject and in which "the favored group has full voting strength and the groups not in favor have their votes discounted," *id.* at 555 n.29, 84 S.Ct. 1362 (cleaned up). In other words, "voters who allege facts *showing disadvantage to themselves*" have standing to bring suit to remedy that disadvantage, *Baker*, 369 U.S. at 206, 82 S.Ct. 691 (emphasis added), but a disadvantage to the plaintiff exists only when the plaintiff is part of a group of voters whose votes will be weighed differently compared to another group. Here, no Pennsylvania voter's vote will count for less than that of any other voter as a result of the Deadline Extension and Presumption of Timeliness.[13]

This conclusion cannot be avoided by describing one group of voters as "those ... who lawfully vote in person and submit their ballots *on time*" and the other group of voters as those whose (mail-in) ballots arrive after Election Day and are counted because of the Deadline Extension and/or the Presumption of Timeliness. Appellants' Br. 33 (emphasis in original). Although the former group, under Plaintiffs' theory, should make up 100% of the total votes counted and the latter group 0%, there is ***359** simply no differential *weighing* of the votes. *See Wise*, 978 F.3d at 104 (Motz, J., concurring) ("But if the extension went into effect, plaintiffs' votes would not count for less *relative to other North Carolina voters*. This is the core of an Equal Protection Clause challenge." (emphasis in original)). Unlike the malapportionment or racial gerrymandering cases, a vote cast by a voter in the so-called "favored" group counts not one bit more than the same vote cast by the "disfavored" group—no matter what set of scales one might choose to employ. *Cf. Reynolds*, 377 U.S. at 555 n.29, 84 S.Ct. 1362. And, however one tries to draw a contrast, this division is not based on a voter's personal characteristics at all, let alone a person's race, sex, economic status, or place of residence. Two voters could each have cast a mail-in ballot before Election Day at the same time, yet perhaps only one of their ballots arrived by 8:00 P.M. on Election Day, given USPS's mail delivery process. It is passing strange to assume that one of these voters would be denied "equal protection of the laws" were *both* votes counted. U.S. Const. amend. XIV, § 1.

The Voter Plaintiffs also emphasize language from *Reynolds* that "[t]he right to vote can neither be denied outright ... nor diluted by ballot-box stuffing." 377 U.S. at 555, 84 S.Ct. 1362 (citing *Ex parte Siebold*, 100 U.S. 371, 25 L.Ed. 717 (1879); *United States v. Saylor*, 322 U.S. 385, 64 S.Ct. 1101, 88 L.Ed. 1341 (1944)). In the first place, casting a vote in accordance with a procedure approved by a state's highest court—even assuming that approval violates the Elections Clause—is not equivalent to "ballot-box stuffing." The Supreme Court has only addressed this "false"-tally type of dilution where the tally was false as a result of a scheme to cast falsified or fraudulent votes. *See Saylor*, 322 U.S. at 386, 64 S.Ct. 1101. We are in uncharted territory when we are asked to declare that a tally that includes false or fraudulent votes is equivalent to a tally that includes votes that are or may be unlawful for non-fraudulent reasons, and so is more aptly described as "incorrect." *Cf. Gray*, 372 U.S. at 386, 83 S.Ct. 801 (Harlan, J., dissenting) ("[I]t is hard to take seriously the argument that 'dilution' of a vote in consequence of a legislatively sanctioned electoral system can, without more, be analogized to an impairment of the political franchise by ballot box stuffing or other criminal activity.").

Yet even were this analogy less imperfect, it still would not follow that every such "false" or incorrect tally is an injury in fact for purposes of an Equal Protection Clause claim. The Court's cases that describe ballot-box stuffing as an injury to the right to vote have arisen from criminal prosecutions under statutes making it unlawful for anyone to injure the exercise of another's constitutional right. *See, e.g.*, *Ex parte Siebold*, 100 U.S. at 373–74 (application for writ of habeas corpus); *Saylor*, 322 U.S. at 385–86, 64 S.Ct. 1101 (criminal appeal regarding whether statute prohibiting "conspir[ing] to injure ... any citizen in the free exercise ... of any right or privilege secured to him by the Constitution" applied to conspiracy to stuff ballot boxes); *Anderson v. United States*, 417 U.S. 211, 226, 94 S.Ct. 2253, 41 L.Ed.2d 20 (1974) (criminal prosecution for conspiracy to stuff ballot boxes under successor to statute in *Saylor*). Standing was, of course, never an issue in those cases because the Government was enforcing its criminal laws. Here, the Voter Plaintiffs, who bear the burden to show standing, have presented no instance in which an individual voter had Article III standing to claim an equal protection harm to his or her vote from the existence of an allegedly illegal vote cast by someone else in the same election.

***360** Indeed, the logical conclusion of the Voter Plaintiffs' theory is that whenever an elections board counts any ballot

that deviates in some way from the requirements of a state's legislatively enacted election code, there is a *particularized* injury in fact sufficient to confer Article III standing on every other voter—provided the remainder of the standing analysis is satisfied. Allowing standing for such an injury strikes us as indistinguishable from the proposition that a plaintiff has Article III standing to assert a general interest in seeing the "proper application of the Constitution and laws"—a proposition that the Supreme Court has firmly rejected. *Lujan*, 504 U.S. at 573–74, 112 S.Ct. 2130. The Voter Plaintiffs thus lack standing to bring their Equal Protection vote dilution claim.

b. Arbitrary and Disparate Treatment

The Voter Plaintiffs also lack standing to allege an injury in the form of "arbitrary and disparate treatment" of a preferred class of voters because the Voter Plaintiffs have not alleged a legally cognizable "preferred class" for equal protection purposes, and because the alleged harm from votes counted solely due to the Presumption of Timeliness is hypothetical or conjectural.

i. No legally protected "preferred class."

The District Court held that the Presumption of Timeliness creates a "preferred class of voters" who are "able to cast their ballots after the congressionally established Election Day" because it "extends the date of the election by multiple days for a select group of mail-in voters whose ballots will be presumed to be timely in the absence of a verifiable postmark."[14] *Bognet*, 2020 WL 6323121, at *6. The District Court reasoned, then, that the differential treatment between groups of voters is by itself an injury for standing purposes. To the District Court, this supposed "unequal treatment of voters ... harms the [Voter] Plaintiffs because, as in-person voters, they must vote by the end of the congressionally established Election Day in order to have their votes counted." *Id.* The District Court cited no case law in support of its conclusion that the injury it identified gives rise to Article III standing.

The District Court's analysis suffers from several flaws. First, the Deadline Extension and Presumption of Timeliness apply to all voters, not just a subset of "preferred" voters. It is an individual voter's *choice* whether to vote by mail or in person, and thus whether to become a part of the so-called "preferred class" that the District Court identified. Whether to join the "preferred class" of mail-in voters was entirely up to the Voter Plaintiffs.

Second, it is not clear that the mere creation of so-called "classes" of voters constitutes an injury in fact. An injury in fact requires the "invasion of a legally protected interest." *Lujan*, 504 U.S. at 560, 112 S.Ct. 2130. We doubt that the mere existence of groupings of voters qualifies as an injury per se. "An equal protection claim will not lie by 'conflating all persons not injured into a preferred class receiving better treatment' than the plaintiff." *Thornton v. City of St. Helens*, 425 F.3d 1158, 1167 (9th Cir. 2005) (quoting *Joyce v. Mavromatis*, 783 F.2d 56, 57 (6th Cir. 1986)); *see also*, *e.g.*, *Batra v. Bd. of Regents of Univ. of Neb.*, 79 F.3d 717, 721 (8th Cir. 1996) ("[T]he relevant prerequisite is unlawful discrimination, not whether plaintiff is part of a victimized class."). ***361** More importantly, the Voter Plaintiffs have shown no disadvantage to themselves that arises simply by being separated into groupings. For instance, there is no argument that it is inappropriate that some voters will vote in person and others will vote by mail. The existence of these two groups of voters, without more, simply does not constitute an injury in fact to in-person voters.

Plaintiffs may believe that injury arises because of a preference shown for one class over another. But what, precisely, is the preference of which Plaintiffs complain? In *Bush v. Gore*, the Supreme Court held that a State may not engage in arbitrary and disparate treatment that results in the valuation of one person's vote over that of another. 531 U.S. at 104–05, 121 S.Ct. 525. Thus, "the right of suffrage can be denied by a *debasement or dilution of the weight of a citizen's vote* just as effectively as by wholly prohibiting the free exercise of the franchise." *Id.* at 105, 121 S.Ct. 525 (quoting *Reynolds*, 377 U.S. at 555, 84 S.Ct. 1362) (emphasis added). As we have already discussed, vote dilution is not an injury in fact here.

What about the risk that some ballots placed in the mail after Election Day may still be counted? Recall that no voter—whether in person or by mail—is *permitted* to vote after Election Day. Under Plaintiffs' argument, it might theoretically be easier for one group of voters—mail-in voters—to illegally cast late votes than it is for another group of voters—in-person voters. But even if that is the case, no group of voters has the *right* to vote after the deadline.[15] We remember that "a private citizen lacks a judicially cognizable interest in the prosecution or nonprosecution of another."

Linda R.S. v. Richard D., 410 U.S. 614, 619, 93 S.Ct. 1146, 35 L.Ed.2d 536 (1973) (citations omitted). And "a plaintiff lacks standing to complain about his inability to commit crimes because no one has a right to commit a crime." *Citizen Ctr. v. Gessler*, 770 F.3d 900, 910 (10th Cir. 2014). Without a showing of discrimination or other intentionally unlawful conduct, or at least some burden on Plaintiffs' own voting rights, we discern no basis on which they have standing to challenge the slim opportunity the Presumption of Timeliness conceivably affords wrongdoers to violate election law. *Cf. Minn. Voters Alliance v. Ritchie*, 720 F.3d 1029, 1033 (8th Cir. 2013) (affirming dismissal of claims "premised on potential harm in the form of vote dilution caused by insufficient pre-election verification of [election day registrants'] voting eligibility and the absence of post-election ballot rescission procedures").

ii. Speculative injury from ballots counted under the Presumption of Timeliness.

Plaintiffs' theory as to the Presumption of Timeliness focuses on the potential for some voters to vote after Election Day and still have their votes counted. This argument reveals that their alleged injury in fact attributable to the Presumption is "conjectural or hypothetical" instead of "actual or imminent." *Spokeo*, 136 S. Ct. at 1547–48 (quoting *Lujan*, 504 U.S. at 560, 112 S.Ct. 2130). The Supreme Court has emphasized that a threatened injury must be "*certainly impending*" and not merely "*possible*" for it to constitute an injury in fact. *Clapper*, 568 U.S. at 409, 133 S.Ct. 1138 (emphasis in original) (quoting ***362** *Whitmore v. Ark.*, 495 U.S. 149, 158, 110 S.Ct. 1717, 109 L.Ed.2d 135 (1990)). When determining Article III standing, our Court accepts allegations based on well-pleaded facts; but we do not credit bald assertions that rest on mere supposition. *Finkelman v. NFL*, 810 F.3d 187, 201–02 (3d Cir. 2016). The Supreme Court has also emphasized its "reluctance to endorse standing theories that rest on speculation about the decisions of independent actors." *Clapper*, 568 U.S. at 414, 133 S.Ct. 1138. A standing theory becomes even more speculative when it requires that independent actors make decisions to act *unlawfully*. *See City of L.A. v. Lyons*, 461 U.S. 95, 105–06 & 106 n.7, 103 S.Ct. 1660, 75 L.Ed.2d 675 (1983) (rejecting Article III standing to seek injunction where party invoking federal jurisdiction would have to establish that he would unlawfully resist arrest or police officers would violate department orders in future).

Here, the Presumption of Timeliness could inflict injury on the Voter Plaintiffs only if: (1) another voter violates the law by casting an absentee ballot after Election Day; (2) the illegally cast ballot does not bear a legible postmark, which is against USPS policy;[16] (3) that same ballot still arrives within three days of Election Day, which is faster than USPS anticipates mail delivery will occur;[17] (4) the ballot lacks sufficient indicia of its untimeliness to overcome the Presumption of Timeliness; and (5) that same ballot is ultimately counted. *See Donald J. Trump for Pres., Inc. v. Way*, No. 20-cv-10753, 2020 WL 6204477, at *7 (D.N.J. Oct. 22, 2020) (laying out similar "unlikely chain of events" required for vote dilution harm from postmark rule under New Jersey election law); *see also Reilly v. Ceridian Corp.*, 664 F.3d 38, 43 (3d Cir. 2011) (holding purported injury in fact was too conjectural where "we cannot now describe how Appellants will be injured in this case without beginning our explanation with the word 'if' "). This parade of horribles "may never come to pass," *Trump for Pres. v. Boockvar*, 2020 WL 5997680, at *33, and we are especially reluctant to endorse such a speculative theory of injury given Pennsylvania's "own mechanisms for deterring and prosecuting voter fraud," *Donald J. Trump for Pres., Inc. v. Cegavske*, No. 20-1445, —— F.Supp.3d ——, ——, 2020 WL 5626974, at *6 (D. Nev. Sept. 18, 2020).[18]

To date, the Secretary has reported that at least 655 ballots without a legible postmark have been collected within the Deadline Extension period.[19] But it is mere speculation to say that any one of those ballots was cast after Election Day. We are reluctant to conclude that an independent ***363** actor—here, one of 655 voters—decided to mail his or her ballot after Election Day contrary to law. The Voter Plaintiffs have not provided any empirical evidence on the frequency of voter fraud or the speed of mail delivery that would establish a statistical likelihood or even the plausibility that any of the 655 ballots was cast after Election Day. Any injury to the Voter Plaintiffs attributable to the Presumption of Timeliness is merely "possible," not "actual or imminent," and thus cannot constitute an injury in fact.

B. Purcell

Even were we to conclude that Plaintiffs have standing, we could not say that the District Court abused its discretion in concluding on this record that the Supreme Court's election-law jurisprudence counseled against injunctive relief. Unique and important equitable considerations, including voters' reliance on the rules in place when they made their plans

to vote and chose how to cast their ballots, support that disposition. Plaintiffs' requested relief would have upended this status quo, which is generally disfavored under the "voter confusion" and election confidence rationales of *Purcell v. Gonzalez*, 549 U.S. 1, 4–5, 127 S.Ct. 5, 166 L.Ed.2d 1 (2006). One can assume for the sake of argument that aspects of the now-prevailing regime in Pennsylvania are unlawful as alleged and still recognize that, given the timing of Plaintiffs' request for injunctive relief, the electoral calendar was such that following it "one last time" was the better of the choices available. *Perez,* 138 S. Ct. at 2324 ("And if a [redistricting] plan is found to be unlawful very close to the election date, the only reasonable option may be to use the plan one last time.").

Here, less than two weeks before Election Day, Plaintiffs asked the District Court to enjoin a deadline established by the Pennsylvania Supreme Court on September 17, a deadline that may have informed voters' decisions about whether and when to request mail-in ballots as well as when and how they cast or intended to cast them. In such circumstances, the District Court was well within its discretion to give heed to Supreme Court decisions instructing that "federal courts should ordinarily not alter the election rules on the eve of an election." *Republican Nat'l Comm. v. Democratic Nat'l Comm.*, —— U.S. ——, 140 S. Ct. 1205, 1207, 206 L.Ed.2d 452 (2020) (per curiam) (citing *Purcell*, 549 U.S. at 1, 127 S.Ct. 5).

In *Purcell*, an appeal from a federal court order enjoining the State of Arizona from enforcing its voter identification law, the Supreme Court acknowledged that "[c]onfidence in the integrity of our electoral processes is essential to the functioning of our participatory democracy." 549 U.S. at 4, 127 S.Ct. 5. In other words, "[c]ourt orders affecting elections, especially conflicting orders, can themselves result in voter confusion and consequent incentive to remain away from the polls. As an election draws closer, that risk will increase." *Id.* at 4–5, 127 S.Ct. 5. Mindful of "the necessity for clear guidance to the State of Arizona" and "the imminence of the election," the Court vacated the injunction. *Id.* at 5, 127 S.Ct. 5.

The principle announced in *Purcell* has very recently been reiterated. First, in *Republican National Committee*, the Supreme Court stayed on the eve of the April 7 Wisconsin primary a district court order that altered the State's voting rules by extending certain deadlines applicable to absentee ballots. 140 S. Ct. at 1206. The Court noted that it was adhering to *Purcell* and had "repeatedly emphasized that lower federal courts should ordinarily not alter the election rules on the eve of an ***364** election." *Id.* at 1207 (citing *Purcell*, 549 U.S. at 1, 127 S.Ct. 5). And just over two weeks ago, the Court denied an application to vacate a stay of a district court order that made similar changes to Wisconsin's election rules six weeks before Election Day. *Democratic Nat'l Comm. v. Wis. State Legislature*, No. 20A66, 592 U.S. ——, —— S.Ct. ——, —— L.Ed.2d ——, 2020 WL 6275871 (Oct. 26, 2020) (denying application to vacate stay). Justice Kavanaugh explained that the injunction was improper for the "independent reason[ ]" that "the District Court changed Wisconsin's election rules too close to the election, in contravention of this Court's precedents." *Id.* at ——, 2020 WL 6275871 at *3 (Kavanaugh, J., concurring). *Purcell* and a string[20] of Supreme Court election-law decisions in 2020 "recognize a basic tenet of election law: When an election is close at hand, the rules of the road should be clear and settled." *Id.*

The prevailing state election rule in Pennsylvania permitted voters to mail ballots up through 8:00 P.M. on Election Day so long as their ballots arrived by 5:00 P.M. on November 6. Whether that rule was wisely or properly put in place is not before us now. What matters for our purposes today is that Plaintiffs' challenge to it was not filed until sufficiently close to the election to raise a reasonable concern in the District Court that more harm than good would come from an injunction changing the rule. In sum, the District Court's justifiable reliance on *Purcell* constitutes an "alternative and independent reason[ ]" for concluding that an "injunction was unwarranted" here. *Wis. State Legislature*, —— S.Ct. at ——, 2020 WL 6275871, at *3 (Kavanaugh, J., concurring).

IV. Conclusion

We do not decide today whether the Deadline Extension or the Presumption of Timeliness are proper exercises of the Commonwealth of Pennsylvania's lawmaking authority, delegated by the U.S. Constitution, to regulate federal elections. Nor do we evaluate the policy wisdom of those two features of the Pennsylvania Supreme Court's ruling. We hold only that when voters cast their ballots under a state's facially lawful election rule and in accordance with instructions from the state's election officials, private citizens lack Article III standing to enjoin the counting of those ballots on the grounds that the source of the rule was the wrong state organ or that doing so dilutes their votes or constitutes differential treatment of voters in violation of the Equal

Protection Clause. Further, and independent of our holding on standing, we hold that the District Court did not err in denying Plaintiffs' motion for injunctive relief out of concern for the settled expectations of voters and election officials. We will affirm the District Court's denial of Plaintiffs' ***365** emergency motion for a TRO or preliminary injunction.

Footnotes

1 Second Letter from Phocion (April 1784), *reprinted in* 3 The Papers of Alexander Hamilton, 1782–1786, 530–58 (Harold C. Syrett ed., 1962).

2 Throughout this opinion, we refer to absentee voting and mail-in voting interchangeably.

3 The Free and Equal Elections Clause of the Pennsylvania Constitution provides: "Elections shall be free and equal; and no power, civil or military, shall at any time interfere to prevent the free exercise of the right of suffrage." Pa. Const. art. 1, § 5.

4 Because we have received comprehensive briefing, and given the weighty public interest in a prompt ruling on the matter before us, we have elected to forgo oral argument.

5 Bognet seeks to represent Pennsylvania in Congress, but even if he somehow had a relationship to *state* lawmaking processes, he would lack personal standing to sue for redress of the alleged "institutional injury (the diminution of legislative power), which necessarily damage[d] all Members of [the legislature] ... equally." *Raines v. Byrd*, 521 U.S. 811, 821, 117 S.Ct. 2312, 138 L.Ed.2d 849 (1997) (plaintiffs were six out of 535 members of Congress); *see also Corman*, 287 F. Supp. 3d at 568–69 (concluding that "two of 253 members of the Pennsylvania General Assembly" lacked standing to sue under Elections Clause for alleged "deprivation of 'their legislative authority to apportion congressional districts' "); *accord Va. House of Delegates v. Bethune-Hill*, —— U.S. ——, 139 S. Ct. 1945, 1953, 204 L.Ed.2d 305 (2019).

6 Our conclusion departs from the recent decision of an Eighth Circuit panel which, over a dissent, concluded that candidates for the position of presidential elector had standing under *Bond* to challenge a Minnesota state-court consent decree that effectively extended the receipt deadline for mailed ballots. *See Carson v. Simon*, No. 20-3139, —— F.3d ——, ——, 2020 WL 6335967, at *5 (8th Cir. Oct. 29, 2020). The *Carson* court appears to have cited language from *Bond* without considering the context—specifically, the Tenth Amendment and the reserved police powers—in which the U.S. Supreme Court employed that language. There is no precedent for expanding *Bond* beyond this context, and the *Carson* court cited none.

7 The alleged injury specific to Bognet does not implicate the Qualifications Clause or exclusion from Congress, *Powell v. McCormack*, 395 U.S. 486, 550, 89 S.Ct. 1944, 23 L.Ed.2d 491 (1969), nor the standing of members of Congress to bring actions alleging separation-of-powers violations. *Moore v. U.S. House of Reps.*, 733 F.2d 946, 959 (D.C. Cir. 1984) (Scalia, J., concurring).

8 Only the Voter Plaintiffs bring the Equal Protection count in the Complaint; Bognet did not join that count.

9 We exclude the Presumption of Timeliness from our concreteness analysis. Plaintiffs allege that the federal statutes providing for a uniform election day, 3 U.S.C. § 1 and 2 U.S.C. § 7, conflict with, and thus displace, any state law that would authorize voting after Election Day. They claim that the Presumption permits, theoretically at least, some voters whose ballots lack a legible postmark to vote *after* Election Day, in violation of these federal statutes. So unlike the Deadline Extension, Plaintiffs contend that the General Assembly could not enact the Presumption consistent with the Constitution. This conceptualization of injury is thus more properly characterized as "concrete" than is the purported Deadline Extension injury attributable to voters having their timely voted ballots received and counted after Election Day. That said, we express no opinion about whether the Voter Plaintiffs have, in fact, alleged such a concrete injury for standing purposes.

Code § 3020(b) (California – three days after Election Day if postmarked on or before Election Day); DC ST § 1-1001.05(a)(10A) (District of Columbia – seven days after the election if postmarked on or before Election Day); 10 ILCS 5/19-8, 5/18A-15 (Illinois – 14 days after the election if postmarked on or before Election Day); K.S.A. 25-1132 (Kansas – three days after the election if postmarked before the close of polls on Election Day); MD Code, Elec. Law, § 9-505 (Maryland – the second Friday after Election Day if postmarked on or before Election Day); Miss. Code Ann. § 23-15-637 (Mississippi – five business days after Election Day if postmarked on or before Election Day); NV Rev Stat § 293.317 (Nevada – by 5:00 P.M. on the seventh day after Election Day if postmarked by Election Day, and ballots with unclear

postmarks must be received by 5:00 P.M. on the third day after Election Day); N.J.S.A. 19:63-22 (New Jersey – 48 hours after polls close if postmarked on or before Election Day); McKinney's Elec. Law § 8-412 (New York – seven days after the election for mailed ballots postmarked on Election Day); N.C. Gen. Stat. § 163-231(b)(2) and *Wise v. Circosta*, 978 F.3d 93, 96 (4th Cir. 2020) (North Carolina – recognizing extension from three to nine days after the election the deadline for mail ballots postmarked on or before Election Day); Texas Elec. Code § 86.007 (the day after the election by 5:00 P.M. if postmarked on or before Election Day); Va. Code 24.2-709 (Virginia – by noon on the third day after the election if postmarked on or before Election Day); West's RCWA 29A.40.091 (Washington – no receipt deadline for ballots postmarked on or before Election Day); W. Va. Code, §§ 3-3-5, 3-5-17 (West Virginia – five days after the election if postmarked on or before Election Day); *see also* Iowa Code § 53.17(2) (by noon the Monday following the election if postmarked by the day before Election Day); NDCC 16.1-07-09 (North Dakota – before the canvass if postmarked the day before Election Day); R.C. § 3509.05 (Ohio – 10 days after the election if postmarked by the day before Election Day); Utah Code Ann. § 20A-3a-204 (seven to 14 days after the election if postmarked the day before the election).

11 *Bush v. Gore* does not require us to perform an Equal Protection Clause analysis of Pennsylvania election law as interpreted by the Pennsylvania Supreme Court. *See* 531 U.S. at 109, 121 S.Ct. 525 ("Our consideration is limited to the present circumstances ...."); *id.* at 139–40, 121 S.Ct. 525 (Ginsburg, J., dissenting) (discussing "[r]are[ ]" occasions when Supreme Court rejected state supreme court's interpretation of state law, one of which was in 1813 and others occurred during Civil Rights Movement—and none decided federal equal protection issues).

12 In their complaint, the Voter Plaintiffs alleged that they are all "residents of Somerset County, a county where voters are requesting absentee ballots at a rate *far less* than the state average" and thus, somehow, the Voter Plaintiffs' votes "will be diluted to a greater degree than other voters." Compl. ¶ 71 (emphasis in original). Plaintiffs continue to advance this argument on appeal in support of standing, and it additionally suffers from being a conjectural or hypothetical injury under the framework discussed *infra* Section III.A.2.b.ii. It is purely hypothetical that counties where a greater percentage of voters request absentee ballots will more frequently have those ballots received after Election Day.

13 Plaintiffs also rely on *FEC v. Akins*, 524 U.S. 11, 118 S.Ct. 1777, 141 L.Ed.2d 10 (1998), for the proposition that a widespread injury—such as a mass tort injury or an injury "where large numbers of voters suffer interference with voting rights conferred by law"—does not become a "generalized grievance" just because many share it. *Id.* at 24–25, 118 S.Ct. 1777. That's true as far as it goes. But the Voter Plaintiffs have not alleged an injury like that at issue in *Akins*. There, the plaintiffs' claimed injury was their inability to obtain information they alleged was required to be disclosed under the Federal Election Campaign Act. *Id.* at 21, 118 S.Ct. 1777. The plaintiffs alleged a statutory right to obtain information and that the same information was being withheld. Here, the Voter Plaintiffs' alleged injury is to their right under the Equal Protection Clause not to have their votes "diluted," but the Voter Plaintiffs have not alleged that their votes are less influential than any other vote.

14 The District Court did not find that the Deadline Extension created such a preferred class.

15 Moreover, we cannot overlook that the mail-in voters potentially suffer a *disadvantage* relative to the in-person voters. Whereas in-person ballots that are timely cast will count, timely cast mail-in ballots may not count because, given mail delivery rates, they may not be received by 5:00 P.M. on November 6.

16 *See* Defendant-Appellee's Br. 30 (citing 39 C.F.R. § 211.2(a)(2); Postal Operations Manual at 443.3).

17 *See Pa. Democratic Party*, 238 A.3d at 364 (noting "current two to five day delivery expectation of the USPS").

18 Indeed, the conduct required of a voter to effectuate such a scheme may be punishable as a crime under Pennsylvania statutes that criminalize forging or "falsely mak[ing] the official endorsement on any ballot," 25 Pa. Stat. & Cons. Stat. § 3517 (punishable by up to two years' imprisonment); "willfully disobey[ing] any lawful instruction or order of any county board of elections," *id.* § 3501 (punishable by up to one year's imprisonment); or voting twice in one election, *id.* § 3535 (punishable by up to seven years' imprisonment).

19 As of the morning of November 12, Secretary Boockvar estimates that 655 of the 9383 ballots received between 8:00 P.M. on Election Day and 5:00 P.M. on November 6 lack a legible postmark. *See* Dkt. No. 59. That estimate of 655 ballots does not include totals from five of Pennsylvania's 67 counties: Lehigh, Northumberland, Tioga, Warren, and Wayne. *Id.* The 9383 ballots received, however, account for all of Pennsylvania's counties. *Id.*

20 *See, e.g.*, *Andino v. Middleton*, No. 20A55, 592 U.S. ——, —— S.Ct. ——, ——, —— L.Ed.2d ——, 2020 WL 5887393, at *1 (Oct. 5, 2020) (Kavanaugh, J., concurring) ("By enjoining South Carolina's witness requirement shortly before the election, the District Court defied [the *Purcell*] principle and this Court's precedents." (citations omitted)); *Merrill v. People First of Ala.*, No. 19A1063, 591 U.S. ——, —— S.Ct. ——, ——, —— L.Ed.2d ——, 2020 WL 3604049 (Mem.), at *1 (July 2, 2020); *Republican Nat'l Comm.*, 140 S. Ct. at 1207; *see also Democratic Nat'l Comm. v. Bostelmann*, 977 F.3d 639, 641 (7th Cir. 2020) (per curiam) (holding that injunction issued six weeks before election violated *Purcell*); *New Ga.*

Project v. Raffensperger, 976 F.3d 1278, 1283 (11th Cir. Oct. 2, 2020) ("[W]e are not on the eve of the election—we are in the middle of it, with absentee ballots already printed and mailed. An injunction here would thus violate *Purcell*'s well-known caution against federal courts mandating new election rules—especially at the last minute." (citing *Purcell*, 549 U.S. at 4–5, 127 S.Ct. 5)).

DONALD J. TRUMP FOR PRESIDENT, INC., et al., Plaintiffs
v.
Kathy BOOCKVAR, in her capacity as Secretary of the Commonwealth of Pennsylvania, et al., Defendants.

No. 2:20-cv-966
|
Signed 10/10/2020

Synopsis

Background: President's reelection campaign, Republican National Committee, and Republican congressional candidates and electors filed suit against state and county election officials alleging federal and state constitutional violations stemming from Pennsylvania's implementation of mail-in voting plan for upcoming general election and its poll watcher residency requirement. State Democratic Party, advocacy organizations, and their members intervened. Parties filed cross-motions for summary judgment.

Holdings: The District Court, J. Nicholas Ranjan, J., held that:

plaintiffs' claims were ripe for adjudication;

any injury that plaintiffs would suffer was too speculative to establish Article III standing;

use of unmanned drop boxes for mail-in ballots by some counties, but not others, did not violate Equal Protection Clause;

use of unmanned drop boxes for mail-in ballots did not violate substantive due process principles;

state law did not impose signature comparison requirement for mail-in and absentee ballots;

state law did not impose signature comparison requirement for applications for mail-in and absentee ballots;

fact that some county boards of elections intended to verify signatures on mail-in and absentee ballots and applications, while others did not, did not violate Equal Protection Clause;

fact that state did not require signature comparison for mail-in and absentee ballots, but did for in-person ballots, did not violate Equal Protection Clause; and

county residency requirement on being poll watcher did not violate plaintiffs' constitutional rights.

Defendants' motion granted.

Walczak, Aclf of PA, Pittsburgh, PA, for Defendants League of Women Voters of Pennsylvania, Patricia Demarco, Danielle Graham Robinson, Kathleen Wise.

OPINION

J. Nicholas Ranjan, United States District Judge

***1** Plaintiffs in this case are President Trump's reelection campaign, the Republican National Committee, and several other Republican congressional candidates and electors. They originally filed this suit, alleging federal and state constitutional violations stemming from Pennsylvania's implementation of a mail-in voting plan for the upcoming general election.

Since then, the Pennsylvania Supreme Court issued a decision involving similar claims, which substantially narrowed the focus of this case. And Secretary of the Commonwealth, Kathy Boockvar, issued additional election "guidance," which further narrowed certain of the claims.

Therefore, as this case presently stands, only three claims remain. First, whether the use of so-called "drop boxes"[1] for mail-in ballots is unconstitutional, given the lack of guidance or mandates that those drop boxes have security guards to man them. Second, whether the Secretary's guidance as to mail-in ballots—specifically, her guidance that county election boards should not reject mail-in ballots where the voter's signature does not match the one on file—is unconstitutional. Third, whether Pennsylvania's restriction that poll watchers be residents in the county for which they are assigned, as applied to the facts of this case, is unconstitutional.

In order to present these claims to the Court on a complete record, the parties engaged in extensive fact and expert discovery, and have filed cross-motions for summary judgment. No party has raised a genuine dispute of material fact that would require a trial, and the Court has found none. As such, the parties' cross-motions for summary judgment are ready for disposition.

After a careful review of the parties' submissions and the extensive evidentiary record, the Court will enter judgment in favor of Defendants on all of Plaintiffs' federal-constitutional claims, decline to exercise supplemental jurisdiction over the state-constitutional claims, and dismiss this case. This is so for two main reasons.

First, the Court concludes that Plaintiffs lack Article III standing to pursue their claims. Standing, of course, is a necessary requirement to cross the threshold into federal court. Federal courts adjudicate cases and controversies, where a plaintiff's injury is concrete and particularized. Here, however, Plaintiffs have not presented a concrete injury to warrant federal-court review. All of Plaintiffs' remaining claims have the same theory of injury—one of "vote dilution." Plaintiffs fear that absent implementation of the security measures that they seek (guards by drop boxes, signature comparison of mail-in ballots, and poll watchers), there is a risk of voter fraud by other voters. If another person engages

in voter fraud, Plaintiffs assert that their own lawfully cast vote will, by comparison, count for less, or be diluted.

***2** The problem with this theory of harm is that it is speculative, and thus Plaintiffs' injury is not "concrete"—a critical element to have standing in federal court. While Plaintiffs may not need to prove actual voter fraud, they must at least prove that such fraud is "certainly impending." They haven't met that burden. At most, they have pieced together a sequence of uncertain assumptions: (1) they assume potential fraudsters may attempt to commit election fraud through the use of drop boxes or forged ballots, or due to a potential shortage of poll watchers; (2) they assume the numerous election-security measures used by county election officials may not work; and (3) they assume their own security measures may have prevented that fraud.

All of these assumptions could end up being true, and these events could theoretically happen. But so could many things. The relevant question here is: are they "certainly impending"? At least based on the evidence presented, the answer to that is "no." And that is the legal standard that Plaintiffs must meet. As the Supreme Court has held, this Court cannot "endorse standing theories that rest on speculation about the decisions of independent actors." *See Clapper v. Amnesty Int'l USA*, 568 U.S. 398, 414, 133 S.Ct. 1138, 185 L.Ed.2d 264 (2013).

Second, even if Plaintiffs had standing, their claims fail on the merits. Plaintiffs essentially ask this Court to second-guess the judgment of the Pennsylvania General Assembly and election officials, who are experts in creating and implementing an election plan. Perhaps Plaintiffs are right that guards should be placed near drop boxes, signature-analysis experts should examine every mail-in ballot, poll watchers should be able to man any poll regardless of location, and other security improvements should be made. But the job of an unelected federal judge isn't to suggest election improvements, especially when those improvements contradict the reasoned judgment of democratically elected officials. *See Andino v. Middleton*, —— U.S. ——, —— S.Ct. ——, ——, —— L.Ed.2d ——, 2020 WL 5887393, at *1 (Oct. 5, 2020) (Kavanaugh, J. concurring) (state legislatures should not be subject to "second-guessing by an unelected federal judiciary," which is "not accountable to the people") (cleaned up).

Put differently, "[f]ederal judges can have a lot of power—especially when issuing injunctions. And sometimes we may even have a good idea or two. But the Constitution sets out our sphere of decision-making, and that sphere does not extend to second-guessing and interfering with a State's reasonable, nondiscriminatory election rules." *New Georgia Project v. Raffensperger*, —— F.3d ——, ——, 2020 WL 5877588, at *4 (11th Cir. Oct. 2, 2020).

As discussed below, the Court finds that the election regulations put in place by the General Assembly and implemented by Defendants do not significantly burden any right to vote. They are rational. They further important state interests. They align with the Commonwealth's elaborate election-security measures. They do not run afoul of the United States Constitution. They will not otherwise be second-guessed by this Court.

BACKGROUND

I. Procedural Background

A. Plaintiffs' original claims.

On June 29, 2020, Plaintiffs filed their original complaint in this case against Defendants, who are the Secretary of the Commonwealth and the 67 county boards of elections. [ECF 4]. With their lawsuit, Plaintiffs challenged a number of Pennsylvania's procedures with respect to mail-in voting—in particular, the use of drop boxes and the counting of mail-in ballots that contained certain procedural defects. *See* [*id.*]. Shortly after filing their original complaint, Plaintiffs moved for expedited discovery and an expedited declaratory-judgment hearing. [ECF 6]. Defendants opposed the motion. The Court partially granted the motion, scheduled a speedy hearing, and ordered expedited discovery before that hearing. [ECF 123; ECF 124].

***3** After Plaintiffs filed the original complaint, many non-parties sought to intervene in the action, including several organizations.[2] The Court granted all intervention motions. [ECF 309].

Defendants and Intervenors moved to dismiss the original complaint. In response, Plaintiffs filed an amended complaint. [ECF 234]. The amended complaint maintained the gist of the original, but added two new counts and made a variety of other drafting changes. *See* [ECF 242]. Defendants and Intervenors moved to dismiss the first amended complaint, too, primarily asking the Court to abstain and stay the case.

Plaintiffs' first amended complaint asserted nine separate counts, but they could be sorted into three overarching categories.

1. Claims alleging vote dilution due to unlawful ballot collection and counting procedures.

The first category covered claims related to allegedly unlawful procedures implemented by some Defendants for the collection and counting of mail-in and absentee ballots. Those included claims related to (1) Defendants' uneven use of drop boxes and other satellite ballot-collection sites, (2) procedures for verifying the qualifications of voters applying in person for mail-in or absentee ballots, and (3) rules for counting non-compliant ballots (such as ballots submitted without a secrecy envelope, without an elector declaration, or that contained stray marks on the envelope).

In Count I, Plaintiffs alleged violations of the Elections Clause and the related Presidential Electors Clause of the U.S. Constitution. [ECF 234, ¶¶ 193-205]. Plaintiffs asserted that, under these provisions, only the state legislature may set the time, place, and manner of congressional elections and determine how the state chooses electors for the presidency. [*Id.* at ¶ 196].

In support of this claim, Plaintiffs alleged that Secretary Boockvar's guidance concerning the use of mail-in ballot drop boxes, whether county boards of elections must independently verify mail-in ballot applications, and the counting of non-compliant mail-in ballots, was an executive overreach—in that the Secretary's guidance allegedly violated certain provisions of the Election Code enacted by the Pennsylvania General Assembly. [*Id.* at ¶ 201]. Plaintiffs also claimed that the Secretary's "unlawful guidance" increased the risk of fraudulent or unlawful voting and infringed on the right to vote, which, they said, amounted to additional violations of the 1st and 14th Amendments to the U.S. Constitution. [*Id.* at ¶¶ 202-03].

In Count II, Plaintiffs alleged a violation of the Equal-Protection Clause under the 14th Amendment. [*Id.* at ¶¶ 206-15]. Plaintiffs asserted that the implementation of the foregoing (*i.e.*, mail-in ballot drop boxes, the verification of mail-in ballot applications, and the counting of non-compliant ballots) was different in different counties, thereby treating voters across the state in an unequal fashion. [*Id.* at ¶¶ 211-13].

***4** In Count III, Plaintiffs asserted a violation of the Pennsylvania State Constitution. [*Id.* at ¶¶ 216-22]. Plaintiffs alleged that the same actions and conduct that comprised Counts I and II also violated similar provisions of the Pennsylvania Constitution. [*Id.* at ¶ 220].

Finally, in Counts VI and VII, Plaintiffs alleged that Defendants violated provisions of the federal and state constitutions by disregarding the Election Code's notice and selection requirements applicable to "polling places." [*Id.* at ¶¶ 237-52]. Plaintiffs alleged that drop boxes are "polling places," and thus subject to certain criteria for site selection and the requirement that county election boards provide 20 days' public notice. [*Id.* at ¶¶ 239-42]. Plaintiffs asserted that Defendants' failure to provide this notice or select appropriate "polling places" in the primary election, if repeated in the general election, would create the risk of voter fraud and vote dilution. [*Id.* at ¶¶ 243-246].

2. Poll-watcher claims.

The second category of claims in the first amended complaint consisted of challenges to the constitutionality of Election-Code provisions related to poll watchers.

In Count IV, Plaintiffs alleged violations of the 1st and 14th Amendments. These claims had both a facial and an as-applied component. [ECF 234, ¶ 230 ("On its face and as applied to the 2020 General Election ...")].

First, Plaintiffs alleged that 25 P.S. § 2687 was facially unconstitutional because it "arbitrarily and unreasonably" limits poll watchers to serving only in their county of residence and to monitoring only in-person voting at the polling place on election day. [*Id.* at ¶ 226]. Second, Plaintiffs alleged that the same provision was unconstitutional as applied in the context of Pennsylvania's new vote-by-mail system, because these poll-watcher restrictions, combined with insecure voting procedures, create unacceptable risks of fraud and vote dilution. [*Id.* at ¶ 228]. Plaintiffs contended that these limitations make it "functionally impracticable" for candidates to ensure that they have poll watchers present where ballots are deposited and collected, given the widespread use of remote drop boxes and other satellite collection sites. [*Id.*].

Count V was the same as Count IV, but alleged that the same poll-watching restrictions violated the Pennsylvania Constitution, too. [*Id.* at ¶ 234].

3. In-person voting claims.

The third category of claims consisted of challenges to the procedures for allowing electors to vote in person after requesting a mail-in ballot.

That is, in Counts VIII and IX, Plaintiffs asserted that the Election Code permits an elector that has requested a mail-in ballot to still vote in person so long as he remits his spoiled ballot. [ECF 234, ¶¶ 253-267]. Plaintiffs asserted that during the primary, some counties allowed such electors to vote in person, while others did not, and they fear the same will happen in the general election. [*Id.* at ¶¶ 255, 259]. Plaintiffs also asserted that some counties allowed electors who had voted by mail to vote in person, in violation of the Election Code. [*Id.* at ¶¶ 257-58]. Plaintiffs alleged that this conduct also violates the federal and state constitutional provisions concerning the right to vote and equal protection. [*Id.* at ¶¶ 261, 265].

B. The Court's decision to abstain.

***5** Upon consideration of Defendants' and Intervenors' motions to dismiss the first amended complaint, on August 23, 2020, the Court issued an opinion abstaining under *R.R. Comm'n of Tex. v. Pullman Co.*, 312 U.S. 496, 61 S.Ct. 643, 85 L.Ed. 971 (1941) and temporarily staying the case. [ECF 409, 410].

In doing so, the Court determined that the three requisite prongs for *Pullman* abstention were met, and that the discretionary considerations weighed in favor of abstention. [ECF 409, p. 3 ("[Under *Pullman*, federal courts abstain] if (1) doing so requires interpretation of 'unsettled questions of state law'; (2) permitting resolution of the unsettled state-law questions by state courts would 'obviate the need for, or substantially narrow the scope of adjudication of the constitutional claims'; and (3) an 'erroneous construction of state law would be disruptive of important state policies[.]' " (citing *Chez Sez III Corp. v. Township of Union*, 945 F.2d 628, 631 (3d Cir. 1991))); *id.* at p. 30 (explaining that after the three prongs of *Pullman* abstention are met, the court must "make a discretionary determination of whether abstention is appropriate given the particular facts of this case," which requires weighing "such factors as the availability of an adequate state remedy, the length of time the litigation has been pending, and the impact of delay on the litigants." (cleaned up))].

The Court found that abstaining under *Pullman* was appropriate because of several unresolved ambiguities in Pennsylvania's Election Code. Specifically, the Court found that there were significant ambiguities as to whether the Election Code (1) permitted delivery of ballots to locations other than the county election board's headquarters, such as drop boxes, (2) permitted counties to count ballots that were not placed within the "secrecy envelope" (*i.e.*, "naked ballots"), (3) considered drop boxes and other ballot-collection sites as "polling places," as defined in the Election Code, and (4) required counties to automatically verify ballot applications for mail-in ballots (where the person applied for the ballot in person), even if there was no "bona fide objection" to the application. [ECF 409, pp. 17-23].

The Court explained that each of these ambiguities, if settled, would significantly narrow—or even resolve—some of Plaintiffs' claims. As the Court explained, for example, if a state court interpreted the Election Code to disallow drop boxes, Plaintiffs would obtain their requested relief (*i.e.*, no drop boxes); alternatively, if drop boxes were authorized by the Election Code, then Plaintiffs' allegations that drop boxes were illegal would be eliminated, which would, in turn, significantly affect the constitutional analysis of Plaintiffs' claims. [*Id.* at pp. 25-28]. The same held true for "naked ballots," the breadth of coverage of "polling places," and the requisite verification for personal ballot applications.

The Court then explained that it was appropriate for it to abstain until a state court could interpret the ambiguous state law. [*Id.* at pp. 28-30]. The Court concluded that if it interpreted the ambiguous state law, there was a sufficient chance that a state court could disagree with the interpretation, which would render this Court's interpretation not only advisory, but disruptive to state policies. The Court noted that especially in the election context, states have considerable discretion to implement their own policies without federal intervention. Accordingly, because these were questions of uninterpreted state law that were sufficiently ambiguous, federalism and comity demanded that a state court, not this Court, be the first interpreter.

***6** Finally, the Court explained that, despite the imminence of the election, abstention was still proper. [*Id.* at pp.

30-33]. The Court noted that state-court litigation was already pending that would resolve some of the statutory ambiguities at issue. [*Id.* at p. 31]. Further, the Court highlighted three courses Plaintiffs could immediately take to resolve the statutory ambiguities: intervene in the pending state-court litigation; file their own state-court case; or appeal this Court's abstention decision to the Third Circuit, and then seek certification of the unsettled state-law issues in the Pennsylvania Supreme Court. [*Id.* at pp. 31-33].

Additionally, the Court explained that it would stay the entire case, despite several of Plaintiffs' claims not being subject to *Pullman* abstention as they were not based on ambiguous state law. [*Id.* at pp. 34-37]. That's because, in its discretion, the Court determined it would be more efficient for this case to progress as a single proceeding, rather than in piecemeal fashion. [*Id.*]. However, the Court allowed any party to move to lift the stay as to the few claims not subject to *Pullman* abstention, if no state-court decision had been issued by October 5, 2020. [*Id.*].

On August 28, 2020, five days after the Court abstained, Plaintiffs moved to modify the Court's stay, and moved for a preliminary injunction. [ECF 414]. Plaintiffs requested, among other things, that the Court order Defendants to segregate, and not pre-canvass or canvass, all ballots that were returned in drop boxes, lacked a secrecy envelope, or were delivered by a third party. [*Id.*]. Plaintiffs also requested that the Court lift the stay by September 14, 2020, instead of October 5, 2020. [*Id.*].

The Court denied Plaintiffs' motion for preliminary injunctive relief, finding that Plaintiffs failed to show they would be irreparably harmed. [ECF 444; ECF 445]. The Court also declined to move up the date when the stay would be lifted. [*Id.*]. The Court noted that, at the request of Secretary Boockvar, the Pennsylvania Supreme Court had already exercised its extraordinary jurisdiction to consider five discrete issues and clarify Pennsylvania law in time for the general election. [*Id.* at p. 1]. Since that case appeared to be on track, the Court denied Plaintiffs' motion without prejudice, and the Court's abstention opinion and order remained in effect.

C. The Pennsylvania Supreme Court's decision.

On September 17, 2020, the Pennsylvania Supreme Court issued its decision in *Pennsylvania Democratic Party v. Boockvar*, —— Pa. ——, —— A.3d ——, 2020 WL 5554644 (Sept. 17, 2020). The court clarified three issues of state election law that are directly relevant to this case.

1. Counties are permitted under the Election Code to establish alternate ballot-collection sites beyond just their main county office locations.

The Pennsylvania Supreme Court first considered whether the Election Code allowed a Pennsylvania voter to deliver his or her mail-in ballot in person to a location other than the established office address of the county's board of election. *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *8. The court further considered the means by which county boards of election could accept hand-delivered mail-in ballots. *Id.*

Consistent with this Court's abstention opinion, the court found that "the parties' competing interpretations of the Election Code on [these questions] are reasonable, rendering the Code ambiguous" on these questions. *Id.* After applying traditional principles of statutory interpretation, the court held that "the Election Code should be interpreted to allow county boards of election to accept hand-delivered mail-in ballots at locations other than their office addresses including drop-boxes." *Id.* at.——, 2020 WL 5554644, at *9. The court reached this conclusion due to "the clear legislative intent underlying Act 77 ... to provide electors with options to vote outside of traditional polling places." *Id.*

***7** The respondents in that case further argued that this interpretation would cause county boards of election to "employ myriad systems to accept hand-delivered mail-in ballots," which would "be unconstitutionally disparate from one another in so much as some systems will offer more legal protections to voters than others will provide" and violate the Equal-Protection Clause *Id.* The court rejected this argument. It found that "the exact manner in which each county board of election will accept these votes is entirely unknown at this point; thus, we have no metric by which to measure whether any one system offers more legal protection than another, making an equal protection analysis impossible at this time." *Id.*

2. Ballots lacking inner secrecy envelopes should not be counted.

The court next considered whether the boards of elections "must 'clothe and count naked ballots,' *i.e.*, place ballots

that were returned without the secrecy envelope into a proper envelope and count them, rather than invalidate them." *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *21. The court concluded that they should not.

The court held that "the Legislature intended for the secrecy envelope provision [in the Election Code] to be mandatory." *Id.* at ——, 2020 WL 5554644, at *24. In other words, the relevant provisions "make clear the General Assembly's intention that, during the collection and canvassing processes, when the outer envelope in which the ballot arrived is unsealed and the sealed ballot removed, it should not be readily apparent who the elector is, with what party he or she affiliates, or for whom the elector has voted." *Id.* The secrecy envelope "properly unmarked and sealed ensures that result," and "[w]hatever the wisdom of the requirement, the command that the mail-in elector utilize the secrecy envelope and leave it unblemished by identifying information is neither ambiguous nor unreasonable." *Id.*

As a result, the court ultimately concluded, "a mail-ballot that is not enclosed in the statutorily-mandated secrecy envelope must be disqualified." *Id.* at ——, 2020 WL 5554644, at *26

3. Pennsylvania's county-residency requirement for poll watchers is constitutional.

The final relevant issue the court considered was whether the poll-watcher residency requirement found in 25 P.S. § 2687(b) violates state or federal constitutional rights. *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *26. Relying on *Republican Party of Pennsylvania v. Cortés*, 218 F. Supp. 3d 396 (E.D. Pa. 2016), the court concluded that the poll-watcher residency provision "impose[d] no burden on one's constitutional right to vote and, accordingly, requires only a showing that a rational basis exists to be upheld." *Id.* at ——, 2020 WL 5554644, at *30. The court found rational-basis review was appropriate for three reasons.

First, "there is no individual constitutional right to serve as a poll watcher; rather, the right to do so is conferred by statute." *Id.* (citation omitted). Second, "poll watching is not incidental to the right of free association and, thus, has no distinct First Amendment protection." *Id.* (cleaned up). Third, "poll watching does not implicate core political speech." *Id.* (citation omitted).

The court went on to find that there was a "clear rational basis for the county poll watcher residency requirement[.]" *Id.* That is, given "Pennsylvania has envisioned a county-based scheme for managing elections within the Commonwealth," it is "reasonable that the Legislature would require poll watchers, who serve within the various counties of the state, to be residents of the counties in which they serve." *Id.*

In upholding the constitutionality of the "county poll watcher residency requirement," the court rejected the claim that "poll watchers are vital to protect against voter fraud and that because of the distribution of voters throughout Pennsylvania, the residency requirement makes it difficult to identify poll watchers in all precincts." *Id.* The court concluded that the claims of "heightened election fraud involving mail-in voting" were "unsubstantiated" and "specifically belied by the Act 35 report issued by [Secretary Boockvar] on August 1, 2020." *Id.* Moreover, the court held that the "speculative claim that it is 'difficult' for both parties to fill poll watcher positions in every precinct, even if true, is insufficient to transform the Commonwealth's uniform and reasonable regulation requiring that poll watchers be residents of the counties they serve into a non-rational policy choice." *Id.*

***8** Based on the foregoing, the court declared "that the poll-watcher residency requirement does not violate the state or federal constitutions." *Id.* at ——, 2020 WL 5554644, at *31.

D. Plaintiffs' notice of remaining claims.

Following the Pennsylvania Supreme Court's decision, this Court lifted the stay it had imposed pursuant to the *Pullman* abstention doctrine and ordered the parties to identify the remaining viable claims and defenses in the case. [ECF 447].

In their notice, Plaintiffs took the position that nearly all their claims remained viable, with a few discrete exceptions. Plaintiffs conceded that their "federal and state constitutional claims of voter dilution solely on the basis that drop boxes and other collection sites are not statutorily authorized by the Pennsylvania Election Code [were] no longer viable." [ECF 448, p. 4]. They also stated that their "facial challenge to the county residency requirement under 25 P.S. § 2687 is no longer a viable claim." [*Id.* at p. 10]. Plaintiffs also moved for leave to amend their complaint a second time to add new allegations and a new claim relating to Secretary Boockvar's recent signature-comparison guidance. [ECF 451].

Defendants and Intervenors, for their part, suggested that Plaintiffs' claims had been substantially narrowed, if not outright mooted, by the Pennsylvania Supreme Court's decision, and reminded the Court that their arguments for dismissal remained outstanding.

E. The Court's September 23, 2020, memorandum orders.

In response to the notices filed by the parties and Plaintiffs' motion for leave to amend the first amended complaint, the Court issued an order granting Plaintiffs' motion, narrowing the scope of the lawsuit, and establishing the procedure for resolving the remaining claims. [ECF 459].

As to Plaintiffs' proposed amendment to their complaint, the Court found that the new claim and allegations were relatively narrow, and thus amendment wouldn't prejudice Defendants and Intervenors. [*Id.* at pp. 3-4]. As a result, the Court granted the motion. [*Id.* at p. 4].

The Court, however, did inform the parties that it would "continue to abstain under *Pullman* as to Plaintiffs' claim pertaining to the notice of drop box locations and, more generally, whether the "polling place" requirements under the Election Code apply to drop-box locations." [*Id.* at p. 5]. This was so because those claims involve still-unsettled issues of state law. The Court explained that the "fact that the Pennsylvania Supreme Court did not address this issue in its recent decision is immaterial" because the "propriety of *Pullman* abstention does not depend on the existence of parallel state-court proceedings." [*Id.* (citing *Stoe v. Flaherty*, 436 F.3d 209, 213 (3d Cir. 2006))]. Moreover, Plaintiffs had several other avenues to pursue prompt interpretation of state law after this Court abstained. [*Id.* at p. 6].

The Court also informed the parties, for similar reasons, that it would continue to abstain with respect to Plaintiffs' claims regarding Secretary Boockvar's guidance that personal applications for mail-in ballots shall be accepted absent a "bona fide objection." [ECF 460].

The Court found that "no Article III 'case or controversy' remain[ed] with respect to the claims on which the Pennsylvania Supreme Court effectively ruled in Plaintiffs' favor on state-law grounds (*e.g.*, illegality of third-party ballot delivery; excluding 'naked ballots' submitted without inner-secrecy envelopes)." [ECF 459, p. 6]. Because there was "no reason to believe Defendants plan to violate what they themselves now agree the law requires," the Court held that Plaintiffs' claims were premature and speculative. [*Id.* at p. 7]. The Court therefore dismissed those claims as falling outside of its Article III power to adjudicate. [*Id.* (citations omitted)].

***9** To resolve the remaining claims, the Court directed the parties to file cross-motions for summary judgment presenting all arguments for dismissal or judgment under Federal Rule of Civil Procedure 56. [*Id.* at pp. 8-10]. Before briefing on those motions, the Court authorized additional expedited discovery. [*Id.* at pp. 4-5]. The parties completed discovery and timely filed their motions; they identified no material disputes of fact; and therefore, the motions are now fully briefed and ready for disposition.

F. The claims now at issue.

Based on the Pennsylvania Supreme Court's prior ruling, this Court's prior decisions, Plaintiffs' nine-count Second Amended Complaint, and recent guidance issued by Secretary Boockvar, the claims remaining in this case are narrow and substantially different than those asserted at the outset of the case.

Drop Boxes (Counts I-III). Plaintiffs still advance a claim that drop boxes are unconstitutional, but in a different way. Now that the Pennsylvania Supreme Court has expressly held that drop boxes are authorized under the Election Code, Plaintiffs now assert that the use of "unmanned" drop boxes is unconstitutional under the federal and state constitutions, for reasons discussed in more detail below.

Signature Comparison (Counts I-III). Plaintiffs' newly added claim relates to signature comparison. Secretary Boockvar's September 2020 guidance informs the county boards that they are not to engage in a signature analysis of mail-in ballots and applications, and they must count those ballots, even if the signature on the ballot does not match the voter's signature on file. Plaintiffs assert that this guidance is unconstitutional under the federal and state constitutions.

Poll Watching (Counts IV, V). The Pennsylvania Supreme Court already declared that Pennsylvania's county-residency requirement for poll watchers is ***facially*** constitutional. Plaintiffs now only assert that the requirement, ***as applied***, is unconstitutional under the federal and state constitutions.

The counts that remain in the Second Amended Complaint, but which are ***not*** at issue, are the counts related to where poll watchers can be located. That is implicated mostly by Counts VI and VII, and by certain allegations in Counts IV

and V. The Court continues to abstain from reaching that issue. Plaintiffs have filed a separate state lawsuit that would appear to address many of those issues, in any event. [ECF 549-22; ECF 573-1]. Counts VIII and IX concern challenges related to voters that have requested mail-in ballots, but that instead seek to vote in person. The Secretary issued recent guidance, effectively mooting those claims, and, based on Plaintiffs' positions taken in the course of this litigation, the Court deems Plaintiffs to have withdrawn Counts VIII and IX. [ECF 509, p. 15 n.4 ("[I]n the September 28 guidance memo, the Secretary corrected [her] earlier guidance to conform to the Election Code and states that any mail-in voter who spoils his/her ballot and the accompanying envelopes and signs a declaration that they did not vote by mail-in ballot will be allowed to vote a regular ballot. Therefore, Plaintiffs agree to withdraw this claim from those that still are being pursued.")].

II. Factual Background

A. Pennsylvania's Election Code, and the adoption of Act 77.

1. The county-based election system.

Pennsylvania's Election Code, first enacted in 1937, established a county-based system for administering elections. *See* 25 P.S. § 2641(a) ("There shall be a county board of elections in and for each county of this Commonwealth, which shall have jurisdiction over the conduct of primaries and elections in such county, in accordance with the provisions of [the Election Code]."). The Election Code vests county boards of elections with discretion to conduct elections and implement procedures intended to ensure the honesty, efficiency, and uniformity of Pennsylvania's elections. *Id.* §§ 2641(a), 2642(g).

2. The adoption of Act 77.

***10** On October 31, 2019, the Pennsylvania General Assembly passed "Act 77," a bipartisan reform of Pennsylvania's Election Code. *See* [ECF 461, ¶¶ 91]; 2019 Pa. Legis. Serv. Act 2019-77 (S.B. 421).

Among other things, by passing Act 77, Pennsylvania joined 34 other states in authorizing "no excuse" mail-in voting by all qualified electors. *See* [ECF 461, ¶¶ 92]; 25 P.S. §§ 3150.11-3150.17; [ECF 549-11, p. 5 ("The largest number of states (34), practice no-excuse mail-in voting, allowing any persons to vote by mail regardless of whether they have a reason or whether they will be out of their jurisdiction on Election Day.")]. Previously, a voter could only cast an "absentee" ballot if certain criteria were met, such as that the voter would be away from the election district on election day. *See* 1998 Pa. Legis. Serv. Act. 1998-18 (H.B. 1760), § 14.

Like the previous absentee voting system, Pennsylvania's mail-in voting system requires voters to "opt-in" by requesting a ballot from either the Secretary or the voter's county board of elections. *See* 25 P.S. §§ 3146.2(a), 3150.12(a). When requesting a ballot, the voter must provide, among other things, his or her name, date of birth, voting district, length of time residing in the voting district, and party choice for primary elections. *See* 25 P.S. §§ 3146.2(b), 3150.12(b). A voter must also provide proof of identification; namely, either a driver's license number or, in the case of a voter who does not have a driver's license, the last four digits of the voter's Social Security number, or, in the case of a voter who has neither a driver's license nor a Social Security number, another form of approved identification. 25 P.S. § 2602(z.5)(3). In this respect, Pennsylvania differs from states that automatically mail each registered voter a ballot—a practice known as "universal mail-in voting." [ECF 549-11, p. 6] ("[N]ine states conduct universal vote-by-mail elections in which the state (or a local entity, such [as] a county or municipality) mails all registered voters a ballot before each election without voters' [sic] having to request them.").

3. The COVID-19 pandemic.

Since early 2020, the United States, and Pennsylvania, have been engulfed in a viral pandemic of unprecedented scope and scale. [ECF 549-8, ¶ 31]. In that time, COVID-19 has spread to every corner of the globe, including Pennsylvania, and jeopardized the safety and health of many people. [*Id.* at ¶¶ 31, 38-39, 54-55, 66]. As of this date, more than 200,000 Americans have died, including more than 8,000 Pennsylvanians. *See* Covid in the U.S.: Latest Map and Case Count, The New York Times, available at https://www.nytimes.com/interactive/2020/us/coronavirus-us-cases.html (last visited Oct. 10, 2020); COVID-19 Data for Pennsylvania, Pennsylvania Department of Health, available at https://www.health.pa.gov/topics/disease/coronavirus/Pages/Cases.aspx (last visited Oct. 10, 2020).

There have been many safety precautions that Pennsylvanians have been either required or urged to take, such as limiting participation in large gatherings, maintaining social distance, and wearing face coverings. [ECF 549-8, ¶¶ 58, 63-65]. The threat of COVID-19 is likely to persist through the November general election. [*Id.* at ¶¶ 53-56, 66-68].

B. Facts relevant to drop boxes.

***11** Pennsylvania's county-based election system vests county boards of elections with "jurisdiction over the conduct of primaries and elections in such county, in accordance with the provisions" of the Election Code. 25 P.S. § 2641(a). The Election Code further empowers the county boards to "make and issue such rules, regulations and instructions, not inconsistent with law, as they may deem necessary for the guidance of voting machine custodians, elections officers and electors." *Id.* at § 2642(f). The counties are also charged with the responsibility to "purchase, preserve, store and maintain primary and election equipment of all kinds, including voting booths, ballot boxes and voting machines." *Id.* at § 2642(c).

As noted above, in *Pennsylvania Democratic Party v. Boockvar*, the Pennsylvania Supreme Court interpreted the Election Code, which allows for mail-in and absentee ballots to be returned to the "county board of election," to "permit[ ] county boards of election to accept hand-delivered mail-in ballots at locations other than their office addresses including drop-boxes." —— A.3d at ——, 2020 WL 5554644, at *10.

Thus, it is now settled that the Election Code permits (but does not require) counties to authorize drop boxes and other satellite-collection locations for mailed ballots. 25 P.S. § 3150.16(a). Pennsylvania is not alone in this regard—as many as 34 other states and the District of Columbia authorize the use of drop boxes or satellite ballot collection sites to one degree or another. [ECF 549-11, p. 8, fig. 4]. Indeed, Secretary Boockvar stated that as many as 16% of voters nationwide had cast their ballots using drop boxes in the 2016 general election, including the majority of voters in Colorado (75%) and Washington (56.9%). [ECF 547, p. 18 (citing ECF 549-16)].

1. Secretary Boockvar's guidance with respect to drop boxes.

Since the passage of Act 77, Secretary Boockvar has issued several guidance documents to the counties regarding the counties' implementation of mail-in voting, including guidance with respect to the use of drop boxes. [ECF 504-21; 504-22; 504-23; 504-24; 504-25; 571-1, Ex. E]. In general terms, the Secretary's guidance as to drop boxes informed the counties that the use of drop boxes was authorized by the Election Code and recommended "best practices" for their use. Her latest guidance offered standards for (1) where drop boxes should be located, [ECF 504-23, § 1.2], (2) how drop boxes should be designed and what signage should accompany them, [*id.* at §§ 2.2-2.3], (3) what security measures should be employed, [*id.* at § 2.5], and (4) what procedures should be implemented for collecting and returning ballots to the county election office, [*id.* at §§ 3.1-3.3, 4].

As to the location of drop boxes, the Secretary recommended that counties consider the following criteria, [*id.* at § 1.2]:

- Locations that serve heavily populated urban/suburban areas, as well as rural areas;
- Locations near heavy traffic areas such as commercial corridors, large residential areas, major employers and public transportation routes;
- Locations that are easily recognizable and accessible within the community;
- Locations in areas in which there have historically been delays at existing polling locations, and areas with historically low turnout;
- Proximity to communities with historically low vote by mail usage;
- Proximity to language minority communities;
- Proximity to voters with disabilities;
- Proximity to communities with low rates of household vehicle ownership;
- Proximity to low-income communities;
- Access to accessible and free parking; and
- The distance and time a voter must travel by car or public transportation.

With respect to drop-box design criteria, the Secretary recommended to counties, [*id.* at § 2.2]:

***12** • Hardware should be operable without any tight grasping, pinching, or twisting of the wrist;

• Hardware should require no more than 5 lbs. of pressure for the voter to operate;

• Receptacle should be operable within reach-range of 15 to 48 inches from the floor or ground for a person utilizing a wheelchair;

• The drop-box should provide specific points identifying the slot where ballots are inserted;

• The drop-box may have more than one ballot slot (e.g. one for drive-by ballot return and one for walk-up returns);

• To ensure that only ballot material can be deposited and not be removed by anyone but designated county board of election officials, the opening slot of a drop-box should be too small to allow tampering or removal of ballots; and

• The opening slot should also minimize the ability for liquid to be poured into the drop-box or rainwater to seep in.

The Secretary's guidance as to signage recommended, [*id.* at § 2.3]:

• Signage should be in all languages required under the federal Voting Rights Act of 1965 (52 U.S.C. Sec. 10503);

• Signage should display language stating that counterfeiting, forging, tampering with, or destroying ballots is a second-degree misdemeanor pursuant to sections 1816 and 1817 of the Pennsylvania Election Code (25 P.S. §§ 3516 and 3517);

• Signage should also provide a statement that third-party return of ballots is prohibited unless the person returning the ballot is rendering assistance to a disabled voter or an emergency absentee voter. Such assistance requires a declaration signed by the voter and the person rendering assistance; and

• Signage should provide a statement requesting that the designated county elections official should be notified immediately in the event the receptacle is full, not functioning, or is damaged in any fashion, and should provide a phone number and email address for such purpose.

With respect to ballot security, the Secretary stated that county boards should implement the following security measures, [*id.* at § 2.5]:

• Only personnel authorized by the county board of elections should have access to the ballots inside of a drop-box;

• Drop-boxes should be secured in a manner to prevent their unauthorized removal;

• All drop-boxes should be secured by a lock and sealed with a tamper-evident seal. Only authorized election officials designated by the county board of elections may access the keys and/or combination of the lock;

• Drop-boxes should be securely fastened in a manner as to prevent moving or tampering, such as fastening the drop-box to concrete or an immovable object;

• During the hours when the staffed return site is closed or staff is unavailable, the drop-box should be placed in a secure area that is inaccessible to the public and/or otherwise safeguarded;

• The county boards of election should ensure adequate lighting is provided at all ballot return sites when the site is in use;

• When feasible, ballot return sites should be monitored by a video security surveillance system, or an internal camera that can capture digital images and/or video. A video security surveillance system can include existing systems on county, city, municipal, or private buildings. Video surveillance should be retained by the county election office through 60 days following the deadline to certify the election; and

***13** • To prevent physical damage and unauthorized entry, the drop-box at a ballot return site located outdoors should be constructed of durable material able to withstand vandalism, removal, and inclement weather.

With respect to ballot collection and "chain of custody" procedures, the Secretary stated that counties should adhere to the following standards, [*id.* at §§ 3.1-3.2]:

- Ballots should be collected from ballot return sites only by personnel authorized by the county board of elections and at times determined by the board of elections, at least every 24 hours, excluding Saturdays and Sundays;

- The county board of elections should designate at least two election officials to collect voted ballots from a ballot return site. Each designated election official should carry identification or an official designation that identifies them as an election official authorized to collect voted ballots;

- Election officials designated to collect voted ballots by the board of elections should sign a declaration declaring that he or she will timely and securely collect and return voted ballots, will not permit any person to tamper with a ballot return site or its contents, and that he or she will faithfully and securely perform his or her duties;

- The designated election officials should retrieve the voted ballots from the ballot return site and place the voted ballots in a secure ballot transfer container;

- The designated election officials should note on *Ballot Return Site Collection Forms* the site and unique identification number of the ballot return site and the date and time of retrieval;

- Ballots collected from any ballot return site should be immediately transported to the county board of elections;

- Upon arrival at the office of the county board of elections, the county board of elections, or their designee(s), should note the time of arrival on the same form, as described above;

- The seal number should be verified by a county election official or a designated representative;

- The county board of elections, or their designee(s), should inspect the drop-box or secure ballot transfer container for evidence of tampering and should receive the retrieved ballots by signing the retrieval form and including the date and time of receipt. In the event tampering is evident, that fact must be noted on the retrieval form;

- The completed collection form should be maintained in a manner proscribed by the board of elections to ensure that the form is traceable to its respective secure ballot container; and

- The county elections official at the county election office or central count location should note the number of ballots delivered on the retrieval form.

And finally, as to election day and post-election day procedures with respect to drop boxes, the Secretary provided as follows, [*id.* at §§ 3.3, 4]:

- The county board of elections should arrange for authorized personnel to retrieve ballots on election night and transport them to the county board of elections for canvassing of the ballots;

- Authorized personnel should be present at ballot return sites immediately prior to 8:00 p.m. or at the time the polls should otherwise be closed;

- At 8:00 p.m. on election night, or later if the polling place hours have been extended, all ballot return sites and drop-boxes must be closed and locked;

***14** - Staff must ensure that no ballots are returned to the ballot return site after the close of polls;

- After the final retrieval after the closing of the polls, the drop-box must be removed or locked and/or covered to prevent any further ballots from being deposited, and a sign shall be posted indicating that polling is closed for the election; and

- Any ballots collected from a return site should be processed in the same manner as mail-in ballots personally delivered to the central office of the county board of elections official by the voter and ballots received via the United States Postal Service or any other delivery service.

The Secretary and her staff developed this guidance in consultation with subject-matter experts within her Department and after review of the policies, practices, and laws in other states where drop boxes have been used. [ECF 549-6, pp. 23:14-22]. The evidence reflects at least one instance in which the Secretary's deputies reiterated that these "best practices" should be followed in response to inquiries from county officials considering whether to use drop boxes. [ECF 549-32 ("Per our conversation, the list of items are things the county must keep in mind if you are going to provide a box for voters to return their ballots in person.")].

Approximately 24 counties plan to use drop boxes during the November general election, to varying degrees. [ECF 549-28; ECF 504-1]. Of these, about nine counties intend to staff the drop boxes with county officials, while about 17 counties intend to use video surveillance in lieu of having staff present. [ECF 549-28].

2. Defendants' and Intervenors' evidence of the benefits and low risks associated with drop boxes.

Secretary Boockvar advocates for the use of drop boxes as a "direct and convenient way" for voters to deliver cast ballots to their county boards of elections, "thereby increasing turnout." [ECF 547, p. 22 ¶ 54 (citing 549-11 at pp. 10-11)]. The Secretary also touts the special benefits of expanding drop-box use in the ongoing COVID-19 pandemic. Specifically, she asserts that drop boxes reduce health risks and inspire voter confidence because "many voters understandably do not wish to cast their votes in person at their polling place on Election Day" due to COVID-19. [*Id.* at ¶¶ 55, 57 (citing ECF 549-2 ¶ 39; ECF 549-11 at p. 10; 549-8, ¶ 95)]. Drop boxes, she says, allow voters to vote in person without coming into "close proximity to other members of the public, compared to in-person voting or personally delivering a mail-in ballot to a public office building." [*Id.* at ¶ 57].

Secretary Boockvar also states that drop boxes are highly convenient, and cost-saving, for both counties and voters. For counties, she notes that "24-hour secure ballot drop boxes" are "cost-effective measures ... as they do not have to be staffed by election judges." [*Id.* at p. 24 ¶ 62 (citing ECF 549-11 at p. 11); ECF 549-9 at ¶ 34]. As for voters, the Secretary explains that, in a state where "ten counties ... cover more than 1,000 square miles" and "two-thirds" of counties "cover more than 500 square miles," many Pennsylvania voters "could be required to drive dozens of miles (and perhaps in excess of 100 miles) if he or she wished to deposit his or her mail-in ballot in person at the main county board of elections office." [*Id.* at ¶ 58 (citing ECF 549-29)].

***15** In addition to any tangible benefit drop boxes may have for voter access and turnout, Secretary Boockvar also states that drop boxes have a positive impact on voter confidence. In particular, she cites a recent news article, and a letter sent by the General Counsel of the U.S. Postal Service regarding Pennsylvania's absentee and mail-in ballot deadline, which have raised concerns over the timeliness and reliability of the U.S. Postal Service. [*Id.* at ¶¶ 60-61 (citing ECF 549-13; ECF 549-14); ECF 549-17; ECF 549-2 ¶¶ 42-43]. Voters' fears that votes returned by mail will not be timely counted could, the Secretary worries, "justifiably dissuade voters from wanting to rely upon the Postal Service for return of their mail-in or absentee ballot." [ECF 547, ¶ 61]. Drop boxes, she says, can address this concern by allowing voters to safely return mail-in ballots to an in-person location.

In exchange for these benefits, the Secretary insists that any potential security risk associated with drop boxes is low. She notes that the federal Department of Homeland Security has released guidance affirming that a "ballot drop box provides a secure and convenient means for voters to return their mail ballot," and recommending that states deploy one drop box for every 15,000 to 20,000 registered voters. [*Id.* at ¶¶ 63-65 (citing ECF 549-24, p. 1)]. She also points to a purported lack of evidence of systemic ballot harvesting or any attempts to tamper with, destroy, or otherwise commit voter fraud using drop boxes, either in Pennsylvania's recent primary election, or in other states that have used drop boxes for many years. [*Id.* at ¶¶ 68-74 (citations omitted)]. And she asserts that "[i]n the last 20 years in the entire state of Pennsylvania, there have been fewer than a dozen confirmed cases of fraud involving a handful of absentee ballots" among the many millions of votes cast during that time period. [*Id.* at ¶ 70 (citing ECF 549-10, pp. 3-4)].

Finally, the Secretary, and other Defendants and Intervenors, argue that Pennsylvania already has robust measures in place to prevent fraud, including its criminal laws, voter registration system, mail-in ballot application requirement, and canvassing procedures. [*Id.* at ¶¶ 66-67 (citing 25 P.S. §§ 3516 - 3518)]; [ECF 549-9, p. 15, ¶¶ 46-47 ("These allegations are not consistent with my experience with drop box security, particularly given the strong voter verification procedures that are followed by elections officials throughout the country and in Pennsylvania. Specifically, the eligibility and identity of the voter to cast a ballot is examined by an election judge who reviews and confirms all the personal identity information provided on the outside envelope. Once voter eligibility is confirmed, the ballot is extracted and separated from the outside envelope to ensure the ballot remains secret. During this step, election judges confirm that there is only one ballot in the envelope and checks for potential defects, such as tears in the ballot.... Regardless of the receptacle used for acceptance of the ballot (drop box versus USPS mailbox), ballot validation occurs when

the ballot is received by the county board of elections. The validation is the same regardless of how the ballots are collected or who delivers the ballot, even where that delivery contravenes state law.")].

Defendants and Intervenors also point to several expert reports expressing the view that drop boxes are both low risk and beneficial. These experts include:

Professor Matthew A. Barreto, a Professor of Political Science and Chicana/o Studies at UCLA. [ECF 549-7]. Professor Barreto offers the opinion that ballot drop boxes are an important tool in facilitating voting in Black and Latino communities. Specifically, he discusses research showing that Black and Latino voters are "particularly concerned about the USPS delivering their ballots." [*Id.* at ¶ 22]. And he opines that ballot drop boxes help to reassure these voters that their vote will count, because "there is no intermediary step between the voters and the county officials who collect the ballot." [*Id.* at ¶ 24].

***16 Professor Donald S. Burke**, a medical doctor and Distinguished University Professor of Health Science and Policy, Jonas Salk Chair in Population Health, and Professor of Epidemiology at the University of Pittsburgh. [ECF 549-8]. Professor Burke details the "significant risk of exposure" to COVID-19 in "enclosed areas like polling places." [*Id.* at ¶ 69]. He opines that "depositing a ballot in a mailbox and depositing a ballot in a drop-box are potential methods of voting that impart the least health risk to individual voters, and the least public health risk to the community." [*Id.* at ¶ 95].

Amber McReynolds, the CEO of the National Vote at Home Institute, with 13 years of experience administering elections as an Elections Director, Deputy Director, and Operations Manager for the City and County of Denver, Colorado. [ECF 549-9]. Ms. McReynolds opines that "[b]allot drop-boxes can be an important component of implementing expanded mail-in voting" that are "generally more secure than putting a ballot in post office boxes." [*Id.* at ¶ 16 (a)]. She notes that "[d]rop boxes are managed by election officials ... delivered to election officials more quickly than delivery through the U.S. postal system, and are secure." [*Id.*].

Ms. McReynolds also opines that Secretary Boockvar's guidance with respect to drop boxes is "consistent with best practices and advice that NVAHI has provided across jurisdictions." [*Id.* at ¶ 35]. But she also notes that "[b]est practices will vary by county based on the county's available resources, population, needs, and assessment of risk." [*Id.* at ¶ 52].

More generally, Ms. McReynolds argues that "[d]rop-boxes do not create an increased opportunity for fraud" as compared to postal boxes. [*Id.* at ¶ 44]. She also suggests that Pennsylvania guards against such fraud through other "strong voter verification procedures," including "ballot validation [that] occurs when the ballot is received by the county board of elections" and "[r]econciliation procedures adopted by election officials ... [to] protect against the potential risk of double voting." [*Id.* at ¶¶ 46-48]. She notes that "Pennsylvania's balloting system requires that those who request a mail-in vote and do not return the ballot (or spoil the mail-in ballot at their polling place), can only vote a provisional ballot" and "[i]f a mail-in or absentee ballot was submitted by an individual, their provisional ballot is not counted." [*Id.* at ¶ 48].

Professor Lorraine C. Minnite, an Associate Professor and Chair of the Department of Public Policy and Administration at Rutgers University-Camden. [ECF 549-10]. Professor Minnite opines that "the incidence of voter fraud in contemporary U.S. elections is exceedingly rare, including the incidence of voter impersonation fraud committed through the use of mail-in absentee ballots." [*Id.* at p. 3]. In Pennsylvania specifically, she notes that "[i]n the last 20 years ... there have been fewer than a dozen confirmed cases of fraud involving a handful of absentee ballots, and most of them were perpetrated by insiders rather than ordinary voters." [*Id.* at pp. 3-4]. As a "point of reference," she notes that 1,459,555 mail-in and absentee ballots were cast in Pennsylvania's 2020 primary election alone. [*Id.* at 4].

Professor Robert M. Stein, a Professor of Political Science at Rice University and a fellow in urban politics at the Baker Institute. [ECF 549-11]. Professor Stein opines that "the Commonwealth's use of drop boxes provides a number of benefits without increasing the risk of mail-in or absentee voter fraud that existed before drop boxes were implemented because (manned or unmanned) they are at least as secure as U.S. Postal Service ('USPS') mailboxes, which have been successfully used to return mail-in ballots for decades in the Commonwealth and elsewhere around the U.S." [*Id.* at p. 3]. According to Professor Stein, the use of drop boxes "has been shown to increase turnout," which he suggests is particularly important "during a global pandemic and where research has shown that natural and manmade disasters have historically had a depressive effect on voter turnout." [*Id.* at

p. 4]. Professor Stein notes that "[d]rop boxes are widely used across a majority of states as a means to return mail-in ballots" and he is "not aware of any studies or research that suggest that drop boxes (manned or unmanned) are a source for voter fraud." [*Id.*]. Nor is he aware "of any evidence that drop boxes have been tampered with or led to the destruction of ballots." [*Id.*].

***17 Professor Paul Gronke**, a Professor of Political Science at Reed College and Director of the Early Voting Information Center. [ECF 545-7]. Professor Gronke recommends that "drop boxes should be provided in every jurisdiction that has significant (20% or more) percentage[ ] of voters casting a ballot by mail, which includes Pennsylvania" for the general election. [*Id.* at ¶ 6]. He avers that "[s]cientific research shows that drop boxes raise voter turnout and enhance voter confidence in the elections process." [*Id.* at ¶ 7]. Voters, he explains, "utilize drop boxes heavily—forty to seventy percent of voters in vote by mail states and twenty-five percent or more in no-excuse absentee states." [*Id.*]. Professor Gronke further states that he is "not aware of any reports that drop boxes are a source for voter fraud" despite having "been in use for years all over the country." [*Id.* at ¶ 8]. And he suggests that the use of drop boxes is "especially important" in an election "that will be conducted under the cloud of the COVID-19 pandemic, and for a state like Pennsylvania that is going to experience an enormous increase in the number of by-mail ballots cast by the citizenry of the state." [*Id.* at ¶ 9].

Based on this evidence, and the purported lack of any contrary evidence showing great risks of fraud associated with the use of drop boxes, Defendants and Intervenors argue that Pennsylvania's authorization of drop boxes, and the counties' specific implementation of them, furthers important state interests at little cost to the integrity of the election system.

3. Plaintiffs' evidence of the risks of fraud and vote dilution associated with drop boxes.

Plaintiffs, on the other hand, argue that the drop boxes allow for an unacceptable risk of voter fraud and "illegal delivery or ballot harvesting" that, when it occurs, will "dilute" the votes of all lawful voters who comply with the Election Code. *See, e.g.,* [ECF 461, ¶¶ 127-128]. As evidence of the dilutive impact of drop boxes, Plaintiffs offer a combination of anecdotal and expert evidence.

Foremost among this evidence is the expert report of Greg Riddlemoser, the former Director of Elections and General Registrar for Stafford County, Virginia from 2011 until 2019. [ECF 504-19]. According to Mr. Riddlemoser, "voter fraud exists." [*Id.* at p. 2]. He defines the term "voter fraud" to mean any "casting and/or counting of ballots in violation of a state's election code." [*Id.*]. Examples he gives include: "Voting twice yourself—even if in multiple jurisdictions," "voting someone else's ballot," and "[e]lection officials giving ballots to or counting ballots from people who were not entitled to vote for various reasons." [*Id.* at pp. 2-3]. All of these things, he asserts, are "against the law and therefore fraudulent." [*Id.*].[3]

Mr. Riddlemoser argues that "ballot harvesting" (which is the term Plaintiffs use to refer to situations in which an individual returns the ballots of other people) "persists in Pennsylvania." [*Id.* at p. 3]. He points to the following evidence to support this opinion:

- Admissions by Pennsylvania's Deputy Secretary for Elections and Commissions, Jonathan Marks, that "several Pennsylvania counties permitted ballot harvesting by counting ballots that were delivered in violation of Pennsylvania law" during the recent primary election, [*Id.*];
- "[S]everal instances captured by the media where voters in the June 2020 Primary deposited multiple ballots into unstaffed ballot drop boxes," [*Id.* at p. 4];
- "Other photographs and video footage of at least one county's drop box (Elk County) on Primary Election day" which "revealed additional instances of third-party delivery," [*Id.*]; and
- "Documents produced by Montgomery County" which "reveal that despite signs warning that ballot harvesting is not permitted, people during the 2020 Primary attempted to deposit into the five drop boxes used by that county ballots that were not theirs," [*Id.*].

***18** With respect to the use of "unstaffed" or "unmanned" ballot drop boxes, Mr. Riddlemoser expresses the opinion that "the use of unmanned drop boxes presents the easiest opportunity for voter fraud" and "certain steps must be taken to make drop boxes 'secure' and 'monitored.' " [*Id.* at p. 16].

He states that, to be "secure," drop boxes must be "attended" by "sworn election officials" at all times (*i.e.*, "never left

unattended at any time they are open for ballot drop-off."). [*Id.*]. He further suggests that officials stationed at drop boxes must be empowered, and required, to "verify the person seeking to drop off a ballot is the one who voted it and is not dropping off someone else's ballot." [*Id.*]. Doing so, he says, would, in addition to providing better security, also "allow the election official to ask the voter if they followed the instructions they were provided ... and assist them in doing so to remediate any errors, where possible, before ballot submission." [*Id.*].

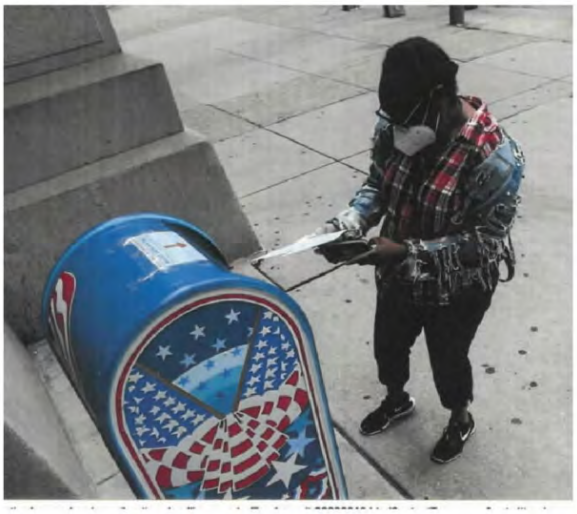
In addition to being "manned," Mr. Riddlemoser suggests that certain procedures with respect to ballot collection are necessary to ensure the integrity of votes cast in drop boxes. For example, he suggests that, at the end of each day, drop boxes, which should themselves be "tamperproof," should "be verifiably completely emptied into fireproof/tamperproof receptacles, which are then sealed and labeled by affidavit as to whom, where, when, etc." [*Id.*] Once sealed, the containers "must then be transported by sworn officials in a county owned vehicle (preferably marked law enforcement) back to the county board where they are properly receipted and safeguarded." [*Id.*]. Emptied drop boxes should also be sealed at the end of each day "such that they are not able to accept any additional ballots until they are 'open' again[.]" [*Id.*]. And boxes should be "examined to ensure no ballots are in the box, that nothing else is inside the box, and that the structural integrity and any security associated with the box remains intact." [*Id.*]. All of this, he suggests, should also be "available for monitoring by poll watchers." [*Id.*].

According to Mr. Riddlemoser, anything short of these robust procedures won't do. In particular, "video cameras would not prevent anyone from engaging in activity that could or is designed to spoil the ballots inside the box; such as dumping liquids into the box, lighting the ballots on fire by using gasoline and matches, or even removing the box itself." [*Id.* at p. 17]. Even if the "identity of the person responsible may be determined ... the ballots themselves would be destroyed —effectively disenfranchising numerous voters." [*Id.*]. And given "recent footage of toppled statues and damage to government buildings" in the news, Mr. Riddlemoser finds the "forcible removal of ballot drop boxes" to be "a distinct possibility." [*Id.*]. In addition to increasing the risk of ballot destruction, Mr. Riddlemoser notes that reliance on video cameras would also "not prohibit someone from engaging in ballot harvesting by depositing more than one ballot in the drop box[.]" [*Id.*].

Beyond Mr. Riddlemoser's expert testimony, Plaintiffs proffer several other pieces of evidence to support their claims that drop boxes pose a dilutive threat to the ballots of lawful voters. Most notably, they present photographs and video stills of, by the Court's count, approximately seven individuals returning more than one ballot to drop boxes in Philadelphia and Elk County (the same photographs referenced by Mr. Riddlemoser). [ECF 504-19, PDF pp. 49-71].

***19** Those photographs depict the following:

- **An unidentified woman holding what appear to be two ballots at a Philadelphia drop box.**



- **Instagram user "thefoodiebarrister" posing for a selfie with two ballots in Philadelphia; captioned, in part, "dropping of [sic] my votes in a designated ballot drop box."**

- **A photograph posted to social media showing a hand placing two ballots in a drop box; captioned, in part, "Cory and I voted!"**

- **A photograph of an unidentified man wearing a "Philadelphia Water" sweater and hat, placing two ballots in a Philadelphia drop box.**

- **Several video stills that, according to Plaintiffs, show voters depositing more than one ballot in an Elk County drop box.**

In addition to these photographs and video stills, Plaintiffs also provide a May 24, 2020, email sent by an official in Montgomery County (which placed security guards to monitor its drop boxes) observing that security "have turned people away yesterday and today without incident who had ballots other than their own." [ECF 504-28].

Separate and apart from this evidence specific to the use of drop boxes, Plaintiffs and their expert also provide evidence of instances of election fraud, voter fraud, and illegal voting generally. These include, for example:

- A case in which a New Jersey court ordered a new municipal election after a city councilman and councilman-elect were charged with fraud involving mail-in ballots. [ECF 504-19, p. 3].

- A New York Post article written by an anonymous fraudster who claimed to be a "master at fixing mail-in ballots" and detailed his methods. [*Id.*].

- Philadelphia officials' admission that approximately 40 people were permitted to vote twice during the 2020 primary elections. [*Id.*].

- A YouTube video purporting to show Philadelphia election officials approving the counting of mail-in ballots that lacked a completed certification on the outside of the envelope. [*Id.* (citation omitted)].

- The recent guilty plea of the former Judge of Elections in South Philadelphia, Domenick J. DeMuro, to adding fraudulent votes to voting machines on election day. [ECF 461, ¶ 61]; *see United States v. DeMuro*, No. 20-cr-112 (E.D. Pa. May 21, 2020).

- The 2014 guilty plea of Harmar Township police chief Richard Allen Toney to illegally soliciting absentee ballots to benefit his wife and her running mate in the 2009 Democratic primary for town council, [ECF 461, ¶ 69];

- The 2015 guilty plea of Eugene Gallagher for unlawfully persuading residents and non-residents of Taylor, in Lackawanna County, Pennsylvania, to register for absentee ballots and cast them for him during his councilman candidacy in the November 2013 election, [*Id.*];

***20** - The 1999 indictment of Representative Austin J. Murphy in Fayette County for forging absentee ballots for residents of a nursing home and adding his wife as a write-in candidate for township election judge, [*Id.*];

- The 1994 Eastern District of Pennsylvania and Third Circuit case *Marks v. Stinson*, which involved an alleged incident of extensive absentee ballot fraud by a candidate for the Pennsylvania State Senate, *see Marks v. Stinson*, 19 F.3d 873 (3d Cir. 1994); *Marks v. Stinson*, No. 93-6157, 1994 WL 146113 (E.D. Pa. Apr. 26, 1994), [ECF 461, ¶ 78]; and

- A report from the bipartisan Commission on Federal Election Reform, chaired by former President Jimmy Carter and former Secretary of State James A. Baker III, which observed that absentee voting is "the largest source of potential voter fraud" and proposed that states "reduce the risks of fraud and abuse in absentee voting by prohibiting 'third-party' organizations, candidates, and political party activists from handling absentee ballots." [ECF 461, ¶¶ 66-67, 80].

C. Facts relevant to signature comparison.

Many of the facts relevant to Plaintiffs' signature-comparison claim relate to the verification procedures for mail-in and absentee ballots, on one hand, and those procedures for in-person voting, on the other. These are described below.

1. Mail-in and absentee ballot verification.

As noted above, Pennsylvania does not distribute unsolicited mail-in and absentee ballots. Rather, a voter must apply for the ballot (and any voter can). [ECF 549-2, ¶ 64]. As part of the application for a mail-in ballot,[4] an applicant must provide certain identifying information, including name, date of birth, length of time as a resident of the voting district, voting district if known, party choice in the primary, and address where the ballot should be sent. 25 P.S. § 3150.12(b). In applying for a mail-in ballot, the applicant must also provide "proof of identification," which is defined by statute as that person's driver's license number, last four digits of Social Security number, or another specifically approved form of identification. [ECF 549-2, ¶ 64; ECF 549-27]; 25 P.S. § 2602(z.5)(3). A signature is not mentioned in the definition of "proof of identification." 25 P.S. § 2602(z.5)(3). However, if physically capable, the applicant must sign the application. *Id.* at § 3150.12(c)-(d).

Upon receiving the mail-in ballot application, the county board of elections determines if the applicant is qualified by "verifying the proof of identification and comparing the information provided on the application with the information contained on the applicant's permanent registration card." 25 P.S. § 3150.12b(a). The county board of elections then either approves the application[5] or "immediately" notifies the applicant if the application is not approved. *Id.* at § 3150.12b(a), (c). Upon approval, the county mails the voter the mail-in ballot.

***21** After receiving the ballot, the mail-in voter must "mark the ballot" with his or her vote, insert the ballot into the "secrecy" envelope, and place the "secrecy" envelope into a larger envelope. *Id.* at § 3150.16(a). Then, the voter must "fill out, date and sign the declaration printed on [the larger] envelope. [The larger] envelope shall then be securely sealed and the elector shall send [it] by mail ... or deliver it in person to said county board of election." *Id.* The declaration on the larger envelope must be signed, unless the voter is physically unable to do so. *Id.* at § 3150.16(a)-(a.1).

Once the voter mails or delivers the completed mail-in ballot to the appropriate county board of elections, the ballot is kept "in sealed or locked containers until they are to be canvassed by the county board of elections." *Id.* at § 3146.8(a). The county boards of elections can begin pre-canvassing and canvassing the mail-in ballots no earlier than election day. *Id.* at § 3146.8(g)(1.1).

When pre-canvassing and canvassing the mail-in ballots, the county boards of elections must "examine the declaration on the [larger] envelope of each ballot ... and shall compare the information thereon with that contained in the ...Voters File." *Id.* at § 3146.8(g)(3). The board shall then verify the "proof of identification" and shall determine if "the declaration [on the larger envelope] is sufficient." *Id.* If the information in the "Voters File ... verifies [the elector's] right to vote," the ballot shall be counted. *Id.*

2. In-person voting verification.

When a voter decides to vote in-person on election day, rather than vote by mail, the procedures are different. There is no application to vote in person. Rather, on election day, the in-person voter arrives at the polling place and "present[s] to an election officer proof of identification," which the election officer "shall examine." *Id.* at § 3050(a). The in-person voter shall then sign a voter's certificate" and give it to "the election officer in charge of the district register." *Id.* at § 3050(a.3)(1). Next, the election officer shall "announce the elector's name" and "shall compare the elector's signature on his voter's certificate with his signature in the district register." *Id.* at § 3050(a.3)(2). If the election officer believes the signature to be "genuine," the in-person voter may vote. *Id.* But if the election officer does not deem the signature "authentic," the in-person voter may still cast a provisional ballot and is given the opportunity to remedy the deficiency. *Id.*

3. The September 11, 2020, and September 28, 2020, sets of guidance.

In September 2020, Secretary Boockvar issued two new sets of guidance related to signature comparisons of mail-in and absentee ballots and applications. The first, issued on September 11, 2020, was titled "Guidance Concerning Examination of Absentee and Mail-In Ballot Return Envelopes." [ECF 504-24]. The guidance stated, in relevant part, the "Pennsylvania Election Code does not authorize the county board of elections to set aside returned absentee or mail-in ballots based solely on signature analysis by the county board of elections." [*Id.* at p. 3]. The second set of guidance, issued on September 28, 2020, was titled, "Guidance Concerning Civilian Absentee and Mail-

In Ballot Procedures." [ECF 504-25]. This September 28, 2020, guidance stated, in relevant part, "The Election Code does not permit county election officials to reject applications or voted ballots based solely on signature analysis. ... No challenges may be made to mail-in and absentee ballots at any time based on signature analysis." [*Id.* at p. 9]. Thus, as evidenced by these two sets of guidance, Secretary Boockvar advised the county boards of elections not to engage in a signature-comparison analysis of voters' signatures on ballots and applications for ballots.

***22** Most of the counties intend to follow the Secretary's guidance and will not compare signatures on mail-in ballots and applications for the upcoming general election. *E.g.*, [ECF 504-1]. A few counties, however, stated their intent to not comply with the guidance, and instead would compare and verify the authenticity of signatures. *E.g.*, [*id.* (noting the counties of Cambria, Elk, Franklin, Juniata, Mifflin, Sullivan, Susquehanna, and Wyoming, as not intending to follow Secretary Boockvar's guidance to not compare signatures)].

According to Defendants, there are valid reasons to not require signature comparisons for mail-in and absentee ballots. For example, Secretary Boockvar notes that signature verification is a technical practice, and election officers are not "handwriting experts." [ECF 549-2, p. 19, ¶ 68]. Secretary Boockvar also notes that voters' signatures can change over time, and various medical conditions (*e.g.*, arthritis) can impact a person's signature. [*Id.*] Defendants' expert, Amber McReynolds, also finds that "signature verification" involves "inherent subjectivity." [ECF 549-9, p. 20, ¶ 64]. Ms. McReynolds further notes the "inherent variability of individuals' signatures over time." [*Id.*] And according to Secretary Boockvar, these are just some reasons Pennsylvania implements verification procedures other than signature comparisons for mail-in voters, who, unlike in-person voters, are not present when their signature would be verified. [ECF 549-2, p. 20, ¶ 69].

Plaintiffs' expert, Greg Riddlemoser, on the other hand, states that signature comparison is "a crucial security aspect of vote-by-mail" and failing to verify signatures on mail-in ballots would "undermine voter confidence and would increase the possibility of voter fraud." [ECF 504-19, pp. 10-11]. Mr. Riddlemoser asserts that Secretary Boockvar's September 11, 2020, and September 28, 2020, guidance "encourage, rather than prevent, voter fraud." [*Id.* at p. 12]. As such, Mr. Riddlemoser explains that mail-in voters should be subject to the same signature-comparison requirement as in-person voters. [*Id.* at pp. 13-14].

4. Secretary Boockvar's King's Bench petition.

In light of this case and the parties' disagreement over whether the Election Code mandates signature comparison for mail-in ballots, Secretary Boockvar filed a "King's Bench" petition with the Pennsylvania Supreme Court on October 4, 2020. In that petition, she asked the Pennsylvania Supreme Court to exercise its extraordinary jurisdiction, in light of the impending election, to clarify whether the Election Code mandates signature comparison of mail-in and absentee ballots and applications. [ECF 556, p. 11; ECF 557].

On October 7, 2020, several groups, including Donald J. Trump for President, Inc. and the Republican National Committee—who are Plaintiffs in this case—moved to intervene as Respondents in the Pennsylvania Supreme Court case. [ECF 571-1]. The Pennsylvania Supreme Court has not yet decided the motion to intervene or whether to accept the case. The petition remains pending.

D. Facts relevant to poll-watcher claims.

The position of "poll watcher" is a creation of state statute. *See* 25 P.S. § 2687. As such, the Election Code defines how a poll watcher may be appointed, what a poll watcher may do, and where a poll watcher may serve.

1. The county-residency requirement for poll watchers.

***23** The Election Code permits candidates to appoint two poll watchers for each election district. 25 P.S. § 2687(a). The Election Code permits political parties and bodies to appoint three poll watchers for each election district. *Id.*

For many years, the Pennsylvania Election Code required that poll watchers serve only within their "election district," which the Code defines as "a district, division or precinct, ... within which all qualified electors vote at one polling place." 25 P.S. § 2687(b) (eff. to May 15, 2002) (watchers "shall serve in only one district and must be qualified registered electors of the municipality or township in which the district where they are authorized to act is located"); 25 P.S. § 2602(g). Thus, originally, poll watching was confined to a

more limited geographic reach than one's county, as counties are themselves made up of many election districts.

Then, in 2004, the General Assembly amended the relevant poll-watcher statute to provide that a poll watcher "shall be authorized to serve in the election district for which the watcher was appointed and, when the watcher is not serving in the election district for which the watcher was appointed, in any other election district in the county in which the watcher is a qualified registered elector." 25 P.S. § 2687(b) (eff. Oct. 8, 2004).

This county-residency requirement is in line with (or is, in some cases, more permissive than) the laws of at least eight other states, which similarly require prospective poll watchers to reside in the county in which they wish to serve as a watcher or (similar to the pre-2004 Pennsylvania statute) limit poll watchers to a sub-division of the county. *See, e.g.*, Fla. Stat. Ann. § 101.131(1) (Florida); Ind. Code Ann. § 3-6-8-2.5 (Indiana); Ky. Rev. Stat. Ann. § 117.315(1) (Kentucky); N.Y. Elec. Law § 8-500(5) (New York); N.C. Gen. Stat. Ann. § 163-45(a) (North Carolina); Tex. Elec. Code Ann. § 33.031(a) (Texas); S.C. Code Ann. § 7-13-860 (South Carolina); Wyo. Stat. Ann. § 22-15-109(b) (Wyoming). However, at least one state (West Virginia) does not provide for poll watchers at all. *See* W. Va. Code Ann. § 3-1-37; W. Va. Code Ann. § 3-1-41

The General Assembly has not amended the poll-watcher statute since 2004, even though some lawmakers have advocated for the repeal of the residency requirement. *See Cortés*, 218 F. Supp. 3d at 402 (observing that legislative efforts to repeal the poll-watcher residency requirement have been unsuccessful).

As part of its September 17, 2020, decision, the Pennsylvania Supreme Court found that the county-residency requirement does not violate the U.S. or Pennsylvania constitutions. *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *31.

2. Where and when poll watchers can be present during the election.

The Pennsylvania Election Code sets forth the rules for where and when poll watchers are permitted to be present.

The Election Code provides that poll watchers may be present "at any public session or sessions of the county board of elections, and at any computation and canvassing of returns of any primary or election and recount of ballots or recanvass of voting machines under" the Code. 25 P.S. § 2650. Additionally, one poll watcher for each candidate, political party, or political body may "be present in the polling place ... from the time that the election officers meet prior to the opening of the polls ... until the time that the counting of votes is complete and the district register and voting check list is locked and sealed." 25 P.S. § 2687(b).

***24** During this time, poll watchers may raise objections to "challenge any person making application to vote." *Id.* Poll watchers also may raise challenges regarding the voters' identity, continued residence in the election district, or registration status. 25 P.S. § 3050(d).

Although Pennsylvania has historically allowed absentee ballots to be returned by U.S. Postal Service or by in-person delivery to a county board of elections office, the Election Code does not provide (and has never provided for) any right to have poll watchers in locations where absentee voters fill out their ballots (which may include their home, office, or myriad other locations), nor where those votes are mailed (which may include their own mailbox, an official U.S. Postal Service collection box, a work mailroom, or other places U.S. Postal Service mail is collected), nor at county board of elections offices. [ECF 549-2, ¶¶ 86-90].

Before Act 77, absentee ballots were held in election districts rather than centralized at the county board of elections. *See* 25 P.S. § 3146.8 (eff. Mar. 14, 2012 to Oct. 30, 2019) ("In all election districts in which electronic voting systems are used, absentee ballots shall be opened at the election district, checked for write-in votes in accordance with section 1113-A and then either hand-counted or counted by means of the automatic tabulation equipment, whatever the case may be.").

At such time (again, before Act 77), poll workers opened those absentee ballots at each polling place after the close of the polls. *Id.* ("Except as provided in section 1302.1(a.2), the county board of elections shall then distribute the absentee ballots, unopened, to the absentee voter's respective election district concurrently with the distribution of the other election supplies. Absentee ballots shall be canvassed immediately and continuously without interruption until completed after the close of the polls on the day of the election in each election district. The results of the canvass of the absentee ballots shall then be included in and returned to the county board with the returns of that district." (footnote omitted)).

With the enactment of Act 77, processing and counting of mail-in and absentee ballots is now centralized in each county board of elections, with all mail-in and absentee ballots in such county held and counted at the county board of elections (or such other site as the county board may choose) without regard to which election district those ballots originated from. 25 P.S. § 3146.8(a) (eff. Mar. 27, 2020); [ECF 549-2, ¶ 81].

Under Act 12, counties are permitted to "pre-canvass" mail-in or absentee ballots received before Election Day beginning at 7:00 a.m. on Election Day. 25 P.S. § 3146.8(g)(1.1). Counties are further permitted to "canvass" ballots received after that time beginning "no earlier than the close of the polls on the day of the election and no later than the third day following the election." *Id.* § 3146.8(g)(2).

The Election Code permits "[o]ne authorized representative of each candidate" and "one representative from each political party" to "remain in the room in which the absentee ballots and mail-in ballots are pre-canvassed." 25 P.S. § 3146.8(g)(1.1). Similarly, during canvassing, the Election Code permits "[o]ne authorized representative of each candidate" and "one representative from each political party" to "remain in the room in which the absentee ballots and mail-in ballots are canvassed." 25 P.S. § 3146.8(g)(2).

***25** The Election Code provisions pertaining to the "pre-canvass" and "canvass" do not make any separate reference to poll watchers, instead referring only to the "authorized representatives" of parties and candidates. *See* 25 P.S. § 3146.8.

On October 6, 2020, Secretary Boockvar issued guidance concerning poll watchers and authorized representatives. [ECF 571-1]. The guidance states that poll watchers "have no legal right to observe or be present at ... ballot return sites," such as drop-box locations. [ECF 571-1, Ex. E, p. 5]. The guidance also states that while a candidate's authorized representative may be present when mail-in ballots are opened (including during pre-canvass and canvass), the representative cannot challenge those ballots. [*Id.* at Ex. E, p. 4].

On October 9, 2020, in a separate lawsuit brought by the Trump Campaign in the Philadelphia County Court of Common Pleas, the state court there confirmed Secretary Boockvar's guidance. Specifically, the state court held that satellite ballot-collection locations, such as drop-box locations, are not "polling places," and therefore poll watchers are not authorized to be present in those places. [ECF 573-1, p. 12 ("It is clear from a reading of the above sections [of the Election Code] that the satellite offices where these activities, and only these activities, occur are true 'offices of the Board of Elections' and are not polling places, nor public sessions of the Board of Elections, at which watchers have a right to be present under the Election Code.")]. Immediately after issuance of this decision, the Trump Campaign filed a notice of appeal, indicating its intention to appeal the decision to the Commonwealth Court of Pennsylvania. Having just been noticed, that appeal remains in its infancy as of the date of this Opinion.

3. Plaintiffs' efforts to recruit poll watchers for the upcoming general election.

In order to become a certified poll watcher, a candidate must meet certain criteria. [ECF 504-20, ¶ 9]. That is, a poll watcher needs to be "willing to accept token remuneration, which is capped at $120 under Pennsylvania state law" and must be able to take off work or otherwise make arrangements to be at the polling place during its open hours on Election Day, which can mean working more than 14 hours in a single day. [*Id.*].

The Pennsylvania Director for Election Day Operations for the Trump Campaign, James J. Fitzpatrick, stated that the Trump Campaign wants to recruit poll watchers for every county in Pennsylvania. [ECF 504-2, ¶ 30]. To that end, the RNC and the Trump Campaign have initiated poll-watcher recruitment efforts for the general election by using a website called DefendYourBallot.com. [ECF 528-14, 265:2-15, 326:14-329-7]. That website permits qualified electors to volunteer to be a poll watcher. [*Id.*]. In addition, Plaintiffs have called qualified individuals to volunteer to be poll watchers, and worked with county chairs and conservative activists to identify potential poll watchers. [*Id.*].

Despite these efforts, the Trump Campaign claims it "is concerned that due to the residency restriction, it will not have enough poll watchers in certain counties." [ECF 504-2, ¶ 25]. Mr. Fitzpatrick, however, could not identify a specific county where the Trump Campaign has been unable to obtain full coverage of poll watchers or any county where they have tried and failed to recruit poll watchers for the General Election. [ECF 528-14, 261:21-262:3, 263:8-19, 265:2-266:3].

***26** In his declaration, Representative Reschenthaler shared Mr. Fitzpatrick's concern, stating that he does not believe that

he will "be able to recruit enough volunteers from Greene County to watch the necessary polls in Greene County." [ECF 504-6, ¶ 12]. But Representative Reschenthaler did not provide any information regarding his efforts to recruit poll watchers to date, or what he plans to do in the future to attempt to address his concern. *See generally* [*id.*].

Representative Kelly stated in his declaration that he was "likely to have difficulty getting enough poll watchers from within Erie County to watch all polls within that county on election day." [ECF 504-5, ¶ 16]. Representative Kelly never detailed his efforts (*e.g.*, the outreach he tried, prospective candidates he unsuccessfully recruited, and the like), and he never explained why those efforts aren't likely to succeed in the future. *See generally* [*id.*].

In his declaration, Representative Thompson only stated that based on his experience, "parties and campaigns cannot always find enough volunteers to serve as poll watchers in each precinct." [ECF 504-4, ¶ 20].

According to statistics collected and disseminated by the Pennsylvania Department of State, there is a gap between the number of voters registered as Democrats and Republicans in some Pennsylvania counties. [ECF 504-34]. Plaintiffs' expert, Professor Lockerbie, believes this puts the party with less than a majority of voters in that county at a disadvantage in recruiting poll watchers. [ECF 504-20, ¶ 15]. However, despite this disadvantage, Professor Lockerbie states that "the Democratic and Republican parties might be able to meet the relevant criteria and recruit a sufficient population of qualified poll watchers who meet the residency requirement[ ]." [*Id.* at ¶ 16].

Additionally, Professor Lockerbie finds the gap in registered voters in various counties to be especially problematic for minor political parties. [*Id.* at ¶ 16]. As just one example, according to Professor Lockerbie, even if one were to assume that all third-party voters were members of the same minor party, then in Philadelphia County it would require "every 7th registrant" to be a poll watcher in order for the third party to have a poll watcher observing each precinct." [*Id.*].

Professor Lockerbie believes that disruptions to public life caused by the COVID-19 pandemic "magnified" the difficulties in securing sufficient poll watchers. [*Id.* at ¶ 10].

Nothing in the Election Code limits parties from recruiting only registered voters from their own party. [ECF 528-14, 267:23-268:1]. For example, the Trump Campaign utilized at least two Democrats among the poll watchers it registered in the primary. [ECF 528-15, P001648].

4. Rationale for the county-residency requirement.

Defendants have advanced several reasons to explain the rationale behind county-residency requirement for poll watchers.

Secretary Boockvar has submitted a declaration, in which she has set forth the reasons for and interests supporting the county-residency requirement. Secretary Boockvar states that the residency requirement "aligns with Pennsylvania's county-based election scheme[.]" [ECF 549-2, p. 22, ¶ 77]. "By restricting poll watchers' service to the counties in which they actually reside, the law ensures that poll watchers should have some degree of familiarity with the voters they are observing in a given election district." [*Id.* at p. 22, ¶ 78].

***27** In a similar vein, Intervenors' expert, Dr. Barreto, in his report, states that, voters are more likely to be comfortable with poll watchers that "they know" and are "familiar with ... from their community." [ECF 524-1, p. 14, ¶ 40]. That's because when poll watchers come from the community, "there is increased trust in government, faith in elections, and voter turnout[.]" [*Id.*].

At his deposition, Representative Kelly agreed with this idea: "Yeah, I think – again, depending how the districts are established, I think people are probably even more comfortable with people that they – that they know and they recognize from their area." [ECF 524-23, 111:21-25].

LEGAL STANDARD

Summary judgment is appropriate "if the movant shows that there is no genuine dispute as to any material fact and the movant is entitled to judgment as a matter of law." Fed. R. Civ. P. 56(a). At summary judgment, the Court must ask whether the evidence presents "a sufficient disagreement to require submission to the jury or whether it is so one-sided that one party must prevail as a matter of law." *Anderson v. Liberty Lobby, Inc.*, 477 U.S. 242, 251-52, 106 S.Ct. 2505, 91 L.Ed.2d 202 (1986). In making that determination, the Court must "consider all evidence in the light most favorable to the party

opposing the motion." *A.W. v. Jersey City Pub. Schs.*, 486 F.3d 791, 794 (3d Cir. 2007).

The summary-judgment stage "is essentially 'put up or shut up' time for the non-moving party," which "must rebut the motion with facts in the record and cannot rest solely on assertions made in the pleadings, legal memoranda, or oral argument." *Berckeley Inv. Grp. Ltd. v. Colkitt*, 455 F.3d 195, 201 (3d Cir. 2006). If the non-moving party "fails to make a showing sufficient to establish the existence of an element essential to that party's case, and on which that party will bear the burden at trial," summary judgment is warranted. *Celotex Corp. v. Catrett*, 477 U.S. 317, 324, 106 S.Ct. 2548, 91 L.Ed.2d 265 (1986).

"The rule is no different where there are cross-motions for summary judgment." *Lawrence v. City of Philadelphia*, 527 F.3d 299, 310 (3d Cir. 2008). The parties' filing of cross-motions "does not constitute an agreement that if one is rejected the other is necessarily justified[.]" *Id.* But the Court may "resolve cross-motions for summary judgment concurrently." *Hawkins v. Switchback MX, LLC*, 339 F. Supp. 3d 543, 547 (W.D. Pa. 2018). When doing so, the Court views the evidence "in the light most favorable to the non-moving party with respect to each motion." *Id.*

DISCUSSION & ANALYSIS

Plaintiffs, Defendants, and Intervenors all cross-move for summary judgment on all three of Plaintiffs' remaining claims, which the Court refers to, in the short-hand, as (1) the drop-box claim, (2) the signature-comparison claim, and (3) the poll-watching claim. The common constitutional theory behind each of these claims is vote dilution. Absent the security measures that Plaintiffs seek, they fear that others will commit voter fraud, which will, in turn, dilute their lawfully cast votes. They assert that this violates the federal and Pennsylvania constitutions.

The Court will address only the federal-constitutional claims. For the reasons that follow, the Court finds that Plaintiffs lack standing to bring their federal-constitutional claims because Plaintiffs' injury of vote dilution is not "concrete" for Article III purposes.

But even assuming Plaintiffs had standing, the Court also concludes that Defendants' regulations, conduct, and election guidance here do not infringe on any right to vote, and if they do, the burden is slight and outweighed by the Commonwealth's interests—interests inherent in the Commonwealth's other various procedures to police fraud, as well as its overall election scheme.

***28** Finally, because the Court will be dismissing all federal-constitutional claims, it will decline to exercise supplemental jurisdiction over any of the state-constitutional claims and will thus dismiss those claims without prejudice.

I. Defendants' procedural and jurisdictional challenges.

At the outset, Defendants and Intervenors raise a number of jurisdictional, justiciability, and procedural arguments, which they assert preclude review of the merits of Plaintiffs' claims. Specifically, they assert (1) the claims are not ripe and are moot, (2) there is a lack of evidence against certain county boards, and those boards are not otherwise necessary parties, and (3) Plaintiffs lack standing. The Court addresses each argument, in turn.

A. Plaintiffs' claims are ripe and not moot.

Several Defendants have argued that Plaintiffs' claims in the Second Amended Complaint are not ripe and are moot. The Court disagrees.

1. Plaintiffs' claims are ripe.

The ripeness doctrine seeks to "prevent the courts, through the avoidance of premature adjudication, from entangling themselves in abstract disagreements." *Artway v. Attorney Gen. of N.J.*, 81 F.3d 1235, 1246-47 (3d Cir. 1996) (cleaned up). The ripeness inquiry involves various considerations including whether there is a "sufficiently adversarial posture," the facts are "sufficiently developed," and a party is "genuinely aggrieved." *Peachlum v. City of York*, 333 F.3d 429, 433-34 (3d Cir. 2003). Ripeness requires the case to "have taken on fixed and final shape so that a court can see what legal issues it is deciding, what effect its decision will have on the adversaries, and some useful purpose to be achieved in deciding them." *Wyatt, Virgin Islands, Inc. v. Gov't of the Virgin Islands*, 385 F.3d 801, 806 (3d Cir. 2004) (quoting *Pub. Serv. Comm'n of Utah v. Wycoff Co.*, 344 U.S. 237, 244, 73 S.Ct. 236, 97 L.Ed. 291 (1952)). "A dispute is not ripe for judicial determination if it rests upon contingent future events that may not occur as anticipated, or indeed may not occur at all." *Id.*

Ultimately, "[r]ipeness involves weighing two factors: (1) the hardship to the parties of withholding court consideration; and (2) the fitness of the issues for judicial review." *Artway*, 81 F.3d at 1247. Unlike standing, ripeness is assessed at the time of the court's decision (rather than the time the complaint was filed). *See Blanchette v. Connecticut General Ins. Corp.*, 419 U.S. 102, 139-40, 95 S.Ct. 335, 42 L.Ed.2d 320 (1974).

The Court finds that Plaintiffs' claims are ripe. Applying the two-factor test here, the Court first concludes that the parties would face significant hardship if the Court were to hold that the case was unripe (assuming it was otherwise justiciable). The general election is less than one month away, and Plaintiffs assert claims that could significantly affect the implementation of Pennsylvania's electoral procedures. Further, if the Court were to find that Plaintiffs' claims were not ripe, Plaintiffs would be burdened. This is because Plaintiffs would then have to either wait until after the election occurred—and thus after the alleged harms occurred—or Plaintiffs would have to bring suit on the very eve of the election, and thus there would be insufficient time for the Court to address the issues. This hardship makes judicial review at this time appropriate. The first factor is met.

***29** Some Defendants argue that because some of the Secretary's guidance was issued after the 2020 primary election, Plaintiffs' claims that rely on such guidance are not ripe because the guidance has not been implemented in an election yet. The Court disagrees. Both the allegations in the Second Amended Complaint, and the evidence presented on summary judgment, reveal that the guidance issued after the primary election will apply to the upcoming general election. This is sufficient to make this a properly ripe controversy.[6]

The second factor the Court must consider in determining ripeness is "the fitness of the issues for judicial review." *Artway*, 81 F.3d at 1247. "The principal consideration [for this factor] is whether the record is factually adequate to enable the court to make the necessary legal determinations. The more that the question presented is purely one of law, and the less that additional facts will aid the court in its inquiry, the more likely the issue is to be ripe, and vice-versa." *Id.* at 1249.

Under this framework, the Court concludes that the issues are fit for review. The parties have engaged in extensive discovery, creating a developed factual record for the Court to review. Further, as shown below, the Court finds it can assess Plaintiffs' claims based on the current factual record and can adequately address the remaining legal questions that predominate this lawsuit. As such, the Court finds Plaintiffs' claims fit for judicial review.

Thus, Plaintiffs' claims are presently ripe.

2. Plaintiffs' claims are not moot.

Some Defendants also assert that Plaintiffs' claims are moot because Plaintiffs reference allegations of harm that occurred during the primary election, and since then, Secretary Boockvar has issued new guidance and the Pennsylvania Supreme Court has interpreted the Election Code to clarify several ambiguities. The Court, however, concludes that Plaintiffs' remaining claims are not moot.

Mootness stems from the same principle as ripeness, but is stated in the inverse: courts "lack jurisdiction when 'the issues presented are no longer 'live' or the parties lack a legally cognizable interest in the outcome.' " *Merle v. U.S.*, 351 F.3d 92, 94 (3d Cir. 2003) (quoting *Powell v. McCormack*, 395 U.S. 486, 496, 89 S.Ct. 1944, 23 L.Ed.2d 491 (1969)). Like ripeness and unlike standing, mootness is determined at the time of the court's decision (rather than at the time the complaint is filed). *See U.S. Parole Commission v. Geraghty*, 445 U.S. 388, 397, 100 S.Ct. 1202, 63 L.Ed.2d 479 (1980). When assessing mootness, the Court may assume (for purposes of the mootness analysis) that standing exists. *Friends of the Earth, Inc. v. Laidlaw Envtl. Servs.*, 528 U.S. 167, 180, 120 S.Ct. 693, 145 L.Ed.2d 610 (2000) (citation omitted).

***30** Here, the Court finds that Plaintiffs' claims are not moot, as the claims Plaintiffs are proceeding with are "live." First, Plaintiffs' claims are based on guidance that issued after the primary election and are to be applied in the upcoming general election. As such, the *harms* alleged are not solely dependent on the already-passed primary election. Second, Defendants, by and large, have made clear that they intend to abide by guidance that Plaintiffs assert is unlawful or unconstitutional. Third, Plaintiffs sufficiently show that certain Defendants intend to engage in the conduct (*e.g.*, use unmanned drop-boxes) that Plaintiffs say infringes their constitutional rights. Thus, these issues are presently "live" and are not affected by the completion of the primary election.[7] Plaintiffs' claims are not moot.

3. All named Defendants are necessary parties to this lawsuit.

Many of the county boards of elections that are Defendants in this case argue that the claims against them should be dismissed because Plaintiffs did not specifically allege or prove sufficient violative facts against them. Plaintiffs argue in response that all county boards have been joined because they are necessary parties, and the Court cannot afford relief without their presence in this case. The Court agrees with Plaintiffs, and declines to dismiss the county boards from the case. They are necessary parties.

Federal Rule of Civil Procedure 19(a) states that a party is a necessary party that must be joined in the lawsuit if, "in that [party's] absence, the court cannot accord complete relief among existing parties." Fed. R. Civ. P. 19(a)(1)(A).

Here, if the county boards were not named defendants in this case, the Court would not be able to provide Plaintiffs complete relief should Plaintiffs prove their case. That's because the Court could not enjoin the county boards if they were not parties. *See* Fed. R. Civ. P. 65(d)(2).[8] This is important because each individual county board of elections manages the electoral process within its county lines. As one court previously summarized, "Election procedures and processes are managed by each of the Commonwealth's sixty-seven counties. Each county has a board of elections, which oversees the conduct of all elections within the county." *Cortés*, 218 F. Supp. 3d at 403 (citing 25 P.S. § 2641(a)). "The county board of elections selects, fixes and at times alters the polling locations of new election districts. Individual counties are also tasked with the preservation of all ballots cast in that county, and have the authority to investigate fraud and report irregularities or any other issues to the district attorney[.]" *Id.* (citing 25 P.S. §§ 2726, 2649, and 2642). The county boards of elections may also make rules and regulations "as they may deem necessary for the guidance of voting machine custodians, elections officers and electors." 25 P.S. § 2642(f).

***31** Indeed, Defendants' own arguments suggest that they must be joined in this case. As just one example, a handful of counties assert in their summary-judgment brief that the "[Election] Code permits Boards to exercise discretion in certain areas when administering elections, to administer the election in a manner that is both legally-compliant and meets the unique needs of each County's citizens." [ECF 518, p. 6]. Thus, because of each county's discretionary authority, if county boards engage in unconstitutional conduct, the Court would not be able to remedy the violation by enjoining only Secretary Boockvar.[9]

To grant Plaintiffs relief, if warranted, the Court would need to enter an order affecting all county boards of elections—which the Court could not do if some county boards were not joined in this case. Otherwise, the Court could only enjoin violative conduct in some counties but not others. As a result, inconsistent rules and procedures would be in effect throughout the Commonwealth. While some counties can pledge to follow orders issued by this Court, the judicial system cannot rely on pledges and promises, regardless of the county boards' good intent. The only way to ensure that any illegal or unconstitutional conduct is uniformly remedied, permanently, is to include all county boards in this case.

Thus, because the county boards are necessary parties, the Court cannot dismiss them.

4. Plaintiffs lack Article III standing to raise their claims of vote dilution because they cannot establish a "concrete" injury-in-fact.

While Plaintiffs can clear the foregoing procedural hurdles, they cannot clear the final one—Article III standing.

Federal courts must determine that they have jurisdiction before proceeding to the merits of any claim. *Steel Co. v. Citizens for Better Env't*, 523 U.S. 83, 94-95, 118 S.Ct. 1003, 140 L.Ed.2d 210 (1998). Article III of the Constitution limits the jurisdiction of federal courts to "Cases" and "Controversies." One component of the case-or-controversy requirement is standing, which requires a plaintiff to demonstrate the now-familiar elements of (1) injury in fact, (2) causation, and (3) redressability. *See Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560–61, 112 S.Ct. 2130, 119 L.Ed.2d 351 (1992).

Standing is particularly important in the context of election-law cases, including a case like this one, that challenge the laws, regulations, and guidance issued by elected and appointed state officials through the democratic processes. As the Supreme Court has explained, the standing "doctrine developed in our case law to ensure that federal courts do not exceed their authority as it has been traditionally understood." *Spokeo, Inc. v. Robins*, —— U.S. ——, 136 S. Ct. 1540, 1547, 194 L.Ed.2d 635 (2016) (cleaned up). The doctrine "limits

the category of litigants empowered to maintain a lawsuit in federal court to seek redress for a legal wrong." *Id.* In this way, "Article III standing serves to prevent the judicial process from being used to usurp the powers of the political branches." *Id.* Nowhere is that concern more acute than in a case that challenges a state's exercise of its core constitutional authority to regulate the most deeply political arena of all—elections.

***32** Here, Defendants and Intervenors claim that Plaintiffs lack standing, largely arguing that Plaintiffs' injury is too speculative. [ECF 547, pp. 43-50]. The Court agrees and finds that Plaintiffs lack Article III standing for this reason.

Initially, to frame the standing inquiry, understanding the specific claims at issue is important. As discussed above, there are essentially three claims remaining in this case: (1) a challenge to Secretary Boockvar's guidance that does not require all drop boxes to have manned security personnel; (2) a challenge to Secretary Boockvar's guidance that counties should not perform a signature comparison for mail-in ballots; and (3) a challenge to Pennsylvania's county-residency restriction for poll-watchers. *See* [ECF 509, pp. 4-5]. The theory behind all of these claims and the asserted injury is one of vote dilution due to the heightened risk of fraud; that is, without the above measures in place, there is an imminent risk of voter fraud (primarily by mail-in voters); and if that fraud occurs, it will dilute the votes of many of Plaintiffs, who intend to vote in person in the upcoming election. [ECF 551, p. 12 ("As qualified electors who will be voting in the November election, Plaintiffs will suffer an injury through their non-equal treatment and/or the dilution or debasement of their legitimately case votes by absentee and mail-in votes that have not been properly verified by matching the voters' signatures on their applications and ballots to the permanent voter registration record and/or that have been improperly delivered by others to drop boxes or other mobile collection sites in manners that are different[ ] from those offered or being used in their counties of residence.")].

Turning to the familiar elements of Article III standing, the first and, in the Supreme Court's estimation, "foremost" element—injury-in-fact—is dispositive. *See Gill v. Whitford*, —— U.S. ——, 138 S. Ct. 1916, 1929, 201 L.Ed.2d 313 (2018). Specifically, the Court finds that Plaintiffs' theory of vote dilution, based on the evidence presented, is insufficient to establish standing because Plaintiffs' injury-in-fact is not sufficiently "concrete."

With respect to injury-in-fact, the Supreme Court has made clear that an injury must be "concrete" and "particularized." *See Spokeo*, 136 S. Ct. at 1548. Defendants argue that the claimed injury of vote dilution caused by possible voter fraud here is too speculative to be concrete. The Court agrees.

To establish a "concrete" injury, Plaintiffs rely on a chain of theoretical events. They first argue that Defendants' lack of election safeguards (poll watchers, drop-box guards, and signature-comparison procedures) creates a risk of voter fraud or illegal voting. *See* [ECF 461, ¶¶ 230-31, 240, 256]. That risk, they say, will lead to potential fraudsters committing voter fraud or ballot destruction. [*Id.*]. And if that happens, each vote cast in contravention of the Election Code will, in Plaintiffs' view, dilute Plaintiffs' lawfully cast votes, resulting in a constitutional violation.

The problem with this theory of harm is that this fraud hasn't yet occurred, and there is insufficient evidence that the harm is "certainly impending."

To be clear, Plaintiffs need not establish actual fraud at this stage; but they must establish that fraud is "certainly impending," and not just a "possible future injury." *See Clapper*, 568 U.S. at 409, 133 S.Ct. 1138 ("Thus, we have repeatedly reiterated that threatened injury must be certainly impending to constitute injury in fact, and that allegations of possible future injury are not sufficient.") (cleaned up).

***33** This case is well past the pleading stage. Extensive fact and expert discovery are complete. [ECF 462]. Nearly 300 exhibits have been submitted on cross-motions for summary judgment (including 68 by Plaintiffs alone). Plaintiffs bear the burden of proof on this issue, and unlike on a motion to dismiss, on summary judgment, they must come forward with proof of injury, taken as true, that will prove standing, including a concrete injury-in-fact. *See Lujan*, 504 U.S. at 561, 112 S.Ct. 2130 (1992) ("At the pleading stage, general factual allegations of injury resulting from the defendant's conduct may suffice ... In response to a summary judgment motion, however, the plaintiff can no longer rest on such mere allegations, but must set forth by affidavit or other evidence specific facts ... which for purposes of the summary judgment motion will be taken to be true.") (cleaned up).

Based on the evidence presented by Plaintiffs, accepted as true, Plaintiffs have only proven the "possibility of future injury" based on a series of speculative events—which falls short of the requirement to establish a concrete injury. For

example, Plaintiffs' expert, Mr. Riddlemoser, opines that the use of "unstaffed or unmanned" drop boxes merely "increases the ***possibility*** for voter fraud (and vote destruction)[.]" [ECF 504-19, p. 20 (emphasis added)]. That's because, according to him (and Plaintiffs' other witnesses), theoretical bad actors ***might*** intentionally "target" a drop box as the "easiest opportunity for voter fraud" or with the malicious "intent to destroy as many votes ... as possible." [*Id.* at pp. 16-18; *see also* ECF 504-2, ¶ 12 (declaring that drop boxes "***may*** serve as a target for bad actors that may wish to tamper with lawfully case ballots before such ballots are counted") (emphasis added)]. But there's no way of knowing whether these independent actors will ever surface, and if they do, whether they will act as Mr. Riddlemoser and Plaintiffs predict.

Similarly, Mr. Riddlemoser concludes that, at most, not conducting signature analysis for mail-in and absentee ballots "open[s] the door to the potential for massive fraud through a mechanism already susceptible to voter fraud." [ECF 504-19, p. 20].

This increased susceptibility to fraud and ballot destruction is the impetus for Plaintiffs, in their various capacities, to express their concerns that vote dilution might occur and disrupt their right to a "free and fair election." *See, e.g.,* [504-3, ¶ 6; 504-4, ¶ 7; ECF 504-6, ¶¶ 6-8; ECF 504-7, ¶¶ 5-9]. But these concerns, as outlined above, are based solely on a chain of unknown events that may never come to pass.

In addition to Plaintiffs' expert report, Plaintiffs' evidence consists of instances of voter fraud in the past, including an article in the N.Y. Post purporting to detail the strategies of an anonymous fraudster, as well as pointing to certain prior cases of voter fraud and election irregularities (*e.g.*, Philadelphia inadvertently allowing 40 people to vote twice in the 2020 primary election; some counties counting ballots that did not have a completed declaration in the 2020 primary election). [ECF 461, ¶¶ 63-82; ECF 504-19, p. 3 & Ex. D]. Initially, with one exception noted directly below, none of this evidence is tied to individuals using drop boxes, submitting forged mail-in ballots, or being unable to poll watch in another county —and thus it is unclear how this can serve as evidence of a concrete harm in the upcoming election as to the specific claims in this case.

***34** Perhaps the best evidence Plaintiffs present are the several photographs and video stills, which are depicted above, and which are of individuals who appear to be delivering more than one ballot to a drop box during the primary election. It is undisputed that during the primary election, some county boards believed it be appropriate to allow voters to deliver ballots on behalf of third parties. [ECF 504-9, 92:4-10; ECF 504-10, 60:3-61:10; ECF 504-49].

But this evidence of past injury is also speculative. Initially, the evidence is scant. But even assuming the evidence were more substantial, it would still be speculative to find that third-party ballot delivery will also occur in the general election. It may; it may not. Indeed, it may be less likely to occur now that the Secretary issued her September 28, 2020, guidance, which made clear to all county boards that for the general election, third-party ballot delivery is prohibited. [ECF 504-25 ("Third-person delivery of absentee or mail-in ballots is not permitted, and any ballots delivered by someone other than the voter are required to be set aside. The only exceptions are voters with a disability, who have designated in writing an agent to deliver their ballot for them.")]. It may also be less likely to occur in light of the Secretary's other guidance, which recommends that county boards place signs near drop boxes, warning voters that third-party delivery is prohibited.

It is difficult—and ultimately speculative—to predict future injury from evidence of past injury. This is why the Supreme Court has recognized that "[p]ast exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief if unaccompanied by any continuing, present adverse effects." *Lujan*, 504 U.S. at 564, 112 S.Ct. 2130 (cleaned up).

In fact, based on Plaintiffs' theory of harm in this case, it is almost impossible for them to present anything other than speculative evidence of injury. That is, they would have to establish evidence of a certainly impending illegal practice that is likely to be prevented by the precautions they seek. All of this sounds in "possible future injury," not "certainly impending" injury. In that way, this case is very much like the Supreme Court's decision in *Clapper*.

In *Clapper*, plaintiffs-respondents were attorneys, other advocates, and media groups who communicated with clients overseas whom they feared would be subject to government surveillance under a FISA statute. 568 U.S. at 406, 133 S.Ct. 1138. The plaintiffs there alleged that the FISA statute at issue created a risk of possible government surveillance, which prevented them from communicating in confidence with their clients and compelled them to travel overseas instead and

incur additional costs. *Id.* at 406-07, 133 S.Ct. 1138. Based on these asserted injures, the plaintiffs filed suit, seeking to invalidate provisions of FISA. *Id.* at 407, 133 S.Ct. 1138.

The Supreme Court held that plaintiffs there lacked standing because their risk of harm was not concrete—rather, it was attenuated and based on a series of speculative events that may or may not ever occur. *Id.* at 410, 133 S.Ct. 1138 (finding that "respondents' argument rests on their highly speculative fear that: (1) the Government will decide to target the communications of non-U.S. persons with whom they communicate; (2) in doing so, the Government will choose to invoke its authority under § 1881a rather than utilizing another method of surveillance; (3) the Article III judges who serve on the Foreign Intelligence Surveillance Court will conclude that the Government's proposed surveillance procedures satisfy § 1881a's many safeguards and are consistent with the Fourth Amendment; (4) the Government will succeed in intercepting the communications of respondents' contacts; and (5) respondents will be parties to the particular communications that the Government intercepts).

***35** In the end, the Court found that it would not "endorse standing theories that rest on speculation about the decisions of independent actors." *Id.* at 414, 133 S.Ct. 1138.

Like *Clapper*, here, Plaintiffs' theory of harm rests on speculation about the decisions of independent actors. For drop boxes, that speculation includes that unknown individuals will utilize drop boxes to commit fraud or other illegal activity; for signature comparison, that fraudsters will submit forged ballots by mail; for poll watchers, that illegal votes will not be sufficiently challenged; and for all these claims, that other security measures in place to monitor drop boxes, to verify ballot information, and to challenge ballots will not work.

All of this may occur and may result in some of Plaintiffs' votes being diluted; but the question is whether these events are "certainly impending." The evidence outlined above and presented by Plaintiffs simply fails to meet that standard.

This is not to say that claims of vote dilution or voter fraud never give rise to a concrete injury. A plaintiff can have standing to bring a vote-dilution claim—typically, in a malapportionment case—by putting forth statistical evidence and computer simulations of dilution and establishing that he or she is in a packed or cracked district. *See Gill*, 138 S. Ct. at 1936 (Kagan, J., concurring). And a plaintiff can have standing to bring a voter-fraud claim, but the proof of injury there is evidence of actual fraud in the election and thus the suit will be brought after the election has occurred. *See, e.g., Marks v. Stinson*, 19 F.3d 873 (3d Cir. 1994). But, at least based on the evidence presented here, a claim of vote dilution brought in advance of an election on the theory of the risk of potential fraud fails to establish the requisite concrete injury for purposes of Article III standing.

Plaintiffs advance three other theories of harm here, in order to establish standing—none of which establish a concrete injury-in-fact.

First, Plaintiffs assert that since some of them are Republican candidates and that Republicans are more likely to vote in person and Democrats more likely to vote by mail, that their injury here is a competitive disadvantage in the electoral process. [ECF 551, pp. 16-18 ("The challenged guidance will further harm the RNC through the institutional prioritization of voting by mail and the potential disenfranchisement of Republican voters, who prefer to vote in person in the upcoming General Election.")]. This too is a speculative, non-concrete injury. There is nothing in the record to establish that potential voter fraud and dilution will impact Republicans more than Democrats.

***36** To be sure, the information that Plaintiffs present shows that more Democrats are likely to use mail-in ballots. [ECF 551, p. 31 ("[I]n Pennsylvania, of the 1.9 million absentee or mail-in ballots that have been requested for the November 3, 2020 General Election, 'nearly 1.5 million Democrats have requested a mail-in ballot—nearly three times the requests from Republicans.' ") (quoting L. Broadwater, "Both Parties Fret as More Democrats Request Mail Ballots in Key States," New York Times (Sept. 30, 2020), *available at* https://www.nytimes.com/2020/09/30/us/mail-voting-democrats-republicans-turnout.html)]. But it doesn't necessarily follow that more Democrats will commit voter fraud, such as through the destruction of drop boxes or third-party ballot harvesting, and thus more Republicans' votes will be diluted.

In fact, as Plaintiffs' expert, Mr. Riddlemoser, explains, fraudsters from either party could target drop boxes in specific areas in order to destroy ballots, depending on who may be the predominant party in the area. [ECF 504-19, at pp. 17-18 ("In short, nothing would prevent someone from intentionally targeting a drop box in a predominantly Republican or

predominantly Democratic area with an intent to destroy as many votes for that political party or that party's candidate(s) as possible.")]. Indeed, the more important fact for this theory of harm is not the party of the voter, but the party of the fraudster—and, on this, Plaintiffs present no evidence that one party over the other is likely to commit voter fraud.

Second, Plaintiffs also argue that the RNC, the Congressional Plaintiffs, and the Trump Campaign have organizational standing because they "have and will continue to devote their time and resources to ensure that their Pennsylvania supporters, who might otherwise be discouraged by the Secretary's guidance memos favoring mail-in and absentee voting and Defendants' implementation thereof, get out to the polls and vote on Election Day." [ECF 551, p. 19]. This is a similar argument raised by the plaintiffs in *Clapper*, and rejected there by the Supreme Court. Because Plaintiffs' harm is not "certainly impending," as discussed above, spending money in response to that speculative harm cannot establish a concrete injury. *Clapper*, 568 U.S. at 416, 133 S.Ct. 1138 ("Respondents' contention that they have standing because they incurred certain costs as a reasonable reaction to a risk of harm is unavailing—because the harm respondents seek to avoid is not certainly impending. In other words, respondents cannot manufacture standing merely by inflicting harm on themselves based on their fears of hypothetical future harm that is not certainly impending."); *see also Donald J. Trump for President, Inc. v. Cegavske*, —— F. Supp. 3d ——, ——, 2020 WL 5626974, at *5 (D. Nev. Sept. 18, 2020) ("Outside of stating 'confusion' and 'discouragement' in a conclusory manner, plaintiffs make no indication of how AB 4 will discourage their member voters from voting. If plaintiffs did not expend any resources on educating their voters on AB4, their voters would proceed to vote in-person as they overwhelmingly have in prior elections.").

Third, with respect to the poll-watching claim, Plaintiffs argue that at least one of the Plaintiffs, Ms. Patterson, is a prospective poll watcher who is being denied the right to poll watch based on the county-residency restriction, and thus she meets the Article III requirements. [ECF 551, p. 34 (citing ECF 551-3, ¶¶ 9-10)]. However, Ms. Patterson cannot establish standing because, by Plaintiffs' own concession, the theory of harm in this case is not the denial of the right to poll watch, but instead dilution of votes from fraud caused from the failure to have sufficient poll watchers. [ECF 509, p. 67 ("But, the core of the as-applied challenge here is not that the Plaintiffs cannot staff a particular polling place, it is that a candidate and his or her party is presented with the Hobson's choice of selecting limited polling places to observe due to the residency requirement and accept that unobserved polling places must exist due to the inability to recruit a sufficient force of poll watchers due to the necessity that candidates be county residents.")].

***37** And the remedy sought here is much broader than simply allowing Ms. Patterson to poll watch in a certain county, but is tied to the broader harm of vote dilution that Plaintiffs assert. [ECF 503-1, p. 3, ¶ 3 ("Plaintiffs shall be permitted to have watchers present at all locations where voters are registering to vote, applying for absentee or mail-in ballots, voting absentee or mail-in ballots, and/or returning or collecting absentee or mail-in ballots, including without limitation any satellite or early voting sites established by any county board of elections.")]. Standing is measured based on the theory of harm and the specific relief requested. *See Gill*, 138 S. Ct. at 1934 ("We caution, however, that 'standing is not dispensed in gross': A plaintiff's remedy must be tailored to redress the plaintiff's particular injury."). As with all of the claims, the poll-watching claim rests on evidence of vote dilution that does not rise to the level of a concrete harm.

In sum, Plaintiffs here, based on the evidence presented, lack Article III standing to assert their claims. Because they lack standing, the Court will enter judgment in Defendants' favor and dismiss all claims.[10] However, because of the novelty of Plaintiffs' claims and theories, a potential appeal in this case, and the short time before the general election, out of an abundance of caution, the Court will, in the alternative, proceed to examine the claims on the merits.

II. Defendants and Intervenors are entitled to summary judgment on Plaintiffs' claim that drop boxes violate the U.S. Constitution.

Plaintiffs' drop-box claim has materially changed since the Pennsylvania Supreme Court's decision authorizing the use of drop boxes. Plaintiffs now allege that drop boxes effectively allow third parties to return the ballots of voters other than themselves because, they say, no one is there to stop them. Absent an in-person guard or poll worker to monitor the drop boxes and prevent the return of ballots cast in a manner contrary to what the Election Code permits, Plaintiffs assert that they face an unacceptable risk of vote dilution, which burdens their right to vote. Plaintiffs also argue that the "uneven" use of drop boxes in Pennsylvania, by some counties but not others, violates equal protection by subjecting voters in different counties to different amounts

of dilutive risk, and perhaps by diluting lawful votes cast by individuals who failed to comply with the Election Code.

The evidence relevant to these claims is undisputed. *See* [ECF 509, p. 45 ("After the completion of extensive discovery, including numerous depositions and responses to discovery requests, no genuine dispute of material fact exists regarding Plaintiffs' constitutional claims.")]. Viewed in the light most favorable to Plaintiffs, the Court could conclude from this evidence, and will assume for purposes of this decision, that (1) drop boxes allow for greater risk of third-party ballot delivery in violation of the Election Code than in-person polling locations or manned drop boxes, and (2) that the use of drop boxes is "uneven" across Pennsylvania due to its county-based election system—*i.e.*, some counties are using "unmanned" drop boxes with varying security measures, some are using "manned" drop boxes, some are using dozens of drop boxes in a variety of locations, some are using one drop box in a county office building, and some are not using drop boxes at all. The question before the Court is whether this state of affairs violates equal protection or due process.

***38** The Court finds that it does not. The uneven use of drop boxes across counties does not produce dilution as between voters in different counties, or between "lawful" and "unlawful" voters, and therefore does not present an equal-protection violation. But even if it did, the guidelines provided by Secretary Boockvar are rational, and weighing the relative burdens and benefits, the Commonwealth's interests here outweigh any burden on Plaintiffs' right to vote.

A. Pennsylvania's "uneven" use of drop boxes does not violate federal equal-protection rights.

Plaintiffs' primary claim concerns the uneven use of drop boxes across the Commonwealth, which they contend violates the Equal-Protection Clause of the 14th Amendment.

The 14th Amendment's Equal-Protection Clause commands that "no State shall ... deny to any person within its jurisdiction the equal protection of laws." U.S. Const. amend. XIV, § 1. This broad and simple promise is "an essential part of the concept of a government of laws and not men." *Reynolds v. Sims*, 377 U.S. 533, 568, 84 S.Ct. 1362, 12 L.Ed.2d 506 (1964).

But while the Constitution demands equal protection, that does not mean all forms of differential treatment are forbidden. *See Nordlinger v. Hahn*, 505 U.S. 1, 10, 112 S.Ct. 2326, 120 L.Ed.2d 1 (1992) ("Of course, most laws differentiate in some fashion between classes of persons. The Equal Protection Clause does not forbid classifications."). Instead, equal protection "simply keeps governmental decisionmakers from treating differently persons who are in all relevant respects alike." *Id.* (citation omitted). What's more, "unless a classification warrants some form of heightened review because it jeopardizes exercise of a fundamental right or categorizes on the basis of an inherently suspect characteristic, the Equal Protection Clause requires only that the classification rationally further a legitimate state interest." *Id.* (citations omitted).

Of course, the right of every citizen to vote is a fundamental right. *See Ill. State Bd. of Elections v. Socialist Workers Party*, 440 U.S. 173, 184, 99 S.Ct. 983, 59 L.Ed.2d 230 (1979) ("[F]or reasons too self-evident to warrant amplification here, we have often reiterated that voting is of the most fundamental significance under our constitutional structure.") (citations omitted). Indeed, it is a foundational right "that helps to preserve all other rights." *Werme v. Merrill*, 84 F.3d 479, 483 (1st Cir. 1996); *Wesberry v. Sanders*, 376 U.S. 1, 17, 84 S.Ct. 526, 11 L.Ed.2d 481 (1964) ("Other rights, even the most basic, are illusory if the right to vote is undermined."). And its scope is broad enough to encompass not only the right of each voter to cast a ballot, but also the right to have those votes "counted without dilution as compared to the votes of others." *Minn. Voters Alliance v. Ritchie*, 720 F.3d 1029, 1031 (8th Cir. 2013) (cleaned up).

As a result, Plaintiffs are quite correct when they suggest that a state election procedure that burdens the right to vote, including by diluting the value of votes compared to others, must "comport with equal protection and all other constitutional requirements." *Cortés*, 218 F. Supp. 3d at 407. That much, at least, is not in dispute.

At the same time, however, the Constitution "confers on the states broad authority to regulate the conduct of elections, including federal ones." *Griffin v. Roupas*, 385 F.3d 1128, 1130 (7th Cir. 2004) (citing U.S. Const. Art. I, § 4, cl. 1). This authority includes "broad powers to determine the conditions under which the right of suffrage may be exercised." *Shelby Cnty., Ala. v. Holder*, 570 U.S. 529, 543, 133 S.Ct. 2612, 186 L.Ed.2d 651 (2013) (cleaned up). Indeed, "[c]ommon sense, as well as constitutional law, compels the conclusion" that states must be free to engage in "substantial regulation of elections" if "some sort of order, rather than chaos, is to accompany the democratic processes." *Burdick v. Takushi*, 504 U.S. 428, 433, 112 S.Ct. 2059, 119 L.Ed.2d 245 (1992)

(cleaned up). And all "[e]lection laws will invariably impose some burden upon individual voters." *Id.*

***39** If the courts were "to subject every voting regulation to strict scrutiny and to require that the regulation be narrowly tailored to advance a compelling state interest," it "would tie the hands of States seeking to assure that elections are operated equitably and efficiently." *Id.* The "machinery of government would not work if it were not allowed a little play in its joints." *Bain Peanut Co. of Tex. v. Pinson*, 282 U.S. 499, 501, 51 S.Ct. 228, 75 L.Ed. 482 (1931). Thus, when faced with a constitutional challenge to a state election law, or to the actions of state officials responsible for regulating elections, a federal court must weigh these competing constitutional considerations and "make the 'hard judgment' that our adversary system demands." *Crawford v. Marion Cnty. Election Bd.*, 553 U.S. 181, 190, 128 S.Ct. 1610, 170 L.Ed.2d 574 (2008).

The Supreme Court has supplied lower courts guidance as to how to make these hard judgments, by "forg[ing]" the "flexible standard" for assessing the constitutionality of election regulations into "something resembling an administrable rule." *Id.* at 205, 128 S.Ct. 1610 (Scalia, J. concurring) (citing *Burdick*, 504 U.S. at 434, 112 S.Ct. 2059).

Under this standard, first articulated in *Anderson v. Celebrezze*, 460 U.S. 780, 103 S.Ct. 1564, 75 L.Ed.2d 547 (1983) and then refined in *Burdick*, the fact "[t]hat a law or state action imposes some burden on the right to vote does not make it subject to strict scrutiny." *Donatelli v. Mitchell*, 2 F.3d 508, 513 (3d Cir. 1993); *see also Libertarian Party of Ohio v. Blackwell*, 462 F.3d 579, 585 (6th Cir. 2006) ("[V]oting regulations are not automatically subjected to heightened scrutiny."). Instead, any "law respecting the right to vote—whether it governs voter qualifications, candidate selection, or the voting process," is subjected to "a deferential 'important regulatory interests' standard for nonsevere, nondiscriminatory restrictions, reserving strict scrutiny for laws that severely restrict the right to vote." *Crawford*, 553 U.S. at 204, 128 S.Ct. 1610 (Scalia, J. concurring).

In practice, this means that courts must weigh the "character and magnitude of the burden the State's rule imposes" on the right to vote "against the interests the State contends justify that burden, and consider the extent to which the State's concerns make that burden necessary." *Timmons v. Twin Cities Area New Party*, 520 U.S. 351, 358, 117 S.Ct. 1364, 137 L.Ed.2d 589 (1997) (cleaned up). If the state imposes a "severe" burden on the right to vote, strict scrutiny applies—the rule may survive only if it is "narrowly tailored" and only if the state advances a "compelling interest." *Id.* But if the state imposes only "reasonable, nondiscriminatory restrictions," its "important regulatory interests will usually be enough" to justify it. *Id.* Indeed, where state regulations are "minimally burdensome and nondiscriminatory" a level of scrutiny "closer to rational basis applies[.]" *Ohio Council 8 Am. Fed'n of State v. Husted*, 814 F.3d 329, 335 (6th Cir. 2016). And where the state imposes no burden on the "right to vote" at all, true rational basis review applies. *See Biener v. Calio*, 361 F.3d 206, 215 (3d Cir. 2004) ("Biener also cannot establish an infringement on the fundamental right to vote ... As the [election] filing fee does not infringe upon a fundamental right, nor is Biener in a suspect class, we consider the claims under a rational basis test.") (citation omitted); *Common Cause/New York v. Brehm*, 432 F. Supp. 3d 285, 310 (S.D.N.Y. 2020) ("Under this framework, election laws that impose no burden on the right to vote are subject to rational-basis review.").

***40** This operates as a "sliding scale"—the "more severe the burden imposed, the more exacting our scrutiny; the less severe, the more relaxed our scrutiny." *Arizona Libertarian Party v. Hobbs*, 925 F.3d 1085, 1090 (9th Cir. 2019); *see also Fish v. Schwab*, 957 F.3d 1105, 1124 (10th Cir. 2020) ("We, and our sister circuits and commentators, have referred to this as a 'sliding scale' test."); *Libertarian Party of New Hampshire v. Gardner*, 638 F.3d 6, 14 (1st Cir. 2011) ("We review all of the First and Fourteenth Amendment claims under the sliding scale approach announced by the Supreme Court in *Anderson* ... and *Burdick*[.]"); *Burdick,* 504 U.S. at 434, 112 S.Ct. 2059 ("[T]he rigorousness of our inquiry into the propriety of a state election law depends upon the extent to which a challenged regulation burdens First and Fourteenth Amendment rights.").

Against that backdrop, the Court now turns to Plaintiffs' claim that the use of unmanned drop boxes by some Pennsylvania counties, but not others, violates equal protection. As will be discussed, Plaintiffs' equal-protection claim fails at the threshold, without even reaching *Anderson-Burdick*, because Plaintiffs have not alleged or shown that Pennsylvania's system will result in the dilution of votes in certain counties and not others. Furthermore, even if the Court applies *Anderson-Burdick*, the attenuated "burden" Plaintiffs have identified—an increased risk of vote dilution created by the use of unmanned drop boxes—is more than justified

by Defendants' important and precise interests in regulating elections.

1. Plaintiffs have not shown that Pennsylvania treats equivalent votes in different counties differently.

Plaintiffs' equal-protection claim asserts differential treatment on a theory of vote dilution. As far as the Court can discern, this claim has two dimensions.

First, the main thrust concerns differential treatment as between counties. Plaintiffs assert that some counties will use drop boxes in certain ways (specifically, without in-person guards or in varying number and locations), while others will not—resulting in differential treatment. *See, e.g.,* [ECF 551, p. 44 ("Plaintiffs assert (and have proven) that Defendants have adopted, and intend to implement in the General Election, an election regime that applies Pennsylvania's Election Code in a way that treats the citizens of Pennsylvania unequally depending on ... the location where they happen to live: in some counties, voters will have around-the-clock access to 'satellite election offices' at which they can deposit their vote, but in other counties, voters will have no access at all to such drop boxes; in some counties those drop boxes will be staffed and secure, but in other counties drop boxes will be unmonitored and open to tampering[.]")]; [*Id.* at p. 46 ("Defendants' ongoing actions and stated intentions ensure that votes will not be counted the same as those voting in other counties, and in some instances, in the same Congressional district. For instance, the harm flowing from those actions will fall disproportionately on the Republican candidates that bring suit here because many Democrat-heavy counties have stated intentions to implement the Secretary's unconstitutional ... ballot collection guidance, and many Republican-heavy counties have stated intentions to follow the Election Code as it is written.")].

***41** Second, although less clear, Plaintiffs' equal-protection claim may also concern broader differential treatment between law-abiders and scofflaws. In other words, Plaintiffs appear to suggest that Pennsylvania discriminates against all law-abiding voters by adopting policies which tolerate an unacceptable risk of a lawfully cast votes being diluted by each unlawfully cast vote anywhere in Pennsylvania. *See, e.g.,* [ECF 509, p. 55 ("The use of unstaffed drop boxes ... not only dilutes the weight of *all* qualified Pennsylvanian electors, it curtails a sense of security in the voting process.") (emphasis in original)]; [ECF 509 p. 68 ("There will be no protection of one-person, one-vote in Pennsylvania, because her policies ... allowing inconsistently located/used drop boxes will result in illegal ballots being cast and counted with legitimate votes[.]")].

As discussed below, both of these species of equal protection fail because there is, in fact, no differential treatment here—a necessary predicate for an equal-protection claim.

Initially, Plaintiffs "have to identify a burden before we can weigh it." *Crawford*, 553 U.S. at 205, 128 S.Ct. 1610 (Scalia, J. concurring). In the equal-protection context, this means the plaintiff "must present evidence that s/he has been treated differently from persons who are similarly situated." *Renchenski v. Williams*, 622 F.3d 315, 337 (3d Cir. 2010) (cleaned up). And not just any differential treatment will do. As discussed above, differences in treatment raise equal-protection concerns, and necessitate heightened scrutiny of governmental interests, only if they burden a fundamental right (such as the right to vote) or involve a suspect classification based on a protected class. *See Obama for Am. v. Husted*, 697 F.3d 423, 429 (6th Cir. 2012) ("If a plaintiff alleges only that a state treated him or her differently than similarly situated voters, without a corresponding burden on the fundamental right to vote, a straightforward rational basis standard of review should be used.").

Plaintiffs argue that equal protection is implicated because Pennsylvania has permitted counties to use drop boxes to varying extents, and with varying degrees of security. Some, like Delaware County, intend to use dozens of drop boxes. *See generally* [ECF 549-28]. Many others will not use drop boxes at all. *See generally* [ECF 504-1]. And among the counties that *do* use drop boxes, some will staff them with county officials, while others will monitor them only with video surveillance or not at all. *See generally* [ECF 549-28].

In this respect, Plaintiffs argue that they suffer an equal-protection harm similar to that found by the Supreme Court in *Bush v. Gore*, 531 U.S. 98, 121 S.Ct. 525, 148 L.Ed.2d 388 (2000). There, the Supreme Court held that the Florida Supreme Court violated equal protection when it "ratified" election recount procedures that allowed different counties to use "varying standards to determine what was a legal vote." *Id.* at 107, 121 S.Ct. 525. This meant that entirely equivalent votes might be counted in one county but discounted in another. *See, e.g., id.* ("Broward County used a more forgiving standard than Palm Beach County, and uncovered almost three times as many new votes, a result markedly

disproportionate to the difference in population between the counties."). Given the absence of uniform, statewide rules or standards to determine which votes counted, the Court concluded that the patchwork recount scheme failed to "satisfy the minimum requirement for nonarbitrary treatment of voters necessary to secure the fundamental right [to vote]." *Id.*

***42** While the Supreme Court expressly limited its holding in *Bush* "to the present circumstances" of a standardless "statewide recount under the authority of a single state judicial officer," *id.* at 109, 121 S.Ct. 525, a few courts have found its reasoning to be persuasive as a broader principle of equal protection. *See Stewart v. Blackwell*, 444 F.3d 843, 859 (6th Cir. 2006) ("Somewhat more recently decided is *Bush v. Gore*, ... which reiterated long established Equal Protection principles."); *Ne. Ohio Coal. for Homeless v. Husted*, 696 F.3d 580, 598 (6th Cir. 2012) ("We agree with all of the parties and the district court that the consent decree likely violates the equal protection principle recognized in *Bush v. Gore*."); *Pierce v. Allegheny Cty. Bd. of Elections*, 324 F. Supp. 2d 684, 705 (W.D. Pa. 2003) (Conti, J.) ("As noted above, the court finds that the facts presented raise a serious equal protection claim under a theory similar to that espoused by the United States Supreme Court in *Bush v. Gore, supra.*"); *Black v. McGuffage*, 209 F. Supp. 2d 889, 899 (N.D. Ill. 2002) ("The Court is certainly mindful of the limited holding of Bush. However, we believe that situation presented by this case is sufficiently related to the situation presented in Bush that the holding should be the same.").

Indeed, *Bush*'s core proposition—that a state may not take the votes of two voters, similarly situated in all respects, and, for no good reason, count the vote of one but not the other—seems uncontroversial. It also seems reasonable (or at least defensible) that this proposition should be extended to situations where a state takes two equivalent votes and, for no good reason, adopts procedures that greatly increase the risk that one of them will not be counted—or perhaps gives more weight to one over the other. *See, e.g.*, *Black*, 209 F. Supp. 2d at 899 ("Plaintiffs in this case allege that the resulting vote dilution, which was found to be unacceptable in *Bush* without any evidence of a disproportionate impact on any group delineated by traditional suspect criteria, is impacting African American and Hispanic groups disproportionately.... Any voting system that arbitrarily and unnecessarily values some votes over others cannot be constitutional."); *see also Reynolds*, 377 U.S. at 555, 84 S.Ct. 1362 ("[T]he right of suffrage can be denied by a debasement or dilution of the weight of a citizen's vote just as effectively as by wholly prohibiting the free exercise of the franchise.").

That is the sort of equal-protection claim Plaintiffs purport to be asserting—a claim that voters in counties that use drop boxes are subjected to a much higher risk of vote dilution than those in other counties that do not. But that characterization falls apart under scrutiny. Indeed, despite their assertions, Plaintiffs have not actually alleged, let alone proven, that votes cast in some counties are diluted by a greater amount relative to votes cast in others. Rather, they have, at best, shown only that events causing dilution are more likely to occur in counties that use drop boxes. But, importantly, the effect of those events will, by Plaintiffs' own admission, be felt by every voter across all of Pennsylvania. [ECF 509, p. 55. ("The use of unstaffed drop boxes places the security of unknown hundreds (if not thousands) of ballots in jeopardy of theft, destruction, and manipulation. This not only dilutes the weight of *all* qualified Pennsylvanian electors, it curtails a sense of security in the voting process.") (citations omitted) (emphasis in original)]. Such dilution impacts the entire electorate equally; not just voters in the county where it occurs.

To illustrate this distinction, consider, for example, a presidential election. The Court agrees with Plaintiffs that the relevant electoral unit in such an election is "the entire Commonwealth of Pennsylvania." [ECF 551, p. 55 ("The electoral unit in this election is the entire Commonwealth of Pennsylvania.")]. Indeed, on election night, votes cast in each of Pennsylvania's 67 counties will be canvassed, counted, and ultimately added to a statewide vote total that decides who wins Pennsylvania's 20 electoral votes. So, ask: what is the dilutive impact of a hypothetical illegal vote cast in Philadelphia during that election? Does it cause, in any sense, an "unequal evaluation of ballots" cast in different counties, *Bush*, 531 U.S. at 106, 121 S.Ct. 525, such that lawful ballots cast in Philadelphia will be less likely to count, worth less if they do, or otherwise disfavored when compared to votes cast in other counties? The answer is evident—it does not. Rather, the hypothetical illegal vote cast in Philadelphia dilutes *all lawful votes* cast in the election *anywhere* in the Commonwealth by the exact same amount.

***43** The same reasoning holds in elections that occur within part of a state, rather than statewide. For example, consider a hypothetical legislative district covering two counties—one that uses drop boxes and one that does not. There may well be a greater risk that illegal voting will occur in the county that

uses drop boxes. But any dilutive impact of those votes will be felt equally by voters in *both* counties.

This is categorically different from the harm at issue in *Bush* and cases like it. In *Bush*, Florida's arbitrary use of different recount standards in different counties meant that the state was counting equivalent ballots differently in different counties, meaning that voters in some counties were more likely to have their votes counted than those in others.

In *Black v. McGuffage*, an Illinois district-court case on which Plaintiffs heavily rely, the plaintiffs alleged that the type of voting machines used in some Illinois counties were statistically much more likely to result in equivalent votes being discounted at a much higher frequency in some counties than others, and that the worst machines were those being used in counties with high populations of minority groups. 209 F. Supp. 2d at 899. As a result, voters (and, specifically, minority voters) were much more likely to have their votes discounted, based just on the county in which they lived. *See id.* ("As a result, voters in some counties are statistically less likely to have their votes counted than voters in other counties in the same state in the same election for the same office. Similarly situated persons are treated differently in an arbitrary manner.... In addition, the Plaintiffs in this case allege that the resulting vote dilution ... is impacting African American and Hispanic groups disproportionately.").

Finally, *Stewart v. Blackwell*, another case cited by Plaintiffs, was the same as *Black*—voters in counties that used punch-card voting were "approximately four times as likely not to have their votes counted" as a voter in a different county "using reliable electronic voting equipment." 444 F.3d at 848.

What ties these cases together is that each of them involves a state arbitrarily "valu[ing] one person's vote over that of another," *Bush*, 531 U.S. at 104-05, 121 S.Ct. 525, by permitting counties to either apply different standards to decide what votes count (*Bush*) or use different voting technologies that create a great risk of votes being discounted in one county that does not exist in others (*Black* and *Stewart*). It is this sort of "differential treatment ... burden[ing] a fundamental right" that forms the bedrock of equal protection. *Sullivan v. Benningfield*, 920 F.3d 401, 409 (6th Cir. 2019).

Plaintiffs, in contrast, have shown no constitutionally significant differential treatment at all.

Instead, as discussed, if Plaintiffs are correct that the use of drop boxes increases the risk of vote dilution, all votes in the relevant electoral unit—whether that is statewide, a subset of the state, or a single county—face the same degree of increased risk and dilution, regardless of which county is most at fault for elevating that risk.

What Plaintiffs have really identified, then, are not uneven ***risks of vote dilution***—affecting voters in some counties more than equivalent voters in others—but merely different voting procedures in different counties that may contribute different amounts of vote dilution ***distributed equally across the electorate as a whole***. The Court finds that this is not an equal-protection issue.

44** To be clear, the reason that there is no differential treatment is solely based on Plaintiffs' theory of harm in this case. In the more "routine" vote-dilution cases, the state imposes some restriction or direct impact on the plaintiff's right to vote—that results in his or her vote being weighed less (*i.e.*, diluted) compared to those in other counties or election districts. *See Gill,* 138 S. Ct. at 1930, (explaining that "the holdings in *Baker* and *Reynolds* were expressly premised on the understanding that the injuries giving rise to those claims were individual and personal in nature, because the claims were brought by voters who alleged facts showing disadvantage to themselves as individuals") (cleaned up). In this case, though, Plaintiffs complain that the state is ***not imposing a restriction on ***someone else's*** right to vote, which, they say, raises the risk of fraud, which, if it occurs, could dilute the value of Plaintiffs' vote. The consequence of this inverted theory of vote dilution is that all other votes are diluted in the same way; all feel the same effect.

Finally, the Court's ruling in this regard is consistent with the many courts that have recognized that counties may, consistent with equal protection, employ entirely different election procedures and voting systems within a single state. *See, e.g., Wexler v. Anderson*, 452 F.3d 1226, 1231-33 (11th Cir. 2006) ("Plaintiffs do not contend that equal protection requires a state to employ a single kind of voting system throughout the state. Indeed, local variety in voting systems can be justified by concerns about cost, the potential value of innovation, and so on.") (cleaned up); *Hendon v. N.C. State Bd. of Elections*, 710 F.2d 177, 181 (4th Cir. 1983) ("A state may employ diverse methods of voting, and the methods by which a voter casts his vote may vary throughout the state."); *Short v. Brown*, 893 F.3d 671, 679 (9th Cir. 2018) ("[T]he appellants' reading of the Supreme Court's

voting cases would essentially bar a state from implementing any pilot program to increase voter turnout. Under their theory, unless California foists a new system on all fifty-eight counties at once, it creates 'unconstitutional vote-dilution' in counties that do not participate in the pilot plan. Nothing in the Constitution, the Supreme Court's controlling precedent, or our case law suggests that we can micromanage a state's election process to this degree."); *Fla. State Conference of N.A.A.C.P. v. Browning*, 569 F. Supp. 2d 1237, 1258 (N.D. Fla. 2008) ("[A]s with countless public services delivered through Florida's political subdivisions—such as law enforcement and education—resource disparities are to some degree inevitable. They are not, however, unconstitutional."); *Green Party of State of New York v. Weiner*, 216 F. Supp. 2d 176, 192 (S.D.N.Y. 2002) ("Even in that situation, [*Bush v. Gore*] did not challenge, and the Court did not question, the use of entirely different technologies of voting in different parts of the state, even in the same election."); *Paher v. Cegavske*, No. 20-243, 2020 WL 2748301, at *9 (D. Nev. May 27, 2020) ("[I]t cannot be contested that Clark County, which contains most of Nevada's population—and likewise voters (69% of all registered voters [ ])—is differently situated than other counties. Acknowledging this as a matter of generally known (or judicially noticeable) fact and commonsense makes it more than rational for Clark County to provide additional accommodations to assist eligible voters."); *Ron Barber for Cong. v. Bennett*, No. 14-2489, 2014 WL 6694451, at *5 (D. Ariz. Nov. 27, 2014) ("[T]he [*Bush v. Gore*] Court did not invalidate different county systems regarding implementation of election procedures."); *Tex. Democratic Party v. Williams*, No. 07-115, 2007 WL 9710211, at n.4 (W.D. Tex. Aug. 16, 2007) ("In *Bush v. Gore*, the Supreme Court specifically noted: 'The question before the Court is not whether local entities, in the exercise of their expertise, may develop different systems for implementing elections.' ").

***45** Equal protection does not demand the imposition of "mechanical compartments of law all exactly alike." *Jackman v. Rosenbaum Co.*, 260 U.S. 22, 31, 43 S.Ct. 9, 67 L.Ed. 107 (1922). Rather, "the Constitution is sufficiently flexible to permit its requirements to be considered in relation to the ... contexts in which they are invoked." *Merchants Nat'l Bank of Mobile v. Dredge Gen. G. L. Gillespie*, 663 F.2d 1338, 1343 (5th Cir. 1981). And in this context, "few (if any) electoral systems could survive constitutional scrutiny if the use of different voting mechanisms by counties offended the Equal Protection Clause." *Trump v. Bullock*, —— F.3d ——, ——, 2020 WL 5810556, at *14 (D. Mont. Sept. 30, 2020).

The distinction—between differences in county election procedures and differences in the treatment of votes or voters between counties—is reflected in *Bush* itself. There, the Supreme Court took pains to clarify that the question before it was "not whether local entities, in the exercise of their expertise, may develop different systems for implementing elections." *Bush*, 531 U.S. at 109, 121 S.Ct. 525; *see also id.* at 134, 121 S.Ct. 525 (Souter, J. dissenting) ("It is true that the Equal Protection Clause does not forbid the use of a variety of voting mechanisms within a jurisdiction, even though different mechanisms will have different levels of effectiveness in recording voters' intentions; local variety can be justified by concerns about cost, the potential value of innovation, and so on."); *Bullock*, —— F.3d at ——, 2020 WL 5810556, at *14 ("[T]he Supreme Court was clear in *Bush v. Gore* that the question was not whether local entities, in the exercise of their expertise, may develop different systems for implementing elections.") (cleaned up).

Thus, coming back to the theory of Plaintiffs' case, Plaintiffs contend that Secretary Boockvar's drop-box guidance will result in differences between counties and differing risks of fraud. But the result of that uneven implementation will not be votes in certain counties being valued less than others. And the result won't be that voters who vote in person will have their votes valued less, either. Instead, if Plaintiffs are right, any unlawful votes will dilute all other lawful votes in the same way. While certainly voter fraud and illegal voting are bad, as a matter of equal protection, there is no unequal treatment here, and thus no burden on Plaintiffs' rights under the Equal Protection Clause.

In addition to their equal-protection claim based on county differences, Plaintiffs also appear to allude to a more general type of equal-protection violation. They assert that Pennsylvania comprises a single election unit. [ECF 551, p. 55 ("The electoral unit in this election is the entire Commonwealth of Pennsylvania.")]. They assert that they intend to cast their ballots lawfully. *See, e.g.,* [ECF 504-3, ¶ 4 ("As a Pennsylvania qualified registered elector, I have always voted in-person at primary and general elections, and I intend to vote in-person at the upcoming November 3, 2020 General Election.")]. And they assert that unmanned drop boxes across the Commonwealth (regardless of the county) will, on a statewide basis, dilute their votes. *See, e.g.,* [*id.* at ¶ 6 ("As a Pennsylvania qualified registered elector who votes in-person, I do not want my in-person vote diluted or cancelled by votes that are cast in a manner contrary

to the requirements enacted by the Pennsylvania General Assembly.")]. For example, if one "qualified elector" casts a lawful ballot, but a fraudulent voter casts ten ballots, then that elector's vote will, under Plaintiffs' theory, be diluted by a magnitude of ten—resulting in differential treatment.

***46** The problem with this theory is that there does not appear to be any law to support it. Indeed, if this were a true equal-protection problem, then it would transform every violation of state election law (and, actually, every violation of every law) into a potential federal equal-protection claim requiring scrutiny of the government's "interest" in failing to do more to stop illegal activity. This is not the law. To the contrary, it is well-established that even violations of state election laws by state officials, let alone violations by unidentified third parties, do not give rise to federal constitutional claims except in unusual circumstances. *See Shipley v. Chicago Bd. of Election Commissioners*, 947 F.3d 1056, 1062 (7th Cir. 2020) ("A violation of state law does not state a claim under § 1983, and, more specifically, a deliberate violation of state election laws by state election officials does not transgress against the Constitution.") (cleaned up); *Martinez v. Colon*, 54 F.3d 980, 989 (1st Cir. 1995) ("[T]he Constitution is not an empty ledger awaiting the entry of an aggrieved litigant's recitation of alleged state law violations—no matter how egregious those violations may appear within the local legal framework.").

Thus, this type of equal-protection claim fails as a matter of law, as well.

2. If Pennsylvania's "uneven" use of drop boxes indirectly burdens the right to vote at all, that burden is slight, and justified by important state interests.

Even assuming that Plaintiffs could establish unequal treatment to state an equal-protection claim, their claim nonetheless fails because the governmental interests here outweigh any burden on the right to vote.

Initially, the Court finds that the appropriate level of scrutiny is rational basis. Defendants' failure to implement a mandatory requirement to "man" drop boxes doesn't directly infringe or burden Plaintiffs' rights to vote at all. Indeed, as discussed above in the context of standing, what Plaintiffs characterize as the burden or harm here is really just an ancillary 'increased risk' of a theoretical harm, the degree of which has not been established with any empirical precision. *See Obama*, 697 F.3d at 429 ("If a plaintiff alleges only that a state treated him or her differently than similarly situated voters, without a corresponding burden on the fundamental right to vote, a straightforward rational basis standard of review should be used."); *Brehm*, 432 F. Supp. 3d at 310 ("Under this framework, election laws that impose no burden on the right to vote are subject to rational-basis review.").

On rational-basis review, the Secretary's guidance here passes constitutional muster. Her guidance certainly provides some flexibility in how counties may use drop boxes, but the guidance overall is rationally related to a legitimate governmental interest—namely, the implementation of drop boxes in a secure manner, taking into account specific county differences. That Plaintiffs feel the decisions and actions of the Pennsylvania General Assembly, Secretary Boockvar, and the county Defendants are insufficient to prevent fraud or illegal voting is of no significance. "[R]ational-basis review in equal protection analysis is not a license for courts to judge the wisdom, fairness, or logic of legislative choices." *Heller v. Doe by Doe*, 509 U.S. 312, 319, 113 S.Ct. 2637, 125 L.Ed.2d 257 (1993).

As detailed above, Secretary Boockvar's guidance provides lawful, comprehensive, and reasonable standards with respect to (1) selecting the location of drop boxes, (2) drop-box design criteria, (3) signage, (4) drop-box security measures, and (5) drop-box ballot collection and chain of custody procedures. Of particular note, with respect to ballot security, the Secretary's guidance calls for the use of reasonably robust measures like video surveillance, durable and tamperproof design features, regular ballot collection every 24 hours, chain-of-custody procedures to maintain ballot traceability, and signage advising voters that third-party delivery is prohibited, among other things.

To be sure, the Secretary's guidance doesn't insist on the use of security personnel—though some counties have decided to post security guards outside of drop boxes on their own. But the Court can't say that either the Secretary's failure to provide that requirement, or the decision of some counties to proceed with drop boxes "unmanned," is irrational. For example, the evidence presented demonstrates that placing a security guard outside of a drop box at all times is costly, particularly for cash-strapped counties—at least $13 per hour or about $104 (8 hours) to $312 (24 hours) per day, according to Defendants' expert, Professor Robert McNair. [ECF 549-11, p. 11] In the context of a broader election system that detects and deters fraud at many other stages of the voting process, and given

that that there are also no equivalent security measures present at U.S. postal mailboxes (which constitute an arguably more tempting vehicle for the would-be ballot harvester), the Court finds that the lack of any statewide requirement that all drop boxes be manned or otherwise surveilled is reasonable, and certainly rational.

***47** But even assuming Plaintiffs are right that their right to vote here has been burdened (and thus a heightened level of scrutiny must apply), that burden is slight and cannot overcome Defendants' important state interests under the *Anderson-Burdick* framework. Indeed, courts routinely find attenuated or ancillary burdens on the right to vote to be "slight" or insignificant, even burdens considerably *less* attenuated or ancillary than any burden arguably shown here. *See, e.g.*, *Weber v. Shelley*, 347 F.3d 1101, 1106 (9th Cir. 2003) ("Under *Burdick*, the use of touchscreen voting systems is not subject to strict scrutiny simply because this particular balloting system may make the possibility of some kinds of fraud more difficult to detect.").[11]

To begin with, application of the *Anderson-Burdick* framework here presents something of a "square peg, round hole" dilemma. After all, that test assumes there is some constitutional injury to "weigh" against the state's "important" regulatory interests in the first place. And without differential treatment of votes or voters, there isn't any equal-protection injury for the Court to balance.

The *Anderson-Burdick* test is also ill-fitted to Plaintiffs' claims for another reason. Typically, *Anderson-Burdick* is invoked where the government takes some direct action to burden or restrict a plaintiff's right to vote. Here, in contrast, Plaintiffs complain that Pennsylvania has indirectly burdened the right to vote through ***inaction***—*i.e.*, by not imposing ***enough*** regulation to secure the voting process it has adopted, which, Plaintiffs say, will allow third parties to vote in an unlawful way, which, if it happens, will dilute (and thus burden) the right to vote.

***48** This unusual causal daisy-chain makes it difficult to apply *Anderson-Burdick*'s balancing approach. After all, it is one thing to assess the government's interest in taking a specific action that imposed burdens on the right to vote. It is much less natural for a court to evaluate whether the government had a good reason for not doing something differently, or for failing to do more to prevent (or reduce the risk of) misconduct by third parties that could burden the right to vote.

To the extent *Anderson-Burdick* applies in such circumstances, the appropriate course would, in this Court's view, be to weigh any burden stemming from the government's alleged failures against the government's interest in enacting the broader election scheme it has erected, of which the challenged piece is usually only one part. Focusing solely on the allegedly inadequate procedure being challenged, such as the state's authorization of "drop boxes" here, would ignore the fact that Election Code provisions and regulations operate as part of a single, complex organism balancing many competing interests, all of which are "important" for purposes of the *Anderson-Burdick* analysis. *See, e.g.*, *Crawford*, 553 U.S. at 184, 128 S.Ct. 1610 ("deterring and detecting voter fraud"); *Tedards v. Ducey*, 951 F.3d 1041, 1067 (9th Cir. 2020) ("voter turnout"); *Lunde v. Schultz*, 221 F. Supp. 3d 1095, 1106 (S.D. Iowa 2014) ("expanding ballot access to nonparty candidates"); *Greenville Cnty. Republican Party Exec. Comm. v. South Carolina*, 824 F. Supp. 2d 655, 671 (D.S.C. 2011) ("promoting voter participation in the electoral process"); *Mays v. LaRose,* 951 F.3d 775, 787 (6th Cir. 2020) ("orderly administration of elections"); *Dudum*, 640 F.3d at 1115 ("orderly administration of ... elections"); *Paher v. Cegavske* , 457 F.Supp.3d 919, ——, 2020 WL 2089813, at *7 (2020) ("protect[ing] the health and safety of ... voters" and "safeguard[ing] the voting franchise"); *Nemes*, —— F. Supp. 3d at ——, 2020 WL 3402345, at *13 ("implementing voting plans that provide for a free and fair election while attempting to minimize the spread of COVID-19").

Thus, on the "burden" side of the equation is Plaintiffs' harm of vote dilution predicated on a risk of fraud. As discussed above in the context of lack of standing, that burden is slight, factually, because it is based on largely speculative evidence of voter fraud generally, anecdotal evidence of the mis-use of certain drop boxes during the primary election, and worries that the counties will not implement a "best practice" of having poll workers or guards man the drop boxes. *See* [ECF 461, ¶¶ 63-82; ECF 504-2, ¶ 12; 504-3, ¶ 6; 504-4, ¶7;; ECF 504-6, ¶¶ 6-8; ECF 504-7, ¶¶ 5-9; ECF 504-9, 92:4-10; ECF 504-10, 60:3-61:10; 504-19, pp. 3, 16-18, 20 & Ex. D; ECF 504-25; ECF 504-49; ECF 509, p. 67; ECF 551, p. 34].

This somewhat scant evidence demonstrates, at most, an increased risk of some election irregularities—which, as many courts have held, does not impose a meaningful burden under *Anderson-Burdick*. "Elections are, regrettably, not always free from error," *Hutchinson v. Miller*, 797 F.2d

1279, 1286–87 (4th Cir. 1986), let alone the "risk" of error. In just about every election, votes are counted, or discounted, when the state election code says they should not be. But the Constitution "d[oes] not authorize federal courts to be state election monitors." *Gamza v. Aguirre*, 619 F.2d 449, 454 (5th Cir. 1980). It is "not an empty ledger awaiting the entry of an aggrieved litigant's recitation of alleged state law violations." *Fournier v. Reardon*, 160 F.3d 754, 757 (1st Cir. 1998). Nor is it "an election fraud statute." *Minnesota Voters*, 720 F.3d at 1031.

***49** "Garden variety" election irregularities, let alone the "risk" of such irregularities, are simply not a matter of federal constitutional concern "even if they control the outcome of the vote or election." *Bennett v. Yoshina*, 140 F.3d 1218, 1226 (9th Cir. 1998). And as discussed above, most often, even "a deliberate violation of state election laws by state election officials does not transgress against the Constitution." *Shipley*, 947 F.3d at 1062. *see, e.g.*, *Lecky v. Virginia State Bd. of Elections*, 285 F. Supp. 3d 908, 919 (E.D. Va. 2018) ("[E]ven assuming the Fredericksburg officials' failure to provide provisional ballots amounted to a violation of state law, it would not rise to the level of an equal protection violation.").

Compared, then, to Plaintiffs' slight burden, the Commonwealth has put forward reasonable, precise, and sufficiently weighty interests that are undisputed and that can be distilled into three general categories: (1) the benefits of drop boxes, (2) the Commonwealth's interests in furthering its overall election-security plan concerning drop boxes, and (3) the interests inherent in the Commonwealth's general mail-in ballot scheme.

The first category concerns the benefits of drop boxes generally. Secretary Boockvar has pointed out the Commonwealth's interests generally in using drop boxes—including, (1) the increase of voter turnout, (2) the protection of voters' health in the midst of the ongoing pandemic, (3) the increase of voter satisfaction, in light of ongoing U.S. Postal Service issues, and (4) the reduction of costs for counties. [ECF No. 547, at pp. 22-25; ECF No. 549-2, ¶¶ 36-39, 42-44]. Plaintiffs do not dispute any of these interests.

The second category of interests concerns the Commonwealth's interests in implementing drop boxes with appropriate and effective safety measures and protocols in place. That is, Secretary Boockvar has, in her capacity as the chief state official charged with overseeing elections, issued uniform guidance to all counties regarding the use of drop boxes, which is noted above. That guidance includes (1) advising counties that the Election Code permits the use of drop boxes, and (2) setting forth best practices that the counties should "consider" with respect to their use. Among other things, the Secretary advised that counties should maintain a traceable chain of custody for mail-in and absentee ballots retrieved from drop boxes; utilize drop boxes with various security features (*e.g.,* anti-tampering features, locks, video surveillance, and removal when the site is closed or cannot be monitored); and designate sworn county personnel to remove ballots from drop boxes. And evidence suggests that the Secretary's deputies have emphasized these best practices when queried by county officials. [ECF 549-32 ("Per our conversation, the list of items are things the county must keep in mind if you are going to provide a box for voters to return their ballots in person.")].

This guidance is lawful, reasonable, and non-discriminatory, and so does not create any constitutional issue in its own right. With this guidance, the Secretary has diminished the risks tolerated by the legislature in adopting mail-in voting and authorizing drop-boxes, by encouraging the counties to adopt rather comprehensive security and chain-of-custody procedures if they do elect to use drop boxes. Conversely, the legislature's decision to leave the counties with ultimate discretion when it comes to how, and to what extent, to use drop boxes (as opposed to adopting a scheme in which the Secretary could enforce compliance with her guidance) is also reasonable, and justified by sufficiently weighty governmental interests, given the many variations in population, geography, local political culture, crime rates, and resources. [ECF 549-9 ("There is no logical reason why ballot receptacles such as drop boxes must be uniform across different counties; particularly because the verification of the voter is determined by election officials upon receipt of the ballot. Counties vary in size and need. Across the country, best practices dictate that counties determine what type of box and size works for them. The needs of a large county are very different from the needs of a smaller county."); ECF 549-11, p. 9 ("Such variation between counties even within a state makes sense, since the needs of different counties vary and their use of drop boxes reflects those considerations (e.g., the geographic size of a county, the population of the county, and the ease with which voters in the county can access other locations to return mail-in ballots).").].

***50** The third category of interests is, more generally, the interests of the Commonwealth in administering its overall

mail-in ballot regime, including the various security and accountability measures inherent in that legislative plan.

Pennsylvania did not authorize drop boxes in a vacuum. Last year, the Pennsylvania legislature "weigh[ed] the pros and cons," *Weber*, 347 F.3d at 1107, and adopted a broader system of "no excuse" mail-in voting as part of the Commonwealth's Election Code. As the Pennsylvania Supreme Court has now confirmed, that system left room for counties to authorize drop boxes and other satellite locations for returning ballots to the county boards of elections. *See Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *9 ("[W]e need not belabor our ultimate conclusion that the Election Code should be interpreted to allow county boards of election to accept hand-delivered mail-in ballots at locations other than their office addresses including drop-boxes.").

Inherent in any mail-in or absentee voting system is some degree of increased risk of votes being cast in violation of other provisions of the Election Code, regardless of whether those ballots are returned to drop boxes, mailboxes, or some other location. For example, there is simply no practical way to police third party delivery of ballots to any mailbox anywhere in the Commonwealth, where Plaintiffs do not dispute that such ballots can be lawfully returned. It is also likely that more (and perhaps many more) voters than usual will be disenfranchised by technicalities this year, for failing to comply with the procedural requirements associated with mail-in ballots, such as the requirement that such ballots be placed in "inner secrecy envelopes."

But in enacting the "no excuse" mail-in voting system that it did, the Pennsylvania legislature chose to tolerate the risks inherent in that approach. And the key point is that the legislature made that judgment in the context of erecting a broader election scheme that authorizes other forms of voting and has many other safeguards in place to catch or deter fraud and other illegal voting practices. These safeguards include voter registration; a mail-in ballot application and identity verification process, 25 P.S. §§ 3146.2, 3150.12; a system for tracking receipt of mail-in ballots, 25 P.S. §§ 3146.3(a), 3150.13(a); and, perhaps most important of all, a pre-canvassing and canvassing process during which mail-in ballots are validated before being counted. In addition, Pennsylvania law also seeks to deter and punish fraud by imposing criminal penalties for unlawful voting, 25 P.S § 3533; voting twice in one election, 25 P.S § 3535; forging or destroying ballots, 25 P.S § 3517; unlawful possession or counterfeiting of ballots 25 P.S § 3516; and much more of the conduct Plaintiffs fear, *see* 25 P.S. § 3501, *et seq.*

In this larger context, the Court cannot say that the balance Pennsylvania struck across the Election Code was unreasonable, illegitimate, or otherwise not "sufficiently weighty to justify," *Crawford*, 553 U.S. at 191, 128 S.Ct. 1610, whatever ancillary risks may be associated with the use of drop boxes, or with allowing counties to exercise discretion in that regard. Pennsylvania may balance the many important and often contradictory interests at play in the democratic process however it wishes, and it must be free to do so "without worrying that a rogue district judge might later accuse it of drawing lines unwisely." *Abbott*, 961 F.3d at 407.

***51** Thus, balancing the slight burden of Plaintiffs' claim of dilution against the categories of interests above, the Court finds that the Commonwealth and Defendants' interests in administering a comprehensive county-based mail-in ballot plan, while both promoting voting and minimizing fraud, are sufficiently "weighty," reasonable, and justified. Notably, in weighing the burdens and interests at issue, the Court is mindful of its limited role, and careful to not intrude on what is "quintessentially a legislative judgment." *Griffin*, 385 F.3d at 1131. "[I]t is the job of democratically-elected representatives to weigh the pros and cons of various balloting systems." *Weber*, 347 F.3d at 1106. "So long as their choice is reasonable and neutral, it is free from judicial second-guessing." *Id.*; *see also Abbott,* 961 at 407, ("That the line might have been drawn differently ... is a matter for legislative, rather than judicial, consideration.") (cleaned up); *Trinsey v. Com. of Pa.*, 941 F.2d 224, 235 (3d Cir. 1991) ("We take no position on the balancing of the respective interests in this situation. That is a function for which the legislature is uniquely fitted.").

Thus, even under the *Anderson-Burdick* framework, the Court finds that Plaintiffs' constitutional challenge fails as a matter of law.

B. Pennsylvania's use of drop boxes does not violate federal due process.

In addition to their equal-protection challenge to the use of drop boxes, Plaintiffs also appear to argue that the use of unmanned drop boxes violates substantive due process protected by the 14th Amendment. This argument is just a variation on their equal-protection argument—*i.e.*, the uneven use of drop boxes will work a "patent and fundamental unfairness" in violation of substantive due process principles. *See Griffin v. Burns*, 570 F.2d 1065, 1077 (1st Cir. 1978)

(substantive due process rights are violated "[i]f the election process itself reaches the point of patent and fundamental unfairness[.]"). The analysis for this claim is the same as that for equal protection, and thus it fails for the same reasons.

But beyond that, this claim demands even stricter proof. Such a claim exists in only the most extraordinary circumstances. *See Nolles v. State Comm. for Reorganization of Sch. Districts*, 524 F.3d 892, 898 (8th Cir. 2008) ("A canvass of substantive due process cases related to voting rights reveals that voters can challenge a state election procedure in federal court only in limited circumstances, such as when the complained of conduct discriminates against a discrete group of voters, when election officials refuse to hold an election though required by state law, resulting in a complete disenfranchisement, or when the willful and illegal conduct of election officials results in fraudulently obtained or fundamentally unfair voting results.") (cleaned up); *Yoshina,* 140 F.3d at 1226 ("We have drawn a distinction between 'garden variety' election irregularities and a pervasive error that undermines the integrity of the vote. In general, garden variety election irregularities do not violate the Due Process Clause, even if they control the outcome of the vote or election.") (citation omitted); *Bennett v. Mollis*, 590 F. Supp. 2d 273, 278 (D.R.I. 2008) ("Before an election error becomes a key that unlocks the restraints on the federal court's authority to act, the Plaintiffs must demonstrate either an intentional election fraud or an unintentional error resulting in broad-gauge unfairness.").

Indeed, "only the most egregious official conduct can be said to be arbitrary in the constitutional sense"—the "executive action must be so ill-conceived or malicious that it 'shocks the conscience.' " *Miller v. City of Phila.*, 174 F.3d 368, 375 (3d Cir. 1999) (cleaned up).

Based on the slight burden imposed here, and the Commonwealth's interests in their overall county specific voting regime, which includes a host of other fraud-prevention measures, the Court finds that the drop-box claim falls short of the standard of substantive due process.

III. Defendants and Intervenors are entitled to summary judgment on Plaintiffs' signature-comparison claims.

***52** Plaintiffs' next claim concerns whether the Secretary's recent guidance on signature comparison violates the federal Constitution. Plaintiffs frame their claims pertaining to signature comparison in two ways—one based on due process and the other based on equal protection.

Plaintiffs initially assert that the Election Code requires a signature comparison for mail-in and absentee applications and ballots. Thus, according to Plaintiffs, Secretary Boockvar's guidance, which says the opposite, is creating unconstitutional vote dilution, in violation of due-process principles—*i.e.*, certain unlawful, unverified ballots will now be counted, thereby diluting the lawful ones cast by other voters (such as in-person voters, whose signatures are verified). Plaintiffs also appear to argue more generally that absent signature comparison, there is a heightened risk of voter fraud, and therefore a heightened risk of vote dilution of lawful votes.

In addition to due process, Plaintiffs argue that the guidance violates equal-protection principles—first, by counties engaging in a patchwork of procedures (where some counties intend to do a signature comparison for mail-in ballots, while others do not); and second, by implementing different standards between mail-in ballots and in-person ones.

In contrast, Defendants and Intervenors take the position that state law does not require signature comparison, and for good reason. According to them, requiring such comparisons is fraught with trouble, as signatures change over time and elections officials are not signature-analysis experts. This leaves open the possibility for arbitrary and discriminatory application that could result in the disenfranchisement of valid voters.

For the reasons that follow, the Court will dismiss the signature-comparison claims and enter judgment in favor of Defendants. A plain reading of the Election Code demonstrates that it does not impose a signature-comparison requirement for mail-in ballots and applications, and thus Plaintiffs' vote-dilution claim sounding in due process fails at the outset. Further, the heightened risk of fraud resulting from a lack of signature comparison, alone, does not rise to the level of a federal constitutional violation. Finally, the equal-protection claims fail because there are sound reasons for the different treatment of in-person ballots versus mail-in ballots; and any potential burdens on the right to vote are outweighed by the state's interests in their various election security measures.

A. The Election Code does not require signature comparison for mail-in and absentee ballots or ballot applications.

Plaintiffs' federal-constitutional claims in Count I of their Second Amended Complaint are partially based on the Secretary's guidance violating state law. That is, Plaintiffs' first theory is that by the Secretary violating state law, unlawful votes are counted and thus lawfully cast votes are diluted. According to Plaintiffs, this violates the 1st and 14th Amendments, as well as the Elections Clause (the latter of which requires the legislature, not an executive, to issue election laws).[12]

***53** Thus, a necessary predicate for these constitutional claims is whether the Election Code mandates signature comparison for mail-in and absentee ballots. If it doesn't, as the Secretary's guidance advises, then there can be no vote dilution as between lawful and unlawful votes, nor a usurpation of the legislature's authority in violation of the Elections Clause.

After carefully considering the parties' arguments and the relevant law, the Court finds that the plain language of the Election Code imposes no requirement for signature comparison for mail-in and absentee ballots and applications.[13] In other words, the Secretary's guidance is consistent with the Election Code, and creates no vote-dilution problems.[14]

Plaintiffs, in advancing their claim, rely on section 3146.8(g)(3)-(7) of the Election Code to assert that the Code requires counties to "verify" the signatures on mail-in and absentee ballots (*i.e.*, examine the signatures to determine whether they are authentic). Plaintiffs specifically point to section 3146.8(g)(3) as requiring this signature verification. [ECF 509, pp. 17-18].

Section 3146.8(g)(3) states:

> When the county board meets to pre-canvass or canvass absentee ballots and mail-in ballots ... the board shall examine the declaration on the envelope of each ballot ... and shall compare the information thereon with that contained in the "Registered Absentee and Mail-in Voters File," the absentee voters' list and/or the "Military Veterans and Emergency Civilians Absentee Voters File," whichever is applicable. If the county board has verified the proof of identification as required under this act and is satisfied that the declaration is sufficient and the information contained in the "Registered Absentee and Mail-in Voters File," the absentee voters' list and/or the "Military Veterans and Emergency Civilians Absentee Voters File" verifies his right to vote, the county board shall provide a list of the names of electors whose absentee ballots or mail-in ballots are to be pre-canvassed or canvassed.

***54** 25 P.S. § 3146.8(g)(3).

According to Plaintiffs, Section 3146.8(g)(3)'s requirement to verify the proof of identification, and compare the information on the declaration, is tantamount to signature comparison. The Court disagrees, for at least three reasons.

First, nowhere does the plain language of the statute require signature comparison as part of the verification analysis of the ballots.

When interpreting a statute enacted by the Pennsylvania General Assembly, courts apply Pennsylvania's Statutory Construction Act, 1 Pa. C.S. §§ 1501-1991. And as the Act instructs, the "object of all interpretation and construction of statutes is to ascertain and effectuate the intention of the General Assembly." 1 Pa C.S. § 1921(a). If the words of the statute are clear and unambiguous, the letter of the law applies. *Id.* at § 1921(b). Otherwise, courts may consider a variety of factors to determine the legislature's intent, including "other statutes upon the same or similar subjects" and "[t]he consequences of a particular interpretation." *Id.* at § 1921(c)(5)-(6).

Section 3146.8(g)(3) does not expressly require any signature verification or signature comparison. 25 P.S. § 3146.8(g)(3). It instead requires election officials to (1) "examine the declaration on the envelope of each ballot," (2) "compare the information thereon with that contained in the ... 'Voters file' [or] the absentee voters' list," and (3) if "the county board has [a] verified the proof of identification as required under this act and [b] is satisfied that the declaration is sufficient and the information contained in the [Voter's file] ... verifies his right to vote," the election official shall include the ballot to be counted. *Id.*

Under the express terms of the statute, then, the information to be "verified" is the "proof of identification." *Id.* The Election Code defines "proof of identification" as the mail-in/absentee voter's driver's license number, last four digits of their Social Security number, or a specifically approved form of identification. 25 P.S. § 2602(z.5)(3)(i)-(iv).[15] The only other "verification" the election official must conduct is to determine whether "the information contained in the [Voter's file] ... verifies his right to vote."

***55** Nowhere does this provision require the election official to compare and verify the authenticity of the elector's signature. In fact, the word "signature" is absent from the provision. It is true that the elector must fill out and sign the declaration included on the ballot. 25 P.S. §§ 3146.6(a), 3150.16(a). However, while section 3146.8(g)(3) instructs the election official to "examine the declaration ... and compare the information thereon with that contained in the [Voter's file]," the provision clarifies that this is so the election official can be "satisfied that the declaration is sufficient." 25 P.S. § 3146.8(g)(3). In other words, the election official must be "satisfied" that the declaration is "fill[ed] out, date[d] and sign[ed]," as required by sections 3150.16(a) and 3146.6(a) of the Election Code. Notably absent is any instruction to verify the signature and set aside the ballot if the election official believes the signature to be non-genuine. There is an obvious difference between checking to see if a signature was provided at all, and checking to see if the provided signature is sufficiently authentic. Only the former is referred to in section 3146.8(g)(3).

Second, beyond the plain language of the statute, other canons of construction compel the Court's interpretation. When interpreting statutes passed by the General Assembly, Pennsylvania law instructs courts to look at other aspects of the statute for context. *See* 1 Pa. C.S. § 1921(c)(5) ("When the words of the statute are not explicit, the intention of the General Assembly may be ascertained by considering ... other statutes upon the same or similar subjects."); *O'Rourke v. Commonwealth*, 566 Pa. 161, 778 A.2d 1194, 1201 (2001) ("The cardinal rule of all statutory construction is to ascertain and effectuate the intent of the Legislature. To accomplish that goal, we should not interpret statutory words in isolation, but must read them with reference to the context in which they appear." (citation omitted)).

Context here is important because the General Assembly mandated signature comparison for in-person voting elsewhere in the Election Code—thus evidencing its intention not to require such comparison for mail-in ballots. *See Fonner v. Shandon, Inc.*, 555 Pa. 370, 724 A.2d 903, 907 (1999) ("[W]here a section of a statute contains a given provision, the omission of such a provision from a similar section is significant to show a different legislative intent.") (citation omitted).

In addressing in-person voting, the General Assembly explicitly instructs that the election official shall, after receiving the in-person elector's voter certificate, immediately "***compare the elector's signature*** on his voter's certificate with his signature in the district register. If, upon such comparison, the signature upon the voter's certificate appears to be genuine, the elector who has signed the certificate shall, if otherwise qualified, be permitted to vote: Provided, That ***if the signature on the voter's certificate, as compared with the signature as recorded in the district register, shall not be deemed authentic*** by any of the election officers, such elector shall not be denied the right to vote for that reason, but shall be considered challenged as to identity and required to [cure the deficiency]." 25 P.S. § 3050(a.3)(2) (emphasis added).

Elsewhere, the General Assembly also explicitly accounts for signature comparison of in-person voters: "[I]f it is determined that the individual was registered and entitled to vote at the election district where the ballot was cast, ***the county board of elections shall compare the signature on the provisional ballot envelope with the signature on the elector's registration form and, if the signatures are determined to be genuine, shall count the ballot*** if the county board of elections confirms that the individual did not cast any other ballot, including an absentee ballot, in the election. ... [But a] provisional ballot shall not be counted if ... the signature[s] required ... are either not genuine or are not executed by the same individual ..." 25 P.S. § 3050(a.4)(5)(i)-(ii) (emphasis added); *see also* 25 P.S. § 2936 ("[When reviewing nomination papers], the Secretary of the Commonwealth or the county board of elections, although not hereby required so to do, ***may question the genuineness of any signature or signatures appearing thereon***, and if he or it shall thereupon find that any such signature or signatures are not genuine, such signature or signatures shall be disregarded[.]" (emphasis added)).

***56** Clearly then, the General Assembly, in enacting the Election Code, knew that it could impose a signature-comparison requirement that requires an analysis to determine whether a signature is "genuine." And when that was its intent, the General Assembly explicitly and unequivocally imposed that requirement. It is thus telling, from a statutory construction standpoint, that no such explicit requirement is imposed for returned mail-in or absentee ballots. Indeed, the General Assembly is aware—and in fact, requires—that a voter must sign their application for an absentee or mail-in ballot, and must sign the declaration on their returned ballot. 25 P.S. §§ 3146.2(d) (absentee-ballot application), 3150.12(c) (mail-in-ballot application), 3146.6(a) (absentee-voter declaration), 3150.16(a) (mail-in voter declaration). Despite this, the General Assembly did

not mention a signature-comparison requirement for returned absentee and mail-in ballots.

The Court concludes from this context that this is because the General Assembly did not intend for such a requirement. *See, e.g.*, *Mishoe v. Erie Ins. Co.*, 573 Pa. 267, 824 A.2d 1153, 1155 (2003) ("In arriving at our conclusion that the foregoing language does not provide for the right to a jury trial, we relied on three criteria. First, we put ***substantial emphasis*** on the fact that the PHRA was silent regarding the right to a jury trial. As we explained, 'the General Assembly is well aware of its ability to grant a jury trial in its legislative pronouncements,' and therefore, 'we can presume that the General Assembly's express granting of trial by jury in some enactments means that it did not intend to permit for a jury trial under the PHRA.' " (cleaned up) (emphasis added)); *Holland v. Marcy*, 584 Pa. 195, 883 A.2d 449, 456, n.15 (2005) ("We additionally note that the legislature, in fact, did specify clearly when it intended the choice of one individual to bind others. In every other category addressed by Section 1705(a) other than (a)(5) which addressed uninsured owners, the General Assembly specifically referenced the fact that the decision of the named insured ... binds other household members.... Similar reference to the ability of the uninsured owner's deemed choice to affect the rights of household members is conspicuously missing from Section 1705(a)(5).").

Accordingly, the Court finds that the General Assembly's decision not to expressly refer to signature comparisons for mail-in ballots, when it did so elsewhere, is significant.

Third, this Court is mindful that Pennsylvania's election statutes are to be construed in a manner that does not risk disenfranchising voters. *See, e.g.*, 1 Pa. C.S. § 1922(3) ("In ascertaining the intention of the General Assembly in the enactment of a statute the following presumptions, among others, may be used: ... That the General Assembly does not intend to violate the Constitution of the United States or of this Commonwealth."); *id.* at § 1921(c)(6) (in interpreting a statute, the court may consider "[t]he consequences of a particular interpretation").

As the Pennsylvania Supreme Court emphasized last month, "[I]t is well-settled that, although election laws must be strictly construed to prevent fraud, they ordinarily will be construed liberally in favor of the right to vote. Indeed, our goal must be to enfranchise and not to disenfranchise the electorate." *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *9 (cleaned up); *see also id.* ("[A]lthough both Respondent and the Caucus offer a reasonable interpretation of Section 3150.16(a) as it operates within the Election Code, their interpretation restricts voters' rights, as opposed to the reasonable interpretation tendered by Petitioner and the Secretary. The law, therefore, militates in favor of this Court construing the Election Code in a manner consistent with the view of Petitioner and the Secretary, as this construction of the Code favors the fundamental right to vote and enfranchises, rather than disenfranchises, the electorate.").

***57** Here, imposing a signature-comparison requirement as to mail-in and absentee ballots runs the risk of restricting voters' rights. This is so because election officials, unstudied and untested in signature verification, would have to subjectively analyze and compare signatures, which as discussed in greater detail below, is potentially problematic.[16] [ECF 549-2, p. 19, ¶ 68]; [ECF 549-9, p. 20, ¶ 64]. And perhaps more importantly, even assuming an adequate, universal standard is implemented, mail-in and absentee voters whose signatures were "rejected" would, unlike in-person voters, be unable to cure the purported error. *See* 25 P.S. § 3146.8(a) (stating that in-person and absentee ballots "shall [be safely kept] in sealed or locked containers until they are to be canvassed by the county board of elections," which § 3146.8(g)(1.1)-(2) states is no earlier than election day); *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *20 ("[A]lthough the Election Code provides the procedures for casting and counting a vote by mail, it does not provide for the 'notice and opportunity to cure' procedure sought by Petitioner. To the extent that a voter is at risk for having his or her ballot rejected due to minor errors made in contravention of those requirements, we agree that the decision to provide a 'notice and opportunity to cure' procedure to alleviate that risk is one best suited for the Legislature."). As discussed in more detail below, unlike in-person voters, whose signatures are verified in their presence, mail-in and absentee voters' signatures would be verified at a later date outside the presence of the voter. *See generally* 25 P.S. § 3146.8(a), (g) (requiring mail-in and absentee ballots to be kept secured in a sealed container until Election Day). Unbeknownst to the voter, then, and without an opportunity to remedy the purported error, these mail-in and absentee voters may not have their votes counted. Based on this risk of disenfranchisement, which the Court must consider in interpreting the statute, the Court cannot conclude that this was the General Assembly's intention.

The Court is not persuaded by Plaintiffs' arguments to the contrary.

Plaintiffs argue that section 3146.8(g)(5)-(7) provides a voter, whose ballot-signature was rejected, notice and an opportunity to cure the signature deficiency. [ECF 509, pp. 13, 18, 50]. That section, however, refers to when a person raises a specific challenge to a specific ballot or application on the grounds that the elector is not a "qualified elector." 25 P.S. § 3146.8(g)(4) (stating that mail-in and absentee ballots shall be counted unless they were challenged under §§ 3146.2b or 3150.12b, which allow challenges on the grounds that the elector applying for a mail-in or absentee ballot wasn't qualified). Thus, the "challenges" referenced in § 3146.8(g)(5)-(7) refer to a voter's qualifications to vote, not a signature verification.

Plaintiffs similarly argue that section 3146.8(h) provides mail-in voters notice and opportunity to cure signature deficiencies. [ECF 552, p. 60]. But that section relates to "those absentee ballots or mail-in ballots for which proof of identification has not been received or could not be verified." 25 P.S. § 3146.8(h). As discussed above, "proof of identification" is a defined term, and includes the voter's driver's license number, last four digits of their Social Security number, or a specifically approved form of identification. 25 P.S. § 2602(z.5)(3)(i)-(iv). Not included is the voter's signature.[17]

***58** At bottom, Plaintiffs request this Court to impose a requirement—signature comparison—that the General Assembly chose not to impose. Section 3146.8(g)(3) does not mention or require signature comparison. The Court will not write it into the statute.

For the same reasons that the Election Code does not impose a signature-comparison requirement for mail-in and absentee ballots, the Election Code does not impose a signature-comparison requirement for mail-in and absentee ballot ***applications.*** While the General Assembly imposed a requirement that the application be signed, there is no mention of a requirement that the signature be verified, much less that the application be rejected based solely on such verification. 25 P.S. §§ 3146.2(d) (absentee-ballot application), 3150.12(c) (mail-in-ballot application). Again, finding no explicit instructions for signature comparison here (unlike elsewhere in the Code), the Court concludes that the General Assembly chose not to include a signature-comparison requirement for ballot applications.

The Court again finds Plaintiffs' arguments to the contrary unavailing. Plaintiffs argue that "there is no other proof of identification required to be submitted with the ballot applications," and thus, a signature comparison must be required. [ECF 509, p. 16].

But the Election Code expressly requires the applicant to include several pieces of identifying information, including their name, mailing address, and date of birth. 25 P.S. §§ 3146.2(b), 3150.12(b). And after receiving the applicant's application, the election official must "verify[ ] the proof of identification [a defined term as discussed above] and compar[e] the information provided on the application with the information contained on the applicant's permanent registration card."[18] *Id.* at §§ 3146.2b(c), 3150.12b(a). Thus, contrary to Plaintiffs' argument, the General Assembly provided for certain methods of identification as to ballot applications. Signature verification isn't one of them.

For these reasons, the Court concludes that the Election Code does not impose a signature-comparison requirement for absentee and mail-in ballots and applications. As such, the Secretary's September 11, 2020, and September 28, 2020, guidance is consistent with the Election Code. Plaintiffs' claims of vote dilution based on this guidance will therefore be dismissed.

B. The lack of a signature comparison does not violate substantive due process.

In addition to alleging that the Secretary's guidance violates the Election Code, Plaintiffs appear to also argue that their right to vote is unconstitutionally burdened and diluted due to a risk of fraud. That is, regardless of what the Election Code requires, Plaintiffs assert that absent signature comparison, mail-in and absentee ballots will be prone to fraud, thereby diluting other lawful ballots. [ECF 509, pp. 45-50; 504-19, pp. 10-15]. Plaintiffs argue that this significantly burdens their fundamental right to vote, resulting in a due-process violation, and thus strict scrutiny applies. The Court disagrees.

***59** As discussed above in the context of Plaintiffs' drop-box claim, Plaintiffs' claim here simply does not rise to the high level for a substantive due process claim. To violate substantive due process in the voting-rights context, the infringements are much more severe. Only in extraordinary circumstances will there be "patent and fundamental unfairness" that causes a constitutional harm. *See Bonas v. Town of North Smithfield*, 265 F.3d 69, 74 (1st

Cir. 2001); *Shannon v. Jacobowitz*, 394 F.3d 90, 94 (2d Cir. 2005).

Here, Plaintiffs' signature-comparison claim does not meet this high standard. This isn't a situation of malapportionment, disenfranchisement, or intentional discrimination. And the risk of voter fraud generally without signature comparison —as a matter of fact and law—does not rise to "patent and fundamental unfairness."

Indeed, as discussed above, Plaintiffs' evidence of potential voter fraud here is insufficient to establish "patent and fundamental unfairness." In their summary-judgment brief, Plaintiffs argue that "the Secretary's September 2020 guidance memos promote voter fraud." [ECF 509, p. 48]. Plaintiffs then offer a hypothetical where a parent signs a ballot application on their child's behalf because the child is out-of-state. [ECF 509, p. 48]. Plaintiffs assert that without signature comparisons, such "fraud" could proceed unchecked. [*Id.*]. Plaintiffs continue, arguing that the "fraud" would "snowball," so that "spouses, neighbors, acquaintances, strangers, and others" were signing applications and ballots on others' behalf. [*Id.* at pp. 48-49]. To prevent such fraud, Plaintiffs' expert, Mr. Riddlemoser, asserts that signature comparison is needed. [ECF 504-19, p. 10 ("Not only does enforcing the Election Code's requirement of a completed and signed declaration ensure uniformity, which increases voter confidence, it also functions to reduce fraud possibilities by allowing signature verification.")].

Mr. Riddlemoser first highlights that in Philadelphia in the primary, ballots were counted "that lacked a completed declaration." [*Id.* at p. 11]. Mr. Riddlemoser further opines that the September 11, 2020, guidance and September 28, 2020, guidance, in instructing that signature comparison is not required for mail-in and absentee ballots and applications, "encourage[s], rather than prevent[s], voter fraud." [*Id.* at pp. 12-13]. Mr. Riddlemoser also notes that signature comparison is "the most common method" to verify ballots and that the Secretary's guidance "leave the absentee/mail-in ballots subject to the potential for unfettered fraud." [*Id.* at p. 14]. He concludes that the guidance "invites the dilution of legitimately cast votes." [*Id.*].

Based on this evidentiary record, construed in Plaintiffs' favor, the Court cannot conclude that there exists "patent and fundamental unfairness." Rather, Plaintiffs present only the possibility and potential for voter fraud. In their briefing, Plaintiffs relied on hypotheticals, rather than actual events. [ECF 509, p. 48]. Mr. Riddlemoser admits that failing to verify signatures only creates "the potential" for fraud and "invites" vote dilution. [ECF 504-19, pp. 14, 15]. Even assuming an absence of signature comparison does indeed invite the potential for fraud, the nondiscriminatory, uniform practice and guidance does not give rise to "patent and fundamental unfairness" simply because of a "potential" for fraud. Plaintiffs have not presented evidence to establish a sufficient burden on their constitutional right to vote.

***60** Indeed, even if the Court assumed some "forged" applications or ballots were approved or counted, this is insufficient to establish substantial, widespread fraud that undermines the electoral process. Rather, limited instances of "forged" ballots—which according to Plaintiffs' definition, includes an individual signing for their spouse or child—amount to what the law refers to as "garden variety" disputes of limited harm. As has long been understood, federal courts should not intervene in such "garden variety" disputes. *Hutchinson*, 797 F.2d at 1283 ("[C]ourts have uniformly declined to endorse action under § 1983 with respect to garden variety election irregularities.") (cleaned up); *Yoshina*, 140 F.3d at 1226 ("In general, garden variety election irregularities do not violate the Due Process Clause, even if they control the outcome of the vote or election." (collecting cases)); *Curry v. Baker*, 802 F.2d 1302, 1314-15 (11th Cir. 1986) ("[I]f the election process itself reaches the point of patent and fundamental unfairness, a violation of the due process clause may be indicated and relief under § 1983 therefore in order. Such a situation must go well beyond the ordinary dispute over the counting and marking of ballots." (cleaned up)).

To be clear, the Court does not take Plaintiffs' allegations and evidence lightly. Election fraud is serious and disruptive. And Plaintiffs could be right that the safer course would be to mandate signature comparison for all ballots. But what Plaintiffs essentially complain of here is whether the procedures employed by the Commonwealth are sufficient to prevent that fraud. That is a decision left to the General Assembly, not to the meddling of a federal judge. *Crawford*, 553 U.S. at 208, 128 S.Ct. 1610 (Scalia, J. concurring) ("It is for state legislatures to weigh the costs and benefits of possible changes to their election codes, and their judgment must prevail unless it imposes a severe and unjustified overall burden upon the right to vote, or is intended to disadvantage a particular class."). *Griffin*, 385 F.3d at 1131-32 ("[S]triking of the balance between discouraging fraud and other abuses and encouraging turnout is quintessentially a legislative judgment

with which we judges should not interfere unless strongly convinced that the legislative judgment is grossly awry.").

C. Plaintiffs' federal equal-protection claims based on signature comparison fail.

Plaintiffs present two federal equal-protection claims. The Court will address each in turn.

1. County differences over signature comparison do not violate federal equal-protection rights.

Plaintiffs' first federal equal-protection claim is based on some county boards of elections intending to verify the signatures on mail-in and absentee ballots and applications, while others do not intend to do so. To that end, Plaintiffs have presented evidence that some, but not all, counties do intend to verify signatures. *E.g.*, [ECF 504-1].[19] According to Plaintiffs, this arbitrary and differential treatment of mail-in and absentee ballots among counties—purportedly caused by the Secretary's September 11, 2020, and September 28, 2020, guidance—violates the Equal-Protection Clause because voters will be treated differently simply because of the county in which they reside. The Court, however, finds no equal-protection violation in this context.

The Secretary's guidance about which Plaintiffs complain is uniform and nondiscriminatory. It was issued to all counties and applies equally to all counties, and by extension, voters. Because the uniform, nondiscriminatory guidance is rational, it is sound under the Equal-Protection Clause. *See Gamza*, 619 F.2d at 453 (5th Cir. 1980) ("We must, therefore, recognize a distinction between state laws and patterns of state action that systematically deny equality in voting, and episodic events that, despite non-discriminatory laws, may result in the dilution of an individual's vote. Unlike systematically discriminatory laws, isolated events that adversely affect individuals are not presumed to be a violation of the equal protection clause.") (citation omitted). Indeed, the guidance merely instructs counties to abide by the Election Code—an instruction to follow the law is certainly rational and related to an obviously rational government interest.

61** In fact, if there is any unequal application now, it is caused by those counties that are ***not following the guidance and are going above and beyond the Election Code to impose a signature-comparison requirement. That claim, though, is not before the Court, as Plaintiffs here do not assert that imposing a signature-comparison requirement violates the Constitution (they allege the opposite).

In any event, to the extent there was uncertainty before, this decision informs the counties of the current state of the law as it relates to signature comparison. If any county still imposes a signature-comparison requirement in order to disallow ballots, it does so without support from the Secretary's guidance or the Election Code. Further, counties that impose this signature-comparison requirement to reject ballots may be creating a different potential constitutional claim for voters whose ballots are rejected. *Boockvar*, ––– A.3d at ––––, 2020 WL 5554644, at *34, n.16 (Wecht, J. concurring) (noting that courts around the country have found due process issues with signature-comparison requirements; and collecting cases).

For these reasons, Plaintiffs' equal-protection claim falls short.

2. Different treatment between in-person ballots and mail-in ballots also does not violate federal equal-protection rights.

Plaintiffs also assert a second federal equal-protection claim on the grounds that the Election Code, by not requiring signature comparison for mail-in and absentee ballots, treats such ballots differently than in-person ballots (which require signature comparisons). Plaintiffs argue that this is an unconstitutionally arbitrary and unequal treatment. The Court disagrees.

It is well-settled that states may employ in-person voting, absentee voting, and mail-in voting and each method need not be implemented in exactly the same way. *See Hendon*, 710 F.2d at 181 ("A state may employ diverse methods of voting, and the methods by which a voter casts his vote may vary throughout the state.")

"Absentee voting is a fundamentally different process from in-person voting, and is governed by procedures entirely distinct from in-person voting procedures." *ACLU of New Mexico v. Santillanes*, 546 F.3d 1313, 1320 (10th Cir. 2008) (citations omitted). It is an "obvious fact that absentee voting is an inherently different procedure from in-person voting." *Indiana Democratic Party v. Rokita*, 458 F. Supp. 2d 775, 830-31 (S.D. Ind. 2006). Because in-person voting

is "inherently different" from mail-in and absentee voting, the procedures for each need not be the same. *See, e.g.*, *Santillanes*, 546 F.3d at 1320-21 ("[B]ecause there are clear differences between the two types of voting procedures, the law's distinction is proper."); *Rokita*, 458 F. Supp. 2d at 831 ("[I]t is axiomatic that a state which allows for both in-person and absentee voting must therefore apply different requirements to these two groups of voters."); *Billups*, 439 F. Supp. 2d at 1356-57 ("[A]bsentee voting and in-person voting are inherently different processes, and both processes use different standards, practices, and procedures.").

Plaintiffs argue that while absentee and mail-in voting "is a fundamentally different process from in-person voting," Defendants have "no justification in this instance to create such an arbitrary and disparate rule between absentee/mail-in voters and in-person voters." [ECF 509, p. 51]. Not so.

***62** Because of the "inherent" differences between in-person voting and mail-in and absentee voting, Pennsylvania's requirement for signature comparison for in-person ballots, but not mail-in and absentee ballots, is not arbitrary. By way of example, Secretary Boockvar articulated several valid reasons why Pennsylvania implements different verification procedures for mail-in and absentee voters versus in-person voters. [ECF 504-12; ECF 549-2].

In her deposition, Secretary Boockvar explained that for in-person voters, the only possible verification is signature comparison and verification. [ECF 504-12, 55:19-56:19]. This is because, unlike mail-in and absentee voters who must apply for a ballot, in-person voters may simply show up at the polls on Election Day and vote. In contrast, for mail-in and absentee voters, there are several verification steps implemented before the voter's mail-in/absentee ballot is counted, such as checking their application and their drivers' license number or social security number. [*Id.* at 56:8-19]. Thus, counties don't need to resort to a signature comparison to identify and verify the mail-in or absentee voter.

This is important, as Defendants and Intervenors present valid concerns about the uniformity and equality of signature comparisons, in part, due to the technical nature of signature analysis, the subjective underpinnings of signature analysis, and the variety of reasons that signatures can naturally change over time. [ECF 549-2, pp. 19-20, ¶ 68; ECF 549-9, p. 20, ¶¶ 63-64]. Such factors can reasonably justify not requiring a signature comparison when the elector is not physically present.

For example, Secretary Boockvar notes the concern with non-handwriting-expert election officials comparing signatures, without uniform standards. [ECF 549-2, pp. 19-20, ¶ 68]. She also notes that people's signatures can change over time, due to natural and unavoidable occurrences, like injuries, arthritis, or the simple passage of time. [*Id.*]. Such reasons are valid and reasonable. *See Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *34 (Wecht, J. concurring) ("Signature comparison is a process fraught with the risk of error and inconsistent application, especially when conducted by lay people.").

Secretary Boockvar further asserts that signature comparison is justified for in-person voting, but not mail-in or absentee voting, because the in-person voter is notified of his or her signature deficiency, and afforded an opportunity to cure. [ECF 549-2, pp. 19-20, ¶¶ 66-68 (explaining that in-person voters can be immediately notified of the signature deficiency, but mail-in/absentee voters cannot)]. Secretary Boockvar's justifications are consistent with the Election Code's framework.

When a voter votes in person, he or she signs the voter's certificate, and the election official immediately, in the voter's presence, verifies the signature. 25 P.S. § 3050(a.3)(1)-(2). If the election official finds the signature to be problematic, the in-person voter is told as such. *Id.* at § 3050(a.3)(2). Notably, however, the in-person voter may still cast a ballot. *Id.* ("[I]f the signature on the voter's certificate ... shall not be deemed authentic by any of the election officers, such elector shall not be denied the right to vote for that reason[.]"). The in-person voter whose signature is questioned must, after casting the ballot, "produce at least one qualified elector of the election district as a witness, who shall make affidavit of his identity or continued residence in the election district." *Id.* at § 3050(d). Thus, the in-person voter whose signature is not verified is immediately notified, is still allowed to cast a ballot, and is given the opportunity to remedy the signature-deficiency.

***63** In contrast, a voter who casts a mail-in or absentee ballot cannot be afforded this opportunity. Absentee and mail-in ballots are kept in "sealed or locked containers" until they are "canvassed by the county board of elections." 25 P.S. § 3146.8(a). The pre-canvassing and canvassing cannot begin until Election Day. *Id.* at § 3146.8(g)(1.1)-(2). As such, the absentee and mail-in ballots cannot be verified until Election Day, regardless of when the voter mails the ballot. Further, even if there were sufficient time, a voter cannot cure these

types of deficiencies on their mail-in or absentee ballot. *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *20 ("[A]lthough the Election Code provides the procedures for casting and counting a vote by mail, it does not provide for the "notice and opportunity to cure" procedure sought by Petitioner.").

Therefore, if mail-in and absentee ballots were subject to signature comparison, an election official—who is unstudied in the technical aspects of signature comparison—could deem a voter's signature problematic and not count the ballot, which would effectively disenfranchise that voter. Unlike the in-person voter, the mail-in or absentee voter may not know that his or her signature was deemed inauthentic, and thus may be unable to promptly cure the deficiency even if he or she were aware.

Accordingly, the Court concludes that the inherent differences and opportunities afforded to in-person voters compared to mail-in and absentee voters provides sufficient reason to treat such voters differently regarding signature comparison. The Court concludes that the lack of signature comparison for mail-in and absentee ballots is neither arbitrary, nor burdens Plaintiffs' equal-protection rights.

For these reasons, the Court will dismiss Plaintiffs' federal equal-protection claims related to signature comparison.

3. The Election Code provisions related to signature comparison satisfy *Anderson*-*Burdick*.

Finally, even assuming the Election Code's absence of a signature-comparison requirement imposes some burden on Plaintiffs' constitutional rights, Plaintiffs' constitutional claims still fail.

As discussed above with respect to Defendants' drop-box implementation, *Anderson*-*Burdick* does not apply neatly to this claim either. This is because Plaintiffs aren't challenging a specific regulation affecting their right to vote, but are instead challenging the ***lack*** of a restriction on someone else's right to vote. This makes both the burden difficult to assess and also the state's interests in ***not*** doing something more abstract. As such, the Court finds that the proper application of the *Anderson*-*Burdick* framework here includes weighing the burden involving Plaintiffs' risk of vote dilution against the state's interests and overall plan in preventing against voter fraud, including with respect to forged mail-in ballots.

Weighing these considerations compels a conclusion that there is no constitutional violation here. With respect to any burden on Plaintiffs' right to vote, that burden is slight, at best. A failure to engage in a signature comparison may, crediting Plaintiffs' evidence, increase the risk of voter fraud. But even then, this remains a largely speculative concern. This burden too is lessened by the numerous other regulations imposed by the Election Code, including the detailed verification procedure as to the information on mail-in ballots (discussed above), and the deterrence furthered by criminal sanctions for those engaging in such voter fraud.

Against these burdens, the Commonwealth has precise and weighty interests in verifying ballot applications and ballots in an appropriate manner to ensure that they are accurate. As discussed above, the Commonwealth determined that the risk of disenfranchising mail-in and absentee voters, did not justify signature comparison for those voters. [ECF 549-2, pp. 19-20, ¶¶ 66-69]. Unlike for in-person voters, there are other means of identifying and verifying mail-in and absentee voters, such as having to specifically apply for a mail-in or absentee ballot and provide various categories of identifying information. [ECF 504-12, 55:19-56:19]; 25 P.S. §§ 3146.2(b), 3150.12(b). And ultimately, due to the slight burden imposed on Plaintiffs, Pennsylvania's regulatory interests in a uniform election pursuant to established procedures is sufficient to withstand scrutiny. *Timmons*, 520 U.S. at 358, 117 S.Ct. 1364.

***64** The General Assembly opted not to require signature comparisons for mail-in and absentee ballots and applications. And as previously discussed, absent extraordinary reasons to, the Court is not to second-guess the legislature.

IV. Defendants and Intervenors are entitled to summary judgment on Plaintiffs' as-applied, federal constitutional challenge to the county-residency requirement for poll watchers.

Plaintiffs next take exception with the provision of the Election Code that restricts a registered voter from serving as a poll watcher outside the county of his or her residence. [ECF 461, ¶ 217].

Plaintiffs argue that "[a]s applied to the 2020 General Election, during the midst of the COVID-19 pandemic, Pennsylvania's residency requirement for watchers violates equal protection." [ECF 509, p. 58]. That's because, according

to Plaintiffs, the "current pandemic severely challenges the ability of parties to staff watchers[.]" [*Id.* at p. 60]. And not having enough poll watchers in place "puts into danger the constitutionally-guaranteed right to a transparent and undiluted vote," [*id.* at p. 68], by "fostering an environment that encourages ballot fraud or tampering," [ECF 461, ¶ 256]. As such, Plaintiffs believe that the county residency requirement "is not rationally connected or reasonably related to any interest presented by the Commonwealth." [ECF 509, p. 63].

Defendants and Intervenors have a markedly different view.

As an initial matter, the Democratic Intervenors argue that Plaintiffs "are precluded from relitigating their claim that the Commonwealth lacks a constitutionally recognized basis for imposing a county-residence restriction for poll watchers" based on the doctrine articulated in *England v. Louisiana State Bd. of Med. Examiners*, 375 U.S. 411, 84 S.Ct. 461, 11 L.Ed.2d 440 (1964). [ECF 529, p. 16]. That doctrine requires that after a federal court has abstained under *Pullman*, the plaintiff must expressly reserve the right to litigate any federal claims in federal court while litigating state-law issues in state court. *England*, 375 U.S. at 419, 421-22, 84 S.Ct. 461. Defendants and Intervenors contend that Plaintiffs (specifically, the Trump Campaign, the RNC, and the Republican Party) failed to do so in the proceedings before the Pennsylvania Supreme Court.

And if the *England* doctrine doesn't bar this claim, Defendants and Intervenors argue that "Plaintiffs' as-applied challenge simply fails to state a constitutional claim." *See, e.g.*, [ECF 547, p. 65]. They believe that the county-residency requirement does not infringe on a fundamental right or regulate a suspect classification (such as race, sex, or national origin). [*Id.*]. As a result, the Commonwealth need only provide a rational basis for the requirement, which Defendants and Intervenors believe the Commonwealth has done. [*Id.*].

After carefully reviewing the record and considering the parties' arguments and evidence, the Court finds that the *England* doctrine does not bar Plaintiffs' ability to bring this claim. Even so, after fully crediting Plaintiffs' evidence, the Court agrees with Defendants and Intervenors that Plaintiffs' as-applied challenge fails on the merits.

A. The *England* doctrine does not bar Plaintiffs' federal challenge to the county-residency requirement.

***65** In *England*, the Supreme Court established that after a federal court abstains under *Pullman*, "if a party freely and without reservation submits his federal claims for decision by the state courts, litigates them there, and has them decided there, then ... he has elected to forgo his right to return to the District Court." 375 U.S. at 419, 84 S.Ct. 461. To reserve those rights, a plaintiff forced into state court by way of abstention must inform the state court that he is exposing the federal claims there only to provide the proper context for considering the state-law questions. *Id.* at 421, 84 S.Ct. 461. And that "he intends, should the state court[ ] hold against him on the question of state law, to return to the District Court for disposition of his federal contentions." *Id.* Essentially, in *England*, the Supreme Court created a special doctrine of *res judicata* for *Pullman* abstention cases.

The Democratic Intervenors argue that because none of the three Plaintiffs who participated in the Pennsylvania Supreme Court case as either intervenors or *amici* "reserved the right to relitigate [Plaintiffs' poll-watcher claim] in federal court," they are now "precluded" from doing so. [ECF 529, p. 17]. The Court is not convinced that this doctrine bars Plaintiffs' claim for at least two reasons.

First, in its original abstention decision, the Court noted that "[n]one of Plaintiffs' poll-watching claims directly ask the Court to construe an ambiguous state statute." [ECF 409, p. 24]. Instead, these claims resided in a *Pullman* gray area, because they were only indirectly affected by other unsettled state-law issues. In light of that, the Court finds that the *England* doctrine was not "triggered," such that Plaintiffs needed to reserve their right to return to federal court to litigate the specific as-applied claim at issue here.

Second, even if it were triggered, not all of the Plaintiffs here were parties in the Pennsylvania Supreme Court case, and only one (the Republican Party) was even given intervenor status. But even the Republican Party, acting as an intervenor, did not have an opportunity to develop the record or present evidence relevant to its as-applied challenge. Thus, this claim wasn't "fully litigated" by any of the Plaintiffs, which is a necessary condition for the claim to be barred under the *England* doctrine. *Cf. Bradley v. Pittsburgh Bd. of Educ.*, 913 F.2d 1064, 1073 (3d Cir. 1990) (explaining that a litigant "may not relitigate an issue s/he fully and unreservedly litigated in state court").

Thus, Plaintiffs are not precluded by the *England* doctrine from bringing their remaining as applied poll-watcher claim. The Court will now address the claim on the merits.

B. The county-residency requirement, as applied to the facts presented and the upcoming general election, does not violate the U.S. Constitution.

Originally, Plaintiffs raised a facial challenge to the county-residency requirement under 25 P.S. § 2687. That is, Plaintiffs first took the position that there was no conceivable constitutional application of the requirement that an elector be a resident of the county in which he or she seeks to serve. But, as Plaintiffs' concede, that facial challenge is no longer viable in light of the Pennsylvania Supreme Court's recent decision. [ECF 448, p. 10]. As a result, Plaintiffs now focus solely on raising an as-applied challenge to the county-residency requirement.

"[T]he distinction between facial and as-applied challenges is not so well defined that it has some automatic effect or that it must always control the pleadings and disposition in every case involving a constitutional challenge." *Citizens United v. Fed. Election Comm'n*, 558 U.S. 310, 331, 130 S.Ct. 876, 175 L.Ed.2d 753 (2010).

At a fundamental level, a "facial attack tests a law's constitutionality based on its text alone and does not consider the facts or circumstances of a particular case. *United States v. Marcavage*, 609 F.3d 264, 273 (3d Cir. 2010). By contrast, an "as-applied attack" on a statute "does not contend that a law is unconstitutional as written but that its application to a particular person under particular circumstances deprived that person of a constitutional right." *Id.* The distinction between facial and an as-applied attack, then, "goes to the breadth of the remedy employed by the Court, not what must be pleaded in a complaint." *Citizens United*, 558 U.S. at 331, 130 S.Ct. 876; *see also Bruni v. City of Pittsburgh*, 824 F.3d 353, 362 (3d Cir. 2016) ("The distinction between facial and as-applied constitutional challenges, then, is of critical importance in determining the remedy to be provided).

***66** Because the distinction is focused on the available remedies, not the substantive pleading requirements, "[t]he substantive rule of law is the same for both challenges." *Edwards v. D.C.*, 755 F.3d 996, 1001 (D.C. Cir. 2014); *see also Pursuing Am.'s Greatness v. Fed. Election Comm'n*, 831 F.3d 500, 509, n.5 (D.C. Cir. 2016) ("Indeed, the substantive rule of law is the same for both as-applied and facial First Amendment challenges.") (cleaned up); *Legal Aid Servs. of Or. v. Legal Servs. Corp.*, 608 F.3d 1084, 1096 (9th Cir. 2010) ("The underlying constitutional standard, however, is no different [in an as-applied challenge] th[a]n in a facial challenge.").

"In other words, *how* one must demonstrate the statute's invalidity remains the same for both type of challenges, namely, by showing that a specific rule of law, usually a constitutional rule of law, invalidates the statute, whether in a personal application or to all." *Brooklyn Legal Servs. Corp. v. Legal Servs. Corp.*, 462 F.3d 219, 228 (2d Cir. 2006), *abrogated on other grounds by Bond v. United States*, 564 U.S. 211, 131 S.Ct. 2355, 180 L.Ed.2d 269 (2011).

In determining whether a state election law violates the U.S. Constitution, the Court must "first examine whether the challenged law burdens rights protected by the First and Fourteenth Amendments." *Patriot Party of Allegheny Cnty. v. Allegheny Cnty. Dep't of Elections*, 95 F.3d 253, 258 (3d Cir. 1996). "Where the right to vote is not burdened by a state's regulation on the election process, ... the state need only provide a rational basis for the statute." *Cortés*, 218 F. Supp. 3d at 408. The same is true under an equal protection analysis. "If a plaintiff alleges only that a state treated him or her differently than similarly situated voters, without a corresponding burden on the fundamental right to vote, a straightforward rational basis standard of review should be used." *Obama*, 697 F.3d at 428 (6th Cir. 2012); *see also Biener*, 361 F.3d at 214-15 (applying rational basis where there was no showing of an "infringement on the fundamental right to vote."); *Donatelli*, 2 F.3d at 515 ("A legislative classification that does not affect a suspect category or infringe on a fundamental constitutional right must be upheld against equal protection challenge if there is any reasonably conceivable state of facts that could provide a rational basis for the classification." (cleaned up)).

But where the law imposes at least some burden on protected rights, the court "must gauge the character and magnitude of the burden on the plaintiff and weigh it against the importance of the interests that the state proffers to justify the burden." *Patriot Party*, 95 F.3d at 258 (citations omitted).

Consistent with the Pennsylvania Supreme Court's recent decision, but now based on a complete record, this Court finds that the county-residency requirement for poll watching does not, as applied to the particular circumstances of this election, burden any of Plaintiffs' fundamental constitutional rights, and so a deferential standard of review should apply.

See Boockvar, —— A.3d at ——, 2020 WL 5554644, at *30. Under a rational-basis review and considering all the relevant evidence before the Court, the county-residency requirement is rational, and thus constitutional. But even if the requirement burdened the right to vote, that burden is slight—and under the *Anderson-Burdick* test, the Commonwealth's interests in a county-specific voting system, viewed in the context of its overall polling-place security measures, outweigh any slight burden imposed by the county-residency restriction.

1. The county-residency requirement neither burdens a fundamental right, including the right to vote, nor discriminates based on a suspect classification.

***67** At the outset, "there is no individual constitutional right to serve as a poll watcher[.]" *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *30 (citing *Cortés*, 218 F. Supp. 3d at 408); *see also Dailey v. Hands*, No. 14-423, 2015 WL 1293188, at *5 (S.D. Ala. Mar. 23, 2015) ("[P]oll watching is not a fundamental right protected by the First Amendment."); *Turner v. Cooper*, 583 F. Supp. 1160, 1162 (N.D. Ill. 1983) ("Plaintiffs have cited no authority ..., nor have we found any, that supports the proposition that [the plaintiff] had a first amendment right to act as a poll watcher.").

"State law, not the Federal Constitution, grants individuals the ability to serve as poll watchers and parties and candidates the authority to select those individuals." *Cortés*, 218 F. Supp. 3d at 414; *see also Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *30 (the right to serve as a poll watcher "is conferred by statute"); *Tiryak v. Jordan*, 472 F. Supp. 822, 824 (E.D. Pa. 1979) ("The number of poll-watchers allowed, the manner of their appointment, their location within the polling place, the activities permitted and the amount of compensation allowed are all dictated by [25 P.S. § 2687]."). Given the nature of the right, "[i]t is at least arguable that the [Commonwealth of Pennsylvania] could eliminate the position of poll watcher" without offending the constitution. *Cotz v. Mastroeni*, 476 F. Supp. 2d 332, 364 (S.D.N.Y. 2007). In fact, one neighboring state—West Virginia—has eliminated poll watchers. W. Va. Code Ann. § 3-1-37; W. Va. Code Ann. § 3-1-41.

Nor does the county-residency requirement hinder the "exercise of the franchise." *Cortés*, 218 F. Supp. 3d at 408. It doesn't in any way limit voters' "range of choices in the voting booth"—voters can still "cast ballots for whomever they wish[.]" *Id.* And, as Plaintiffs admit, the county-residency requirement doesn't make the actual act of casting a vote any harder. *See* [ECF 524-24, 67:1-6]. Indeed, at least one of the plaintiffs here, Representative Joyce, testified that he was unaware of anyone unable to cast his ballot because of the county-residency requirement for poll watchers [*Id.*].

Finally, Plaintiffs' claim that Pennsylvania's "poll watching system" denies them "equal access" to the ability to observe polling places in the upcoming election does not, on its own, require the Court to apply anything other than rational-basis scrutiny. [ECF 551, p. 75]. To the extent Plaintiffs are denied equal access (which discussed below, as a matter of evidence, is very much in doubt), it isn't based on their membership in any suspect classification.

For a state law to be subject to strict scrutiny, it must not only make a distinction among groups, but the distinction must be based on inherently suspect classes such as race, gender, alienage, or national origin. *See City of Cleburne v. Cleburne Living Ctr.*, 473 U.S. 432, 439-40, 105 S.Ct. 3249, 87 L.Ed.2d 313 (1985). Political parties are not such a suspect class. *Greenville Republican Party*, 824 F. Supp. 2d at 669 ("[T]his court is unfamiliar with, and Plaintiffs have not cited, any authority categorizing political parties as an inherently suspect class.") Likewise, "[c]ounty of residence is not a suspect classification warranting heightened scrutiny[.]" *Short*, 893 F.3d at 679.

Plaintiffs don't dispute this. [ECF 509, p. 65 ("To be clear, the right at issue here is the right of **candidates** and **political parties** to participate in an election where the process is transparent and open to observation and the right of the **voters** to participate in such election." (emphasis in original))]. Rather, Plaintiffs' theory as to how the county-residency requirement burdens the right to vote is based on the same threat of vote dilution by fraud that they have advanced with their other claims. In other words, Plaintiffs' claim that the county-residency requirement for poll watchers limits the ability to find poll watchers, which, in turn, limits the ability for poll watchers to detect fraud and ballot tampering. [ECF 461, ¶¶ 256-57]. The resulting fraudulent or destroyed ballots cause the dilution of lawfully cast ballots. [ECF 509, pp. 64-68].

***68** Thus, based on this theory, to establish the burden flowing from the county-residency restriction, Plaintiffs must show (1) the county-residency requirement prevents them from recruiting enough registered Republican poll watchers in every county, (2) the absence of these Republican poll

watchers creates a material risk of increased fraud and ballot tampering, and (3) this risk of fraud and ballot tampering will dilute the value of honestly cast votes.

There are both factual and legal problems fatal to Plaintiffs' vote-dilution theory in this context. Factually, Plaintiffs' evidence, accepted as true, fails to establish that they cannot find enough poll watchers because of the county-residency requirement. But even if they made that factual showing, the inability to find poll watchers still does not burden any recognized constitutional right in a way that would necessitate anything more than deferential review.

2. Plaintiffs' evidence does not establish any factual predicate for their theory.

Even accepting as true Plaintiffs' version of events, Plaintiffs have not established that the county-residency requirement is responsible for an inability to find enough poll watchers for at least two reasons.

First, Plaintiffs' evidence stops short of demonstrating any actual shortfall of desired poll watchers.

For example, in his declaration, James J. Fitzpatrick, the Pennsylvania Director for Election Day Operations for the Trump Campaign, stated only that the "Trump Campaign is ***concerned*** that due to the residency restriction, it will not have enough poll watchers in certain counties." [ECF 504-2, ¶ 25 (emphasis added)]. Notably, however, Mr. Fitzpatrick, even when specifically asked during his deposition, never identified a single county where the Trump Campaign has ***actually*** tried and failed to recruit a poll watcher because of the county-residency requirement. *See, e.g.*, [ECF 528-14, 261:21-25] ("Q: Which counties does the Trump campaign or the RNC contend that they will not be able to obtain what you refer to as full coverage of poll watchers for the November 2020 election? A: I'm not sure. I couldn't tell you a list.").

Nor do any of Plaintiffs' other witness declarations establish an actual, inability to recruit poll watchers in any specific county. Representative Reschenthaler stated only that he was "concerned" that he "will not be able to recruit enough volunteers from Greene County to watch the necessary polls in Greene County." [ECF 504-6, ¶ 12].

Representative Kelly stated that he was "likely to have difficulty getting enough poll watchers from within Erie County to watch all polls within that county on election day." [ECF 504-5, ¶ 16]. "Likely difficulty" isn't the same as an "actual inability." That aside, the declaration doesn't provide any basis for Representative Kelly's assessment of this "likely difficulty." Nowhere does he detail the efforts he took (*e.g.*, the outreach he tried, prospective candidates he unsuccessfully recruited, and the like), nor did he explain why those efforts aren't likely to succeed in the future.

The same goes for Representative Thompson's declaration. Representative Thompson stated that during some unspecified prior elections, unidentified parties and campaigns did not "always find enough volunteers to serve as poll watchers in each precinct." [ECF 504-4, ¶ 20]. But this undetailed statement doesn't help Plaintiffs' cause, because it doesn't identify the elections during which this was a problem, the parties and campaigns affected by a lack of poll watchers, or the precincts for which no poll watcher could be found.

***69** Representative Joyce's declaration doesn't even express a "concern" about "likely difficulty" in recruiting poll watchers. He simply stated his belief that "[p]oll watchers play a very important role in terms of protecting the integrity of the election process[.]" [ECF 504-7, ¶ 11]. While he may be right, it has no bearing on whether Plaintiffs can find enough people to play that "very important role."

Indeed, Plaintiffs' prediction that they will "likely" have difficulty finding poll watchers is belied by the uncontested Pennsylvania voter registration statistics for 2019 that they included as an exhibit to their summary-judgment brief. [ECF 504-34]. Those statistics suggest that there is no shortage of registered Republican voters who are qualified to serve as poll watchers. [*Id.*]. Even in the three specific counties in which Plaintiffs warn that "Democratic registered voters out-number ... their Republican counterparts" (*i.e.*, Philadelphia, Delaware, and Centre), there are still significant numbers of registered Republicans. *See* [ECF 504-34 (Philadelphia – 118,003; Delaware – 156,867; and Centre – 42,903)]. And only a very small percentage of the registered Republicans would be needed to fill all the necessary poll watcher positions in those allegedly problematic counties. *See, e.g.*, *Cortés*, 218 F. Supp. 3d at 410 (noting that, in 2016, the Republican Party "could staff the entirety of the poll watcher allotment in Philadelphia county with just 4.1% of the registered Republicans in the county."). While Plaintiffs argue that these statistics don't show the number of registered Republicans *willing* to serve as a poll watcher, the Court is hard pressed to see, nor do Plaintiffs show, how among the

tens—or hundreds—of thousands of registered Republicans in these counties, Plaintiffs are unable to find enough poll workers.[20]

Plaintiffs have not presented any evidence that would explain how, despite these numbers, they will have a hard time finding enough poll watchers. In fact, Plaintiffs' own expert, Professor Lockerbie, admits that "the Democratic and Republican parties might be able to meet the relevant criteria and recruit a sufficient population of qualified poll watchers who meet the residency requirements[.]" [ECF 504-20, ¶ 16].

Professor Lockerbie's report makes clear, and Plaintiffs appear to agree, that the county-residency requirement only potentially burdens other, "minor" political parties' ability to recruit enough poll watchers. [ECF 509, p. 61 (citing ECF 504-20, ¶¶ 16-17)]. Regardless, any burden on these third parties is not properly before the Court. They are not parties to this litigation, and so the Court doesn't know their precise identities, whether they have, in fact, experienced any difficulty in recruiting poll watchers, or, more fundamentally, whether they even want to recruit poll watchers at all.[21]

***70** Additionally, Plaintiffs failed to present evidence that connects the county-residency requirement to their inability to find enough poll watchers. To succeed on their theory Plaintiffs cannot just point to difficulty recruiting poll watchers, they need to also show that "Section 2687(b) is responsible for their purported staffing woes." *Cortés*, 218 F. Supp. 3d at 410. Plaintiffs fail to show this, too.

Plaintiffs argue that the ongoing COVID-19 pandemic greatly reduces the number of people who would be willing to serve as a poll watcher, which further exacerbates the alleged problem caused by the county-residency requirement. [ECF 509, p. 60]. The primary problem with this argument, though, is that Plaintiffs have not presented any evidence to support it. Plaintiffs have not put forward a statement from a single registered voter who says they are unwilling to serve as a poll watcher due to concerns about contracting COVID-19.

Despite this shortcoming, the Court also acknowledges that COVID-19 generally has made it more difficult to do anything in person, and it is entirely plausible that the current pandemic will limit Plaintiffs from recruiting poll watchers to man polling places on election day. But that is likely true for just about every type of election rule and regulation. For example, the effects of the ongoing pandemic coupled with the requirement that the poll watcher be a registered voter (a requirement that unquestionably narrows the pool of potential candidates) would also make it harder to recruit poll watchers. There is no basis to find that the current public-health conditions, standing alone, render the county-residency requirement irrational or unconstitutional.

To bolster their concerns over COVID-19, Plaintiffs point to *Democratic Nat'l Committee v. Bostelmann*, No. 20-249, —— F.Supp.3d ——, 2020 WL 5627186 (W.D. Wis. Sept. 21, 2020), where the court there enjoined Wisconsin's statute that requires that each election official (*i.e.*, poll worker) be an elector of the county in which the municipality is located. That case is distinguishable in at least two important ways.

First, *Bostelmann* concerned poll ***workers***, not poll ***watchers***. *Id.* at ——, 2020 WL 5627186, at *7. The difference between the two is significant. Poll workers are a more fundamental and essential aspect of the voting process. Without poll workers, counties cannot even open polling sites, which creates the possibility that voters will be completely disenfranchised. In fact, in *Bostelmann*, the plaintiffs presented evidence that Milwaukee was only able to open 5 of its normal 180 polling places. *Id.* A failure to provide voters a place to vote is a much more direct and established constitutional harm than the one Plaintiffs allege here.

Second, the plaintiffs in *Bostelmann* actually presented evidence that they were unable to find the poll workers they needed due to the confluence of the COVID-19 pandemic and the challenged restriction. *Id.* As discussed above, Plaintiffs here have presented no such evidence.

To succeed on summary judgment, Plaintiffs need to move beyond the speculative concerns they offer and into the realm of proven facts. But they haven't done so on two critical fronts —they haven't shown an actual inability to find the necessary poll watchers, or that such an inability is caused by the county-residency requirement. Because Plaintiffs have not pointed to any specific "polling place that Section 2687(b) prevents [them] from staffing with poll watchers," Plaintiffs' theory of burden is doomed at launch. *Cortés*, 218 F. Supp. 3d at 409.

3. Even if Plaintiffs could establish a factual predicate for their theory, it would fail as a matter of law.

***71** As the Pennsylvania Supreme Court concluded last month, Plaintiffs' "speculative claim that it is 'difficult' for

both parties to fill poll watcher positions in every precinct, ***even if true***, is insufficient to transform the Commonwealth's uniform and reasonable regulation requiring that poll watchers be residents of the counties they serve into a non-rational policy choice." *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *30 (emphasis added).[22] The fundamental constitutional principles undergirding this finding are sound.

Plaintiffs' only alleged burden on the right to vote is that Defendants' lawful imposition of a county-residency requirement on poll watching will result in an increased risk of voter irregularities (*i.e.*, ballot fraud or tampering) that will, in turn, potentially cause voter dilution. While vote dilution is a recognized burden on the right to vote in certain contexts, such as when laws are crafted that structurally devalue one community's or group of people's votes over another's, there is no authority to support a finding of burden based solely on a speculative, future possibility that election irregularities might occur. *See, e.g.*, *Minnesota Voters,* 720 F.3d at 1033 (affirming dismissal of claims "premised on potential harm in the form of vote dilution caused by insufficient pre-election verification of EDRs' voting eligibility and the absence of post-election ballot rescission procedures"); *Common Cause Rhode Island v. Gorbea*, 970 F.3d 11, 15 (1st Cir. 2020) (rejecting the claim that a ballot witness signature requirement should not be enjoined during a pandemic because it would allegedly increase the risk of voter fraud and put Republican candidates at risk); *Cook Cnty. Rep. Party v. Pritzker*, No. 20-4676, 2020 WL 5573059, at *4 (N.D. Ill. Sept. 17, 2020) (denying a motion to enjoin a law expanding the deadline to cure votes because plaintiffs did not show how voter fraud would dilute the plaintiffs' votes).

Without a recognized burden on the right to vote, Plaintiffs' "argument that the defendants did not present an adequate justification is immaterial." *Green Party of Tennessee v. Hargett*, No. 16-6299, 2017 WL 4011854, at *4 (6th Cir. May 11, 2017). That's because the Court need not apply the *Anderson-Burdick* framework, and its intermediate standards, in this situation. *See Donatelli*, 2 F.3d at 514 & n.10. Instead, just as the Pennsylvania Supreme Court held, the Commonwealth here need only show "that a rational basis exists [for the county-residency requirement] to be upheld. *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *30 (citing *Cortes*, 218 F. Supp. 3d at 408); *see also Voting for Am., Inc. v. Andrade*, 488 F. App'x 890, 899 (5th Cir. 2012) (applying rational basis review as opposed to the *Anderson-Burdick* balancing test because state election law did not implicate or burden specific constitutional rights); *McLaughlin v. North Carolina Bd. of Elections*, 65 F.3d 1215, 1227 (4th Cir. 1995) (concluding that a ballot access law "fails the *Anderson* balancing test only if it also does in fact burden protected rights").

***72** "Under rational-basis review, the challenged classification must be upheld 'if there is any reasonably conceivable state of facts that could provide a rational basis for the classification.' " *Donatelli*, 2 F.3d at 513 (quoting *FCC v. Beach Commc'ns, Inc.*, 508 U.S. 307, 313, 113 S.Ct. 2096, 124 L.Ed.2d 211 (1993)). "This standard of review is a paradigm of judicial restraint." *FCC*, 508 U.S. at 314, 113 S.Ct. 2096. It "is not a license for courts to judge the wisdom, fairness, or logic of legislative choices." *Id.* at 313, 113 S.Ct. 2096. Nor is it the Court's "place to determine whether the [General Assembly's decisions] were the best decisions or even whether they were good ones." *Donatelli*, 2 F.3d at 518.

Applying this deferential standard of review, the Pennsylvania Supreme Court found that given Pennsylvania's "county-based scheme for conducting elections, it is reasonable that the Legislature would require poll watchers, who serve within the various counties of the state, to be residents of the counties in which they serve." *Boockvar*, —— A.3d at ——, 2020 WL 5554644, at *30 (citing *Cortés*, 218 F. Supp. 3d at 409). The Court agrees.

There are multiple reasons for this. As Secretary Boockvar advises, "[b]y restricting poll watchers' service to the counties in which they actually reside, the law ensures that poll watchers should have some degree of familiarity with the voters they are observing in a given election district." [ECF 549-2, p. 22, ¶ 78]. In a similar vein, Intervenors' expert, Dr. Barreto, in his report, states that, voters are more likely to be comfortable with poll watchers that "they know and they recognize from their area." [ECF 524-1, ¶40 ("Research in political science suggests that voters are much more comfortable and trusting of the process when they know or are familiar with poll workers who are from their community.")]. When poll watchers come from the community, "there is increased trust in government, faith in elections, and voter turnout[.]" [*Id.*].

At his deposition, Representative Kelly agreed with this idea: "Yeah, I think – again, depending how the districts are established, I think people are probably even more comfortable with people that they – that they know and they recognize from their area." [ECF 524-23, 111:21-25].

Whether requiring poll watchers to be residents of the county in which they will serve is the best or wisest rule is not the issue before the Court. The issue is whether that rule is *reasonable* and rationally advances Pennsylvania's legitimate interests. This Court, like multiple courts before it, finds that it does.

4. Plaintiffs' poll-watcher claim fails under the *Anderson*-*Burdick* framework.

Even if rational-basis review did not apply and Plaintiffs had established a burden on their right to vote, their claim nonetheless fails under the *Anderson*-*Burdick* framework.

Viewing Plaintiffs' evidence in the best possible light, at most, the county-residency requirement for poll watching places only an indirect, ancillary burden on the right to vote through an elevated risk of vote dilution.

Against this slight burden, the Commonwealth has sound interests in imposing a county-residency requirement, including, as noted above, local familiarity with rules, regulations, procedures, and the voters. Beyond this, in assessing the Commonwealth's interest in imposing the county-based restriction, that interest must be viewed in the overall context of the Commonwealth's security measures involving polling places that are designed to prevent against fraud and vote dilution.

As the court in *Cortés* recognized, "while poll watchers may help guard the integrity of the vote, they are not the Election Code's only, or even best, means of doing so." 218 F. Supp. 3d at 404.

***73** Each county has the authority to investigate fraud and report irregularities to the district attorney. 25 P.S. § 2642(i). Elections in each district are conducted by a multimember election board, which is comprised of an election judge, a majority inspector, and a minor inspector. 25 P.S. § 2671. Each voting district may also use two overseers of election, who are appointed from different political parties by the Pennsylvania Courts of Common Pleas, and "carry greater authority than poll watchers." *Cortés*, 218 F. Supp. 3d at 403 (citing 25 P.S. § 2685). "Election overseers have the right to be present with the officers of an election 'within the enclosed space during the entire time the ... election is held." *Id.* "Poll watchers have no such right," they must "remain 'outside the enclosed space' where ballots are counted or voting machines canvassed." *Id.* (citing 25 P.S. § 2687(b)). Election overseers can also challenge any person offering to vote, while poll watchers have no such authority. 25 P.S. § 2687. For these reasons, concerns "over potential voter fraud —whether perpetrated by putative electors or poll workers themselves—appear more effectively addressed by election overseers than poll watchers[.]" *Id.* at 406.

Plaintiffs complain that poll watchers may not be present during the pre-canvass and canvass meetings for absentee and mail-in ballots. But the Election Code provides that "authorized representatives" of each party ***and*** each candidate can attend such canvassing. 25 P.S. § 3146.8(g)(1.1), (2). That means if, for example, 15 Republican candidates appear on ballots within a particular county (between both the state and federal elections), there could be up to 16 "authorized representatives" related to the Republican Party (one for each candidate and one for the party as a whole) present during canvassing. Adding poll watchers to that mix would just be forcing unnecessary cooks into an already crowded kitchen.[23] *See* [ECF 549-2, p. 23, ¶ 83 ("If every certified poll watcher within a county was permitted to attend the pre-canvass meeting, the elections staff could be overwhelmed by the vast numbers of poll watchers, and the pre-canvassing process could become chaotic and compromised.")].

***74** Further, Secretary Boockvar testified that Pennsylvania has adopted new voting systems that will provide an additional layer of security. [ECF 524-27, 237:21-238:11]. That is, there will now be a paper trail in the form of verifiable paper ballots that will allow voters to confirm their choice, and the state recently piloted a new program that will help ensure that votes can be properly verified. [*Id.*].

On balance, then, it is clear that to the extent any burden on the right to vote exists, it is minimal. On the other hand, the Commonwealth's interest in a county-specific voting system, including with county-resident poll watchers, is rational and weighty, particularly when viewed in the context of the measures that the Commonwealth has implemented to prevent against election fraud at the polls. As such, under the flexible *Anderson*-*Burdick* standard, Plaintiffs have failed to establish that the county-residency requirement is unconstitutional.

5. The Court will continue to abstain from deciding where the Election Code permits poll watching to occur.

Plaintiffs also appear to challenge any attempts to limit poll watching to "monitoring only in-person voting at the polling place on Election Day." [ECF 461, ¶ 254]. That is, in their proposed order accompanying their Motion for Summary Judgement, Plaintiffs seek a declaration that they are "permitted to have watchers present at all locations where voters are registering to vote, applying for absentee or mail-in ballots, voting absentee or mail-in ballots, and/or returning or collecting absentee or mail-in ballots, including without limitation any satellite or early voting sites established by any county board of elections." [ECF 503-1, ¶ 3].

Plaintiffs also argue that Secretary Boockvar's October 6, 2020, guidance expressly, and unlawfully, prohibits poll watchers from being present at county election offices, satellite offices, and designated ballot-return sites. [ECF 571].

This challenge, however, is directly related to the unsettled state-law question of whether drop boxes and other satellite locations are "polling places" as envisioned under the Election Code. If they are, then Plaintiffs may be right in that poll watchers must be allowed to be present. However, the Court previously abstained under *Pullman* in addressing this "location" claim due to the unsettled nature of the state-law issues; and it will continue to do so. [ECF 459, p. 5 ("The Court will continue to abstain under *Pullman* as to Plaintiffs' claim pertaining to the notice of drop box locations and, more generally, whether the 'polling place' requirements under the Election Code apply to drop-box locations. As discussed in the Court's prior opinion, this claim involves unsettled issues of state law.")].

Moreover, Plaintiffs have filed a lawsuit in the Court of Common Pleas of Philadelphia to secure access to drop box locations for poll watchers. The state court held that satellite ballot-collection locations, such as drop-box locations, are not "polling places," and therefore poll watchers are not authorized to be present in those places. [ECF 573-1, at p. 12]. The Trump Campaign immediately filed a notice of appeal of that decision. Regardless of what happens on appeal, Plaintiffs appear to be on track to obtain resolution of that claim in state court. [ECF 549-22]. Although this isn't dispositive, it does give the Court comfort that Plaintiffs will be able to seek timely resolution of these issues, which appear to be largely matters of state law. *See Barr v. Galvin*, 626 F.3d 99, 108 n.3 (1st Cir. 2010) ("Though the existence of a pending state court action is sometimes considered as a factor in favor of abstention, the lack of such pending proceedings does not necessarily prevent abstention by a federal court.").

V. The Court will decline to exercise supplemental jurisdiction over Plaintiffs' state-constitutional claims.

***75** In addition to the federal-constitutional claims addressed above, Plaintiffs assert violations of the Pennsylvania Constitution in Counts III, V, VII, and IX of the Second Amended Complaint. Because the Court will be dismissing all federal-constitutional claims in this case, it will decline to exercise supplemental jurisdiction over these state-law claims.

Under 28 U.S.C. § 1367(c)(3), a court "may decline to exercise supplemental jurisdiction over state law claims if it has dismissed all claims over which it has original jurisdiction[.]" *Stone v. Martin*, 720 F. App'x 132, 136 (3d Cir. 2017) (cleaned up). "It 'must decline' to exercise supplemental jurisdiction in such circumstances 'unless considerations of judicial economy, convenience, and fairness to the parties provide an affirmative justification for [exercising supplemental jurisdiction].' " *Id.* (quoting *Hedges v. Musco*, 204 F.3d 109, 123 (3d Cir. 2000) (emphasis in original)).

Courts have specifically applied this principle in cases raising federal and state constitutional challenges to provisions of the state's election code. *See, e.g., Silberberg v. Bd. of Elections of New York*, 272 F. Supp. 3d 454, 480–81 (S.D.N.Y. 2017) ("Having dismissed plaintiffs' First and Fourteenth Amendment claims, the Court declines to exercise supplemental jurisdiction over plaintiffs' state law claims."); *Bishop v. Bartlett*, No. 06-462, 2007 WL 9718438, at *10 (E.D.N.C. Aug. 18, 2007) (declining "to exercise supplemental jurisdiction over the state constitutional claim" following dismissal of all federal claims and recognizing "the limited role of the federal judiciary in matters of state elections" and that North Carolina's administrative, judicial, and political processes provide a better forum for plaintiffs to seek vindication of their state constitutional claim), *aff'd*, 575 F.3d 419 (4th Cir. 2009).

Beyond these usual reasons to decline to exercise supplemental jurisdiction over the state-constitutional claims, there are two additional reasons to do so here.

First, the parties do not meaningfully address the state-constitutional claims in their cross-motions for summary judgment, effectively treating them as coextensive with the federal-constitutional claims here. The Pennsylvania Supreme Court, however, has held that Pennsylvania's "Free

and Equal Elections" Clause is not necessarily coextensive with the 14th Amendment. *See League of Women Voters v. Commonwealth*, 645 Pa. 1, 178 A.3d 737, 812-813 (2018) (referring to the Pennsylvania Free and Equal Elections Clause as employing a "separate and distinct standard" than that under the 14th Amendment to the U.S. Constitution). Given the lack of briefing on this issue and out of deference to the state courts to interpret their own state constitution, the Court declines to exercise supplemental jurisdiction.

Second, several Defendants have asserted a defense of sovereign immunity in this case. That defense does not apply to Plaintiffs' federal-constitutional claims under the *Ex parte Young* doctrine. *See Acosta v. Democratic City Comm.*, 288 F. Supp. 3d 597, 627 (E.D. Pa. 2018) ("Here, the doctrine of *Ex parte Young* applies to Plaintiffs' constitutional claims for prospective injunctive and declaratory relief, and therefore the First and Fourteenth Amendment claims are not barred by the Eleventh Amendment. Secretary Cortés, as an officer of the Pennsylvania Department of State, may be sued in his individual and official capacities 'for prospective injunctive and declaratory relief to end continuing or ongoing violations of federal law.' "). But sovereign immunity may apply to the state-law claims, at least those against Secretary Boockvar. The possibility of sovereign immunity potentially applying here counsels in favor of declining supplemental jurisdiction to decide the state-law claims.

***76** As such, all state-constitutional claims will be dismissed without prejudice.

CONCLUSION

For the foregoing reasons, the Court will enter judgment in favor of Defendants and against Plaintiffs on all federal-constitutional claims, decline to exercise supplemental jurisdiction over the remaining state-law claims, and dismiss all claims in this case. Because there is no just reason for delay, the Court will also direct entry of final judgment under Federal Rule of Civil Procedure 54(b). An appropriate order follows.

Footnotes

1 "Drop boxes" are receptacles similar to U.S. Postal Service mailboxes. They are made of metal, and have a locking mechanism, storage compartment, and an insert or slot into which a voter can insert a ballot. *See generally* [ECF 549-9].

2 Intervenors include the Pennsylvania State Democratic Party, the League of Women Voters, the NAACP Pennsylvania State Conference, Common Cause Pennsylvania, Citizens for Pennsylvania's Future, the Sierra Club, the Pennsylvania Alliance for Retired Americans, and several affiliated individuals of these organizations.

3 As noted above, Plaintiffs and Mr. Riddlemoser use the term "voter fraud" to mean "illegal voting"—*i.e.*, voter fraud is any practice that violates the Election Code. For purposes of the Court's decision and analysis of Plaintiffs' vote-dilution claims, the Court accepts this definition.

4 The procedure for absentee ballots and applications largely resembles the procedure for mail-in ballots and applications.

5 If the application is approved, the approval is "final and binding," subject only to challenges "on the grounds that the applicant was not a qualified elector." 25 P.S. § 3150.12b(a)(2). An unqualified elector would be, for example, an individual who has not "been a citizen of the United States at least one month." Pa. Const. Art. 7, § 1; *see also* 25 P.S. § 2602(t) (defining "qualified elector" as "any person who shall possess all of the qualifications for voting now or hereafter prescribed by the Constitution of this Commonwealth, or who, being otherwise qualified by continued residence in his election district, shall obtain such qualifications before the next ensuing election").

6 In her summary-judgment brief, Secretary Boockvar argues that Plaintiffs' as-applied challenge to Pennsylvania's county-residency requirement is unripe. [ECF 547, pp. 60-63]. The Secretary reasons that Plaintiffs have not shown sufficient evidence that they are harmed by the county-residency requirement. This argument is directed more towards a lack of standing and a lack of evidence to support the claim on the merits. As the sufficiency of the evidence of harm is a separate issue from ripeness (which is more concerned with timing), the Court does not find Plaintiffs' as-applied challenge to the county-residency requirement unripe. *See Progressive Mountain Ins. Co. v. Middlebrooks*, 805 F. App'x 731, 734 (11th Cir. 2020) ("The question of ripeness frequently boils down to the same question as questions of Article III standing, but the distinction between the two is that standing focuses [on] whether the type of injury alleged is qualitatively sufficient to fulfill the requirements of Article III and whether the plaintiff has personally suffered that harm, whereas ripeness centers on whether that injury has occurred yet." (cleaned up) (citations omitted)).

7 In their briefing, the parties focused on the "capable of repetition yet evading review" exception to the mootness doctrine. The Court, however, does not find that it needs to rely on this exception. Nearing the eve of the election, it is clear that Defendants intend to engage in the conduct that Plaintiffs assert is illegal and unconstitutional. Thus, the claims are presently live, and are not "evading review" in this circumstance.

8 While Rule 65(d)(2)(C) states that an injunction binds "[non-parties] who are in active concert or participation" with the parties or the parties' agents, the Court does not find that Rule 65(d) helps the county boards. As discussed, the county boards manage the elections and implement the electoral procedures. While the Court could enjoin Secretary Boockvar, for example, from using unmanned drop boxes, each individual county election board could still use unmanned drop boxes on their own. Doing so would not result in the counties being in "active concert or participation" with Secretary Boockvar, as each county is independently managing the electoral process within their county lines. *See Marshak v. Treadwell*, 595 F.3d 478, 486 (3d Cir. 2009) ("[N]on-parties guilty of aiding or abetting or acting in concert with a named defendant or his privy in violating the injunction may be held in contempt." (cleaned up) (citations omitted)). In other words, each county elections board would not be "aiding or abetting" Secretary Boockvar in violating the injunction (which would implicate Rule 65(d)(2)(C)); rather, the counties would be utilizing their independent statutory authority to manage elections within their county lines.

9 As evidence of the county boards' indispensability, one court recently found that the failure to join local election officials in an election case can make the harm alleged not "redressable." It would be a catch-22 to say that county boards cannot be joined to this case as necessary parties, but then dismiss the case for lack of standing due to the boards' absence. *Cf. Jacobson v. Florida Secretary of States*, 974 F.3d 1236, —— – ——, 2020 WL 5289377, at *11-12 (11th Cir. Sept. 3, 2020) ("The problem for the [plaintiffs] is that Florida law tasks the [county] Supervisors, independently of the Secretary, with printing the names of candidates on ballots in the order prescribed by the ballot statute. ... The Secretary is responsible only for certifying to the supervisor of elections of each county the names of persons nominated ... Because the Secretary didn't do (or fail to do) anything that contributed to [plaintiffs'] harm, the voters and organizations cannot meet Article III's traceability requirement." (cleaned up)).

10 The organizational Plaintiffs also raise certain associational and organizational standing arguments, asserting that they represent their members' interests. The associational standing arguments are derivative of their members' interests. That is, because the Court has found no concrete injury suffered by the individual voters, which would include the members of the organizational Plaintiffs, there are no separate grounds to establish standing for these organizations. *See United Food & Commercial Workers Union Local 751 v. Brown Grp., Inc.*, 517 U.S. 544, 553, 116 S.Ct. 1529, 134 L.Ed.2d 758 (1997) (an organization only has standing to sue on behalf of its members when "its members would otherwise have standing to sue in their own right") (citation omitted).

11 *See, also, e.g., Dudum v. Arntz*, 640 F.3d 1098, 1117 (9th Cir. 2011) ("If the aspects of the City's restricted IRV scheme Dudum challenges impose any burdens on voters' constitutional rights to vote, they are minimal at best."); *Common Cause/Georgia v. Billups*, 554 F.3d 1340, 1354–55 (11th Cir. 2009) ("The district court determined that the burden imposed on Georgia voters who lack photo identification was not undue or significant, and we agree.... The NAACP and voters are unable to direct this Court to any admissible and reliable evidence that quantifies the extent and scope of the burden imposed by the Georgia statute."); *Soules v. Kauaians for Nukolii Campaign Comm.*, 849 F.2d 1176, 1183 (9th Cir. 1988) ("Appellants claim that Hawaii's absentee voting law fails to prohibit 'the solicitation, examination and delivery of absentee ballots by persons other than the voters' and that such activities occurred during the special election ... We agree with the district court that the Hawaii absentee ballot statute and the regulations adopted under it adequately protect the secrecy and integrity of the ballot. Although Hawaii has not adopted a regulation to prevent the delivery of ballots by persons other than the voter, the Hawaii regulations go into great detail in their elaboration of procedures to prevent tampering with the ballots."); *McLain v. Meier*, 637 F.2d 1159, 1167 (8th Cir. 1980) ("[A]lthough ballot format has an effect on the fundamental right to vote, the effect is somewhat attenuated."); *Nemes v. Bensinger*, —— F. Supp. 3d ——, ——, 2020 WL 3402345, at *13 (W.D. Ky. June 18, 2020) ("The burden imposed by the contraction to one polling place is modest, and the identified groups are afforded various other means under the voting plans to easily and effectively avoid disenfranchisement. As already discussed, Defendants have offered evidence of the substantial government interest in implementing voting plans that provide for a free and fair election while attempting to minimize the spread of COVID-19."); *Paralyzed Veterans of Am. v. McPherson*, No. 06-4670, 2008 WL 4183981, at *22 (N.D. Cal. Sept. 9, 2008) ("Plaintiff Bohlke's listed burdens rely on speculative risk or the ancillary effects of third party assistance, but not on evidence of any concrete harm. Such speculations or effects are insufficient under Supreme Court and Ninth Circuit precedent to demonstrate a severe burden on the fundamental right to vote.").

12 The parties do not specifically brief the elements of an Elections-Clause claim. This is typically a claim brought by a state legislature, and the Court has doubts that this is a viable theory for Plaintiffs to assert. *See Lance v. Coffman*, 549 U.S. 437, 442, 127 S.Ct. 1194, 167 L.Ed.2d 29 (2007). Regardless, if state law does not require signature comparison, then there is no difference between the Secretary's guidance and the Election Code, and the Elections-Clause claim necessarily fails.

13 Several Defendants and Intervenors have asked this Court to abstain from deciding this issue on the basis of *Pullman*. As this Court previously discussed, a court can abstain under *Pullman* if three factors are met: "(1) [the dispute] requires interpretation of "unsettled questions of state law,"; (2) permitting resolution of the unsettled state-law questions by state courts would "obviate the need for, or substantially narrow the scope of adjudication of the constitutional claims"; and (3) an "erroneous construction of state law would be disruptive of important state policies[.]" " [ECF 409, p. 3 (quoting *Chez Sez*, 945 F.2d at 631)]. But if, on the other hand, the answer to the state law dispute is "clear and unmistakable," abstention is not warranted. [*Id.* at p. 15 (citing *Chez Sez*, 945 F.2d at 632)]. Here, the Court concludes (as discussed below) that the Election Code is clear that signature comparison is not required and further, that Plaintiffs' competing interpretation is not plausible. As such, the Court cannot abstain under *Pullman*.

The *Pullman* analysis does not change simply because Secretary Boockvar has filed a "King's Bench" petition with the Pennsylvania Supreme Court, requesting that court to clarify whether the Election Code mandates signature comparison of mail-in and absentee ballots and applications. [ECF 556, p. 11; ECF 557]. The fact that such a petition was filed does not change this Court's conclusion that the Election Code is clear. The *Pullman* factors remain the same. And they are not met here.

14 The Secretary's September 11, 2020, guidance, stated that the "Pennsylvania Election Code does not authorize the county board of elections to set aside returned absentee or mail-in ballots based solely on signature analysis by the county board of elections." [ECF 504-24, p. 3, § 3]. Similarly, the Secretary's September 28, 2020, guidance stated that "Election Code does not permit county election officials to reject applications or voted ballots based solely on signature analysis. ... No challenges may be made to mail-in and absentee ballots at any time based on signature analysis." [ECF 504-25, p. 9, § 5.2].

15 The Election Code's definition of "proof of identification" in full provides:

> The words "proof of identification" shall mean ... For a qualified absentee elector ... or a qualified mail-in elector ...:
>
> i. in the case of an elector who has been issued a current and valid driver's license, the elector's driver's license number;
>
> ii. in the case of an elector who has not been issued a current and valid driver's license, the last four digits of the elector's Social Security number;
>
> iii. in the case of an elector who has a religious objection to being photographed, a copy of a document that satisfies paragraph (1) [*i.e.*, "a valid-without-photo driver's license or a valid-without-photo identification card issued by the Department of Transportation"]; or
>
> iv. in the case of an elector who has not been issued a current and valid driver's license or Social Security number, a copy of a document that satisfies paragraph (2) [*i.e.*, "a document that shows the name of the individual to whom the document was issued and the name substantially conforms to the name of the individual as it appears in the district register; shows a photograph of the individual to whom the document was issued; includes an expiration date and is not expired, except (A) ... or (B) ...; and was issued by" the federal, state, or municipal government, or an "accredited Pennsylvania public or private institution of higher learning [or] "a Pennsylvania are facility."].

25 P.S. § 2602(z.5)(3).

16 While election officials must engage in signature comparison for in-person voters, that requirement is explicitly required by the Election Code, unlike for mail-in ballots. 25 P.S. § 3050(a.3)(2). And as discussed below, in-person voters, unlike mail-in voters, are immediately notified if their signatures are deficient.

17 Plaintiffs also argue that signature comparison for mail-in and absentee ballots is supported by historical case law. [ECF 552, pp. 58-59]. Plaintiffs cite to two cases from the 1960s that the Court of Common Pleas decided. [*Id.*]. The first, *Appeal of Fogleman*, concluded that under the then-applicable election law, an absentee voter had to sign a declaration to show that he was a proper resident who had not already voted in that election. 36 Pa. D. & C.2d 426, 427 (Pa. Ct. Comm. Pl. 1964). Regarding the voter's signature, the court simply stated, "[i]f the elector fails or refuses to attach his or her signature, then such elector has not completed the declaration as required by law of all voters." *Id.* Thus, no signature comparison or verification was implicated there; rather, the court simply stated that the declaration must be signed (*i.e.*, completed). The second case Plaintiffs cite, *In re Canvass of Absentee Ballots of Gen. Election* [ECF 552, pp. 58-59], arose from individual, post-election challenges to 46 individual absentee ballots. 39 Pa. D. & C.2d 429, 430 (Pa. Ct.

Comm. Pl. 1965). Thus, a universal and mandatory signature-comparison requirement was not at issue there, unlike what Plaintiffs contest here. This Court finds neither case persuasive.

18 This identifying information on a ballot application includes much of the same information expressly listed for what a voter must provide in initially registering to vote. 25 Pa. C.S.A. § 1327(a) (stating that the "official voter registration application" shall request the applicant's: full name, address of residence (and mailing address if different), and date of birth).

19 The counties that intend to compare and verify signatures in the upcoming election include at least the following counties: Cambria, Elk, Franklin, Juniata, Mifflin, Sullivan, Susquehanna, and Wyoming. [ECF 504-1].

20 Plus, these figures do not even tell the whole story because they do not take into account the hundreds of thousands of voters who are registered to other parties who could also conceivably serve as poll watchers for the Trump Campaign and the candidate Plaintiffs. [504-34]. While that may not be the ideal scenario for Plaintiffs, they concede there's nothing in the Election Code that limits them to recruiting only registered voters from the Republican Party. [ECF 528-14, 267:23-268:1 (Q: And you don't have to be a registered Republican to serve as a poll watcher for the Trump campaign, do you? A: No.)]. To that point, the Trump Campaign utilized at least two Democrats among the poll watchers it registered in the primary. [ECF 528-15, P001648].

21 To the extent that Plaintiffs are attempting to bring their claim on behalf of these third parties (which is unclear), they would lack standing to do so. Ordinarily, "a litigant must assert his or her own legal rights and interests and cannot rest a claim of relief on the legal rights or interests of third parties." *Powers v. Ohio*, 499 U.S. 400, 410, 111 S.Ct. 1364, 113 L.Ed.2d 411 (1991). The only time a litigant can bring an action on behalf of a third party is when "three important criteria are satisfied." *Id.* "The litigant must have suffered an 'injury in fact,' thus giving him or her a 'sufficiently concrete interest' in the outcome of the issue in dispute; the litigant must have a close relation to the third party; and there must exist some hindrance to the third party's ability to protect his or her own interest." *Id.* at 410-11, 111 S.Ct. 1364 (cleaned up). Plaintiffs cannot satisfy the second or third criteria.

Plaintiffs claim that they "have a close relationship with these minor parties such that it will act as an effective advocate for the minor parties." [ECF 551, p. 30]. It is hard to see how Plaintiffs can be said to have a close relationship with rival political parties who are their direct adversaries in the upcoming election.

Plaintiffs also argue that these "minor parties are hindered from protecting their own interests, particularly in this action when there are no minor party intervenors." [*Id.*]. But that doesn't hold water either. Just because these other parties have not asked to intervene, it does not mean they were incapable of intervening or seeking relief elsewhere. Indeed, these parties and their candidates have demonstrated time and again that they can raise their own challenges to election laws when they so desire, including by filing suit in federal district court. *See, e.g.*, *Stein v. Cortés*, 223 F. Supp. 3d 423 (E.D. Pa. 2016) (Green Party Presidential candidate Jill Stein seeking recount); *Libertarian Party of Conn. v. Merrill*, No. 20-467, 2020 WL 3526922 (D. Conn. June 27, 2020) (seeking to enjoin Connecticut's ballot access rules that required minor party candidates to petition their way onto the ballot); *Green Party of Ark. v. Martin*, 649 F.3d 675 (8th Cir. 2011) (challenging Arkansas' ballot access laws).

22 The Sierra Club Intervenors argue this should end the analysis. [ECF 542, p. 14 ("Even 'as applied,' Plaintiffs' claim has already been rejected")]. While the Court finds the Pennsylvania Supreme Court's apparent ruling on Plaintiffs' as-applied challenge instructive, it is not outcome determinative. That is because the Pennsylvania Supreme Court did not have the benefit of the full evidentiary record that the Court has here.

23 After the briefing on the cross-motions for summary judgment had closed, on October 6, 2020, Secretary Boockvar issued additional guidance, which Plaintiffs then raised with the Court the following day. [ECF 571]. This new guidance confirms that poll watchers cannot be present during the pre-canvassing and canvassing of mail-in ballots. It also makes clear that while the authorized representative can be present, the representative cannot make any challenges to the ballots. The Court finds that this new guidance has minimal relevance to the current disputes at issue here. The scope of duties of a representative is not before the Court. Of sole relevance here is whether this new guidance changes how this Court weighs the burdens and benefits of the county-residency restriction for poll watchers. The Court finds that the representative's inability to challenge mail-in ballots does appear to provide less protection to Plaintiffs; but in the grand election scheme, particularly in light of the role of the election overseers, the Court does not find the new guidance to materially upset the Commonwealth's interests in its overall election-monitoring plan.

ORDER

Andrew S. Hanen, United States District Judge

***1** The Court has before it the Motion for Preliminary Injunction (Doc. No. 3) filed by Plaintiffs Steven Hotze, M.D., Wendell Champion, Hon. Steve Toth, and Sharon Hemphill (collectively, "Plaintiffs"), the Response in Opposition (Doc. No. 22) filed by Defendant Chris Hollins in his official capacity as Harris County Clerk (hereinafter, "Defendant"), and various Motions to Intervene filed on behalf of forty-eight individuals and/or entities. The Court also has before it *amicus curiae* briefs filed by the Texas Coalition of Black Democrats, The Lincoln Project, the Libertarian Party of Texas, Joseph R. Straus, III, and election law professor, Benjamin L. Ginsberg.

I.

Due to the time constraints given the issue involved, this Court cannot issue the formal opinion that this matter deserves. Consequently, given those confines, this Order must suffice. The Court first notes that it appreciates the participation of all counsel involved and the attention each gave to this important topic on such short notice.

This Court's overall ruling is that the Plaintiffs do not have standing (as explained below). While this ruling is supported by general Equal Protection and Election Clause cases, it is somewhat without precedent with regard to the Plaintiffs (or Intervenors) who are actual candidates for elected office. Therefore, the Court, in anticipation of an appeal or petition for writ of mandamus and knowing that the appellate court could draw a distinction in that regard and hold that standing exists, has gone further to indicate what its ruling would have been in that case.

II.

The Court finds that Plaintiffs lack standing to sue. Federal courts must determine whether they have jurisdiction before proceeding to the merits. *Steel Co. v. Citizens for Better Environment*, 523 U.S. 83, 94–95 (1998). Article III of the Constitution limits federal jurisdiction to "Cases" and "Controversies." One component of the case or controversy requirement is standing. *Lujan v. Defenders of Wildlife*, 504 U.S. 555, 560–61 (1992). The Supreme Court has repeatedly held that an individual plaintiff raising only a generalized grievance about government does not meet the Article III requirement of a case or controversy. *Id.* at 573–74. This Court finds that the Plaintiffs here allege only a "generalized grievance about the conduct of government." *Lance v. Coffman*, 549 U.S. 437, 442 (2007).

The Plaintiffs' lack of a particularized grievance is fatal to their claim under the Equal Protection Clause. "The rule against generalized grievances applies with as much force in the equal protection context as in any other." *U.S. v. Hays*, 515 U.S. 737, 743 (1995). Plaintiffs' general claim that Harris County's election is being administered differently than Texas's other counties does not rise to the level of the sort of particularized injury that the Supreme Court has required for constitutional standing in elections cases. *See id.; Gill v. Whitford*, 138 S. Ct. 1916, 1933 (2018) (no standing in equal protection case when alleged injury involved "group political interests" and not "individual legal rights").

***2** Further, it is unclear that individual plaintiffs have standing to assert claims under the Elections Clause at all. The Supreme Court has held that individual plaintiffs, like those here, whose only asserted injury was that the Elections Clause had not been followed, did not have standing to assert such a claim. *See Lance*, 549 U.S. at 442. Conversely, the Court has held that the Arizona Legislature did have standing to allege a violation of the Elections Clause as it was "an institutional plaintiff asserting an institutional injury." *Ariz. State Legislature v. Ariz. Indep. Redistricting Comm'n*, 576 U.S. 787, 802 (2015). In addition, the Supreme Court has also held plaintiffs had such standing when they were state senators whose "votes had been completely nullified" by executive action. *Id.* at 803 (citing *Raines v. Byrd*, 521 U.S. 811, 822–23 (1997)). These cases appear to stand for the proposition that only the state legislature (or a majority of the members thereof) have standing to assert a violation of the Elections Clause.

The Court finds that the Plaintiffs here are akin to those in *Lance v. Coffman*, in which the Supreme Court held that private citizens, whose primary alleged injury was that the Elections Clause was not followed, lacked standing to bring a claim under the Elections Clause. 549 U.S. at 442. To summarize the Plaintiffs' primary argument, the alleged irreparable harm caused to Plaintiffs is that the Texas Election Code has been violated and that violation compromises the integrity of the voting process. This type of harm is a quintessential generalized grievance: the harm is to every citizen's interest in proper application of the law. *Lujan*, 504 U.S. at 573–74; *Fairchild v. Hughes*, 258 U.S. 126, 129 (1922) (holding that the right, possessed by every citizen, to require that the Government be administered according to the law does not entitle a private citizen to institute a lawsuit in federal court). Every citizen, including the Plaintiff who is a candidate for federal office, has an interest in proper execution of voting procedure. Plaintiffs have not argued that they have any specialized grievance beyond an interest in the integrity of the election process, which is "common to all members of the public." *United States v. Richardson*, 418 U.S. 166, 176–77.[1]

1 This Court finds the answer to this question to be particularly thorny, given that some of the Plaintiffs are actual candidates who have put in time, effort, and money into campaigning, to say nothing of the blood, sweat, and tears that a modern campaign for public office entails. This Court would readily understand if some appellate court finds that these Plaintiffs have standing despite the fact they cannot individualize their damage beyond their rightful feeling that an election should be conducted lawfully. Neither this Court's research nor the briefing of the parties have brought forth any precedent to support this concept under either of the two pleaded causes of action based upon claimed violations of Equal Protection or the "Elections Clause." Given the timing of this case and the impact that such a ruling might have, this Court finds it prudent to follow the existing precedent.

III.

If the Court had plaintiffs with standing, it would have denied in part and granted in part the motion for preliminary injunction.[2] A preliminary injunction is an "extraordinary remedy" that should only be granted if the movant has "clearly carried the burden of persuasion" on all four factors. *Lake Charles Diesel, Inc. v. Gen. Motors Corp.*, 328 F.3d 192, 196 (5th Cir. 2003). The movant, however, "need not prove his case." *Lakedreams v. Taylor*, 932 F.2d 1103, 1109 (5th Cir. 1991) (citing *H & W Indus. v. Formosa Plastics Corp.*, 860 F.2d 172, 179 (5th Cir. 1988)). Before a court will grant a preliminary injunction, the movants must clearly show "(1) a substantial likelihood that they will prevail on the merits, (2) a substantial threat that they will suffer irreparable injury if the injunction is not granted, (3) that their substantial injury outweighs the threatened harm to the party whom they seek to enjoin, and (4) granting the preliminary injunction will not disserve the public interest." *City of El Cenizo v. Texas*, 890 F.3d 164, 176 (5th Cir. 2018) (quoting *Tex. Med. Providers Performing Abortion Servs. v. Lakey*, 667 F.3d 570, 574 (5th Cir. 2012)); *see also Winter v. NRDC*, 555 U.S. 7, 20 (2008) ("A plaintiff seeking a preliminary injunction must establish that he is likely to succeed on the merits, that he is likely to suffer irreparable harm in the absence of preliminary relief, that the balance of equities tips in his favor, and that an injunction is in the public interest."). "The purpose of a preliminary injunction is always to prevent irreparable injury so as to preserve the court's ability to render a meaningful decision on the merits." *Canal Auth. of Fla. v. Callaway*, 489 F.2d 567, 576 (5th Cir. 1974).

2 The Defendant and Intervenors suggested both in oral argument and in their written presentations that the Court should abstain under either *Pullman, Colorado River*, or *Rooker-Feldman* doctrine. Since standing is jurisdictional and since this Court is dismissing this action, it need not analyze these arguments. *See Railroad Commission of Texas v. Pullman Co.*, 312 U.S. 496, 61

S. Ct. 643 (1941); *Colorado River Water Conservation Dist. v. U.S.*, 424 U.S. 800 (1976); *Rooker v. Fidelity Trust Co.*, 263 U.S. 413 (1923); and *District of Columbia Court of Appeals v. Feldman*, 460 U.S. 462 (1983).

***3** This Court finds that there is a difference between the voting periods presented to it. The merits need to be analyzed separately by early voting and election day voting. With respect to the likelihood of success, the Court would find that the Plaintiffs do not prevail on the element of likelihood of success with respect to early voting. First, § 85.062 of the Texas Election Code provides for "temporary branch polling places" during early voting. Tex. Elec. Code. § 85.062. The statute authorizes county election officials to use "movable structure[s]" as polling places. *Id.* § 85.062(b). The Code does not define "structure," but Black's Law Dictionary defines the term as: "Any construction, production, or piece of work artificially built up or composed of parts purposefully joined together." Black's Law Dictionary (11th ed. 2019). The Court finds, after reviewing the record, the briefing, and considering the arguments of counsel, that the tents used for drive-thru voting qualify as "movable structures" for purposes of the Election Code. The Court is unpersuaded by Plaintiffs' argument that the voters' vehicles, and not the tents, are the polling places under the drive-thru voting scheme. Consequently, the Court finds that drive-thru voting was permissible during early voting. Moreover, the Plaintiffs failed to demonstrate under the Texas Election Code that an otherwise legal vote, cast pursuant to the instructions of local voting officials, becomes uncountable if cast in a voting place that is subsequently found to be non-compliant.

Additionally, the promptness with which one brings an injunction action colors both the elements of likelihood of success on the merits and irreparable harm. *See Petrella v. Metro-Goldwyn-Mayer, Inc.*, 572 U.S. 663, 685 (2014) ("In extraordinary circumstances, however, the consequences of a delay in commencing suit may be of sufficient magnitude to warrant, at the very outset of the litigation, curtailment of the relief equitably awardable."); *Environmental Defense Fund, Inc. v. Alexander*, 614 F.2d 474, 478 (1980) ("equitable remedies are not available if granting the remedy would be inequitable to the defendant because of the plaintiff's long delay."). Here, the Court finds that the Plaintiffs did not act with alacrity. There has been an increasing amount of conversation and action around the subject of implementing drive-thru voting since earlier this summer. The Defendant has argued, and no one has refuted, that discussions were held with leaders of both major political parties, and, using that input, a drive-thru voting plan was developed. The Harris County Commissioners Court approved a budget for drive-thru voting in late September. Finally, actual drive-thru voting began October 13, 2020. At virtually any point, but certainly by October 12, 2020, Plaintiffs could have filed this action. Instead, they waited until October 28, 2020 at 9:08 p.m. to file their complaint and did not file their actual motion for temporary relief until mid-day on October 30, 2020—the last day of early voting. The Court finds this delay is critical. It is especially important in this compact early voting timeframe, in a particularly tense election, where each day's voting tally functionally equated to many days or even weeks of early voting in different situations.

Therefore, this Court finds the Plaintiffs do not prevail on the first element.

With regard to the second element, "irreparable injury," this point is covered more thoroughly in the standing discussion, but suffice it to say, in response to the Court's question during oral argument, Plaintiff's counsel described their injuries as the concern for the voting law to be accurately enforced and voting to be legal. In response to the Court's questions, Plaintiffs' Counsel said their irreparable injury was that the election process was being compromised, and that it prevents there being uniformity in the manner of voting throughout Texas. While certainly valid concerns, those are not the kind of injuries that separate Plaintiffs from other concerned citizens. Plaintiffs have no evidence of individualized irreparable injuries.

The one element that the Court finds the Plaintiffs have prevailed on is the harm to the party defendant. The Court finds that there would be no harm to Harris County. The only suggested harm is that the County has spent millions of dollars to implement drive-thru voting. While these funds may have been better spent, their loss does not prevail over tens of thousands of potentially illegal votes. Further, if granted, the injunction would only require the Defendant to conduct elections as Harris County has conducted them in the past without drive-thru voting.

***4** The last element must, like the first, take on extraordinary significance in this context. That element concerns the public interest. Plaintiffs argue, correctly, that the public has an interest in seeing that elections are carried out pursuant to the Election Code. This is no doubt true; however, this generalized interest is offset by two somewhat stronger factors. First, the drive-thru early voting as designed and implemented is, to this Court's reading, legal as described

above. Second, there have been over 120,000 citizens who have legally voted utilizing this process. While Plaintiffs have complained about anecdotal reports of irregularities, the record reflects that the vast majority were legal voters, voting as instructed by their local voting officials and voting in an otherwise legal manner. The only claimed widespread illegality is the place of voting—a tent outside the polling place instead of inside the actual building. To disenfranchise over 120,000 voters who voted as instructed the day before the scheduled election does not serve the public interest.

Therefore, if the Court had found standing existed, it would have denied an injunction as to the drive-thru early voting.

The Court finds the issue as to Election Day to cut the opposite direction. On Election Day, as opposed to early voting, there is no legislative authorization for movable structures as polling places. The Election Code makes clear that, on Election Day, "[e]ach polling place shall be located inside a building." Tex. Elec. Code § 43.031(b). The term "building" is not defined in the Code. Nevertheless, Black's Law Dictionary defines "building" as: "A structure with walls and a roof, esp. a permanent structure." Black's Law Dictionary (11th ed. 2019). The Court finds, after reviewing the record and arguments of counsel, that the tents used for drive-thru voting are not "buildings" within the meaning of the Election Code. Further, they are not inside, they are clearly outside. Accordingly, if the Plaintiffs had standing, the Court would have found that the continuation of drive-thru voting on Election Day violates the Texas Election Code.

It also finds that, unlike in early voting, the Plaintiffs prevail when one weighs the various elements that underlie the issuance of an injunction. First, as stated above, the Court does not find a tent to be a building. Therefore, under the Election Code it is not a legal voting location. Second, the Plaintiffs' request for injunctive relief is timely. While it could and should have been made earlier, it was made days before the election. The Court would have found that the Plaintiffs had a likelihood of success. The analysis of the second element remains the same. With regard to the loss that the Defendant might suffer, the Court finds this to be minimal. While it apparently spent millions in implementing the drive-thru voting system, it had over 120,000 voters use it—so it is money well-spent. The fact it would not be used on Election Day does not diminish its benefit. The analysis of the last element, public interest, swings in favor of the Plaintiffs. No one should want votes to be cast illegally or at an illegal polling place. No one has voted yet—so no one is being disenfranchised. Moreover, for those who are injured or worried that their health would be compromised should they be compelled to enter the building to vote, curbside voting is available under § 64.009 of the Texas Election Code.[3] Lastly, there are very few citizens who would want their vote to be in jeopardy, so it is incumbent on election officials to conduct voting in a proper location—not one which the Attorney General has already said was inappropriate. Consequently, this Court, had it found that standing existed, would have granted the injunction prospectively and enjoined drive-thru voting on Election Day and denied all other relief.

3 This Court is quite cognizant of the Texas Supreme Court ruling (in a slightly different context) that fear of contracting COVID-19 does not establish an exception. *In re State*, 602 S.W.3d 549 (Tex. 2020).

***5** Nevertheless, since it found standing does not exist, this action is hereby dismissed.

Synopsis
D.Or.

AFFIRMED.

Appeal from the United States District Court for the District of Oregon; James A. Redden, District Judge, Presiding.

Before CHOY, TANG and O'SCANNLAIN, Circuit Judges.

MEMORANDUM[**]

***1** G. Donald Massey, Bruce L. Bax, and Donna L. Sergi appeal *pro se* the district court's judgment dismissing their action for injunctive and declaratory relief.

Massey, Bax, and Sergi filed an action in federal district court seeking declaratory and injunctive relief against the Oregon Supreme Court, the Circuit Court of Oregon for Josephine County, Oregon State District Judge A. Coon, and Oregon Circuit Judge L.A. Cushing. The complaint alleged that the defendants violated the plaintiffs' federal due process and equal protection rights by unlawfully assigning Coon to serve as circuit court judge *pro tem* in plaintiffs' quiet title action in state court. Defendants moved to dismiss the complaint for failure to state a claim. The magistrate recommended granting dismissal and the district court adopted the magistrate's findings and recommendations and dismissed the action. The appeal now comes before this court.

A. *Jurisdiction Over Bax and Sergi*
This court does not have jurisdiction to hear an appeal by *pro se* appellants who do not personally sign the notice of appeal. *Carter v. Commissioner,* 784 F.2d 1006, 1008 (9th Cir.1986). Bax and Sergi signed neither the original nor the amended notices of appeal. Therefore, Bax and Sergi's appeals must be dismissed.

B. *Massey's Appeal*
Massey contends that Article VII Section 2(a)(3) of the Oregon Constitution and several Oregon statutes (1) prohibit the appointment of a state circuit judge *pro tem* to serve in the judicial district for which the judge was elected; and (2) forbid a state circuit judge to name a judge *pro tem* as that power is reserved to the Oregon Supreme Court.

Massey also contends that such assignment, because it is contrary to state law, violates the due process and equal protection clauses of the Constitution. Assuming, arguendo, that Massey has correctly interpreted state law, we nonetheless conclude that the eleventh amendment bars his suit.

The eleventh amendment prevents federal courts from hearing suits brought against a state without its consent, regardless of the type of relief sought. *See Pennhurst State School & Hosp. v. Halderman,* 465 U.S. 89, 100 (1984). Massey has failed to indicate any explicit waiver of Oregon's immunity to suit in federal court. He contends that the eleventh amendment is inapplicable because his suit is not in substance brought against the state. He further argues that this suit is excepted from the general jurisdictional bar by the principles of *Ex Parte Young,* 209 U.S. 123 (1908). We reject both arguments.

The eleventh amendment bars any suit nominally brought against individual state officials where the state is the real party in interest.[1] *Pennhurst,* 465 U.S. at 101. A suit for non-monetary relief is in substance against the sovereign if "the effect of the judgment would be 'to restrain the Government from acting or compel it to act.' " *Pennhurst,* 465 U.S. at 101 n. 11 (citing *Dugan v. Rank,* 372 U.S. 609, 620 (1963)). Here, the relief sought would require the state, acting through its officials, to conform its conduct to state law by appointing a judge from another district to serve as judge *pro tem* in this case.

***2** Massey contends that this suit is not brought against the state for purposes of the eleventh amendment because defendants' actions were outside their delegated power. However, a state official is not entitled to eleventh amendment immunity only when he acts "without any authority whatever." *Pennhurst,* 465 U.S. at 101 n. 11 (citing *Florida Dept. of State v. Treasure Salvors, Inc.,* 458 U.S. 670, 697 (1982) (plurality opinion)). "A claim of error in the exercise of [an official's delegated] power is therefore not sufficient" to support a claim of ultra vires. *Larson v. Domestic & Foreign Commerce Corp.,* 337 U.S. 682, 690 (1949). Oregon's Constitution and statutes clearly did provide a mechanism for appointing judges *pro tem,* even though the procedures may not have been followed correctly in this case. Therefore, this case does not fall within the narrow scope of the ultra vires doctrine as enunciated by the Supreme Court. The action against Judges Coon and Cushing was thus in substance an action against the state.

Massey argues that if the suit is deemed to be one against the state, it is not barred by the eleventh amendment because it falls under the exception enunciated in *Ex Parte Young. Young* provides that a suit for injunctive relief challenging a state official's action under the Constitution is not considered a suit against the state for purposes of the eleventh amendment. *Young,* 209 U.S. at 167. Although on its face the complaint states a claim under the due process and equal protection clauses of the Constitution, these constitutional claims are entirely based on the failure of defendants to conform to state law. "[W]hen a plaintiff alleges that a state official has violated *state* law.... the entire basis for the doctrine of *Young* ... disappears." *Pennhurst,* 465 U.S. at 106 (emphasis in original). Therefore, the *Young* exception does not apply and the district court correctly dismissed the suit against Judges Coon and Cushing.

Finally, the district court properly dismissed Massey's action without leave to amend. Where amendment of the complaint would have served no purpose because the acts complained of could not constitute a cognizable claim for relief, it is not error to dismiss a complaint without leave to amend. *See Jones v. Community Redevelopment Agency,* 733 F.2d 646, 650 (9th Cir.1984). No restatement of Massey's claim could constitute a claim for relief cognizable in federal court.[2]

AFFIRMED.

** This disposition is not appropriate for publication and may not be cited to or by the courts of this circuit except as provided by Ninth Circuit Rule 36–3.

1 We consider only the claims against Judges Coon and Cushing because Massey does not argue on appeal that the district court erred in its determination that the state court defendants are immune from suit in federal court.

2 We also deny Massey's motion to file an amended opening brief. The amended brief adds no new arguments and would have no effect on the outcome of this case.

ORDER

Honorable Diane J. Humetewa, United States District Judge

***1** Pending before the Court is a Motion to Dismiss ("the Motion") filed by Defendant International Fruit Genetics, LLC ("IFG") (Doc. 20). The Motion seeks to dismiss the Complaint filed by Plaintiff Aguila Management LLC ("Aguila"). (Doc. 20 at 1). Plaintiff filed a Response (Doc. 28), and Defendant filed a Reply (Doc. 31).[1]

[1] Both parties requested oral argument on this matter. The Court denies the request because the issues have been fully briefed and oral argument will not aid the Court's decision. *See* Fed.R.Civ.P. 78(b) (court may decide motions without oral hearings); LRCiv 7.2(f) (same).

I. Background

Plaintiff initiated this action on January 10, 2019 (Doc. 1). The Complaint alleges Federal Trademark Infringement in violation of 15 U.S.C. § 1114(1), Federal Unfair Competition and False Designation of Origin in violation of 15 U.S.C. § 1125(a), and Dilution in violation of 15 U.S.C. § 1125(c), as well as Common Law Unfair Competition and Common Law Trademark Infringement. (Doc. 1 at 8-12).

Plaintiff Aguila is the managing entity of a fruit and vegetables business which conducts transactions in the retail and wholesale marketplaces. (Doc. 1 at 3). Defendant IFG is a fruit-breeding business focused on creating new fruit varietals. (Doc. 20 at 4). Plaintiff's fruit and vegetables business utilizes trademarks "CANDY" for "Fresh Fruit-Namely, Apples, Peaches, Pears, Fresh Prunes and Plums;" "CANDY" for "Fresh Fruit;" and "KANDY" for "Fresh Fruit and Fresh Vegetables." (Doc. 1 at 4-5). Subsequent to Plaintiff, Defendant registered "COTTON CANDY" for "Fruits, Namely, Fresh Grapes," among other phrases. (Doc. 20 at Ex. 6). In the Complaint, Plaintiff alleges that Defendant knowingly and willingly infringed upon its trademarks by adopting and using "Cotton Candy" as well as other "Candy" related terms. (Doc. 1 at 5-6). Pursuant to Fed. R. Civ. P. 12(b)(6), Defendant moves to dismiss on all counts for failure to state a claim upon which relief can be granted, arguing that the affirmative defense of laches bars Plaintiff's claims. (Doc. 20 at 1-2).

II. Discussion

A. Legal Standard for Rule 12(b)(6) Motion

A motion to dismiss pursuant to Rule 12(b)(6) challenges the legal sufficiency of a complaint. *Cook v. Brewer*, 637 F.3d 1002, 1004 (9th Cir. 2011). Complaints must contain a "short and plain statement showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a). This requires "more than an unadorned, the-defendant-unlawfully-harmed-me accusation." *Ashcroft v. Iqbal*, 556 U.S. 662, 678 (2009) (citing *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544, 555 (2007)). A complaint need not contain detailed factual allegations to avoid a Rule 12(b)(6) dismissal; it must simply plead "enough facts to state a claim to relief that is plausible on its face." *Twombly*, 550 U.S. 544, 570 (2007). "The plausibility standard is not akin to a 'probability requirement,' but it asks for more than a sheer possibility that defendant has acted unlawfully." *Iqbal*, 556 U.S. at 678 (citing *Twombly*, 550 U.S. at 556). "Where a complaint pleads facts that are 'merely consistent with' a defendant's liability, it 'stops short of the line between possibility and plausibility of entitlement to relief.' " *Id.* at 678 (citation omitted).

***2** The Court must interpret facts alleged in the complaint in the light most favorable to the plaintiff, while also accepting all well-pleaded factual allegations as true. *Shwarz v. United States*, 234 F.3d 428, 435 (9th Cir. 2000). That rule does not apply, however, to legal conclusions. *Iqbal*, 556 U.S. at 678. A complaint that provides "labels and conclusions" or "a formulaic recitation of the elements of a cause of action will not do." *Twombly*, 550 U.S. at 555. Nor will a complaint suffice if it presents nothing more than "naked assertions" without "further factual enhancement." *Id.* at 557.

B. Laches

Laches is an affirmative defense distinct from a statute of limitations defense. *Jarrow Formulas, Inc. v. Nutrition Now, Inc.*, 304 F.3d 829, 835 (9th Cir. 2002) (citation omitted). It is "an equitable time limitation on a party's right to bring suit." *Id.* (quoting *Boone v. Mech Specialties Co.*, 609 F.2d 956, 958 (9th Cir. 1979)). In a trademark infringement claim under the Lanham Act, it is well established that laches may be presented as an equitable defense. *GoTo.com, Inc. v. Walt Disney Co.*, 202 F.3d 1199, 1209 (9th Cir. 2000). If a suit is filed beyond the "analogous state limitations period" for a claim arising from the Lanham Act, the Court presumes laches applies. *Jarrow*, 304 F.3d at 836 (citations omitted). Arizona's analogous statute of limitations for trademark infringement and unfair competition bars claims after three years. *See Ranch Realty v. DC Ranch Realty*, LLC, 614 F. Supp. 2d 983, 989-90 (D. Ariz. 2007).

To evaluate the application of laches, the Court first applies a two-prong test. *Danjaq LLC v. Sony corp.*, 263 F.3d 942, 951 (9th Cir. 2001). The first prong asks whether plaintiff unreasonably delayed filing suit, and the second prong asks whether defendant suffered prejudice as a result of the delay. *Id.*

The first prong begins with the length of delay, which is measured from the time the plaintiff knew or should have known about its potential cause of action. *Jarrow*, 304 F.3d at 838 (citing *Kling v. Hallmark Cards Inc.*, 225 F.3d 1030, 1036 (9th Cir. 2000); *Portland Audubon Soc'y v. Lujan*, 884 F.2d 1233, 1241 (9th Cir. 1989)). Next, the Court decides whether the plaintiff's delay was reasonable. *Id.* (citing *Danjaq*, 263 F.3d at 954-55; *Couveau v. American Airlines*, 218 F.3d 1078, 1083 (9th Cir. 2000)). The reasonableness of the plaintiff's delay is considered in light of the time allotted by the analogous limitations period. *Id.* (citing *Sandvik v. Alaska Packers Ass'n*, 609 F.2d 969, 971 (9th Cir. 1979)). The Court also considers whether the plaintiff has proffered a legitimate excuse for its delay. *Id.* (citing *Danjaq*, 263 F.3d at 954-55).

In the second prong, a defendant must prove either evidentiary prejudice or expectations-based prejudice. *Danjaq*, 263 F.3d at 955. Evidentiary prejudice includes such things as lost, stale, or degraded evidence, or witnesses whose memories have faded or who have died. *Id.* (citations omitted). A defendant may demonstrate expectations-based prejudice by showing that it took actions or suffered consequences that it would not have, had the plaintiff brought suit promptly. *Id.* (citation omitted). However, when laches is presented as a defense to a trademark infringement claim, a finding of expectations-based prejudice requires more. *Internet Specialties West, Inc. v. Milon-Digiorgio Enters., Inc.*, 559 F.3d 985, 991 (9th Cir. 2009). The court must determine whether the claim of prejudice is based on mere expenditures in promoting the infringed name or whether it is based on an investment in the mark as the identity of the business in the minds of the public. *Id.* at 991-93 (citations omitted) (quotation omitted).

***3** Finally, in addition to the *Jarrow* two-prong test, courts analyze six factors to determine whether laches precludes a trademark infringement claim: "1) the strength and value of trademark rights asserted; 2) plaintiff's diligence in enforcing mark; 3) harm to senior user if relief denied; 4) good faith ignorance by junior users; 5) competition between senior and junior users; and 6) extent of harm suffered by junior user because of senior user's delay." *E-Systems, Inc. v. Monitek, Inc.*, 720 F.2d 604, 607 (9th Cir. 1983).

C. Analysis

In the Motion, Defendant argues Plaintiff's claims are barred by the equitable doctrine of laches. (Doc. 20 at 7). Courts in this district have previously applied laches in a motion to dismiss, noting that "where the elements of laches are apparent on the face of a complaint, it may be asserted on a motion to dismiss." *Arizona Minority Coalition for Fair Redistricting v. Arizona Independent Redistricting Com'n*, 366 F. Supp. 2d 887, 912 n.19 (D. Ariz. 2005) (citation omitted). Defendant first argues the facts require the presumption that laches applies. (Doc. 20 at 8). Second, Defendant argues Plaintiff unreasonably delayed suit. *Id.* at 9. Third, Defendant argues it is prejudiced by Plaintiff's alleged unreasonable delay in bringing suit. *Id.* at 10. Finally, Defendant argues the six-factor *E-Systems* test weighs in favor of dismissing Plaintiff's claims. *Id.* at 11-14. For the following reasons, the Court will deny the Motion.

1. The Presumption of Laches

Plaintiff does not dispute that in 2011 it had knowledge of Defendant's "COTTON CANDY" Intent-To-Use Trademark Application at the U.S. Patent Trademark Office ("USPTO"). (Doc. 28 at 9-10). Plaintiff argues an intent-to-use application does not trigger laches because the Lanham Act requires infringement by "use in commerce" for laches to be triggered. *Id.* at 9 (citing *United Am. Indus., Inc. v. Cumberland Packing Corp.*, No. CV-06-1833PHX-FJM, 2007 WL 38279 at *3 (D. Ariz. Jan 5, 2007)). In this instance, however, the Court need not reach whether an intent-to-use application triggers laches under the Lanham Act because Defendant's "COTTON CANDY" mark was later registered with the USPTO on March 6, 2012. (Doc. 20 at Ex. 6). The registration also indicated use in commerce as early as August 26, 2011. *Id.*

As a matter of public record not subject to reasonable dispute, the Court takes judicial notice of Defendant's 2012 "COTTON CANDY" mark registration. *See Intri-Plex Technologies, Inc. v. Crest Group, Inc.*, 499 f.3d 1048, 1052 (9th Cir. 2007); Fed. R. Evid. 201(b); *Tallyho Enterprises, LLC. V. PremierGarage Sys., LLC*, No. CV-07-01791-PHX-SRB, 2008 WL 11338891, at *7 n.1 (D. Ariz. Apr. 29, 2008). Plaintiff thus had constructive notice of the March 6, 2012 registration of "COTTON CANDY" mark by Defendant. *See Kling*, 225 F.3d at 1036 (when laches is raised, the law charges Plaintiff with "such knowledge as he might have obtained upon inquiry, provided the facts already known by him were such as to put upon a man of ordinary intelligence the duty of inquiry"). Given that Plaintiff was aware of the relevant intent-to-use application prior to Defendant's March 6, 2012 "COTTON CANDY" mark registration, the Court finds Plaintiff reasonably had a duty of inquiry and is assumed to have had knowledge of the registration as of March 6, 2012.

The current action was filed January 10, 2019, far later than the would-be March 6, 2015 deadline for suit under Arizona's analogous statute. The Court thus initially proceeds under the assumption laches applies. *See Jarrow*, 304 F.3d at 836.

2. Plaintiff's Unreasonable Delay

***4** Plaintiff filed suit nearly seven years following Defendant's March 6, 2012 "COTTON CANDY" mark registration. Plaintiff's delay is greater than double the maximum time to file suit under Arizona's analogous statute of limitations. Plaintiff does not establish any justifiable reason for the delay. The Court finds the length of Plaintiff's delay to be unreasonable.

3. Defendant Must Show it is Prejudiced by Plaintiff's Unreasonable Delay

Plaintiff's delay in bringing suit is unreasonable, but Defendant does not claim evidentiary prejudice and has not proven expectations-based prejudice. The Complaint does allege that "IFG has both licensed the Infringing Marks ... and sold products bearing the Infringing Marks." (Doc. 1 at 7). The claim that Defendant licensed and sold products bearing infringing marks, however, does not establish prejudice in the laches context. *See Internet Specialties*, 559 F.3d at 991-93. Laches is meant to protect an infringer whose efforts have been aimed at "build[ing] a valuable business *around its trademark*" and "an important reliance *on the publicity of [its] mark.*" *Id.* at 991-92 (quoting 6 McCarthy on Trademarks and Unfair Competition § 31:12) (citations omitted) (emphases added). Proof of efforts to build a valuable business around the marks in question is necessary because "if this prejudice could consist merely of expenditures in promoting the infringed name, then relief would have to be denied in practically every case of delay." *Id.* at 991 (quoting *Tisch Hotels, Inc. v. Americana Inn, Inc.*, 350 F.2d 609, 615 (7th Cir. 1965)).

Defendant has not shown at this stage that its alleged infringement rests on "an investment in the mark [ ] as the identity of the business in the minds of the public." *Id.* at 992; *see also Jarrow*, 304 F.3d at 839 (if plaintiff had filed the action sooner, defendant "could have invested its resources in shaping an alternative identity ... in the minds of the public"). Defendant's statement that "the history of IFG's uncontested growth as documented in the Complaint and in the USPTO register are precisely what evidence Courts rely upon" when analyzing prejudice understates the burden of proof required when asserting laches against a Lanham Act trademark infringement claim. (Doc. 31 at 2). Defendant's statement that its efforts regarding brand recognition are sufficiently demonstrated "by its development, registration, use, and licensing of its numerous CANDY-formative marks" also misapprehends the burden of proof required to show expectations-based prejudice. *Id.* at 8. The Court is unable to conclude, at this early stage of the litigation, that Defendant has invested in the relevant marks as the identity of its

business. Even finding a presumption in favor of laches, the application of laches at this stage is inappropriate because prejudice is not apparent on the face of the Complaint.[2] Therefore, the Court will deny the Motion to Dismiss.

2 The Court need not reach the *E-Systems* factors because the Motion fails to establish prejudice under the *Jarrow* test. *See Internet Specialties*, 559 F.3d at 991 (citing *Jarrow*, 304 F.3d at 839) (holding that notwithstanding the result of the *E-Systems* analysis, defendant must still satisfy the second prong of the laches test).

III. Conclusion

The Court finds the application of laches inappropriate because the Defendant failed to establish prejudice at this stage.

***5** Accordingly,

IT IS ORDERED that Defendant's Motion to Dismiss (Doc. 20) is **DENIED**.

SOLOW BUILDING COMPANY, LLC, Plaintiff,

v.

NINE WEST GROUP, INC. and Nine West Development Corporation, Defendants.

No. 00 Civ. 7685(DC).
|
June 29, 2001.

Attorneys and Law Firms

Dreier & Baritz LLP, By: Marc S. Dreier, Michael A. Nicodema, New York, New York, for Plaintiff.

Fried Frank Harris Shriver & Jacobson, By: Ira S. Sacks, Rita M. Odin, Andrea R. Rosenblum, New York, New York, for Defendants.

MEMORANDUM DECISION

CHIN, J.

***1** Plaintiff, a real estate corporation, is headquartered at 9 West 57th Street in New York City, a building with a large red sculpture—the numeral "9"—on the sidewalk in front of the property. Although plaintiff has never used the name in its business, it contends that its building has acquired the nickname "9 West." Defendants, manufacturers and retailers of shoes, clothing, and accessories, have used the mark "Nine West" since 1980. Plaintiff sues defendants for trademark dilution, false designation of origin, trademark infringement, and unfair competition.

Defendants move to dismiss the Second Amended Complaint (the "Complaint") on the grounds that plaintiff's claims are barred by laches and fail to state a claim upon which relief may be granted. As discussed below, because the Complaint demonstrates that plaintiff has known of defendants' use of the "Nine West" mark since 1980, has inexcusably delayed the commencement of this action, and has prejudiced defendants by its delay, the Court agrees that the laches defense applies; moreover, even assuming this action is not untimely, the Complaint fails to allege likelihood of confusion and plaintiff's ownership rights to the "9 West" name. Accordingly, plaintiff's Complaint is dismissed.

BACKGROUND

A. *The Parties*

Plaintiff Solow Building Company, LLC ("Solow"), a New York corporation, is a real estate company engaged in constructing and renting commercial and residential properties. It is headquartered at 9 West 57th Street, New York, New York, which is plaintiff's "premier property." (Sec.Am.Compl.¶¶ 1, 10). On the sidewalk in front of its headquarters, plaintiff has placed a nine-foot by five-foot red sculpture of the numeral "9." (*Id.* ¶ 13). Plaintiff's red numeral "9" is a registered mark with the United States Patent and Trademark Office (the "USPTO"). (*Id.* ¶ 12). In addition, plaintiff has registered the mark "SOLO9W57" (*id.* ¶ 14), and it alleges that "the public has derived the nickname '9 West' from Solow's numeral '9' and/or the SOLOW9W57 service marks as an identification of 9 West 57."[1] (*Id.* ¶ 16).

1 In its Complaint, plaintiff identifies its service mark as both "SOLO9W57" and "SOLOW9W57." (*See, e.g.,* Sec. Am. Compl. ¶¶ 14, 15, 16). It is unclear which version is the proper mark.

Defendant Nine West Group, Inc. is a manufacturer and retailer of shoes, clothing, and accessories. It is a Delaware corporation with its principal place of business in White Plains, New York. (*Id.* ¶ 2). Defendant Nine West Development Corp. is a wholly owned subsidiary of Nine West Group.[2] (*Id.* ¶ 3).

2 The Court shall refer to defendants collectively as "Nine West ."

B. *Defendants' "Nine West" Mark*

Fisher Camuto Retail Corporation ("Camuto") was the predecessor of Nine West. (*Id.* ¶ 18). Camuto was a tenant in 9 West 57th Street from July 1977 through June 1982. (*Id.*). In or about 1980, Camuto began doing business under the name "9 West," employing the numeral "9" on its corporate logo similar to plaintiff's "9" sculpture. (*Id.* ¶¶ 19, 20). In 1981, in

response to plaintiff's demands to cease using the "9" logo, Camuto began using a "script numeral '9.' " (*Id.* ¶ 21).

***2** In 1990, Camuto began using "Nine West" as its corporate logo, and, in 1993, it also began using the name "9 & Co." (*Id.* ¶¶ 22–24). Defendants use the marks "for use in connection with the retail sale of women's shoes and handbags." (*Id.* ¶¶ 23, 24). Defendants registered both names with the USPTO in 1991 and 1995, respectively. (*Id.*).

In 1996, defendants began using their "Nine West" mark in connection with the retail sale of clothing (such as hosiery, jackets, and sleepwear) and accessories (such as sunglasses, watches, and hats). (*Id.* ¶¶ 26–28). Defendants filed trademark applications on their "Nine West" name to cover these products. (*Id.*).

C. *Investigations of Defendants*

In 1997, the Securities and Exchange Commission began investigating defendants for accounting irregularities and, along with the United States Customs Service, for circumstances surrounding Brazilian imports. (*Id.* ¶ 34). More recently, the Federal Trade Commission (the "FTC") and all of the state attorney generals investigated defendants for alleged price-fixing, which resulted in a settlement agreement whereby defendants agreed to pay approximately $34 million in fines. (*Id.* ¶¶ 35, 36).

DISCUSSION

Plaintiff's Complaint asserts four causes of action: trademark dilution under the Lanham Act; false designation under the Lanham Act; common law trademark infringement and unfair competition; and trademark dilution under New York law. Defendants move to dismiss the Complaint in its entirety, arguing that plaintiff's claims are barred by laches. In addition, defendants argue that the Complaint must be dismissed because, among other things, plaintiff failed to sufficiently plead likelihood of confusion and its ownership in the mark "9 West."

I. *Motion to Dismiss Standard*

A complaint may not be dismissed on a motion to dismiss unless it " 'appears beyond doubt that the plaintiff can prove no set of facts in support of his claim which would entitle him to relief." ' *Allen v. WestPoint–Pepperell, Inc.,* 945 F.2d 40, 44 (2d Cir.1991) (quoting *Conley v. Gibson,* 355 U.S. 41, 45–46 (1957)). Therefore, the issue before the Court " 'is not whether a plaintiff will ultimately prevail but whether the claimant is entitled to offer evidence to support the claims." ' *Villager Pond, Inc. v. Town of Darien,* 56 F.3d 375, 378 (2d Cir.1995) (quoting *Scheuer v. Rhodes,* 416 U.S. 232, 235–36 (1974)).

Although the pleading requirements under Federal Rule of Civil Procedure 8(a) are construed liberally, "[l]iberal construction has its limits, for the pleading must at least set forth sufficient information for the court to determine whether some recognized legal theory exists upon which relief could be accorded the pleader. If it fails to do so, a motion under Rule 12(b)(6) will be granted." *Levisohn, Lerner, Berger & Langsam v. Medical Taping Sys., Inc.,* 10 F.Supp.2d 334, 344 (S.D.N.Y.1998) (internal quotation omitted); *accord Scholastic, Inc. v. Stouffer,* 124 F.Supp.2d 836, 841 (S.D.N.Y.2000).

II. *Laches*

***3** To prevail on the defense of laches, defendants must establish three elements: (1) plaintiff had knowledge of defendants' use of its marks; (2) plaintiff inexcusably delayed taking action; and (3) defendants will be prejudiced by permitting plaintiff to assert its rights now. *See Fourth Toro Family Ltd. P'ship v. PV Bakery, Inc.,* 88 F.Supp.2d 188, 196 (S.D.N.Y.2000) (citation omitted). Although the burden of establishing these factors is usually on defendants, the Second Circuit has instructed that "when the suit is brought after the statutory time has elapsed, the burden is on the complainant to [allege] ... the circumstances making it inequitable to apply laches in [its] case." *Conopco, Inc. v. Campbell Soup Co.,* 95 F.3d 187, 191 (2d Cir.1996); *cf. Jose Armando Bermudez & Co. v. Bermudez Int'l,* No. 99 Civ. 9346(AGS), 2000 WL 1225792, at *8 (S.D.N.Y. Aug. 29, 2000) (conducting this analysis on a motion to dismiss).

The limitations period that courts apply to Lanham Act cases is six years.[3] *See Bermudez,* 2000 WL 1225792, at *8 n. 10 (citing *Conopco,* 95 F.3d at 191–92). Here, plaintiff acknowledges that Camuto "adopted the corporate logo '9 West' and began doing business under that name" in 1980, and that in 1991 "Camuto filed a trademark application ... on the name 'Nine West' for use in connection with the retail sale of women's shoes and handbags." (Sec.Am.Compl.¶¶ 19, 23). Plaintiff commenced this suit on October 12, 2000. Accordingly, because the statute of limitations has run, *see Bermudez,* 2000 WL 1225792, at *8 n. 10 (noting that the

period begins to run "when plaintiff purportedly discovered the alleged infringements"), "a presumption of laches ... appl[ies] and plaintiff must show why the laches defense ought not be applied in the case."[4] *Conopco,* 95 F.3d at 191.

3 The Second Circuit has explained that "laches is an equitable defense that courts employ instead of a statutory time-bar.... Because the Lanham Act establishes no limitations period ..., and ... there is no corresponding federal statute of limitations, we look to the most appropriate state statute of limitations for laches purposes." *Conopco,* 95 F.3d at 191. Hence, courts in this circuit apply New York's six-year fraud statute to Lanham Act claims. *See id.; accord Fourth Toro Family,* 88 F.Supp.2d at 196.

4 Even if the statute of limitations has not run, the laches defense may still be applicable. *See Peyser v. Searle Blatt & Co.,* No. 99 Civ. 10785(WK), 2000 WL 1071804, at *5 (S.D.N.Y. Aug. 2, 2000). In such a situation, however, there is no presumption of laches, and, thus, the burden remains on the defendant to prove the defense. *Conopco,* 95 F.3d at 191.

Plaintiff argues that its case should not be dismissed for laches for three reasons. First, plaintiff asserts that laches is not a proper issue for determination on a motion to dismiss. Second, plaintiff asserts that it has not inexcusably delayed taking action. Last, plaintiff asserts that its delay has not prejudiced defendants .[5] I address, and ultimately reject, each of these arguments in turn.

5 In its memorandum in opposition to defendants' motion to dismiss, plaintiff states that the "presumption" of laches "has no basis in law, or logic." (Pl. Mem. at 18). Hence, plaintiff's arguments actually read, *"Defendants Have Failed to Establish* an Unreasonable and Inexcusable Delay in Filing Suit," and *"Defendants Have Failed to Establish* Prejudice." (*Id.* at 17, 18 (emphasis added)). As already noted, however, the Second Circuit has specifically stated that "once the ... statute has run, a presumption of laches will apply," *Conopco,* 95 F.3d at 191, and the Complaint here clearly indicates that plaintiff commenced this action outside the limitations period. *See Bermudez,* 2000 WL 1225792, at *8 n. 10. Nonetheless, even if the burden is on defendants to establish laches, as discussed more fully below, defendants have satisfied this burden.

A. *Resolving Laches on Motion to Dismiss*

This Court has held: "[W]hen the defense of laches is clear on the face of the complaint, and where it is clear that the plaintiff can prove no set of facts to avoid the insuperable bar, a court may consider the defense on a motion to dismiss." *Lennon v. Seaman,* 63 F.Supp.2d 428, 439 (S.D.N.Y.1999) (citing *Oshiver v. Levin Fishbein Sedrin & Berman,* 38 F.3d 1380, 1385 n. 1 (3d Cir.1994); 5A Charles A. Wright & Arthur R. Miller, *Federal Practice & Procedure:* Civil 2d § 1357); *accord Bermudez,* 2000 WL 1225792, at *8. Hence, although the defense is fact-specific, the Court can consider laches on a motion to defense.

B. *Inexcusable Delay*

***4** Although plaintiff acknowledges that it has known of defendants' use of the "Nine West" mark since at least 1981 (Sec.Am.Compl.¶ 21), plaintiff argues that it has not inexcusably delayed the commencement of this action because its claims are based on "actions taken by Defendants beginning in 1996 and continuing through 2000...." (Pl. Mem. at 17). To support its position, plaintiff relies exclusively on the decision in *Fourth Toro Family,* 88 F.Supp.2d 188. (Pl. Mem. at 18). There, in a dispute between bagel sellers each claiming the right to use the "H & H" name, defendant argued that the action was barred by laches because it had used the name for 12 years prior to plaintiff's suit. The court, however, rejected the defense, noting a number of actions in the intervening years that excused the delay: defendant had "increased the aggressiveness and the scope of its advertising" by imitating plaintiff's campaigns; defendant changed its marketing focus from Manhattan to nation-wide; defendant changed its mark to one that was much more similar to plaintiff's mark; defendant adopted a "confusingly similar '800' number"; and defendant traded on plaintiff's kosher certification. *Fourth Toro Family,* 88 F.Supp.2d at 197. These actions, according to the court, "creat[ed] instances of both actual, reported confusion and the likelihood of increasing confusion." *Id.* In addition, the court noted that, prior to suing defendant, plaintiff had taken action with the "Trademark Office" on at least three separate occasions and, in fact, obtained "exclusive trademark protection" from the office. *Id.* at 197–98. Thus, the court concluded that "plaintiff's filing of [the] lawsuit ... was a direct and timely response to defendant's tactics." *Id.* at 198 (citation omitted).

In contrast, plaintiff here took no action against defendants until it commenced this action in October 2000, and defendants took no actions that increased the likelihood of confusion between the parties' marks or their services.

Defendants have used the "Nine West" mark, with plaintiff's knowledge, since 1980. In 1981, plaintiff demanded that Camuto alter his "9 West" logo because it allegedly violated plaintiff's red numeral "9" trademark. (Sec.Am.Compl.¶ 21). For the next two decades, however, plaintiff took no action even as defendants "continued to use the name[s] ... openly and notoriously...." (*Id.* ¶ 25). Plaintiff does not allege that it sought exclusive protection for the "9 West" mark, *cf. Fourth Toro Family,* 88 F.Supp.2d at 197–98, it does not allege that it notified defendants of its concerns, *cf. Bermudez,* 2000 WL 1225792, at *8 (declining to apply laches, in part, because plaintiff had "notified [defendant] of its concerns relat[ing] to possible infringement," and because defendant, in response, had represented that it would no longer engage in the allegedly infringing conduct), and it does not allege that it conducted an "investigation into the merits of [its] case."[6] *Cf. Peyser,* 2000 WL 1071804, at *6 (noting that a "reasonable investigation into the merits ... will in effect toll the laches period").

6 In its memorandum in opposition to defendants' motion to dismiss, plaintiff does not assert that it took any of these actions.

***5** In addition, plaintiff does not allege that defendants' use of the "Nine West" mark, including their post–1996 use, "increas[ed] the likelihood of confusion" between its real estate business or its properties and defendants' shoe and clothing business. The crux of the *Fourth Toro Family* decision was that in the intervening years defendant's actions "altered the competitive environment between plaintiff and defendant." 88 F.Supp.2d at 198. Here, plaintiff does not, and cannot, make such an allegation. Rather, plaintiff merely alleges that defendants' actions during that time "expanded the public's awareness of [*defendants'*] 'Nine West' name."[7] (Sec. Am. Compl. ¶ 26 (emphasis added)). Accordingly, the Complaint does not sufficiently allege that the filing of this lawsuit in October 2000, more than 20 years after defendants began using the "Nine West" name, was either a direct or a timely response to defendants' actions. *Cf. Fourth Toro Family,* 88 F.Supp.2d at 198.

7 Plaintiff also argues that the SEC's and FTC's investigations of defendants, beginning in 1997, and the resulting "negative publicity," "caused the public to associate [defendants' marks] with dishonesty, fraudulent practices and illegal conduct." (Sec.Am.Compl.¶ 37). This argument is meritless. First, the Complaint does not allege that the investigations increased the likelihood of confusion between the parties. Second, as discussed by the Fifth Circuit, plaintiff is proposing that a "trademark owner has a property right in his mark, but only so long as he personally is not unpopular with the general public." *Exxon Corp. v. Oxxford Clothes, Inc.,* 109 F.3d 1070, 1084 (5th Cir.1997). Like the Fifth Circuit, I "reject this highly unorthodox view of trademark law." *Id.*

C. *Prejudice to Defendants*

"A defendant has been prejudiced when the assertion of a claim available some time ago would be 'inequitable' in light of the delay in bringing that claim. Specifically, prejudice is present when a 'defendant has changed his position in a way that would not have occurred if the plaintiff had not delayed.' " *Bermudez,* 2000 WL 1225792, at *8 (quoting *Conopco,* 95 F.3d at 192). Here, the Complaint alleges the following: in 1980, Camuto began using a variation on the "Nine West" name; in 1981, plaintiff demanded that Camuto alter the style of his logo; in 1990, Camuto began using "Nine West" as its corporate logo; in 1991, Camuto filed a trademark application on the name "Nine West"; in 1993, defendants began to use the name "9 & Co.," and, in 1995, they applied for trademark protection for the name; from 1996 through 2000 defendants expanded its line of consumer products from shoes and handbags to include certain types of clothing apparel and accessories, and defendants filed trademark applications to cover these products under their "Nine West" name. Thus, in part because of plaintiff's inaction as to defendants' use of the "Nine West" mark, defendants have used the name for more than 20 years "in the manufacture and retail sale of clothing and accessories...." (Sec.Am.Compl.¶ 2). Aside from the one concern that it raised in 1981, plaintiff has allowed defendants to use the "Nine West" name uncontested for two decades.

Nonetheless, plaintiff argues that defendants have not suffered prejudice because "since 1996, Defendants have changed the manner in which they used the 'Nine West' name by expanding their business activities to include a wide variety of consumer products...."[8] (Pl. Mem. at 19). This argument, however, supports the opposite conclusion—that plaintiff's inaction prejudiced defendants—as defendants decided to "expand [their] business activities" after 16 years of selling shoes and handbags with no action from plaintiff. (Sec.Am.Compl.¶ 26). *Cf. Peyser,* 2000 WL 1071804, at *7–8 (noting that "courts have had little tolerance for cries of

'prejudice' from defendants who ... were put on notice of an infringement").

[8] Plaintiff's additional argument that defendants have failed to "establish" prejudice because "since 1997, [they] have been engaged in a series of illegal activities which have lent notoriety to the 'Nine West' name" is irrelevant. The issue before the Court is whether defendants have suffered prejudice because of *plaintiff's* inactions.

***6** Accordingly, because plaintiff has known of defendants' use of the "Nine West" name since 1980, has inexcusably delayed the commencement of an action against defendants, and has allowed defendants to maintain and expand their business activities by its delay, thus prejudicing defendants, plaintiff's claims are barred by laches. Laches is clear on the face of plaintiff's Complaint; it is clear that plaintiff "can prove no set of facts to avoid the insuperable bar," *Lennon,* 63 F.Supp.2d at 439; and there is no reason why the Court "should permit plaintiff[ ] to 'sleep on [its] rights' to sue under any of [its] claims." *Peyser,* 2000 WL 1071804, at *9.

III. *Additional Grounds for Dismissal*

A. *Likelihood of Confusion*

Even assuming the Complaint is not barred by laches, plaintiff's cause of action also fails because the Complaint fails to sufficiently allege any likelihood of confusion between the parties' marks, as required by the Lanham Act and New York common law. *See Nabisco, Inc. v. Warner–Lambert Co.,* 220 F.3d 43, 45–46 (2d Cir.2000). Although the existence of consumer confusion is generally a question of fact, "[i]n considering a motion to dismiss pursuant to Rule 12(b)(6), the Court may ... make an initial finding as to whether or not a jury would find a likelihood of confusion as to source." *Textile Deliveries, Inc. v. Stagno,* No. 90 Civ.2020(JFK), 1990 WL 155709, at *6 (S.D.N.Y. Oct. 9, 1990); *accord Schieffelin & Co. v. Jack Co. of Boca, Inc.,* 725 F.Supp. 1314, 1323 (S.D.N.Y.1989) (noting that for a motion to dismiss "courts retain an important authority to monitor the outer limits of substantial similarity within which a jury is permitted to make the factual determination whether there is a likelihood of confusion as to source" (quoting *Warner Bros., Inc. v. American Broadcasting Cos.,* 720 F.2d 231, 246 (2d Cir.1983))). Thus, the Court, accepting the facts as alleged in plaintiff's Complaint as true, must conclude whether a legal claim exists based on those facts. Here, plaintiff has failed to allege the existence of likelihood of confusion.[9]

[9] This is in contrast to the facts in *Solow v. BMW (US) Holding Corp.,* No. 97 Civ. 1373(DC), 1998 WL 717613, at *4 (S.D.N.Y. Oct. 14, 1998), where I denied a motion to dismiss a complaint filed by Solow that did allege a likelihood of confusion. There, in a case involving BMW's use—in a television commercial—of a red numeral "5" sculpture in front of a building similar in style to plaintiff's 9 West 57th Street property, Solow "unequivocally" alleged likelihood of confusion. *See id.* Moreover, in that case, unlike here, Solow did not wait 20 years to commence its action.

In addressing likelihood of confusion, courts apply the eight-factor test set forth in *Polaroid Corp. v. Polaroid Elecs. Corp.,* 287 F.2d 492, 495 (2d Cir.1961):(i) strength of plaintiff's mark; (ii) similarities of the parties' marks; (iii) proximity of the parties' products in the marketplace; (iv) likelihood that plaintiff will bridge the gap between the products; (v) actual confusion; (vi) defendants' intent in adopting their mark; (vii) quality of defendants' product; and (viii) sophistication of the relevant consumer group. *See also Nabisco,* 220 F.3d at 46. As the Second Circuit has noted, "the ultimate question [is] whether consumers are likely to be confused." *Id.* (quotation and citation omitted).

Here, the Complaint makes no allegations at all as to five of the *Polaroid* factors (iii, iv, vi, vii, and viii). The absence of any such discussion is not surprising, as those factors all weigh against a finding of confusion. As to the "ultimate question" of the likelihood of consumer confusion, the Complaint provides that plaintiff is a "corporation engaged in the business of real estate construction and the rental of distinctive commercial and residential properties." (Sec.Am.Compl.¶ 1). Defendants, in turn, manufacture and sell women's footwear, handbags, and, for the last six years, additional items such as hosiery, sunglasses, watches, and bed sheets. (*Id.* ¶¶ 24–28). Thus, there is clearly no proximity between the parties' businesses or their products, and there is simply no competition between the parties. *See Charles Atlas, Ltd v. DC Comics, Inc.,* 112 F.Supp.2d 330, 339 (S.D.N.Y.2000) (noting that because the parties "are simply not in direct competition ... the likelihood of confusion is greatly reduced"). Moreover, consumers who seek real estate construction or property rentals surely will not be confused by a company that manufactures and sells women shoes, handbags, clothing, and accessories.

***7** Accordingly, the Court concludes that the Complaint's allegations exceed the "outer limits ... within which a jury

is permitted to make the factual determination [that] there is a likelihood of confusion as to source." Based on the facts alleged, no legal claim exists.

B. *Plaintiff's "9 West" Mark*

In the Complaint, plaintiff alleges that "the public has derived the nickname '9 West' ... [and] uses the nickname '9 West' to identify 9 West 57 and has come to uniquely associate the nickname '9 West' with the building." (Sec.Am.Compl.¶ 16). The Complaint does not allege, however, that *plaintiff* uses, or has ever used, the nickname "9 West," or that *plaintiff* uses, or has ever used, the nickname to identify the building at 9 West 57. Hence, defendants argue that plaintiff "cannot have acquired ownership rights in the mark '9 West." ' (Defs. Mem. at 12–13); *see* 15 U.S.C. § 1127 (defining "trademark" as "any word, name, symbol, or device ... *used by [the applicant]"* seeking trademark protection (emphasis added)).

In response, plaintiff does not challenge defendants' assertion that it does not use the nickname, but, instead, relies on *National Cable Television Ass'n v. American Cinema Editors, Inc.,* 937 F.2d 1572 (Fed.Cir.1991), for its argument that "even without 'use' of trademark directly by the claimant ..., nicknames of trademarks or names used only by the public give rise to protectable rights...." (Pl. Mem. at 20). While the court there did state, in dicta, that public-created nicknames do give rise to protectable rights, the court's holding rested on the fact that *plaintiff* had "made significant use of [the nickname] as its trade name...." *National Cable Television,* 937 F.2d at 1577–78.

In *Harley–Davidson, Inc. v. Grottanelli,* 164 F.3d 806, 812 (2d Cir.1999), a case involving a motorcycle manufacturer's and a motorcycle repairer's competing use of the word "hog," the Second Circuit noted the *National Cable Television* decision but did not indicate "[w]hether or not we agree with [the] decision[ ]...." The court did note, however, that the nickname "hog," like plaintiff's alleged nickname "9 West," differed "significantly" from the nickname at issue in *National Cable Television* in that the nickname "hog" was "a generic term in the language as applied" to motorcycles.[10] *Id.* The court stated: "The public has no more right than a manufacturer to withdraw from the language a generic term, already applicable to the relevant category of products, and accord it trademark significance, at least as long as the term retains some generic meaning."[11] *Id.*

10 As noted by the Second Circuit, the term "hog" was used "to refer to motorcycles generally and large motorcycles in particular." *Harley–Davidson,* 164 F.3d at 808.

11 Moreover, the Second Circuit denied trademark protection to plaintiff's use of "hog" despite the fact that plaintiff itself had begun to use the term in connection with its merchandise, advertising, and promotion. *Harley–Davidson,* 164 F.3d at 809. Here, as already noted, the Complaint does not allege that plaintiff itself ever used the nickname "9 West."

There is a "9 West" on almost every cross-street in Manhattan, and, thus, "9 West" surely retains a "generic meaning" in the "language" of building addresses, which is how plaintiff uses the name. Under the reasoning of *Harley–Davidson,* therefore, plaintiff would not be permitted to accord trademark significance to the public-created nickname "9 West" in an action against another building that sought to use it. Hence, if plaintiff cannot enforce the nickname against another real estate company, then plaintiff should not be permitted to enforce the "9 West" nickname against a shoe and clothing company.

***8** Accordingly, plaintiff has no trademark right to the term "9 West," a nickname that, according to the Complaint, was created and is used only by the public, and one that is generic.

CONCLUSION

Based on the foregoing, all of plaintiff's claims are barred by the laches defense. In addition, plaintiff has failed to sufficiently allege likelihood of confusion and ownership rights in the name "9 West." Hence, the Second Amended Complaint is dismissed in its entirety, with prejudice, and the Clerk of Court shall enter judgment accordingly.

SO ORDERED.

UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF WISCONSIN
MILWAUKEE DIVISION

William Feehan,

Plaintiff,

vs.

Case No. 2:20-cv-1771

Wisconsin Elections Commission, and its members, Ann S. Jacobs, Mark L. Thomsen, Marge Bostelman, Julie M. Glancey, Dean Knudson, Robert F. Spindell, Jr., in their official capacities, Governor Tony Evers, in his official capacity,

Defendants.

BRIEF IN OPPOSITION TO PLAINTIFF'S MOTION FOR EMERGENCY INJUNCTIVE RELIEF OF AMICUS CURIAE WISCONSIN STATE CONFERENCE NAACP, DOROTHY HARRELL, WENDELL J. HARRIS, SR., AND EARNESTINE MOSS

INTRODUCTION

This lawsuit should be dismissed with prejudice on the pleadings. It is but one of 40-plus cases that have been filed around the country by President Trump or his political allies seeking to invalidate the results of the November 3, 2020 presidential election. It is the fifth such suit in Wisconsin alone, and a sixth has since been filed. The substance and timing of the instant case and the extreme and unprecedented relief it seeks constitute a continuation of an equally unprecedented abuse of the court system, to which credence need not and should not be given.

Plaintiff has already placed a significant enough burden on the Court, so the Wisconsin State Conference NAACP and its three participating members, Dorothy Harrell, Wendell J. Harris, Sr., and Earnestine Moss (collectively the "Wisconsin NAACP") will endeavor to not repeat the

substantive arguments that we expect the parties will make. Rather, we seek to highlight some of the stronger reasons why this Court should summarily dismiss this action. Three issues stand out: (1) federal courts in particular are not the proper forum for suits like this; (2) Plaintiff's inexcusable delay in filing this action deprives him of the right to the relief he seeks; and (3) the relief he seeks—the invalidation of approximately 3.2 million votes lawfully cast by eligible Wisconsin voters—is so inapt, so wrong, indeed so absurd as to mandate rejection of Plaintiff's plea without further proceedings.

In offering this perspective, the proposed amici rely on the lessons taught by federal district court and appellate judges in Pennsylvania, Georgia, and Michigan, who ruled that gussying up run-of-the-mill state law claims and unsupported voter fraud claims as federal constitutional claims is insufficient to invoke the jurisdiction of federal courts, and that suits brought even earlier than this one were still brought too late. We rely also on the opinions of members of the Wisconsin Supreme Court who, even while disagreeing on whether that court was the proper forum for an original action challenging Wisconsin's election results, raised serious threshold questions about the availability of the extraordinary relief requested by the President and his allies in those cases.

Before proceeding, we offer one final thought. Wisconsin NAACP is not simply an organization whose mission includes ensuring that voters' votes are counted, important as that mission is. It is dedicated specifically to advancing the interests of Black voters in our democracy. To that end, the national NAACP has partnered with one of the country's leading civil rights organizations, the Lawyers' Committee for Civil Rights Under Law, to work with experienced local counsel in several states, including Wisconsin, to ensure that the votes of Black voters are not invalidated in this election. It is no accident that Plaintiff's focus in this case is on the voters of Milwaukee County, home to Wisconsin's largest city and Black population. This follows a

pattern wherein the Trump Campaign and its allies have singled out alleged "corruption" in other cities with large Black populations.[1]

Wisconsin NAACP respectfully asks this Court to scrutinize Plaintiff's claims in that light, and recognize them not only as an existential threat to our democracy—which they are—but also as a particular threat to the votes of members of minority populations whose access to the ballot box has been historically obstructed.

Plaintiff's Complaint does not deserve a day in court.

ARGUMENT

I. THESE CASES DO NOT BELONG IN FEDERAL COURT.

On November 9, 2020, the Trump Campaign filed suit in the Middle District of Pennsylvania alleging a series of election improprieties, similar (and equally frivolous) to those alleged by Plaintiff here. *Donald J. Trump for President, Inc. v. Kathy Boockvar*, No. 4:20-cv-02078, 2020 WL 6821992 (Nov.21, 2020).[2] Initially, United States District Court Judge Matthew Brann scheduled an evidentiary hearing on the plaintiffs' motion for preliminary relief, but after hearing oral argument on the defendants' motion to dismiss, he not only adjourned the hearing without resetting it, but denied the plaintiffs' motion for leave to file a second amended complaint. *Trump v. Boockvar*, 2020 WL 6821992 at *3-4, 14. On appeal, a unanimous panel of the Third Circuit affirmed the denial of the request to amend the complaint, with Judge Stephanos Bibas writing for the Court and ruling that the sort of claims asserted by the plaintiffs, even though

[1] *See e.g.*, Transcript of Oral Argument Proceedings in Re: Motion to Dismiss, *Donald J. Trump for President v. Boockvar*, No. 20-3371 (M.D. Pa., Nov. 17, 2020), at 18-19 (President Trump's lawyer Rudy Giuliani alleging massive voter fraud in Philadelphia, Pittsburgh, Detroit, Milwaukee, and Atlanta).

[2] As here, the claims included allegations that election officials improperly cured absentee ballots and restricted observers.

repackaged as federal due process and equal protection claims, "boil down to issues of state law." *Donald J. Trump for President, Inc v. Pa.*, No. 20-3371, 2020 WL 7012522 at *1 (3d Cir. Nov 27, 2020).

Similar claims led to the identical result in a suit filed on November 13, 2020 in the Northern District of Georgia by L. Lin Wood, Jr.—who also serves as counsel for Plaintiff in this action—in which he alleged a series of election irregularities as frivolous as are Plaintiff's. claims here. *L. Lin Wood, Jr. v. Brad Raffensperger*, No. 1:20-cv-04651-SDG, 2020 WL 6817513 (N.D. Ga., Nov. 20, 2020).[3] The district court held a hearing, then denied Wood's request for a temporary restraining order. This past Saturday, December 5, the Eleventh Circuit, in an opinion by Chief Judge Pryor, unanimously affirmed on grounds that the case was not justiciable in the first instance, because federal courts are "courts of limited jurisdiction" and "may not entertain post-election contests about garden-variety issues of vote counting and misconduct that may properly be filed in state courts." *Wood v. Raffensperger*, No. 20-14418, 2020 WL 7094866 at *1 (11th Cir., Dec. 5, 2020).

Most recently, Judge Linda Parker of the Eastern District of Michigan also denied the Plaintiffs' Emergency Motion for Declaratory, Emergency, and Permanent Injunctive Relief challenging the election results in Michigan, particularly in Detroit, in a case brought by Sidney Powell—lead counsel for plaintiff in this case—and others on November 25. *King v. Whitmer*, No. 20-13134, slip op. (E.D. Mich., Dec. 7, 2020). The district court ruled without hearing oral argument. *Id.* at 6. The court found that Plaintiffs' claims were not justiciable in federal court because they were effectively state law claims brought against state officials. *Id.* at 10-13.

[3] Wood alleged, among other things, that defendant had improperly accepted absentee ballots without signature verification and restricted observers to the counting.

This case presents no reason for the Court to veer from the path taken by these sister courts. The claims are substantially the same: alleged deviations from state court laws that govern the handling and counting of absentee ballots and wild conspiracy theories about voting machines. As in the Michigan, Georgia, and Pennsylvania cases, there are no allegations that any specific voter was not qualified to vote or that any specific vote was fraudulently cast, and certainly no evidence beyond mere speculation by Plaintiff and non-credible analyses by unqualified "experts" that there were a sufficient number of fraudulent votes to affect the outcome of the Presidential election. There is no reason for this Court to continue this case, and, as explained below, every reason for this Court not to. This is even more true because there is an active suit in state circuit court brought by President Trump alleging noncompliance with Wisconsin election law that will be decided at a hearing on December 10, 2020.

II. PLAINTIFF'S DELAY DEPRIVES HIM OF THE RIGHT TO SEEK RELIEF.[4]

Plaintiff knew of the bases for the claims he has brought in this suit earlier than December 1, 2020 when he filed this suit. For example, the guidance by the Wisconsin Elections Commission (the "Commission") to local clerks regarding application of the "indefinitely confined" category of eligibility for obtaining an absentee ballot during the COVID-19 pandemic was issued on **March 29, 2020**, with an additional directive issued **May 13, 2020**, as Plaintiff himself alleges. (Compl., ¶ 40.)[5] Likewise, the practice of local clerks filling in missing witness address information on absentee ballot envelopes without requiring the presence of the voter has been

[4] Wisconsin NAACP does not agree that Plaintiff has standing to bring this case in the first instance under the Electors or Elections Clause, *see Lance v. Coffman*, 549 U.S. 437, 442 (2007); *Corman v. Torres*, 287 F.Supp.3d 558, 573 (M.D. Pa. 2018); *Bognet v. Sec'y Commw. of Pa.*, No. 20-3214, 2020 WL 6686120, at *6-9 (3d Cir. Nov. 13, 2020); *Wood v. Raffensperger, et. al.*, No. 1:20-CV-04651-SDG, 2020 WL 6817513, at *5 (N.D. Ga. Nov. 20, 2020); *King*, slip op. at 26-29, or under the due process and equal protection clauses. *See King*, slip op. at 24-25. We assume that the parties will make the same argument and therefore will not repeat it here.

[5] The related instructions from the Dane County Clerk were issued on March 25, 2020.

mandated by the Commission since at least **October 18, 2016**, as Plaintiff himself alleges.[6] (Compl., ¶ 44.) Plaintiff's utterly baseless claims about widespread coordinated manipulation of voting machines amount to nothing more than wild conspiracy theories, based principally on a single redacted declaration from an anonymous witness. (*See* Compl., Exh. 1.) But even that declaration was purportedly signed on **November 15, 2020**, and the declarant purported to have knowledge of the bases for Plaintiff's allegations as early as a decade prior. (Compl., Exh. 1, ¶¶ 11-26.)

Nevertheless, Plaintiff did not file suit until a month after Election Day, waiting until well after he learned on November 4 that President Trump had lost the election in Wisconsin and indeed until after that result had been certified. Laches bars this suit because of Plaintiff's lack of diligence and the prejudice resulting from the delay. Indeed, in the Northern District of Georgia post-election lawsuit, involving a state election that was called against the President much later than Wisconsin's and still filed **seventeen days before this lawsuit**, the district court found that laches applied. *Wood*, 2020 WL 6817513 at * 6-9. Additionally, in the Eastern District of Michigan lawsuit, filed five days before this case, the district court also found that laches applied. *King*, slip op. at 19 ("Plaintiffs could have lodged their constitutional challenges much sooner than they did, and certainly not three weeks after Election Day and one week after certification of almost three million votes. The Court concludes that Plaintiffs' delay results in their claims being barred by laches.").

The Georgia court's decision squares with how courts have handled similar cases in the past. Plaintiff may not "'lay by and gamble upon [his favored candidate] receiving a favorable decision of the electorate' and then, upon losing, seek to undo the ballot results in a court action."

[6] It was merely reiterated on October 19, 2020, (Compl., ¶ 45), still weeks before the election, and a month and a half before Plaintiff filed this suit.

Hendon v. N.C. State Bd. of Elections, 710 F.2d 177, 182 (4th Cir. 1983) (quoting *Toney v. White*, 488 F.2d 310, 314 (5th Cir. 1973)).

Laches applies with particular rigor to election challenges, requiring "any claim against a state electoral procedure [to] be expressed expeditiously." *Fulani*, 916 F.2d at 1031. Before an election, laches requires such claims to be promptly raised lest last-minute court orders confuse voters, disincentivizing voting and undermining public confidence in the fairness of elections. *See, e.g., Purcell v. Gonzales*, 549 U.S. 1, 4-5 (2006); *Bognet v. Sec'y Commw. of Pa.*, No. 20-3214, 2020 WL 668120, at *17-18 (3d Cir. Nov. 13, 2020). And, after an election, laches generally bars parties from challenging the election on grounds they could have raised beforehand. *Soules v. Kauaians for Nukoli Campaign Comm.*, 849 F.2d 1176, 1180 (9th Cir. 1988). Moreover, applying laches avoids the "judicial fire drill[s]" and "mad scramble[s]" required to adjudicate belated challenges to election procedures before post-election deadlines mandated by state law for certification of results. *Stein v. Cortés*, 223 F.Supp.3d 423, 436 (E.D. Pa. 2016) (internal quotation marks omitted).

Plaintiff offers no justification for delaying in asserting these claims until now—nor could he, because there is none. Further, the delay is prima facie prejudicial, as the relief he requests would void an entire election of more than 3.2 million eligible Wisconsin voters. *See Hawkins v. Wis. Elections Comm'n*, 393 Wis.2d 629, 635 (2020) (denying petitioners' ballot access claim because, "given their delay in asserting their rights, [the court] would be unable to provide meaningful relief without completely upsetting the election."). And, by overturning the democratic will of the people as expressed through their votes, Plaintiff's requested relief would seriously and irreparably undermine the Commission's efforts to ensure public trust and confidence in Wisconsin's electoral system, including the trust and confidence of voters like those represented

by the Wisconsin NAACP, who have always had to fight for recognition as equals and access to the vote. *See Hawkins*, 393 Wis.2d at 635-636 (denying relief in ballot access case against the Commission where it would cause "confusion and disarray and would undermine confidence in the general election results."). Most important, it would severely prejudice more than 3.2 million Wisconsin voters who cast ballots for the presidential candidate of their choice during the 2020 General Election. Equity cannot possibly sanction such a result.

III. THE REMEDY REQUESTED IS PROHIBITED AS A MATTER OF LAW.

Overturning the results of an election—as Plaintiff asks this Court to do—would be an extraordinary intervention by the judiciary into democratic processes. Again, the recent Georgia, Michigan, and Pennsylvania cases provide useful guidance. The District Court in Georgia captured the compelling reasons why relief should not be granted in cases like this:

> The Court finds that the threatened injury to Defendants as state officials and the public at large far outweigh any minimal burden on Wood. To reiterate, Wood seeks an extraordinary remedy: to prevent Georgia's certification of the votes cast in the General Election, after millions of people had lawfully cast their ballots. To interfere with the result of an election that has already concluded would be unprecedented and harm the public in countless ways. [citations]. Granting injunctive relief here would breed confusion, undermine the public's trust in the election, and potentially disenfranchise of over one million Georgia voters. Viewed in comparison to the lack of any demonstrable harm to Wood, this Court finds no basis in fact or in law to grant him the relief he seeks.

Wood, 2020 WL 6817513 at * 13.

Similarly, as the Third Circuit stated, granting the kind of relief requested by Plaintiff here—"**throwing out millions of votes—is unprecedented.**" *Trump v. Pa.*, 2020 WL 7012522 at *7 (emphasis in original). In Pennsylvania, the Third Circuit rightly concluded that, "[v]oters, not lawyers, choose the President. Ballots, not briefs, decide elections." *Id.* at *9. Judge Parker of the Eastern District of Michigan reached a similar conclusion: "[T]he Court finds that

Plaintiffs are far from likely to succeed in this matter. In fact, this lawsuit seems to be less about achieving the relief Plaintiffs seek—as much of that relief is beyond the power of this Court—and more about the impact of their allegations on People's faith in the democratic orderly statutory scheme established to challenge elections and to ignore the will of millions of voters. This, the Court cannot, and will not, do. ¶ The People have spoken." *King*, slip op., 35-36. Indeed, granting Plaintiff's requested relief would violate the longstanding principle that "all qualified voters have a constitutionally protected right to vote and to have their votes counted." *Reynolds v. Sims,* 377 U.S. 533, 554 (1963) (citing *Ex parte Yarbrough,* 110 U.S. 651 (1884) and *United States v. Mosley*, 238 U.S. 383 (1915)).

It is hard to imagine such a remedy could ever be appropriate, but certainly it is not here, where Plaintiff has failed to put forth any credible evidence demonstrating that a single unlawful vote was counted or valid ballot discarded. Nor has he pled a single cognizable claim. Plaintiff instead alleges what amounts to a laundry list of speculative and circumstantial claims about the **potential** for fraud and about the conduct of the election as a whole, which he asserts led to a "fail[ure] to conduct the general election in a uniform manner," (Compl., ¶ 117) and "disparate treatment of Wisconsin voters," (Compl., ¶ 144) related to the widespread use of mail-in ballots by Wisconsin voters necessitated by the COVID-19 pandemic. But even if Plaintiff's claims were legitimate, invalidating the ballots of Wisconsin voters—who justifiably relied on the voting procedures made available to them by the Wisconsin Legislature and the Commission—cannot possibly be the appropriate remedy. Tossing out votes cast by eligible voters in reliance on official instructions how to vote would violate the due process rights of every voter. *See, e.g.*, *Ne. Ohio Coal. for Homeless v. Husted*, 696 F.3d 580, 595, 597–98 (6th Cir. 2012) (holding that rejecting ballots invalidly cast due to poll worker error likely violates due process).

Further, contrary to Plaintiff's allegations, this is not *Bush v. Gore*. There, the Supreme Court specifically distinguished the issue before it—whether there existed arbitrary and disparate variations in the standards applied to whether a ballot should be counted—from "[t]he question … whether local entities, in the exercise of their expertise, may develop different systems for implementing elections." 531 U.S. at 109. The prevailing rule is that, absent such arbitrary differences in the standards used to determine whether individual ballots should be counted or not—an issue not even hinted at in Plaintiff's blunderbuss challenge here—differences in election administration between local entities are not only permissible, but expected. *See, e.g., Short v. Brown*, 893 F.3d 671, 679 (9th Cir. 2018); *Ne. Ohio Coal. for Homeless v. Husted*, 837 F.3d at 636; *Wexler v. Anderson*, 452 F.3d 1226, 1231-33 (11th Cir. 2006); *Hendon v. N.C. State Bd. of Elections*, 710 F.2d at 181; *Paher v. Cegavske*, No. 20-243, 2020 WL 2748301, at *9 (D. Nev. May 27, 2020); *Donald J. Trump for President, Inc. v. Boockvar*, No. 2:20-CV-966, 2020 WL 5997680, at *44-45.

Plaintiff's request for injunctive relief—directing Defendants to "de-certify the election results," "enjoining transmitting the currently certified results the Electoral College [sic]," and "requiring Governor Evers to transmit certified election results that state that President Donald Trump is the winner of the election," *inter alia*, Compl., ¶ 142, is beyond bizarre. Federal courts lack the authority to determine which results a state must certify, let alone to "de-certify" results that have already been certified—and slate of Electors already submitted—under lawful constitutionally-determined and state-law-provided mechanisms, so Plaintiff's request cuts against the institutional role of each branch of the republic and each level of government. Here, the Wisconsin Legislature has already acted within its authority: it vested the right to vote for President in the people of Wisconsin, and the right to vote includes the right to have that vote counted. *See*

Reynolds, 377 U.S. at 554 (1964); *U. S. v. Classic*, 313 U.S. 299, 315 (1941); *U.S. v. Mosley*, 238 U.S. 383, 386 (1915).

In that vein, the Wisconsin Supreme Court has recognized that a remedy that would nullify the votes of millions of voters is simply a bridge too far. In the past two weeks, three original actions were brought directly to the Wisconsin Supreme Court to change the result of the election. In each, a majority of that court held that such actions need to be brought in the circuit court first, if they can be brought at all. *Trump v. Evers*, No. 2020AP1971-OA (Wis. S. Ct., Dec. 3, 2020); *Mueller v. Wis. Elections Comm'n*, No. 2020AP1958-OA (Wis. S. Ct. Dec. 4, 2020): *Wis. Voters Alliance v. Wis. Elections Comm'n*, No. 2020AP1930-OA (Wis. S. Ct., Dec, 4, 2020).

Beyond simply disposing of the cases, Justice Hagedorn, in his concurrence joined by three justices who comprised the majority in *Wisconsin Voters Alliance,* made clear that the remedies sought by President Trump and his supporters would cause irreparable damage to our democracy if granted or even given serious thought:

> Something far more fundamental than the winner of Wisconsin's electoral votes is implicated in this case. At stake, in some measure, is faith in our system of free and fair elections, a feature central to the enduring strength of our constitutional republic. It can be easy to blithely move on to the next case with a petition so obviously lacking, but this is sobering. The relief being sought by the petitioners is the most dramatic invocation of judicial power I have ever seen. Judicial acquiescence to such entreaties built on so flimsy a foundation would do indelible damage to every future election. Once the door is opened to judicial invalidation of presidential election results, it will be awfully hard to close that door again. This is a dangerous path we are being asked to tread. The loss of public trust in our constitutional order resulting from the exercise of this kind of judicial power would be incalculable.

Wis. Voters Alliance, (slip. op. at 3) (Wis. Sup. Ct., Dec, 4, 2020) (Hagedorn, J., concurring).[7]

[7] Even Chief Justice Roggensack, while dissenting in all three cases on the grounds that the Wisconsin Supreme Court should exercise original jurisdiction, acknowledged in one of her dissents that "[t]he remedy Petitioners seek may be out of reach for a number of reasons." *Trump v. Evers*, No. 2020AP1971-OA (slip. op. at 6) (Wis. S. Ct., Dec, 3, 2020) (Roggensack, C.J., dissenting).

CONCLUSION

For the reasons set forth above, Wisconsin State Conference NAACP, Dorothy Harrell, Wendell J. Harris, Sr., and Earnestine Moss respectfully requests that this Court summarily dismiss this case.

Dated this 7th day of December 2020.

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN
MILWAUKEE DIVISION

WILLIAM FEEHAN and DERRICK VAN ORDEN,

Plaintiffs,

v.

WISCONSIN ELECTIONS COMMISSION, and its members ANN S. JACOBS, MARK L. THOMSEN, MARGE BOSTELMANN, JULIE M. GLANCEY, DEAN KNUDSON, ROBERT F. SPINDELL, JR., in their official capacities, GOVERNOR TONY EVERS, in his official capacity,

Case No.: 20CV1771

Defendants.

NOTICE OF SUPPLEMENTAL AUTHORITY

Defendant Governor Tony Evers files this Notice of Supplemental Authority to alert the Court that the District of Arizona just dismissed a nearly-identical suit filed by Plaintiff's counsel there, *Bowyer v. Ducey*, No. 2:20-cv-2321 (Dec. 9, 2020). The Opinion and Order granting the Motion to Dismiss is attached as Exhibit A.

The *Bowyer* Opinion rules against Plaintiffs on all grounds. First, it finds that Plaintiffs have no standing under the Electors/Elections Clause or for their vote dilution claims. Ex. A. at 4-11. Second, it finds that abstention applies. *Id*. at 11-14. Third, the court holds that Eleventh Amendment Immunity bars Plaintiffs' claims. *Id*. at 14-16. Fourth, the court rules that laches bars Plaintiffs' claims. *Id*. at 16-21. Fifth, it holds that the case is moot. *Id*. at 21-22. Sixth, the court finds that Plaintiffs have failed to state a claim. *Id*. at 22-27. Finally, the court finds that Plaintiffs

do not meet any of the other requirements to obtain an injunction and in fact the requested injunction would "greatly harm the public interest." *Id.* at 28.

All these reasons apply in this nearly-identical case.

Respectfully submitted this 9th day of December 2020.

Exhibit A

WO

IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF ARIZONA

Tyler Bowyer, et al., Plaintiffs, v. Doug Ducey, et al., Defendants.	No. CV-20-02321-PHX-DJH **ORDER**

Plaintiffs bring their Complaint seeking injunctive relief from this Court, specifically, to "set aside the results of the 2020 General Election," because they claim the election process and results were "so riddled with fraud, illegality and statistical impossibility . . . that Arizona voters, courts and legislators cannot rely on or certify" its results. (Doc. 1 at 2). By any measure, the relief Plaintiffs seek is extraordinary. If granted, millions of Arizonans who exercised their individual right to vote in the 2020 General Election would be utterly disenfranchised. Such a request should then be accompanied by clear and conclusive facts to support the alleged "egregious range of conduct in Maricopa County and other Arizona counties . . . at the direction of Arizona state election officials." (*Id.*) Yet the Complaint's allegations are sorely wanting of relevant or reliable evidence, and Plaintiffs' invocation of this Court's limited jurisdiction is severely strained. Therefore, for the reasons stated herein, the Complaint shall be dismissed.

I. Background

In Arizona, more than 3.4 million voters participated in the November 3, 2020,

General Election. Thereafter, pursuant to A.R.S. § 16-602, several counties performed a hand count of sample ballots to test the tabulation equipment, and either no discrepancies were found or, if there were, they were "within the acceptable margin."[1] Arizona law also requires the secretary of state, in the governor's presence, to certify the statewide canvas on the fourth Monday after a general election. A.R.S. § 16-648. On November 30, 2020, Secretary of State Katie Hobbs, in the presence of Governor Doug Ducey, certified the statewide canvas. (Doc. 40 at 4). The Canvas shows that former Vice President Joseph Biden prevailed over President Donald Trump by more than ten thousand votes.[2] On that same day, Governor Ducey signed the Certificate of Ascertainment for Vice President Biden's presidential electors. (Doc. 40 at 4). The Certificate was then transmitted to the United States Archivist pursuant to the Electoral Count Act. (*Id.*); s*ee also* 3 U.S.C. § 6.

In their Complaint and the accompanying Motion for Temporary Restraining Order ("TRO") filed on December 2, Plaintiffs "contest" the election and ask this Court to compel the Governor to "de-certify" these results. (Docs. 1 ¶ 145; 2 at 10). The Complaint also requests that this Court grant a permanent injunction "enjoining Secretary Hobbs and Governor Ducey from transmitting the currently certified election results to the Electoral College," declare the election results unconstitutional, and seize all voting machines, equipment, software, and other election-related records and materials, including all ballots cast.[3] (Doc. 1 at 51–52). The Complaint claims to show "multifaceted schemes and artifices implemented by Defendants and their collaborators" to defraud the election. (*Id.* at ¶ 3). And these schemes allegedly resulted in "the unlawful counting, or fabrication, of hundreds of thousands of illegal, ineligible, duplicate or purely fictitious ballots." (*Id.*)

[1] Ariz. Sec'y of State, *Summary of Hand Count Audits–2020 General Election* (Nov. 17, 2020), https://azsos.gov/election/2020-general-election-hand-count-results.

[2] Ariz. Sec'y of State, State of Arizona Official Canvass, https://azsos.gov/sites/default/files/2020_General_State_Canvass.pdf.

[3] Under 3 U.S.C. § 5, if a state enacts and applies procedures to decide election controversies before election day, and a decision regarding a contested election is made at least six days before the electors' meetings, then the decision is conclusive and will apply in counting the electoral votes. That deadline, referred to as the "safe harbor" deadline, was December 8, 2020, as the Electoral College will meet on December 14, 2020. *See* 3 U.S.C. § 7.

Of the fourteen named Plaintiffs, three are registered voters and GOP Chairs for various Arizona counties. (*Id.* at ¶¶ 29–31). The remaining eleven are Republican nominees for Arizona's presidential electors. (*Id.* at ¶ 28). One of the eleven, Dr. Kelli Ward, filed suit in state-court over allegations of fraud in this election. *See Ward v. Jackson*, Case No. CV2020-015285, slip. op. (Ariz. Super. Ct. Dec. 4, 2020) (finding no evidence of alleged fraud and dismissing claims of election misconduct); (Doc. 55-1). In that case, on December 8, 2020, the Arizona Supreme Court affirmed the Maricopa County Superior Court's findings that there was no evidence of fraud or misconduct in Arizona's election. (*Ward v. Jackson*, CV2020-015285 (Ariz. 2020); (Doc. 81-1).

Plaintiffs' Complaint contains four counts, three of which assert 42 U.S.C. § 1983 claims for violations of the Constitution's Elections and Electors Clauses, as well as the Fourteenth Amendment's Due Process and Equal Protection guarantees. (Doc. 1 ¶¶ 103–34). The final count, which does not specify a cause of action, is for "Wide-Spread Ballot Fraud." (*Id.* at ¶¶ 135–41).

On December 3, the day after Plaintiffs filed their Complaint, the Court received a Motion to Intervene from the Arizona Democratic Party, which was subsequently denied.[4] (Docs. 26 and 69). The Court also received a Motion to Intervene from the Maricopa County Board of Supervisors and Maricopa County Recorder Adrian Fontes, which was granted. (Docs. 27 and 32). The Court held a status conference on the same day, in which it scheduled a December 8 hearing on the TRO. (Doc. 28). By subsequent Order (Doc. 43), the Court converted that hearing to oral argument on the Motions to Dismiss filed on December 4. (Docs. 36, 38, and 40). Plaintiffs have filed their Response to the Motions (Doc. 44), and Defendants have filed their Replies. (Docs. 53, 54, and 55). On December 8, 2020, the Court held oral argument on the Motions to Dismiss and took this matter under advisement. Being fully briefed on the matter, the Court now issues its ruling.

…

[4] The Arizona Democratic Party sought intervention under theories of permissive joinder. While the Court did not believe the Motion was inappropriate, the Court did not find their presence necessary to this lawsuit and therefore denied the Motion to Intervene.

II. Analysis

Given the import of the overarching subject—a United States Presidential Election—to the citizens of Arizona, and to the named Plaintiffs, the Court is compelled to make clear why it finds it inappropriate to reach the merits of Plaintiffs' Complaint and why it must grant the Motions to Dismiss this matter in its entirety. The Court will endeavor to lay bare the independent reasons for its conclusions, including those related to Article III standing, abstention, laches, mootness, and the federal pleading standards, which govern its review.

A. Article III Standing

"To ensure that the Federal Judiciary respects the proper—and properly limited—role of the courts in a democratic society, a plaintiff may not invoke federal-court jurisdiction unless he can show a personal stake in the outcome of the controversy." *Gill v. Whitford*, 138 S. Ct. 1916, 1929 (2018) (internal citations omitted). Article III provides that federal courts may only exercise judicial power in the context of "cases" and "controversies." U.S. Const. art. III, § 2, cl. 1; *Lujan v. Defs. of Wildlife*, 504 U.S. 555, 559 (1992). For there to be a case or controversy, the plaintiff must have standing to sue. *Spokeo, Inc. v. Robins*, 136 S. Ct. 1540, 1547 (2016) ("*Spokeo II*"). Whether a plaintiff has standing presents a "threshold question in every federal case [because it determines] the power of the court to entertain the suit." *Warth v. Seldin*, 422 U.S. 490, 498 (1975). "No principle is more fundamental to the judiciary's proper role in our system of government than the constitutional limitation of federal-court jurisdiction to actual cases or controversies." *DaimlerChrysler Corp. v. Cuno,* 547 U.S. 332, 341 (2006). A suit brought by a plaintiff without Article III standing is not a "case or controversy," and an Article III federal court therefore lacks subject matter jurisdiction. *Steel Co. v. Citizens for a Better Environment*, 523 U.S. 83, 101 (1998).

"[A] plaintiff seeking relief in federal court must first demonstrate . . . a personal stake in the outcome," *Baker v. Carr*, 369 U.S. 186, 204 (1962), distinct from a "generally available grievance about government," *Lance v. Coffman*, 549 U.S. 437, 439 (2007) (per

curiam). "That threshold requirement ensures that we act as judges, and do not engage in policymaking properly left to elected representatives." *Gill*, 138 S. Ct. at 1923. To establish standing, a plaintiff has the burden of clearly demonstrating that she has: "(1) suffered an injury in fact, (2) that is fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a favorable judicial decision." *Spokeo II*, 136 S. Ct. at 1547 (*quoting Warth*, 422 U.S. at 518); *accord Kokkonen v. Guardian Life Ins. Co. of Am.*, 511 U.S. 375, 377 (1994) (noting the party asserting jurisdiction bears the burden of establishing subject matter jurisdiction on a Rule 12(b)(1) motion to dismiss).

To establish an injury in fact, "a plaintiff must show that he or she suffered 'an invasion of a legally protected interest' that is 'concrete and particularized' and 'actual or imminent, not conjectural or hypothetical.'" *Spokeo,* 136 S. Ct. at 1548 (*quoting Lujan,* 504 U.S. at 560). "When we have used the adjective 'concrete, we have meant to convey the usual meaning of the term—'real,' and not 'abstract.'" *Id*. The plaintiff must establish a "particularized" injury, which means that "the injury must affect the plaintiff in a personal and individual way." *Raines v. Byrd*, 521 U.S. 811, 819 (1997). Moreover, "[a]lthough imminence is concededly a somewhat elastic concept, it cannot be stretched beyond its purpose, which is to ensure that the alleged injury is not too speculative for Article III purposes—that the injury is certainly impending." *Clapper v. Amnesty Int'l USA*, 568 U.S. 398, 409 (2013). Where a plaintiff has not established the elements of standing, the case must be dismissed pursuant to Federal Rule of Civil Procedure 12(b)(1).

Rule 12(b)(1) authorizes a court to dismiss claims over which it lacks subject-matter jurisdiction. A Rule 12(b)(1) challenge may be either facial or factual. *Safe Air for Everyone v. Meyer*, 373 F.3d 1035, 1039 (9th Cir. 2004). In a facial attack, the court may dismiss a complaint when the allegations of and documents attached to the complaint are insufficient to confer subject-matter jurisdiction. *See Savage v. Glendale Union High Sch. Dist. No. 205*, 343 F.3d 1036, 1039 n.2 (9th Cir. 2003). In this context, all allegations of material fact are taken as true and construed in the light most favorable to the nonmoving party. *Fed'n of African Am. Contractors v. City of Oakland*, 96 F.3d 1204, 1207 (9th Cir.

1996). In contrast, when a court evaluates a factual challenge to jurisdiction, a court is "free to weigh the evidence and satisfy itself as to the existence of its power to hear the case." *Safe Air for Everyone*, 373 F.3d at 1039 ("In resolving a factual attack on jurisdiction, the district court may review evidence beyond the complaint without converting the motion to dismiss into a motion for summary judgment.").

1. Elections and Electors Clause – Count One

Plaintiffs allege in Count One that Defendants violated the Elections and Electors Clauses and 28 U.S.C. § 1983 by, among other things, losing or destroying absentee ballots, and/or replacing those ballots with "blank ballots filled out by election workers, Dominion or other third parties" sending thousands of absentee ballots to someone besides the registered voter that "could have been filled out by anyone." (Doc. 1 at 41). Defendants argue that Plaintiffs do not have standing to assert such a claim. (Doc. 40 at 8–9).

The Elections Clause of the United States Constitution states: "The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof[.]" U.S. Const. art. I, § 4, cl. 1. The Elections Clause authorizes the state governments to regulate federal elections held in the state, while Congress retains "exclusive control" to alter a state's regulations. *Colegrove v. Green*, 328 U.S. 549, 554 (1946). A separate provision, the "Electors Clause" of the Constitution, states: "Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors . . . ." U.S. Const. art. II, § 1, cl. 2.[5]

Plaintiffs' Complaint alleges that Defendants violated the Elections Clause. However, the Complaint does not allege grounds for standing to assert this claim, nor does it distinguish between the status of the groups of Plaintiffs. At oral argument, Plaintiffs'

[5] While the Electors Clause and Elections Clause are separate Constitutional provisions, they share "considerable similarity." *Ariz. State Leg. v. Ariz. Indep. Redistricting Comm'n*, 576 U.S. 787, 839, (2015) (Roberts, C.J., dissenting). These provisions are therefore often considered together. *See Bognet v. Sec'y of Commonwealth of Pa.*, 980 F.3d 336, 348–52 (3d Cir. 2020) (analyzing standing for Elections Clause and Electors Clause under the same test); *Wood v. Raffensperger*, 2020 WL 6817513, at *1 (N.D. Ga. Nov. 20, 2020) (same); *U.S. Term Limits, Inc. v. Thornton*, 514 U.S. 779, 804–05 (1995) (holding that state's "duty" under Elections Clause "parallels the duty" described by Electors Clause). Plaintiffs do not meaningfully distinguish between the two clauses in their Complaint or briefing.

counsel stated that eleven of the Plaintiffs were Republican Party nominees to be electors, and the other three were county GOP Chairs. As an initial matter, Plaintiffs' briefing does not contain any arguments that the GOP Chairs have standing to assert this claim and the Court will dismiss the claim as to the GOP Chairs outright.

Plaintiffs argue that the Plaintiff Electors should be considered "candidates," and thus that they have standing under the Electors and Elections Clause pursuant to an Eighth Circuit case, *Carson v. Simon*, 978 F.3d 1051 (8th Cir. 2020). (Doc. 44 at 5). That case, which is based on the operation of Minnesota state election law, allowed electors to bring claims under the Elections Clause because electors were treated as candidates for office under Minnesota law and thus would be injured by the governor's failure to seat them if chosen as the state's electors. *See Carson*, 978 F.3d at 1057.

Plaintiff Electors likewise assert that under Arizona law they should also be considered "candidates." (Doc. 44 at 5–6) (citing A.R.S. § 16-344). However, the Electors are not candidates for office as the term is generally understood. Arizona law makes clear that the duty of an Elector is to fulfill a ministerial function, which is extremely limited in scope and duration, and that they have no discretion to deviate at all from the duties imposed by the statute. *See* A.R.S. § 16-212(C) ("After the secretary of state issues the statewide canvass containing the results of a presidential election, the presidential electors of this state ***shall cast their electoral college votes for the candidate for president and the candidate for vice president who jointly received the highest number of votes*** in this state as prescribed in the canvass.") (emphasis added). Arizona voters do not show up to vote for any single Electors listed next to the presidential candidates' names; they vote for their preferred presidential candidate. By specifying that the electors "shall be enclosed in a bracketed list" next to "the surname of the presidential candidate and vice-presidential candidate," A.R.S. § 16-507(B) clarifies and distinguishes the Electors' ministerial status from that of the presidential candidate running for office, the latter who unquestionably suffers the discrete injury required for standing.[6] Notably, the Republican candidate whose

[6] A.R.S. § 16-507(B) in its entirety reads: "Presidential electors, which, shall be enclosed in a bracketed list and next to the bracketed list shall be printed in bold type the surname

name was on the ballot is not a plaintiff in this case.

Other circuit courts to reach the issue have cited the *Carson* decision with disapproval, noting that there was no precedent for expanding standing in the way that it did.[7] *See Bognet v. Sec'y of Commonwealth of Pa.*, 980 F.3d 336, 351 n.6 (3d Cir. 2020) ("Our conclusion departs from the recent decision of an Eighth Circuit panel which, over a dissent, concluded that candidates for the position of presidential elector had standing under *Bond* [*v. United States*, 564 U.S. 211 (2011)] to challenge a Minnesota state-court consent decree that effectively extended the receipt deadline for mailed ballots. . . . The *Carson* court appears to have cited language from *Bond* without considering the context—specifically, the Tenth Amendment and the reserved police powers—in which the U.S. Supreme Court employed that language. There is no precedent for expanding *Bond* beyond this context, and the *Carson* court cited none."). Indeed, as numerous other courts have held, where, as here, the injury alleged by plaintiffs is that defendants failed to follow the Elections Clause, the Supreme Court has stated that the "injury is precisely the kind of undifferentiated, generalized grievance about the conduct of government that [courts] have refused to countenance." *Lance*, 549 U.S. at 442.

Elector Plaintiffs have not established they can personally bring suit, and therefore, they do not have standing to bring Count One.[8] Therefore, the Court will dismiss Count

---

of the presidential candidate and vice-presidential candidate who is seeking election jointly with the presidential candidate shall be listed directly below the name of the presidential candidate. The indicator for the selection of the presidential and vice-presidential candidates shall be directly next to the surname of the presidential candidate, and one mark directly next to a presidential candidate's surname shall be counted as a vote for each elector in the bracketed list next to the presidential and vice-presidential candidates."

[7] *See also Carson,* 78 F.3d at 1063 (Kelly, J., dissenting) ("I am not convinced the Electors have Article III standing to assert claims under the Electors Clause. Although Minnesota law at times refers to them as 'candidates,' *see, e.g.*, Minn. Stat. § 204B.03 (2020), the Electors are not candidates for public office as that term is commonly understood. Whether they ultimately assume the office of elector depends entirely on the outcome of the state popular vote for president. *Id.* § 208.04 subdiv. 1 ('[A] vote cast for the party candidates for president and vice president shall be deemed a vote for that party's electors.'). They are not presented to and chosen by the voting public for their office, but instead automatically assume that office based on the public's selection of entirely different individuals.").

[8] The Court notes that Count One of the Complaint makes passing references to the "VRA and HAVA," (the Voting Rights Act and the Help America Vote Act of 2002) but does not bring any claims under these statutes. (Doc. 1 ¶ 106).

One.

2. Vote Dilution – Count Two

In Count Two, Plaintiffs allege Equal Protection violations based on Defendants' failure to comply with Arizona law by permitting "illegal votes," allowing "voting fraud and manipulation," and in preventing "actual observation and access to the elector process," which allegedly resulted in "the dilution of lawful votes . . . and the counting of unlawful votes." (Doc. 1 at 45). Plaintiffs ask the Court to order that "no ballot processed by a counting board in Arizona can be included in the final vote tally unless a challenger [i]s allowed to meaningfully observe the process." (Doc 1 ¶ 120). Absent from the Complaint is an allegation that Plaintiffs (or any registered Arizona voter for that matter) were deprived of their right to vote. Instead, they bring baseless claims of "disparate treatment of Arizona voters, in subjecting one class of voters to greater burdens or scrutiny than another." (Doc. 1 ¶ 115). They do not allege what "class" of voters were treated disparately. Nor do the Elector Plaintiffs cite to any authority that they, as "elector delegates," are a class of protected voters. Defendants contend that Plaintiffs do not have standing to assert these claims and point out that these allegations are nothing more than generalized grievances that any one of the 3.4 million Arizonans who voted could make if they were so allowed. The Court agrees.

Here, Plaintiffs have not alleged a concrete harm that would allow the Court to find Article III Standing for their vote dilution claim. As courts have routinely explained, vote dilution is a very specific claim that involves votes being weighed differently and cannot be used generally to allege voter fraud. "Contrary to the Voter Plaintiffs' conceptualization, vote dilution under the Equal Protection Clause is concerned with votes being weighed differently." *Bognet*, 980 F.3d at 355; *see also Rucho v. Common Cause*, – — U.S. ——, 139 S. Ct. 2484, 2501 (2019) ("[V]ote dilution in the one-person, one-vote cases refers to the idea that each vote must carry equal weight."). "This conceptualization of vote dilution—state actors counting ballots in violation of state election law—is not a concrete harm under the Equal Protection Clause of the Fourteenth Amendment. Violation

of state election laws by state officials or other unidentified third parties is not always amenable to a federal constitutional claim." *Bognet*, 980 F.3d at 355; *see also Shipley v. Chicago Bd. of Election Comm'rs*, 947 F.3d 1056, 1062 (7th Cir. 2020) ("A deliberate violation of state election laws by state election officials does not transgress against the Constitution."); *Powell v. Power*, 436 F.2d 84, 88 (2d Cir. 1970) (rejecting Equal Protection claim where allegations of state's erroneous counting of votes cast by voters unqualified to participate).

Additionally, Plaintiffs cannot sustain their Equal Protection Clause claim on a vote dilution theory. *See Bognet*, 980 F.3d at 355 (rejecting Equal Protection theory and explaining "[t]his conceptualization of vote dilution—state actors counting ballots in violation of state election law—is not a concrete harm under the Equal Protection Clause of the Fourteenth Amendment"); *see also Shipley*, 947 F.3d at 1062 ("A deliberate violation of state election laws by state election officials does not transgress against the Constitution") (internal citations omitted); *Am. Civil Rights Union v. Martinez-Rivera*, 166 F. Supp. 3d 779, 789 (W.D. Tex. 2015) (holding that allegations of "vote dilution" as a result of alleged voting process irregulates "[are] speculative and, as such, are more akin to a generalized grievance about the government than an injury in fact."); *Powell*, 436 F.2d at 88 (rejecting Equal Protection Clause claim arising from state's erroneous counting of votes cast by voters unqualified to participate in closed primary); *Snowden v. Hughes*, 321 U.S. 1, 11 (1944) ("It was not intended by the Fourteenth Amendment . . . that all matters formerly within the exclusive cognizance of the states should become matters of national concern.").

Setting aside that Plaintiffs' claims regarding the election are not viable vote dilution claims, Plaintiffs also have not requested relief that is redressable in a tailored way as is required. *See Gill*, 138 S. Ct. at 1934 ("A plaintiff's remedy must be tailored to redress the plaintiff's particular injury."); *see also Lewis v. Casey*, 518 U.S. 343, 357 (1996) ("The remedy must of course be limited to the inadequacy that produced the injury in fact that the plaintiff has established."). Therefore, even if Plaintiffs could somehow establish that

their vote dilution claim was more than a generalized grievance to the point of asserting an injury, Plaintiffs have not established that the Court can redress this grievance. To give Plaintiffs the relief they desire would disenfranchise the nearly 3.4 million Arizonans that voted in the 2020 General Election. Under Plaintiffs' theory of dilution, this would transform all of the alleged diluted votes from being "diluted" to being destroyed. As Plaintiffs raise "only a generally available grievance about government—claiming only harm to his and every citizen's interest in proper application of the Constitution and laws, and seeking relief that no more directly and tangibly benefits him than it does the public at large," the Court finds that Plaintiffs' Count Two "does not state an Article III case or controversy." *See Lance*, 549 U.S. 437 at 439. Therefore, Plaintiffs do not have standing to bring suit in this forum.[9]

B. Abstention

Defendants also argue the Court should abstain from reaching Plaintiffs' claims based on their similarities with ongoing state court cases. Yesterday, the Arizona Supreme Court ruled on one such case—filed by Dr. Kelli Ward—seeking to "set aside the 2020 General Election results." *See Ward*, CV 2020-015285 (Ariz. 2020); (Doc. 81-1). That case was filed pursuant to A.R.S. § 16-672 and was also filed after Governor Ducey certified the election results on November 30, 2020. (Doc. 58-1 at 17). The *Ward* plaintiffs alleged an insufficient opportunity to observe election officials, an overcounting of mail-in ballots by not adequately comparing signatures on the ballot envelopes, and errors in the ballot duplication process. (*Id.* at 17–21). After an evidentiary hearing, the Maricopa County Superior Court issued a ruling on December 4, 2020, finding that there was no misconduct, fraud, or effect on the outcome of the election.[10] (*Id.*) This ruling was

[9] Having established that the Court does not have jurisdiction over Plaintiffs' Counts One through Three, the Court will decline to exercise supplemental jurisdiction over Count Four, which pleads no federal cause of action and is entirely based on alleged fraud under Arizona law.

[10] Judge Randall H. Warner of the Maricopa County Superior Court addressed Ward's allegations of election misconduct. First, Ward argued that there was an insufficient opportunity to observe the actions of election officials. The State Court dismissed that claim as untimely, holding that "[t]he observation procedures for the November general election were materially the same as for the August primary election, and any objection to

unanimously affirmed by an *en banc* panel of the Arizona Supreme Court on expedited review.[11]

Here, Plaintiffs' Complaint similarly relies upon A.R.S. § 16-672 and its provisions related to bringing suit for alleged election misconduct, including illegal votes and erroneous counting. (Doc. 1 at ¶ 15). A.R.S. § 16-672 also provides that an elections contest brought under this statute should be filed in the superior court of the county in which the person contesting resides or in the superior court of Maricopa county. A.R.S. § 16-672(B). Plaintiffs aver that their claims seek federal action under federal statutes, and therefore, their claims are distinguishable from the claims being litigated in the state court. The Court disagrees.

Generally, a federal court has a duty to exercise the jurisdiction conferred by Congress. However, under certain circumstances, it is prudent for a federal court to abstain from hearing a matter. "Indeed, we have held that federal courts may decline to exercise its jurisdiction, in otherwise 'exceptional circumstances,' where denying a federal forum would clearly serve an important countervailing interest." *Quackenbush v. Allstate Ins.*

---

them should have been brought at a time when any legal deficiencies could have been cured," and citing *Lubin v. Thomas*, 144 P.3d 510, 511 (Ariz. 2006) ("In the context of election matters, the laches doctrine seeks to prevent dilatory conduct and will bar a claim if a party's unreasonable delay prejudices the opposing party or the administration of justice."). Second, Ward alleged that "election officials overcounted mail-in ballots by not being sufficiently skeptical in their comparison of signatures on the mail-in envelope/affidavits with signatures on file." The state court allowed Ward to examine a sampling of mail-in ballots, and the court held that "[t]he evidence does not show that these affidavits are fraudulent, or that someone other than the voter signed them. There is no evidence that the manner in which signatures were reviewed was designed to benefit one candidate or another, or that there was any misconduct, impropriety, or violation of Arizona law with respect to the review of mail-in ballots." Lastly, Ward alleged errors with duplication of ballots. The state court also allowed Ward to examine a sampling of duplicate ballots and held that '[t]he duplication process prescribed by the Legislature necessarily requires manual action and human judgment, which entail a risk of human error. Despite that, the duplication process for the presidential election was 99.45% accurate. And there is no evidence that the inaccuracies were intentional or part of a fraudulent scheme. They were mistakes. And given both the small number of duplicate ballots and the low error rate, the evidence does not show any impact on the outcome." The state court concluded by holding that "[t]he Court finds no misconduct, no fraud, and no effect on the outcome of the election." *Ward*, CV 2020-015285 (Ariz. Super. Ct. Dec. 4, 2020); (Doc. 58-1).

[11] "The Court concludes, unanimously, that the trial judge did not abuse his discretion in denying the request to continue the hearing and permit additional inspection of the ballots." *Ward*, CV 2020-015285, at *7 (Ariz. 2020); (Doc. 81-1).

Co., 517 U.S. 706, 716 (1996) (citing *County of Allegheny v. Frank Mashuda Co*., 360 U.S. 185, 189 (1959)). Abstention may be "warranted by considerations of proper constitutional adjudication, regard for federal-state relations, or wise judicial administration." *Id.* *Colorado River* abstention permits a federal court to abstain from exercising jurisdiction over a matter in deference to a state court suit regarding similar claims and allegations. *Colorado River Water Conservation District v. United States*, 424 U.S. 800, 813, 817 (1976).

The Ninth Circuit has enumerated an eight-part test for whether *Colorado River* abstention is warranted, stressing that the factors are "not a mechanical checklist," with some factors that "may not have any applicability to a case." *Seneca Ins. Co., Inc. v. Strange Land, Inc*., 862 F.3d 835, 841–42 (9th Cir. 2017). The factors are: (1) which court first assumed jurisdiction over any property at stake; (2) the inconvenience of the federal forum; (3) the desire to avoid piecemeal litigation; (4) the order in which the forums obtained jurisdiction; (5) whether federal law or state law provides the rule of decision on the merits; (6) whether the state court proceedings can adequately protect the rights of the federal litigants; (7) the desire to avoid forum shopping; and (8) whether the state court proceedings will resolve all issues before the federal court. *Id.*

Factors two through seven all support abstaining from this case.[12] To begin, this federal forum is less convenient than the state forum, considering the state election law violations alleged, the claims are brought against state actors, and the interplay of state election law. Moreover, the present suit reflects the very essence of "piecemeal litigation," with many of the same parties and attorneys litigating related matters in both forums. As to the primacy of cases, this case was the last filed case. All of the state court litigation filed related to the election preceded this action. As to the nature of the claims, while Plaintiffs bring their claims under federal laws, the crux of their arguments, and the statutes upon which they rely, involve Arizona election law and the election procedures carried out at the county and state level by state officials. The state courts are adequately equipped to

[12] The Court finds that the first factor is not relevant to the facts alleged herein.

protect the rights of the named Plaintiffs, especially considering that Plaintiff Ward already pursued her grievances there. Moreover, as Congress has conferred concurrent jurisdiction on state courts to adjudicate Section 1983 claims, there is no concern that the state is unable to adjudicate Plaintiffs' Section 1983 claims. *Felder v. Casey*, 487 U.S. 131, 139 (1988). Lastly, abstention would alleviate the necessity to consider whether this matter was filed in this Court as a form of forum shopping, especially considering that a number of other related state court lawsuits have already been disposed of. The eighth factor is the only factor that weighs against abstention, as it does not appear that Plaintiffs' allegations of widespread fraud in relation to the tabulation systems and software were before the state court. However, as discussed *infra*, the Court finds that claim lacks Rule 9(b) particularity and plausibility.

Moreover, when considering abstention, "proper constitutional adjudication, regard for federal-state relations, or wise judicial administration," also inform this Court. *Quackenbush*, 517 U.S. at 716. If the Court were to reach the merits of Plaintiffs' claims, it would be entirely possible today for it to reach a different legal determination, or the same conclusion but with a different analysis, than the Arizona Supreme Court reached in *Ward v. Jackson*. The Court cannot think of a more troubling affront to "federal-state relations" than this. *See Quackenbush*, 517 U.S. at 716. Therefore, the Court finds that abstention of these parallel issues is appropriate and indeed necessary.

C. Eleventh Amendment

Defendants also argue that the Eleventh Amendment bars Plaintiffs' demands for relief because they, as state officials who have not consented to being sued, are immune from suit. Further, they argue that no exception applies, that the relief Plaintiffs seek is not prospective, and that the claims are barred.

The Eleventh Amendment to the Constitution provides:

> The Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

U.S. Const. amend. XI. Such immunity applies when a citizen brings a claim against their own state. *See Hans v. Louisiana*, 134 U.S. 1, 19 (1890). The immunity extends to "suit[s] against state officials when the state is the real, substantial party in interest." *Pennhurst State Sch. & Hosp. v. Halderman*, 465 U.S. 89, 100 (1984). "This jurisdictional bar applies regardless of the nature of the relief sought." *Id.* "When the suit is brought only against state officials, a question arises as to whether that suit is a suit against the State itself." *Id.* at 101. "The general rule is that a suit is against the sovereign . . . if the effect of the judgment would be to restrain the Government from acting, or to compel it to act." *Dugan v. Rank*, 372 U.S. 609, 620 (1963).

There are three recognized exceptions to the above: (1) Congress has abrogated the immunity within a federal statute; (2) the State has waived immunity and allowed individuals to sue it pursuant to specific state statutes; and (3) in "claims seeking *prospective* injunctive relief against state officials to remedy a state's *ongoing* violation of *federal* law." *Ariz. Students' Ass'n v. Ariz. Bd. of Regents*, 824 F.3d 858, 865 (9th Cir. 2016) (citing *Ex parte Young*, 209 U.S. 123 (1908)) (emphasis added).

None of these exceptions are present here. As for Plaintiffs' 42 U.S.C. § 1983 claims, Congress did not abrogate the states' immunity from suit in the enacting language of Section 1983, and therefore, the Eleventh Amendment bars those claims. *See Will v. Michigan Dep't of State Police*, 491 U.S. 58, 66 (1989) (holding that Section 1983 "does not provide a federal forum for litigants who seek a remedy against a State for alleged deprivations of civil liberties"). Plaintiffs provided no argument or authority that the state has explicitly waived its immunity for elections challenges. Therefore, the second exception does not apply. As for the remaining claims, the Court must determine whether Plaintiffs are seeking prospective relief to cure an ongoing violation of federal law.

"In determining whether the doctrine of *Ex parte Young* avoids an Eleventh Amendment bar to suit, a court need only conduct a straightforward inquiry into whether [the] complaint alleges an ongoing violation of federal law and seeks relief properly characterized as prospective." *Verizon Md., Inc. v. Pub. Serv. Comm'n*, 535 U.S. 635, 645

(2002) (internal citations omitted). However, where the claims are state law claims, masked as federal law claims, *Ex parte Young* is inapplicable and the Eleventh Amendment clearly bars the suit. *See Massey v. Coon*, 865 F.2d 264 (9th Cir. 1989) (affirming dismissal where "on its face the complaint states a claim under the due process and equal protection clauses of the Constitution, [but] these constitutional claims are entirely based on the failure of defendants to conform to state law"); *see also Pennhurst*, 465 U.S. at 90 ("[W]hen a plaintiff alleges that a state official has violated state law" and "when a federal court instructs state officials on how to conform their conduct to state law, this conflicts directly with the principles of federalism that underlie the Eleventh Amendment."). This is true whether the relief requested is "prospective or retroactive" in nature. *Pennhurst*, 465 U.S. at 106.

Here, Plaintiffs face a number of difficulties in their attempt to pierce Defendants' sovereign immunity. Defendants argue that all of Plaintiffs' allegations are actually state law allegations masked under federal law. Defendants point to numerous instances in Plaintiffs' Complaint where Arizona state election law is relied on, including their catch-all fraud claims, which are entirely based on state law. The Eleventh Amendment clearly bars such claims. *See Pennhurst*, 465 U.S. at 106 ("On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law.").

However, even assuming that Plaintiffs established that their claims are indeed independent federal claims, it is unclear what *ongoing* violation of federal law is being asserted. Plaintiffs allege Due Process and Equal Protection claims, along with a catch-all fraud claim, that arise from Defendants' alleged failure to follow Arizona state election laws. (Doc. 1 at ¶¶ 106–120). These numerous alleged violations—related to alleged issues with signature verification, ballot duplication, and poll observation—concern past conduct.[13] The relief requested—compelling the Governor to decertify the election—

[13] These include objections regarding poll watchers' ability to observe ballot counting, issues related to the manner and process by which Arizona election officials matched signatures on absentee ballots (Doc. 1 at ¶¶ 46–48); issues related to the process and role assigned to poll referees in settling unresolved disputes between adjudicators (*Id.* at ¶ 49);

similarly seeks to alter past conduct. Plaintiffs have not identified an ongoing violation to enjoin. In short, "Plaintiffs are seeking to undo what has already occurred, as their requested relief reflects." *See King v. Whitmer*, 2020 WL 7134198, at *5 (E.D. Mich. Dec. 7, 2020).

The Eleventh Amendment bars the injunctive relief sought.

D. Laches

Defendants also argue that the doctrine of laches bars Plaintiffs' claims. Laches will bar a claim when the party asserting it shows the plaintiff unreasonably delayed in filing the action and the delay caused prejudice to the defendant or the administration of justice. *Danjaq LLC v. Sony Corp.*, 263 F.3d 942, 951–52 (9th Cir. 2001) (noting that laches requires a "defendant [] prove both an unreasonable delay by the plaintiff and prejudice to itself"). Laches can bar untimely claims for relief in election cases, even when the claims are framed as constitutional challenges. *Soules v. Kauaians for Nukolii Campaign Comm.*, 849 F.2d 1176, 1181 (9th Cir. 1988); *U.S. v. Clintwood Elkhorn Min. Co.*, 553 U.S. 1, 9 (2008) ("[A] 'constitutional claim can become time-barred just as any other claim can.'") (*quoting Block v. North Dakota ex rel. Board of Univ. and School Lands*, 461 U.S. 273, 292 (1983)).

Plaintiffs filed their Complaint and request for TRO seeking to "de-certify" the election results on December 2, 2020, nearly a month after the General Election on November 3, 2020. Plaintiffs conclusively argue that they waited this long because they "could not have known the basis of their claim, or presented evidence substantiating their claim, until after the election." (Doc. 44 at 9). They further state that, because "Arizona election officials and other third parties did not announce or publicize their misconduct, and in fact prevented Republican poll watchers from observing the ballot counting and handling, it took Plaintiffs additional time post-election to gather the fact and expert witness testimony presented in the Complaint." (*Id.*) During oral argument, Plaintiffs' counsel repeatedly stated that the alleged fraud related to the Dominion voting machines

"irregularities" with the voting machines (*Id.* at ¶¶ 50–52); and certification of the Dominion voting system on November 18, 2020 (*Id.* at ¶ 53).

was not known until election night, when their experts noted a "blip" in their reporting data that showed an increase in votes for Joe Biden around 8:00 p.m. Plaintiffs also argue that A.R.S. §16-673 supports the timeliness of their Complaint because it requires an elector to file a challenge to the election in state court within five days of certification of the election.

Plaintiffs' Complaint includes a hodge-podge of alleged misconduct by Arizona elections officials, occurring on various dates over the past weeks, months, and even years. In addition to the objections regarding poll watchers' inability to observe ballot counting and handling, Plaintiffs also object to the manner and process by which Arizona election officials matched signatures on absentee ballots (Doc. 1 ¶¶ 46–48); to the process and role assigned to poll referees in settling unresolved disputes between adjudicators (*Id.* at ¶ 49); to "irregularities" with the voting machines on Election Day and before (*Id.* at ¶¶ 50–52); and to the certification of the Dominion voting system on November 18, 2020 (*Id.* at ¶ 53).

The affidavits or declarations upon which Plaintiffs rely clearly shows that the basis for each of these claims was either known well before Election Day or soon thereafter, and thus cannot be excused by a lack of knowledge nor an inability to substantiate their claims through December 2. For example, Plaintiffs' Complaint cites to documents showing that Plaintiffs were in possession of information about suspected irregularities with the Dominion voting machines as early as 2018. (*Id.* at ¶¶ 21, 69, 71–73) (referencing "publicly available evidence (including judicial and administrative proceedings)" that discuss concerns with security flaws in Dominion voting machines dating back to 2018); (Doc. 1-10 at 19, Ex. 20, Declaration of Mark Paul Law dated November 24, 2020 (describing his concerns over Maricopa County Dominion voting machine security and observations while poll watching on October 25, 2020 and November 1, 2020); *id.* at 30, Ex. 22, Declaration of Gregory Wodynski dated November 23, 2020 (describing his concerns over Maricopa County Dominion voting machine security and his perception that "Bruce," a Dominion employee, could manually manipulate voter data files while poll watching on October 24, 2020 and November 1, 2020).

Plaintiffs also include documents showing that the facts underlying their allegations

of ballot counting and verification misconduct occurred weeks before Election Day. Canvassing in Arizona began in October, and the poll watcher declarations and affidavits attached to the Complaint object to the signature verification and ballot process during this time. (*See* Doc. 1-3 at 7, Ex. 5) (containing unsigned Declaration dated October 25, 2020 from poll watcher objecting to "NO EFFECTIVE oversight" in signature verification rooms); *id.* at 9, Ex. 5A (document listing poll watcher objections made on 10/7/20, 10/23/20, 10/24/20, 10/29/20); (Doc. 1-10 at 25, Ex. 21) (containing a Declaration of poll watcher Judith Burns dated November 16, 2020 and noting her objections in observing the signature verification and ballot processing on October 17, 2020 and October 21, 2020). In a statement from Ms. Linda Brickman, the First Vice-Chair of the Maricopa County Republican Committee, she represents that she had ongoing concerns regarding the signature verification for early and mail-in ballots during her time as an elections worker "from 10/19/20 to 11/11/20" (Doc. 1-10 at 38, Ex. 23) and had objections to the Logic and Accuracy Certification of the Dominion voting systems that occurred on November 18, 2020. (*Id.* at 35). Indeed, at least one Plaintiff has already raised some of these complaints in state court.[14] *Ward*, CV2020-015285 (Super. Ct. of Ariz. Dec. 4, 2020) (dismissing the Petition with prejudice); (Doc. 58-1 at 14, Ex. B). Dr. Ward clearly knew the basis of her claim before December 2, 2020 but offers no reasonable explanation for the delay in bringing this suit in federal court. When contesting an election, any delay is prejudicial, but waiting until a month after Election Day and two days after certification of the election is inexcusable. *See Kelly v. Penn.*, 2020 WL 7018314, at *1 (Pa. Nov. 28, 2020) ("Petitioners failed to act with due diligence in presenting the instant claim" when they waited until November 21 to sue to invalidate Pennsylvania's election); *Kistner v. Simon*, No. A20-1486, slip op. at 3–4 (Minn. Dec. 4, 2020); *see also, e.g., Ariz. Libertarian Party*

[14] As she does here, Ms. Ward's state court action claimed that poll watchers were given insufficient opportunity to observe the actions of election officials. Notably, the state court judge found this claim barred by the doctrine of laches, as Ms. Ward had failed to assert it during a time when it could have been corrected. (Doc. 1-10 at 19 ("The observation procedures for the November general election were materially the same as for the August primary election, and any objection to them should have been brought at a time when any legal deficiencies could have been cured.").

v. Reagan, 189 F. Supp. 3d 920, 922–23 (D. Ariz. 2016).

The Court does not find that the Arizona state election challenge deadline excuses delay on Plaintiffs' part in these circumstances. *See* A.R.S. §16-673. As noted above, the facts underlying the suspected irregularities complained of were either known to Plaintiffs prior to Election Day or soon thereafter. Although Arizona electors may have a deadline by which to file election contests in Arizona state court, Plaintiffs here opted to file their federal constitutional challenges in federal court. The exhibits to the Complaint confirm that the events complained of occurred on or before Election Day. Accordingly, the Court rejects Plaintiffs' self-serving statement that they did not know the basis for their claims before December 2, 2020. The documents they submit with their Complaint plainly shows the contrary is true, and the delay—which has resulted in a rush by this Court and Defendants to resolve these issues before the Electoral College meeting deadline of December 14, 2020—is unreasonable.

The second part of the laches test—prejudice—is also unquestionably met. First, the prejudice to the Defendants and the nearly 3.4 million Arizonans who voted in the 2020 General Election would be extreme, and entirely unprecedented, if Plaintiff were allowed to have their claims heard at this late date. *SW Voter Registration Educ. Project v. Shelley*, 344 F.3d 914, 919 (9th Cir. 2003) ("Interference with impending elections is extraordinary, and interference with an election after voting has begun is unprecedented."). As an Eastern District of Michigan Court stated in a nearly identical case, "[the prejudice] is especially so considering that Plaintiffs' claims for relief are not merely last-minute—they are after the fact. While Plaintiffs delayed, the ballots were cast; the votes were counted; and the results were certified. The rationale for interposing the doctrine of laches is now at its peak." *King*, 2020 WL 7134198, at *7.

Second, the challenges that Plaintiffs assert quite simply could have been made weeks ago, when the Court would have had more time to reflect and resolve the issues. "Unreasonable delay can prejudice the administration of justice by compelling the court to steamroll through . . . delicate legal issues in order to meet election deadlines." *Arizona*

Libertarian Party, 189 F. Supp. 3d at 923 (quotation marks and citations omitted). Plaintiffs offer no reasonable explanation why their claims were brought in federal court at this late date. Their delay and the resulting prejudice bars their claims by laches.

E. Mootness

Defendants also argue that this case is moot. (Docs. 38 at 5; 40 at 22). The Court agrees. "Mootness is a jurisdictional issue, and 'federal courts have no jurisdiction to hear a case that is moot, that is, where no actual or live controversy exists.'" *Foster v. Carson*, 347 F.3d 742, 745 (9th Cir. 2003) (quoting *Cook Inlet Treaty Tribes v. Shalala*, 166 F.3d 986, 989 (9th Cir. 1999)). In addition, a case is moot when a party cannot obtain relief for its claim. *Id.*; *see also Ruvalcaba v. City of L.A.*, 167 F.3d 514, 521 (9th Cir. 1999).

Plaintiffs request an injunction that (a) enjoins Governor Ducey from transmitting the certified results, (b) orders Defendants to "de-certify" the election results, (c) nullifies votes tabulated by uncertified machines, (d) declares that illegal ballot fraud occurred in violation of the Electors and Elections Clauses and the Fourteenth Amendment's Due Process and Equal Protections Clauses, (e) mandates a manual recount or statistical sampling of all mail-in and absentee ballots, and (f) allows Plaintiffs to seize and inspect voting hardware and software as well as security camera recordings "of all rooms used in Maricopa County" from November 3 to 4. (Doc. 1 at ¶ 145).

Obviously, the Court cannot enjoin the transmission of the certified results because they have already been transmitted. (Doc. 40 at 4). Plaintiffs' counsel orally argued that Defendants had the power to de-certify the election under 3 U.S.C. § 6. Nothing in that statute authorizes this Court to de-certify the results. The manner provided to contest elections under Arizona law requires election contest claims to be brought, "in the superior court of the county in which the person contesting resides or in the superior court of Maricopa County." A.R.S. § 16-672. Therefore, if de-certification were possible, it would only be possible through an action brought in Arizona superior court. In other words, this Court has no power to de-certify the results. But even assuming the Court were able to grant the extraordinary relief requested, ordering Governor Ducey to de-certify the

election, such relief would necessarily run afoul of 3 U.S.C. § 6 by ignoring Arizona law. In this instance, the Court cannot allow Plaintiffs to circumvent both federal and Arizona law.

Because this Court cannot de-certify the results, it would be meaningless to grant Plaintiffs any of the remaining relief they seek. *See Wood v. Raffensperger*, 2020 WL 7094866, at *6 (11th Cir. Dec. 5, 2020) ("[I]t is not possible for us to delay certification nor meaningful to order a new recount when the results are already final and certified."); *King*, 2020 WL 7134198, at *5 n.3 ("[T]he evidence Plaintiffs seek to gather by inspecting voting machines and software and security camera footage only would be useful if an avenue remained open for them to challenge the election results."). Plaintiffs' claims are moot.

F. Failure to State a Claim

"A motion to dismiss a complaint or claim 'grounded in fraud' under Rule 9(b)[15] for failure to plead with particularity is the functional equivalent of a motion to dismiss under Rule 12(b)(6) for failure to state a claim." *Vess v. Ciba-Geigy Corp. USA*, 317 F.3d 1097, 1107 (9th Cir. 2003). In a Rule 12(b)(6) context, courts must consider all well-pleaded factual allegations as true and interpret them in the light most favorable to the plaintiff. *Schlegal v. Wells Fargo Bank, NA,* 720 F.3d 1204, 1207 (9th Cir. 2013). Dismissal is proper when there is either (1) a lack of a cognizable legal theory or (2) insufficient facts to support a cognizable legal claim. *Conservation Force v. Salazar*, 646 F.3d 1240, 1242 (9th Cir. 2011), *cert. denied, Blasquez v. Salazar*, 565 U.S. 1261 (2012).

When pleading allegations concerning fraudulent conduct, Rule 9(b) requires something more than Rule 8: particularity. *Ashcroft v. Iqbal*, 556 U.S. 662, 686 (2009);

[15] Although Plaintiffs strenuously argue that they can bring their Arizona election law-based claims in federal court because of the presence of federal allegations, they also boldly assert in their Reply that they need not follow the heightened pleading standard of Federal Rule of Civil Procedure 9(b) in pleading their fraud claims with particularity, because the federal rules are somehow abrogated by "controlling Arizona Supreme Court precedent.[15]" (Doc. 44 at 23). Plaintiffs cannot have it both ways. Plaintiffs have not provided any authority that a state court decision can alter the pleading requirements in federal court established by United States Supreme Court precedent and the Federal Rules of Civil Procedure.

see also Fed. R. Civ. P. 9(b) ("In alleging fraud or mistake, a party must state with particularity the circumstances constituting fraud or mistake."). "This particularity requirement demands a higher degree of notice than that required for other claims. The claim must identify who, what, where, when, and how." *U.S. ex rel. Costner v. United States*, 317 F.3d 883, 888 (8th Cir. 2003).

Moreover, "claims of fraud or mistake . . . must, in addition to pleading with particularity, also plead plausible allegations. That is, the pleading must state enough facts to raise a reasonable expectation that discovery will reveal evidence of the misconduct alleged." *Cafasso, U.S. ex rel. v. Gen. Dynamics C4 Sys., Inc*., 637 F.3d 1047, 1055 (9th Cir. 2011) (internal citations omitted). Indeed, "Rule 9(b) serves not only to give notice to defendants of the specific fraudulent conduct against which they must defend, but also 'to deter the filing of complaints as a pretext for the discovery of unknown wrongs, to protect [defendants] from the harm that comes from being subject to fraud charges, and to prohibit plaintiffs from unilaterally imposing upon the court, the parties and society enormous social and economic costs absent some factual basis.'" *Bly-Magee v. California*, 236 F.3d 1014, 1018 (9th Cir. 2001) (citing *In re Stac Elec. Sec. Litig*., 89 F.3d 1399, 1405 (9th Cir. 1996)).

Establishing the plausibility of a complaint's allegations is a two-step process that is "context-specific" and "requires the reviewing court to draw on its judicial experience and common sense." *Iqbal*, 556 U.S. 679. First, a court must "identif[y] pleadings that, because they are no more than conclusions, are not entitled to the assumption of truth." *Id*. Then, assuming the truth only of well-pleaded factual allegations, a court must "determine whether they plausibly give rise to an entitlement to relief." *Id*.; *see also Eclectic Props. E., LLC v. Marcus & Millichap Co.*, 751 F.3d 990, 996 (9th Cir. 2014) (identifying the two-step process for evaluating pleadings). Although a plaintiff's specific factual allegations may be consistent with a plaintiff's claim, a district court must assess whether there are other "more likely explanations" for a defendant's conduct such that a plaintiff's claims cannot cross the line "'from conceivable to plausible.'" *Iqbal*, 556 U.S. at 680

(quoting *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570 (2007)). This standard represents a balance between Rule 8's roots in relatively liberal notice pleading and the need to prevent "a plaintiff with a largely groundless claim" from "'tak[ing] up the time of a number of other people, with the right to do so representing an *in terrorem* increment of settlement value.'" *Twombly*, 550 U.S. at 557–58 (quoting *Dura Pharmaceuticals, Inc. v. Broudo*, 544 U.S. 336, 347 (2005)).

Advancing several different theories, Plaintiffs allege that Arizona's Secretary of State and Governor conspired with various domestic and international actors to manipulate Arizona's 2020 General Election results allowing Joseph Biden to defeat Donald Trump in the presidential race. The allegations they put forth to support their claims of fraud fail in their particularity and plausibility. Plaintiffs append over three hundred pages of attachments, which are only impressive for their volume. The various affidavits and expert reports are largely based on anonymous witnesses, hearsay, and irrelevant analysis of unrelated elections. Because the Complaint is grounded in these fraud allegations, the Complaint shall be dismissed. *Vess*, 317 F.3d at 1107 ("When an entire complaint, or an entire claim within a complaint, is grounded in fraud and its allegations fail to satisfy the heightened pleadings requirements of Rule 9(b), a district court may dismiss the complaint or claim.").

Plaintiffs first "describe specific violations of Arizona law" to support their fraud claims.[16] In doing so, they attach declarations from poll watchers that observed election officials during the November General Election. (Doc. 1 ¶¶ 46–53). As Intervenor-Defendant Maricopa County points out, these are the only declarants offered by Plaintiffs with first-hand observation of the election administration. (Doc. 36 at 4). But these four declarants do not allege fraud at all. (*See* Doc. 1-10 at 18–24). Instead, they raise objections to the manner and process by which Arizona election officials matched signatures on absentee ballots (Doc. 1 ¶¶ 46–48); to the process and role assigned to poll

[16] Plaintiffs' often scattershot pleadings allege that "Defendants failed to administer the November 3, 2020 election in compliance with the manner prescribed by the ***Georgia legislature***." (Doc 2 at 6) (emphasis added). Plaintiffs also nonsensically include references to Wisconsin state statutes. (Doc. 1 at 33).

referees in settling unresolved disputes between adjudicators (*Id.* at ¶ 49); to "irregularities" with the voting machines on Election Day and before (*Id.* at ¶¶ 50–52); and to the certification of the Dominion voting system on November 18, 2020 (*Id.* at ¶ 53). These objections to the manner in which Arizona officials administered the election cannot serve to overturn the results of the 2020 presidential election in Arizona because they fail to present evidence that supports the underlying fraud claim. At most, these are the type of "garden variety election irregularities" federal courts are "not equipped nor empowered to supervise . . . ." *Griffin v. Burns*, 570 F.2d 1065, 1076, 1077 (1st Cir. 1978) ("If every election irregularity or contested vote involved a federal violation, the court would be thrust into the details of virtually every election, tinkering with the state's election machinery, reviewing petitioners, registration cards, vote tallies, and certificates of election for all manner of error and insufficiency under state and federal law.").

Plaintiffs next argue that they have expert witnesses who can attest to widespread voter fraud in Arizona. As an initial matter, none of Plaintiffs' witnesses identify Defendants as committing the alleged fraud, or state what their participation in the alleged fraudulent scheme was. Instead, they allege that, absentee ballots "*could have* been filled out by anyone and then submitted in the name of another voter," "*could be* filled in by third parties to shift the election to Joe Biden," or that ballots were destroyed or replaced "with blank ballots filled out by election workers, Dominion or other third parties." (Doc. 1 ¶¶ 54–58) (emphasis added). These innuendoes fail to meet Rule 9(b) standards. But perhaps more concerning to the Court is that the "expert reports" reach implausible conclusions, often because they are derived from wholly unreliable sources.

Plaintiffs' expert Mr. William Briggs ("Briggs"), for example, concludes that "troublesome" errors by Arizona election officials "involving unreturned mail-in ballots [] are indicative of voter fraud" and that the election should consequently be overturned. (Doc. 1 at ¶ 54). Briggs relies on data provided by an unknown person named "Matt Braynard," a person who may or may not have tweeted a "Residency Analysis of ABS/EV Voters" on his Twitter account on November 20, 2020 (Doc. 1-2 at 14, Ex. 2); (*Id.* at 52,

Ex. 3). Apart from a screenshot of Mr. Braynard's tweets that day, Plaintiffs offer nothing further about Mr. Braynard's identity, qualifications, or methodologies used in conducting his telephone "survey." But according to the Briggs' report, Mr. Braynard conducted his survey of unknown size and to unknown persons in Georgia, Michigan, Wisconsin, Arizona, and Pennsylvania regarding absentee ballots, and his "findings" were conveyed to Mr. Briggs. (*Id.*) In concluding that there were "clearly a large number of troublesome ballots in each state," Mr. Briggs assumed Mr. Braynard's "survery [sic] respondents [were] representative and the data [was] accurate." (*Id.*) This cavalier approach to establishing that hundreds of thousands of Arizona votes were somehow cast in error is itself troublesome. The sheer unreliability of the information underlying Mr. Briggs' "analysis" of Mr. Braynard's "data" cannot plausibly serve as a basis to overturn a presidential election, much less support plausible fraud claims against these Defendants.

The Complaint is equally void of plausible allegations that Dominion voting machines were actually hacked or compromised in Arizona during the 2020 General Election. Plaintiffs are clearly concerned about the vulnerabilities of voting machines used in some counties across Arizona and in other states. They cite sources that attest to knowledge of "well-known" vulnerabilities, have included letters from concerned citizens, Arizona elected officials, and United States senators. Plaintiffs even attach an affidavit of an anonymous witness with connections to the late Venezuelan dictator Hugo Chavez claiming to be privy as to how officials in Venezuela rigged their elections with the help of a voting systems company whose software "DNA" is now used in voting machines in the United States. (Doc. 1-1, Ex. 1). These concerns and stated vulnerabilities, however, do not sufficiently allege that any voting machine used in Arizona was in fact hacked or compromised in the 2020 General Election. Rather, what is present is a lengthy collection of phrases beginning with the words "could have, possibly, might," and "may have." (Doc. 1 ¶¶ 8, 53, 55, 57, 60, 66, 77, 88, 91, 108, 109, 122). To lend support to this theory, Plaintiffs offer expert Russell Ramsland, Jr., who asserts there was "an improbable, and *possibly impossible* spike in processed votes" in Maricopa and Pima Counties at 8:46 p.m.

on November 3, 2020. (Doc. 1 ¶ 60); (Doc. 1-9, Ex. 17) (emphasis added). He suggests that this spike "could easily be explained" by presuming that Dominion "pre-load[ed] batches of blank ballots in files such as Write-Ins or other adjudication-type files then casting them almost all for Biden using the Override Procedure . . . ." (Doc. 1-9 at 9, Ex. 17). This scenario is conceivable. However, Defendant Hobbs points to a much more likely plausible explanation: because Arizona begins processing early ballots before the election, the spike represented a normal accounting of the early ballot totals from Maricopa and Pima Counties, which were reported shortly after in-person voting closed. (Doc. 40 at 17–18). Thus, the Court finds that while this "spike" *could* be explained by an illicit hacking of voting machinery in Arizona, the spike is "not only compatible with, but indeed was more likely explained by, lawful, unchoreographed" reporting of early ballot tabulation in those counties. *See Iqbal*, 556 U.S. at 680. Plaintiffs have not moved the needle for their fraud theory from conceivable to plausible, which they must do to state a claim under Federal pleading standards. *Id.*

Because Plaintiffs have failed to plead their fraud claims with particularity and because the Complaint is grounded in these claims, it must be dismissed.[17]

G. Motion for TRO and Preliminary Injunction

There are multiple independent grounds upon which to dismiss Plaintiffs' Complaint. Accordingly, it is not necessary to reach the merits of Plaintiffs' requests for a temporary restraining order and preliminary injunction and the Court will therefore only briefly addresses those Motions here.

"The standard for issuing a temporary restraining order is identical to that for issuing a preliminary injunction." *Taylor-Failor v. Cty of Hawaii*, 90 F. Supp. 3d 1095, 1098 (D. Haw. 2015). Under normal circumstances, both are extraordinary and drastic remedies,

[17] Throughout their pleadings, Plaintiffs allege that there were "spikes" of votes for Joe Biden that occurred in Arizona, which also occurred in other states that certified the election for Joe Biden, including Georgia, Wisconsin, Michigan, and Pennsylvania. Regardless of whether these "spikes" shifting the vote majorities from President Trump to Vice President Biden occurred in other states, Plaintiffs have presented nothing to support the claim that these same "spikes" occurred in Arizona, where Biden never trailed Trump in the vote tally.

and "should not be granted unless the movant, by a clear showing, carries the burden of persuasion.'" *Lopez v. Brewer*, 680 F.3d 1068, 1072 (9th Cir. 2012) (quoting *Mazurek v. Armstrong*, 520 U.S. 968, 972 (1997) (per curiam)); *see also Winter v. Natural Res. Def. Council, Inc*., 555 U.S. 7, 24 (2008) ("A preliminary injunction is an extraordinary remedy never awarded as of right.") (citation omitted). A plaintiff seeking a temporary restraining order or preliminary injunction must show that (1) he or she is likely to succeed on the merits, (2) is likely to suffer irreparable harm without an injunction, (3) the balance of equities tips in his or her favor, and (4) an injunction is in the public interest. *Winter*, 555 U.S. at 20.

Plaintiffs simply cannot establish they have a likelihood of success on their claims. Plaintiffs face serious jurisdictional impediments in bringing their claims to federal court at the eleventh hour. These insurmountable legal hurdles are exacerbated by insufficiently plead allegations of fraud, rendered implausible by the multiple inadmissible affidavits, declarations, and expert reports upon which their Complaint relies.

Furthermore, granting Plaintiffs the injunctive relief they seek would greatly harm the public interest. As stated by Defendant Hobbs, "the requested relief would cause enormous harm to Arizonans, supplanting the will of nearly 3.4 million voters reflected in the certified election results and potentially imperiling Arizona's participation in the Electoral College. It would be more difficult to envision a case in which the balance of hardships would tip more strongly against a plaintiff." (Doc. 40 at 24). The Court agrees. The significant weight of these two *Winters* factors requires that the Court deny Plaintiffs' requests for injunctive relief. [18]

III. Conclusion

Not only have Plaintiffs failed to provide the Court with factual support for their extraordinary claims, but they have wholly failed to establish that they have standing for the Court to consider them. Allegations that find favor in the public sphere of gossip and innuendo cannot be a substitute for earnest pleadings and procedure in federal court. They

[18] The Court will vacate the hearing on Plaintiffs' TRO and Request for Preliminary Injunction scheduled for December 10, 2020.

most certainly cannot be the basis for upending Arizona's 2020 General Election. The Court is left with no alternative but to dismiss this matter in its entirety.

Accordingly,

IT IS HEREBY ORDERED that Defendants' Governor Doug Ducey, Secretary of State Katie Hobbs, and Intervenor Defendants Maricopa County Board of Supervisors and Adrian Fontes' Motions to Dismiss the Complaint (Docs. 36, 38, and 40) are **GRANTED** for the reasons stated herein.

IT IS FURTHER ORDERED that all remaining pending motions (Docs. 14, 62, 65 and 66) are **denied as moot,** and the hearing on Plaintiffs' TRO and Preliminary Injunction set for December 10, 2020 is **vacated**.

IT IS FINALLY ORDERED that this matter is dismissed, and the Clerk of Court is kindly directed to terminate this action.

Dated this 9th day of December, 2020.

Honorable Diane J. Humetewa
United States District Judge

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

Plaintiff,

Case No. 20-cv-1771-pp

v.

WISCONSIN ELECTIONS COMMISSION,
COMMISSIONER ANN S. JACOBS,
MARK L. THOMSEN, COMMISSIONER MARGE BOSTELMANN,
JULIE M. BLANCEY, COMMISSIONER DEAN KNUDSON,
ROBERT F. SPINDELL, JR., and TONY EVERS ,

Defendants.

ORDER DENYING PLAINTIFF'S MOTION TO FILE UNREDACTED COPIES OF EXHIBITS 1 AND 12 TO PLAINTIFF'S AMENDED COMPLAINT UNDER SEAL AND EXHIBITS 4, 13, AND 19 UNDER PROTECTIVE ORDER (DKT. NO. 75)

After the plaintiff filed his reply brief in support of his motion for injunctive relief, he filed a separate motion to file unredacted copies of Exhibits 1 and 12 under seal and to file Exhibits 4, 13 and 19 as restricted to all attorneys of record. Dkt. No. 75. The plaintiff previously had filed redacted versions of these documents with the amended complaint, concealing the affiants' identities and some additional material. Dkt. Nos. 9-1, 9-4, 9-12, 9-13, 9-19.

The general local rule governing confidential matters requires that a movant certify in the motion that the parties have conferred in a good faith attempt to avoid the motion or to limit the scope of the documents or materials

subject to sealing under the motion. Gen. L.R. 79(d)(4). The plaintiff filed an email from Attorney Jeffrey Mandell, who represents defendant Governor Tony Evers, objecting to the use of declarations, affidavits or reports or otherwise pressing forward with evidentiary issues. Dkt. No. 75-1 at 1. The plaintiff has not indicated whether he attempted to confer with counsel for the Wisconsin Election Commission and its members.

General Local Rule 79(d)(2) requires the motion to describe the general nature of the information withheld from the public record. Any motion to restrict access or seal must be supported by sufficient facts demonstrating good cause for withholding the document or material from the public record. Gen. L. R. 79(d)(3). "The Seventh Circuit has emphasized that 'the public at large pays for the courts and therefore has an interest in what goes on at all stages of a judicial proceeding.' *Citizens First Nat'l Bank v. Cincinnati Ins. Co.*, 178 F.3d 943, 945 (7th Cir. 1999)." Roumann Consulting Inc. v. T.V. John & Son, Inc., No. 17-C-1407, 2019 WL 3501513, at *8 (E.D. Wis. Aug. 1, 2019). A party may override this interest only if its privacy interest surmounts the public's interest; "that is, only if there is good cause for sealing a part or the whole of the record in that case." Id.

The plaintiff maintains that good cause exists to restrict the affiants' identities. Dkt. No. 76 at 2. He asserts that sealing to protect identities is routine. Id. at 3 (citing Hicklin Eng'g, L.C. v. Bartell, 439 F.3d 346, 348-49 (7th Cir. 2006), abrogated on other grounds by RTP LLC v. ORIX Real Estate Capital, 827 F.3d 689, 691-92 (7th Cir. 2016); Roe v. City of Milwaukee, 37 F.

Supp. 2d 1127 (E.D. Wis. 1999)). It is unclear what portion of Hicklin plaintiff relies on for this understanding. Hicklin addresses whether a *judicial decision* may be sealed. Hicklin, 439 F.3d at 348-49.

The Seventh Circuit imposes a high burden on a party seeking to seal court documents, and it is anything but "routine." See, *e.g.*, Bond v. Utreras, 585 F.3d 1061, 1075 (7th Cir. 2009) ("documents . . . 'used in [a court] proceeding' . . . are therefore presumptively open to public inspection unless they meet the definition of trade secret or other categories of bona fide long-term confidentiality.") (citing Fed. R. Civ. P. 5(d)). "It is beyond dispute that most documents filed in court are presumptively open to the public." Id. at 1073. In fact, a judge in this district has stated that "[t]he party seeking to seal items has the burden of showing cause and must 'analyze in detail document by document, the propriety of secrecy, providing reasons and legal citations.'" E.E.O.C. v. Abbott Labs., No. 10-C-0833, 2012 WL 2884882, at *1 (E.D. Wis. July 12, 2012) (quoting Baxter Int'l, Inc. v. Abbott Labs., 297 F.3d 544, 548 (7th Cir. 2002)).

The motion does not explain why the plaintiff believes the court needs the unredacted material this stage of the litigation. The plaintiff previously took the position that "the plaintiff's amended complaint and motion present material dispositive issues that are questions of law that may be resolved without factual investigation or determination." Dkt. No. 10 at ¶6. At the telephonic hearing on December 8, the court told the parties that it needed to decide threshold issues of justiciability before it could consider any evidence.

Dkt. Nos. 70, 71. The plaintiff asked the court to rule on those justiciability issues on December 9, 2020; the court is working hard to do that.

As for the plaintiff's concern that the court protect the identities of the declarants, the plaintiff says that the affiants (declarants) are "in reasonable fear of harassment and threats to their physical safety and their livelihoods in retaliation for their coming forward with testimony." Dkt. No. 76 at 4. Exhibit 1 was prepared by a Venezuela whistleblower and Exhibit 2 was prepared by an individual known as "Spider" who describes him- or herself as an electronic intelligence analyst. Id. at 5. According to plaintiff, both individuals showed "great courage in coming forward at a critical moment to deliver the truth to the court about matters of great importance." Dkt. No. 76 at 6. He says that the authors of exhibits 4, 13 and 19 fear attacks against their reputation, professional career and personal safety. Id. at 7.

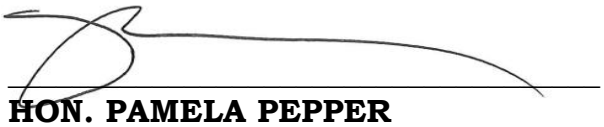
The court will not require the plaintiff to disclose the identities of the individuals at this time. Their identities are not relevant to the justiciability issues the court is working to resolve. If and when the time comes to discuss presentation of evidence, the plaintiff may renew his motion.

The court **DENIES WITHOUT PREJUDICE** Plaintiff's Motion to File Unredacted Copies of (1) Exhibits 1 and 12 to Plaintiff's Amended Complaint

Under Seal and (2) Exhibits 4, 3 and 19 Under Protective Order. Dkt. No. 75.

Dated in Milwaukee, Wisconsin this 9th day of December, 2020.

BY THE COURT:



HON. PAMELA PEPPER
Chief United States District Judge

ORDER GRANTING DEFENDANTS' MOTIONS TO DISMISS (DKT. NOS. 51, 53), DENYING AS MOOT PLAINTIFF'S AMENDED MOTION FOR INJUNCTIVE RELIEF (DKT. NO. 6) AND DISMISSING CASE

At 8:24 a.m. on Tuesday, December 1, 2020—twenty-eight days after the November 3, 2020 general Presidential election, thirteen days after President Donald J. Trump petitioned for a recount in Milwaukee and Dane Counties and one day after the Wisconsin Elections Commission and the Governor certified that Joseph R. Biden and Kamala D. Harris had received the highest number of votes following that recount—two plaintiffs filed this lawsuit in federal court for the Eastern District of Wisconsin. Although state law governs the election process, the plaintiffs brought the suit in a federal court, asking that federal court to order state officials to decertify the election results that state officials had certified the day before, order the Governor not to transmit to the Electoral

College the certified results he'd transmitted the day before and order the Governor to instead transmit election results that declared Donald Trump to be "the winner of this election."

The election that preceded this lawsuit was emotional and often divisive. The pleadings that have been filed over the past week are passionate and urgent. People have strong, deep feelings about the right to vote, the freedom and opportunity to vote and the value of their vote. They should. But the legal question at the heart of this case is simple. Federal courts have limited jurisdiction. Does a federal court have the jurisdiction and authority to grant the relief this lawsuit seeks? The answer is no.

Federal judges do not appoint the president in this country. One wonders why the plaintiffs came to federal court and asked a federal judge to do so. After a week of sometimes odd and often harried litigation, the court is no closer to answering the "why." But this federal court has no authority or jurisdiction to grant the relief the remaining plaintiff seeks. The court will dismiss the case.

I. Background

According to defendant the Wisconsin Elections Commission's November 18, 2020 canvass results, 3,297,352 Wisconsin residents voted in the November 3, 2020 general election for President. https://elections.wi.gov/sites/elections.wi.gov/files/Statewide%20Results%20All%20Offices%20%28pre-Presidential%20recount%29.pdf. Of those, 49.45%—1,630,673—voted for Biden for President and Harris for Vice-President. Id. Biden and Harris received

approximately 20,600 more votes than Donald J. Trump for President and Michael R. Pence for Vice-President. Id.

Under Wis. Stat. §9.01(1)(a)(1), any candidate in an election where more than 4,000 votes were cast for the office the candidate seeks and who trails the leading candidate by no more than 1 percent of the total votes cast for that office may petition for a recount. On November 18, 2020, Donald J. Trump filed a recount petition seeking a recount of "all ballots in all wards in every City, Village, Town and other voting unit in Dane and Milwaukee Counties." https://elections.wi.gov/sites/elections.wi.gov/files/2020-11/WEC%20-%20Final%20Recount%20Order_0.pdf. The Wisconsin Elections Commission granted that petition and ordered a recount "using the ballot count method selected per Wis. Stat. § 5.90(1) unless otherwise ordered by a court per Wis. Stat. § 5.90(2)." Id. The WEC ordered the recount to be completed by 12:00 p.m. on December 1, 2020. Id.

The partial recount was completed on November 29, 2020. https://elections.wi.gov/elections-voting/recount. On November 30, 2020, the chair of the Wisconsin Elections Commission signed the statement of canvass certifying that Joseph R. Biden and Kamala D. Harris received the greatest number of votes and certified their electors. https://elections.wi.gov/sites/elections.wi.gov/files/2020-11/Jacobs%20-%20Signed%20Canvass%20for%20President%20-%20Vice%20President.pdf. The same day—November 30, 2020—Wisconsin Governor Tony Evers announced that he had signed the Certificate of Ascertainment for the electors for Biden and Harris.

https://content.govdelivery.com/accounts/WIGOV/bulletins/2aef6ff. The web site for the National Archives contains the Certificate of Ascertainment signed by Evers on November 30, 2020, certifying that out of 3,298,041 votes cast, Biden and Harris and their electors received 1,630,866 votes, while Trump and Pence and their electors received 1,610,184 votes. https://www.archives.gov/files/electoral-college/2020/ascertainment-wisconsin.pdf.

On December 1, 2020, Donald J. Trump filed a petition for an original action in the Wisconsin Supreme Court. Trump v. Evers, Case No. 2020AP001971-OA (available at https://wscca.wicourts.gov). On December 3, 2020, the court denied leave to commence an original petition because under Wis. Stat. §9.01(6), appeals from the board of canvassers or the Wisconsin Elections Commission must be filed in circuit court. Dkt. No. 59-7. The same day—December 3, 2020—Donald J. Trump filed lawsuits in Milwaukee and Dane Counties. Trump v. Biden, Case No. 2020CV007092 (Milwaukee County Circuit Court; Trump v. Biden, Case No. 2020CV002514 (Dane County Circuit Court) (both available at https://wcca.wicourts.gov). Those cases have been consolidated and are scheduled for hearing on December 10, 2020 at 1:30 (or for December 11, 2020 at 9:00 a.m. if the parties are litigating in another court).

Meanwhile, on December 2, 2020, Donald J. Trump filed suit in federal court for the Eastern District of Wisconsin, suing the defendants in this case and others. Trump v. Wisconsin Elections Commission, *et al.*, Case No. 20-cv-

1785-BHL (E.D. Wis.). There is an evidentiary hearing scheduled for December 10, 2020 at 9:00 a.m. by videoconference. Id. at Dkt. No. 45.

II. Procedural History of the Case

On December 1, 2020—the day after Governor Evers signed the Certificate of Ascertainment—William Feehan and Derrick Van Orden filed a complaint in the federal court for the Eastern District of Wisconsin. Dkt. No. 1. Feehan identified himself as a resident of La Crosse, Wisconsin, a registered voter and "a nominee of the Republican Party to be a Presidential Elector on behalf of the State of Wisconsin." Id. at ¶23. Van Orden was identified as a resident of Hager City, Wisconsin and the 2020 Republican nominee for Wisconsin's Third Congressional District Seat for the U.S. House of Representatives. Id. at ¶26. The complaint alleged that "Mr. Van Orden 'lost' by approximately 10,000 votes to the Democrat incumbent," and stated that "[b]ecause of the illegal voting irregularities as will be shown below, Mr. Van Orden seeks to have a new election ordered by this court in the Third District, with that election being conducted under strict adherence with the Wisconsin Election Code." Id. at ¶27.

The complaint alleged "massive election fraud, multiple violations of the Wisconsin Election Code, *see e.g.,* Wis. Stat. §§5.03, *et seq.,* in addition to the Election and Electors Clauses and Equal Protection Clause of the U.S. Constitution" based on "dozens of eyewitnesses and the statistical anomalies and mathematical impossibilities detailed in the affidavits of expert witnesses." Dkt. No. 1 at ¶1. The plaintiffs alleged four causes of action: (1) violation of the

Elections and Electors Clauses and 42 U.S.C. §1983; (2) violation of the Equal Protection Clause of the Fourteenth Amendment, 42 U.S.C. §1983 and the "invalid enactment of regulations & disparate treatment of absentee vs. mail-in ballots"; (3) denial of the Fourteenth Amendment due process right to vote and 42 U.S.C. §1983; and (4) "wide-spread ballot fraud." Id. at ¶¶106-138. The plaintiffs asked for the following emergency relief:

> 1. An order directing Governor Evers and the Wisconsin Elections Commission to de-certify the election results:
>
> 2. An order enjoining Governor Evers from transmitting the currently certified election results [sic] the Electoral College;
>
> 3. An order requiring Governor Evers to transmit certified election results that state that President Donald Trump is the winner of the election;
>
> 4. An immediate emergency order to seize and impound all servers, software, voting machines, tabulators, printers, portable media, logs, ballot applications, ballot return envelopes, ballot images, paper ballots, and all "election materials" referenced in Wisconsin Statutes §9.01(1)(b)11 related to the November 3, 2020 Wisconsin election for forensic audit and inspection by the Plaintiffs;
>
> 5. An order that no votes received or tabulated by machines that were not certified as required by federal and state law be counted;
>
> 6. A declaratory judgment declaring that Wisconsin's failed system of signature verification violates the Electors and Elections Clause by working a de facto abolition of the signature verification requirement;
>
> 7. A declaratory judgment declaring that currently certified election results violate the Due Process Clause, U.S. Const. Amend. XIV;
>
> 8. A declaratory judgment declaring that mail-in and absentee ballot fraud must be remedied with a Full Manual Recount or statistically valid sampling that properly verifies the signatures on absentee ballot envelopes and that invalidates the certified results if

the recount or sampling analysis shows a sufficient number of ineligible absentee ballots were counted;

9. A declaratory judgment declaring absentee ballot fraud occurred in violation of Constitutional rights, Election laws and under state law;

10. A permanent injunction prohibiting the Governor and Secretary of State from transmitting the currently certified results to the Electoral College based on the overwhelming evidence of election tampering;

11. Immediate production of 48 hours of security camera recording of all rooms used in the voting process at the TCF Center[1] for November 3, 2020 and November 4, 2020;

12. Plaintiffs further request the Court grant such relief as is just and proper including but not limited to, the costs of this action and their reasonable attorney fees and expenses pursuant to 42 U.S.C. §1988.

Id. at 50.

With the complaint, the plaintiffs filed a motion for declaratory, emergency, and permanent injunctive relief, dkt. no. 2, and memorandum in support of that motion, dkt. no. 3. The motion stated that the specific relief the plaintiff requested was set out in an attached order, dkt. no. 2 at 1, but there was no order attached. The memorandum asked the court to grant the motion and enter the proposed order, dkt. no. 3 at 10; again, no proposed order was provided.

Later that day, the plaintiffs filed a corrected motion for declaratory, emergency, and permanent injunctive relief. Dkt. No. 6. The plaintiff did not file a memorandum in support of this motion but did file a proposed order. Dkt.

[1] The plaintiff may be referring to the TCF convention center in Detroit, Michigan; the court is unaware of a "TCF Center" in Wisconsin.

No. 1. The relief described in the proposed order was almost identical to the relief requested in the complaint, with a notable exception. Instead of the request for an order requiring production of forty-eight hours of security camera footage from the TCF Center, the plaintiffs asked for an order prohibiting "any wiping or alteration of data or other records or materials" from voting machines, tabulations machines, servers, software and printers, and any alteration or destruction of ballot applications, ballot return envelopes, ballot images, paper ballots, registration lists, poll lists or other election materials, "across the state of Wisconsin." Dkt. No. 6-1 at 7-8.

Two days later, plaintiff Freehan filed an amended complaint removing Derrick Van Orden as a plaintiff. Dkt. No. 9. It differed from the original complaint only in the removal of Van Orden as a plaintiff.

Along with the amended complaint, the plaintiff filed a motion for temporary restraining order and preliminary injunction "to be considered in an expedited manner." Dkt. No. 10. The plaintiff did not file a memorandum in support of the motion; his main purpose in filing the amended motion appears to have been to ask the court to rule on the motion quickly. The plaintiff attached a proposed briefing schedule, suggesting that the court should require the defendants to respond by 8:00 p.m. on Friday, December 4, 2020 and require him to file his reply by 8:00 p.m. on Saturday, December 5, 2020; he proposed to submit the matter on briefs without argument. Dkt. No. 10-1. The defendants objected to this severely truncated schedule. Dkt. Nos. 25

(defendant Evers), 26 (defendants Wisconsin Election Commission and its members).

Construing the amended motion as a Civil L.R. 7(h) expedited, non-dispositive motion for an expedited briefing schedule, the court granted the request on December 4, 2020, setting a schedule that, while not as expedited as the plaintiff requested, gave the parties a short leash. Dkt. No. 29.

Wisconsin voter James Gesbeck filed a motion to intervene, dkt. no. 14, and later an expedited motion to intervene, dkt. no. 33. The Democratic National Committee (DNC) also sought to intervene. Dkt. No. 22. The court denied both requests, dkt. nos. 41 (DNC), 74 (Gesbeck), but allowed both to file *amicus curiae* briefs by the December 7, 2020 deadline it had set for the defendants to oppose the plaintiff's motion for injunctive relief, dkt. nos. 37 (Gesbeck), 41 (DNC).

Recall that the plaintiff had not filed a memorandum in support of the December 1, 2020 corrected motion for injunctive relief or in support of the December 3, 2020 amended motion. On Sunday, December 6, 2020, the plaintiff filed an amended memorandum in support of the motion. Dkt. No. 42. In the first paragraph, the plaintiff indicated that he filed the amended memorandum to "avoid possible confusion from removal of Mr. Van Orden is [sic] plaintiff." Id. at 1. He said that the memorandum was identical to the original memorandum "except for amending references to plaintiffs to refer to Mr. Meehan [sic] only and correcting several inadvertent references to the State of Georgia." Id.

On Sunday, December 6, the plaintiff also filed a motion asking the court to schedule an evidentiary hearing "on the merits" for Wednesday, December 9, 2020 at 9:00 a.m. Dkt. No. 44. Although the plaintiff had not asked for a hearing in any prior motion, and had represented in the amended motion that he was submitting the matter on the briefs without argument, the plaintiff explained that he had changed his position based on the court's December 4, 2020 order. Id. at ¶4. The court denied the motion in a telephonic hearing on December 8, 2020, explaining that before it could reach the merits of the motion for injunctive relief, it must resolve issues regarding justiciability. Dkt. Nos. 70, 71.

In opposing the plaintiff's amended motion for injunctive relief, defendants Wisconsin Election Commission and its members argued that the case has jurisdictional and procedural defects that require dismissal. Dkt. No. 52 at 5. They asserted that the plaintiff lacks Article III standing, id. at 6, that the doctrine of laches bars consideration of his claims, id. at 8 and that the Eleventh Amendment shields them from the relief he seeks, id. at 10. They asserted that the complaint fails to state a claim for relief under the Election or Electors Clauses, id. at 11, or under the Equal Protection or Due Process Clauses, id. at 13, and they contended that the plaintiff's purported evidence fails to meet basic evidentiary standards, id. at 20.

In his brief opposing injunctive relief, defendant Governor Evers argued that there is no evidence of fraud in Wisconsin's election results, dkt. no. 55 at 10, that the plaintiff's witnesses and experts lack qualifications and are

unreliable, id. at 12, and that the plaintiff has failed to state valid claims, id. at 22. Evers also argued that an adequate remedy at law exists because the recount procedures under Wis. Stat. §9.01 unambiguously constitute the "exclusive remedy" for challenging election results. Id. at 55. With respect to the balancing of harms, Evers argued that the requested relief would prejudice the defendants and "retroactively deprive millions of Wisconsin voters of their constitutional right to vote in the 2020 presidential election." Id. at 32.

James Gesbeck, filing as friend of the court, opposed the motion for injunctive relief on the grounds that the plaintiff has not established subject matter jurisdiction and that the court should defer to the Wisconsin courts and Wisconsin's procedural mechanism for resolving disputed elections. Dkt. No. 47 at 11, 12. Gesbeck applied the balancing analysis for injunctive relief, asserting that relief in this court would moot the Wis. Stat. §9.01 challenge pending in the Wisconsin courts. Id. at 17. He argued that this, in turn, would put the "insurmountable weight of the Federal Government on the election result in Wisconsin and would be unbalancing the scale created by the system of checks and balances that have been maintained since the Constitution was adopted." Id. at 17.

Amicus DNC opposed the motion on many of the same grounds as the other defendants. Dkt. No. 57. The DNC argued that the plaintiff lacks standing, that the doctrine of laches bars the plaintiff's claims, that the defendants are immune from suit under the Eleventh Amendment, that principles of federalism and comity require abstention, and that the plaintiff

fails to state a claim upon which relief can be granted. Dkt. No. 57. It asserted that the plaintiff cannot establish irreparable harm and has an adequate remedy of law. Id. at 36.

The defendants have filed motions to dismiss the case. The WEC and its members seek dismissal for failure to state a claim under Federal Rule of Civil Procedure 12(b)(6). Dkt. No. 53. Defendant Evers seeks dismissal for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1), failure to plead fraud with particularity under Fed. R. Civ. P. 9(b) and failure to state a claim under Fed. R. Civ. P. 12(b)(6).

The Wisconsin State Conference of the NAACP and three of its members (Dorothy Harrell, Wendell J. Harris, Jr. and Earnestine Moss) sought leave to file an *amicus* brief on the question of whether the court should dismiss the case. Dkt. No. 56. The court granted that motion. Dkt. No. 69.

III. Procedural Posture

From the outset, the plaintiff has sought to have the claims in the complaint resolved through a motion for injunctive relief under Fed. R. Civ. P. 65. The relief he requests in the second iteration of his motion for injunctive relief is the same relief he requests in the lawsuit itself. As defendant Evers points out in his motion to dismiss, the plaintiff's December 6, 2020 motion for an evidentiary hearing (which the court has denied) "makes clear that what [the plaintiff] seeks—without any discovery or basic adversarial development of evidence—is a trial and final adjudication on the merits." Dkt. No. 51 at 2.

Evers points to Fed. R. Civ. P. 12(i), which states that "[i]f a party so moves, any defense listed in Rule 12(b)(1)-(7)—whether made in a pleading or by motion—and a motion under Rule 12(c) must be heard and decided before trial unless the court orders a deferral until trial." Because Evers has raised defenses under Rule 12(b)(1) and (b)(6), and because in asking for a hearing the plaintiff sought what would have been a trial on the merits of the causes of action raised in the complaint, the court must resolve the defenses before moving to the merits.

As the court stated in the hearing on December 8, that requirement is more than a procedural nicety. The defendants and the *amici* have raised questions about this federal court's authority to decide the claims alleged in the amended complaint. If this court does not have jurisdiction to hear and decide those claims, any decision it might make regarding the merits of the claims would be invalid. For that reason, the court considers the motions to dismiss before considering the plaintiff's request for injunctive relief.

IV. The Motions to Dismiss

A. Legal Standards

1. *Rule 12(b)(1)—Lack of Subject Matter Jurisdiction*

In evaluating a motion to dismiss for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1), "the court must first determine whether a factual or facial challenge has been raised." Silha v. ACT, Inc., 807 F.3d 169, 173 (7th Cir. 2015) (citing Apex Dig., Inc. v. Sears, Roebuck & Co., 572 F.3d 440, 443 (7th Cir. 2009). A *factual* challenge alleges that even if the pleadings are

sufficient, no subject matter jurisdiction exists. A *facial* challenge alleges that the complaint is deficient—that the plaintiff has not sufficiently alleged subject matter jurisdiction. Id. The difference matters—a court reviewing a factual challenge "may look beyond the pleadings and view any evidence submitted to determine if subject matter exists," while a court reviewing a facial challenge "must accept all well-pleaded factual allegations as true and draw all reasonable inferences in favor of the plaintiff." Id.

2. *Rule 12(b)(6)—Failure to State a Claim*

A motion to dismiss for failure to state a claim under Rule 12(b)(6) challenges the legal sufficiency of the complaint. A complaint must include "a short and plain statement of the claim showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a)(2). The complaint must contain enough facts, accepted as true, to "state a claim for relief that is plausible on its face." Ashcroft v. Iqbal, 556 U.S. 662, 678 (2009) (quoting Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570 (2007)). "A claim has facial plausibility when the plaintiff pleads factual content that allows a court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. (citing Twombly, 550 U.S. at 556). "[T]he plausibility determination is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." W. Bend Mut. Ins. Co. v. Schumacher, 844 F.3d 670, 676 (7th Cir. 2016).

3. *42 U.S.C. § 1983*

To state a claim for a civil rights violation under 42 U.S.C. §1983, a plaintiff must allege that someone deprived him of a right secured by the Constitution or the laws of the United States and that whoever deprived him of that right was acting under the color of state law. D.S. v. E. Porter Cty. Sch. Corp., 799 F.3d 793, 798 (7th Cir. 2015) (citing Buchanan–Moore v. Cty. of Milwaukee, 570 F.3d 824, 827 (7th Cir. 2009)).

B. Subject Matter Jurisdiction

"Federal courts are courts of limited jurisdiction." Kokkonen v. Guardian Life Ins. Co. of America, 511 U.S. 375, 377 (1994). Subject matter jurisdiction has to do with "the courts' statutory or constitutional *power* to adjudicate the case." Steel Co. v. Citizens for a Better Environment, 523 U.S. 83, 89 (1998) (emphasis in the original). "Article III, §2, of the Constitution extends the 'judicial Power' of the United States only to 'Cases' and 'Controversies.'" Id. at 102. The defendants raise a factual challenge to the court's subject matter jurisdiction, arguing that regardless of the pleadings, subject matter jurisdiction does not exist. The court may look outside the four corners of the complaint in considering that challenge.

1. *Standing*

Article III standing is an "essential component of Article III's case-or-controversy requirement," and therefore a "threshold jurisdictional question." Apex Dig., Inc., 572 F.3d at 443 (citing Lujan v. Defenders of Wildlife, 504 U.S. 555, 560 (1992)). "[N]o principle is more fundamental to the judiciary's proper

role in our system of government than the constitutional limitation of federal-court jurisdiction to actual cases or controversies." Raines v. Byrd, 521 U.S. 811, 818 (1997). "Standing to sue is part of the common understanding of what it takes to make a justiciable case." Id. "Standing is an element of subject-matter jurisdiction in a federal civil action . . . ." Moore v. Wells Fargo Bank, N.A., 908 F.3d 1050, 1057 (7th Cir. 2018).

> The "irreducible constitutional minimum of standing contains three requirements. *Lujan v. Defenders of Wildlife*, [504 U.S. 555], at 560 [1992)]. First and foremost, there must be (and ultimately proved) an "injury in fact"—a harm suffered by the plaintiff that is "concrete" and "actual or imminent, not 'conjectural' or 'hypothetical.'" *Whitmore v. Arkansas*, [495 U.S. 149], at 149 [1990] (quoting *Los Angeles v. Lyons*, 461 U.S. 95, 101-102 . . . (1983)). Second, there must be causation—a fairly traceable connection between the plaintiff's injury and the complained-of conduct of the defendant. *Simon v. Eastern Ky. Welfare Rights Organization*, 426 U.S. 26, 41-42 . . . (1976). And third, there must be redressability—a likelihood that the requested relief will redress the alleged injury. *Id.*, at 45-46 . . .; see also *Warth v. Seldin*, 422 U.S. 490, 505 . . . (1975). This triad of injury in fact, causation, and redressability constitutes the core of Article III's case-or-controversy requirement, and the party invoking federal jurisdiction bears the burden of establishing its existence. See *FW/PBS, Inc. v. Dallas*, 493 U.S. 215, 231 . . . (1990).

Steel Co., 523 U.S. at 102-104.

Regarding the "injury in fact" leg of the triad, the injury must be "particularized," such that it "affect[s] the plaintiff in a personal and individual way." Spokeo, Inc. v. Robins, ___ U.S. ___, 136 S. Ct. 1540, 1548 (2016) (citations omitted). The injury also must be "concrete"—it must be "real," not "abstract." Id. A plaintiff cannot show a particularized and concrete injury by showing "that he has merely a general interest common to all members of the public." *Ex parte* Levitt, 302 U.S. 633, 634 (1937). A plaintiff may not use a

"federal court as a forum in which to air his generalized grievances about the conduct of government . . . ." United States v. Richardson, 418 U.S. 166, 174 (1974) (quoting Flast v. Cohen, 392 U.S. 83, 106 (1942)).

As for the redressability leg of the triad, "[r]elief that does not remedy the injury suffered cannot bootstrap a plaintiff into federal court; that is the very essence of the redressability requirement." Steel Co., 523 U.S. at 107. The plaintiff must show that it is "likely," not merely "speculative," that the injury the plaintiff alleges will be "redressed by a favorable decision." Lujan, 504 U.S. at 561 (quoting Simon, 426 U.S. at 38).

In addition to the Article III case-or-controversy requirement, there is a prudential limitation in Fed. R. Civ. P. 17(a), requiring that "[e]very action must be prosecuted in the name of the real party in interest," Fed. R. Civ. P. 17(a), and "requir[ing] that the complaint be brought in the name of the party to whom that claim 'belongs' or the party who 'according to the governing substantive law, is entitled to enforce the right.'" Rawoof v. Texor Petroleum Co., Inc., 521 F.3d 750, 756 (7th Cir. 2008) (quoting Oscar Gruss & Son, Inc. v. Hollander, 337 F.3d 186, 193 (2d Cir. 2003)); see also RK Co. v. See, 622 F.3d 846, 850 (7th Cir. 2010) ("the real party in interest rule is only concerned with whether an action can be maintained in the plaintiff's name," and is "similar to, but distinct from, constitutional ... standing"). The real party in interest is "the one who by the substantive law, possesses the right sought to be enforced, and not necessarily the person who will ultimately benefit from the recovery." Act II Jewelry, LLC v. Wooten, 301 F. Supp. 3d 905, 910-911 (N.D.

Ill. 2018) (quoting Checkers, Simon & Rosner v. Lurie Corp., 864 F.2d 1338, 1343 (7th Cir. 1988) (internal citations omitted)). The purpose of the rule is to "protect the defendant against a subsequent action by the party actually entitled to recover." RK Co., 622 F.3d at 850 (citing Fed. R. Civ. P. 17(a) advisory committee note (2009)).

The amended complaint alleges that the plaintiff has standing "as a voter and as a candidate for the office of Elector under Wis. Stat. §§ 5.10, *et seq* (election procedures for Wisconsin electors)." Dkt. No. 9 at 8. The defendants argue that the plaintiff lacks standing in either capacity. Dkt. No. 43 at 4-5; Dkt. No. 59 at 8-9.

a. Standing as a voter

The amended complaint does not assert that the plaintiff voted in the 2020 general Presidential election in Wisconsin. It says that he is a registered voter, but it does not affirmatively state that he voted in the election the results of which he asks the court to decertify. His counsel asserts in the brief in opposition to the defendants' motion to dismiss—filed eight days after the original complaint and five days after the amended complaint—that the plaintiff "voted for President Trump in the 2020 General Election." Dkt. No. 72 at 17. For the first time at the motion to dismiss stage, the plaintiff provided his own declaration, in which he attests that he voted for President Donald J. Trump in the November 3, 2020 election. Dkt. No. 72-1.

The plaintiff claims that the defendants failed to comply "with the requirements of the Wisconsin Election Code and thereby diluted the lawful

ballots of the Plaintiff and of other Wisconsin voters and electors in violation of the United States Constitution guarantee of Equal Protection." Dkt. No. 9 at ¶116. He alleges that the defendants enacted regulations or issued guidance that, in intent and effect, favored Democratic absentee voters over Republican voters, and that these regulations and this guidance enable and facilitated voter fraud. Id. The plaintiff also asserts that he has a right to have his vote count and claims that a voter is injured if "the important of his vote is nullified." Id. at ¶127.

Several lower courts have addressed the plaintiff's theory that a single voter has standing to sue as a result of his vote being diluted by the possibility of unlawful or invalid ballots being counted. The district court for the Middle District of North Carolina catalogued a few of those decisions, all finding that the harm was too speculative and generalized—not sufficiently "concrete"—to bestow standing. These courts concluded that the vote dilution argument fell into the "generalized grievance" category. In Moore v. Circosta, the court wrote:

> Indeed, lower courts which have addressed standing in vote dilution cases arising out of the possibility of unlawful or invalid ballots being counted, as Plaintiffs have argued here, have said that this harm is unduly speculative and impermissibly generalized because all voters in a state are affected, rather than a small group of voters. See, e.g., Donald Trump for President, Inc. v. Cegavske, Case No. 2:20-CV-1445 JCM (VCF), __ F. Supp. 3d __, __, 2020 WL 5626974, at *4 (D. Nev. Sept. 18, 2020) ("As with other generally available grievances about the government, plaintiffs seek relief on behalf of their member voters that no more tangibly benefits them than it does the public at large.") (internal quotations and modifications omitted); Martel v. Condos, Case No. 5:20-cv-131, ___ F. Supp. 3d ___, ___, 2020 WL 5755289, at *4 (D. Vt. Sept. 16, 2020) ("If every voter suffers the same incremental dilution of the franchise caused by some third-party's fraudulent vote, then these voters have experienced a generalized injury."); Paher v. Cegavske, 457 F. Supp.

> 3d 919, 926-27 (D. Nev. 2020) ("Plaintiffs' purported injury of having their votes diluted due to ostensible election fraud may be conceivably raised by any Nevada voter."); Am. Civil Rights Union v. Martinez-Rivera, 166 F. Supp. 3d 779, 789 (W.D. Tex. 2015) ("[T]he risk of vote dilution [is] speculative and, as such, [is] more akin to a generalized grievance about the government than an injury in fact.")
>
> Although "[i]t would over-simplify the standing analysis to conclude that no state-wide election law is subject to challenge simply because affects all voters," Martel, __ F. Supp.3d at __, 2020 WL 5755289, at *4, the notion that a single person's vote will be less valuable as a result of unlawful or invalid ballots being cast is not a concrete and particularized injury necessary for Article III standing. Compared to a claim of gerrymandering, in which the injury is specific to a group of voters based on their racial identity or the district in which they live, all voters in North Carolina, not just Individual Plaintiffs, would suffer the injury Individual Plaintiffs allege. This court finds this injury to generalized to give rise to a claim of vote dilution . . . .

Moore v. Circosta, Nos. 1:20CV911, 1:20CV912, 2020 WL 6063332, at *14,

The court agrees. The plaintiff's alleged injuries are injuries that any Wisconsin voter suffers if the Wisconsin election process were, as the plaintiff alleges, "so riddled with fraud, illegality, and statistical impossibility that this Court, and Wisconsin's voters, courts, and legislators, cannot rely on, or certify, any numbers resulting from this election." Dkt. No. 9 at ¶5. The plaintiff has not alleged that, as a voter, he has suffered a particularized, concrete injury sufficient to confer standing.

The plaintiff argues that it is incorrect to say that his standing is based on a theory of vote dilution. Dkt. No. 72 at 19. He then proceeds to opine that he has shown in great detail how his vote and the votes of others who voted for Republican candidates was diluted. Id. at 19-20. He says the vote dilution did not affect all Wisconsin voters equally, asserting that it had a negative impact

on those who voted for Republican candidates and a positive impact on those who voted for Democratic candidates. Id. at 20. He asserts that he also has shown that the defendants sought to actively disenfranchise voters for Republican candidates. Id. These are the same arguments he made in the amended complaint and they still show no more than a generalized grievance common to any voter. Donald J. Trump carried some Wisconsin counties; the voters who voted for Joseph R. Biden in those counties could make the same complaints the plaintiff makes here.

The plaintiff says that his interests and injury are "identical to that of President Trump," and cites to Bush v. Gore, 531 U.S. 98 (2000), which he characterizes as holding that "then-candidate George W. Bush of Texas had standing to raise the equal protection rights of Florida voters that a majority of the Supreme Court deemed decisive." Id. at 21 (quoting Hawkins v. Wayne Twp. Bd. of Marion Cty., Ind, 183 F. Supp. 2d 1099, 1103 (S.D. Ind. 2002)). The court is stymied by the plaintiff's assertion that his interests and injury are identical to that of President Trump. As the court will explain in the next section, contrary to his assertions, the plaintiff is not a "candidate" in the way that President Trump was a candidate for office. President Trump's interest is in being re-elected, while the plaintiff has said that his interest is in having his vote count and not be diluted. If his interest is solely in getting President Trump re-elected, as opposed to having his vote be counted as part of a valid election process, the court is aware of no constitutional provision that gives him the right to have his candidate of choice declared the victor.

Nor does the decision in Bush v. Gore say what the plaintiff claims it says. As far as the court can tell, the word "standing" does not appear in the majority opinion. In the Indiana decision the plaintiff cites, then-district court judge David Hamilton wrote: "If candidate Hawkins did not have standing to raise equal protection rights of voters, it would be difficult to see how then-candidate George W. Bush of Texas had standing to raise equal protection rights of Florida voters . . . in *Bush v. Gore*." Hawkins, 183 F. Supp.2d at 1103. But the Supreme Court in Bush v. Gore never explained how candidate Bush had standing, and even if it had, the plaintiff is not a candidate.

Nor has the plaintiff demonstrated redressability. He complains that his vote was diluted and that he wants his vote to count. But he asks the court to order the results of the election de-certified and then to order defendant Evers to certify the election for Donald J. Trump. Even if this *federal* court had the authority to order the governor of the *state* of Wisconsin to certify the results of a national presidential election for any candidate—and the plaintiff has presented *no* case, statute or constitutional provision providing the court with that authority—doing so would further invalidate and nullify the plaintiff's vote. The plaintiff wants Donald J. Trump to be certified as the winner of the Wisconsin election *as a result of the plaintiff's vote*. But what he asks is for Donald J. Trump to be certified the winner *as a result of judicial fiat*. That remedy does not redress the plaintiff's alleged injury. Even the plaintiff concedes in his brief in opposition to dismissal that "[d]efendant Evers can . . . provide partial redress in terms of the requested injunctive relief, namely, by

refusing to certify or transmit the election results, and providing access to voting machines, records and other 'election materials.'" Dkt. No. 72 at 21. The plaintiff is wrong in that regard, as the court will explain when it discusses the related doctrine of mootness; the point is that even from the plaintiff's perspective, the remedy he seeks will not fully redress the injury he claims.

Circling back to Article III's "case or controversy" requirement, the Supreme Court has held that "[t]he remedy must of course be limited to the inadequacy that produced the injury in fact that the plaintiff has established." DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 353 (2006) (quoting Lewis v. Casey, 518 U.S. 343, 357 (1996)). In other words, "[a] plaintiff's remedy must be tailored to redress the plaintiff's particular injury." Gill v. Whitford, ___ U.S. ___, 138 S. Ct. 1916, 1934 (2018) (citing Cuno, 547 U.S. at 353). Even if the plaintiff had alleged a particularized, concrete injury and even if the relief he seeks would redress that injury, that relief is not tailored to the alleged injury. As the Michigan court explained in King v. Whitmer, Case No. 20-13134 at Dkt. No. 62, page 25 (E.D. Mich. Dec. 7, 2020), "Plaintiffs' alleged injury does not entitle them to seek their requested remedy because the harm of having one's vote invalidated or diluted is not remedied by denying millions of others *their* right to vote."

The plaintiff's status as a registered voter does not give him standing to sue.

b. Standing as a nominee for elector

The amended complaint alleges that the plaintiff has standing to bring the suit "as a candidate for the office of Elector under Wis. Stat. §§ 5.10, et seq." Dkt. No. 9 at ¶26. The amended complaint cites to "Wis. Stat. §§5.10, et seq," but the court is not sure what the "*et seq.*"—"and what follows"—contributes to the plaintiff's belief that he has standing. Wis. Stat. §5.10 is followed by Wis. Stat. §5.15, which concerns the "Division of municipalities into wards," as well as other sections concerning polling places and voting machines. The court assumes the plaintiff meant to reference only Wis. Stat. §5.10.

Wis. Stat. §5.10 states:

> Although the names of the electors do not appear on the ballot and no reference is made to them, a vote for the president and vice president named on the ballot is a vote for the electors of the candidates for whom an elector's vote is cast. Under chs. 5 to 12, all references to the presidential election, the casting of votes and the canvassing of votes for president, or for president and vice president, mean votes for them through their pledged presidential electors.

Relying on this section, the amended complaint directs the court's attention to Carson v. Simon, 978 F.3d 1051, 1057 (8th Cir. 2020).[2] In Carson,

[2] The complaint also cites two Supreme Court cases: McPherson v. Blacker, 146 U.S. 1, 27 (1892) and Bush v. Palm Beach Cty. Canvassing Bd., 531 U.S. 70, 76 (2000) (*per curiam*). Neither address the Article III standing of an elector. In McPherson, the Court reviewed the Michigan supreme court's decision on the constitutionality of the Michigan statute governing selection of electors. While the parties who brought the suit in state court were nominees for presidential electors, the Court did not address their standing (or lack of it). The petitioner in Bush was the then-Republican candidate, George W. Bush, who was challenging the Florida supreme court's interpretation of its election statutes; again, the Court did not address (and had no need to address) the standing of an elector to sue.

two certified nominees of the Republican Party to be presidential electors sued the Minnesota secretary of state, challenging a consent decree that "essentially ma[de] the statutorily-mandated absentee ballot receipt deadline inoperative." Id. at 1054. As a result of the decree, the secretary of state had directed election officials "to count absentee ballots received up to a week after election day, notwithstanding Minnesota law." Id. The potential electors sought an injunction in federal court, but the district court found they lacked standing. Id.

The Eighth Circuit reversed, finding that the potential electors had standing as candidates "because the plain text of Minnesota law treats prospective presidential electors as candidates." Id. at 1057. The court found that candidates suffered particularized and concrete injury from an inaccurate vote tally. Id. at 1058.

The plaintiff urges this court to reach the same conclusion. An Eighth Circuit decision is not binding on this court, but the question is whether the reasoning in that decision is persuasive. A member of the panel in Carson dissented from the majority opinion and expressed doubt about the potential electors' standing. Circuit Judge Jane Kelley wrote:

> . . . I am not convinced the Electors have Article III standing to assert claims under the Electors Clause. Although Minnesota law at times refers to them as "candidates," see, e.g., Minn. Stat. § 204B.03 (2020), the Electors are not candidates for public office as that term is commonly understood. Whether they ultimately assume the office of elector depends entirely on the outcome of the state popular vote for president. Id. § 208.04 subdiv. 1 ("[A] vote cast for the party candidates for president and vice president shall be deemed a vote

> for that party's electors.") They are not presented to and chosen by the voting public for their office, but instead automatically assume that office based on the public's selection of entirely different individuals. But even if we nonetheless assume the Electors should be treated like traditional political candidates for standing purposes, I question whether these particular candidates have demonstrated the "concrete and particularized" injury necessary for Article III standing. Lujan v. Defs. of Wildlife, 504 U.S. 555, 560 . . . (1992). To the contrary, their claimed injury—a potentially "inaccurate vote tally" . . .—appears to be "precisely the kind of undifferentiated, generalized grievance about the conduct of government: that the Supreme Court has long considered inadequate for standing. Lance v. Coffman, 549 U.S. 437, 442 . . . (2007) (examining standing in the context of a claim under the Elections Clause). Because the Electors, should they in fact assume that office, must swear an oath to mark their Electoral College ballots for the presidential candidate who won the popular vote, Minn. Stat. § 208.43 (2015), it is difficult to discern how they have more of a "particularized stake," Lance, 549 U.S. at 442 . . . , in Minnesota conducting fair and transparent elections than do the rest of the state's voters.

Id. at 1063.

Judge Kelly's reasoning is the more persuasive. Under Wisconsin law, a vote for the candidates of president and vice president is a vote for the electors of those candidates. Wis. Stat. § 5.65(3)(a). When the electors meet, they must vote for the candidates of the party that nominated the electors. Wis. Stat. §7.75(2). Like Minnesota electors, Wisconsin electors may be referred to as "candidates" by statute but they are not traditional political candidates presented to and chosen by the voting public. Their interest in seeing that every valid vote is correctly counted and that no vote is diluted is no different than that of an ordinary voter. And the court has concluded, as did Judge Kelly, that the plaintiff's status as a voter does not give him standing.

The amended complaint does not mention the Elections Clause or the Electors Clause of the Constitution in relation to standing. In his brief in

opposition to the motions to dismiss, the plaintiff alleges that he has standing under "Electors and Elections Clause." Dkt. No. 72 at 17. He asserts that the Eighth Circuit found in Carson that electors had "both Article III and Prudential standing under the Electors and Elections Clauses." Id. The plaintiff reads Carson differently than does this court. The Carson majority did not mention the Electors or Elections Clause in its discussion of Article III standing. The entire discussion of Article III standing was based on Minnesota law. See Carson, 978 F.3d at 1-57-1058. In its discussion of *prudential* standing, the Carson majority stated that "[a]lthough the Minnesota Legislature may have been harmed by the Secretary's usurpation of its constitutional right under the Elector Clause, the Electors have been as well." Id. at 1058-59.

This court has found that the plaintiff does not have Article III standing, but even if had not, it disagrees that the Elector Clause[3] provides prudential standing to electors. Article II, Section 1, Clause 2 of the Constitution—known as the "Elector Clause"—states that "[e]ach State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of

[3] The plaintiff cites the "Elector and Elections Clause" or "Clauses" in the same breath but does not discuss the text of either. It is not clear how the plaintiff sees the Elections Clause—Article II, Sec. 1, cl. 3—as providing him with standing and the plaintiff has not developed that argument. The court notes only that in Lance v. Coffman, the Supreme Court found that plaintiffs whose only alleged injury was that the Elections Clause had not been followed did not have standing because they alleged "precisely the kind of undifferentiated, generalized grievance about the conduct of government that we have refused to countenance in the past." Lance, 549 U.S. at 442.

Trust or Profit under the United States, shall be appointed an Elector." The clause confers on the *state* the right to appoint electors and confers on the *legislature* the right to decide the way those electors will be appointed. It confers no right on the *electors* themselves. Just a few months ago, the Supreme Court stated as much in Chiafalo v. Washington, ___ U.S. ___, 140 S. Ct. 2316, 2328 (July 6, 2020), in the context of considering whether a state could penalize an elector for breaking his pledge and voting for someone other than the candidate who won his state's popular vote:[4] "Article II and the Twelfth Amendment give States broad powers over electors, and give electors themselves no rights." The Court went on to say,

> Early in our history, States decided to tie electors to the presidential choices of others, whether legislatures or citizens. Except that legislatures no longer play a role, that practice has continued for more than 200 years. Among the devices States have long used are pledge laws, designed to impress on electors their role as agents of others. A State follows in the same tradition if, like [the state of] Washington, it chooses to sanction an elector for breaching his promise. Then, too, the State instructs its electors that they have no ground for reversing the vote of millions of its citizens. That direction accords with the Constitution—as well as with the trust of a Nation that here, We the People rule.

Id.

The plaintiff's status as a nominee to be a Republican elector does not give him Article III or prudential standing.

[4] Wisconsin's "pledge law"—Wis. Stat. §7.75(1)—does not impose a penalty on a "faithless elector."

2. *Mootness*

Mootness "has sometimes been called 'the doctrine of standing set in a time frame.'" Chi. Joe's Tea Room, LLC v. Vill. of Broadview, 894 F.3d 807, 812-13 (7th Cir. 2018) (quoting Friends of the Earth, Inc. v. Laidlaw Envtl. Services (TOC), Inc., 528 U.S. 167, 189 (2000)). A case becomes moot "'when the issues presented are no longer "live" or the parties lack a legally cognizable interest in the outcome.'" Already, LLC v. Nike, Inc., 568 U.S. 85, 91 (2013) (quoting Murphy v. Hunt, 455 U.S. 478, 481 (1982) (per curiam)). "Mootness strips a federal court of subject-matter jurisdiction." Id. at 815 (citing DJL Farm LLC v. EPA, 813 F.3d 1048, 1050 (7th Cir. 2016). This is because "[a] case that becomes moot at any point during the proceedings is 'no longer a "Case" or "Controversy" for purposes of Article III.'" United States v. Sanchez-Gomez, __ U.S. __, 138 S. Ct. 1532, 1537 (2018) (quoting Already, LLC, 568 U.S. at 91).

The amended complaint states that the plaintiff brought this suit "to prohibit certification of the election results for the Office of President of the United States in the State of Wisconsin . . . ." Dkt. No. 9 at ¶27. The plaintiff asks the court to prohibit from occurring an event that already has occurred—an event that occurred the day before he filed this lawsuit and nine days before the court issues this order. He asks the court to enjoin defendant Evers from transmitting the certified election results, id. at ¶142—an event that already has occurred. He asks the court to order that certain votes not be counted, id., when the vote counting has been over since November 29.

The plaintiff himself demonstrates the mootness problem in his brief in opposition to dismissal. He states that defendant Evers can provide partial redress for his alleged injuries "by refusing to certify or transmit the election results." Dkt. No. 72 at 21. But Evers already has certified and transmitted the elections results—he cannot refuse to do that which he already has done.

At the December 8 hearing, the plaintiff argued that there remains a live controversy because the electors have not yet voted and will not do so until Monday, December 14, 2020. Dkt. No. 70. This argument ignores the fact that several of the events that dictate which slate of nominees are certified to vote already have taken place and had taken place at the time the plaintiff filed his complaint. The votes have been counted. In two counties, they've been counted twice. The WEC chair has signed the canvass and certified electors for Biden/Harris. The governor has signed the Certificate of Ascertainment and the National Archive has that certificate.

In his brief in opposition to dismissal, the plaintiff points to this court's own order earlier in this case, determining that the plaintiff had not demonstrated why the December 8, 2020 "safe harbor" deadline under 3 U.S.C. §5 was the date by which the plaintiff needed the court to issue a decision to preserve his rights. Dkt. No. 72 at 25 (citing Dkt. No. 29 at 7). The court noted in that order that the plaintiff's brief in opposition to a motion to reassign another case erroneously referred to December 8 as the date that the College of Electors was scheduled to meet. Dkt. No. 29 at 7. The court pointed out that that was incorrect, and that December 8 was the deadline by which the state

would have to make its final determination of any election dispute in order to avoid congressional challenge. Id. The court then said, "Because the electors do not meet and vote until December 14, 2020, the court will impose a less truncated briefing schedule than the one the plaintiff proposes . . . ." Dkt. No. 29.

The plaintiff says that "[i]mplicit in this Court's determination" is the assumption that "this Court can still grant some or perhaps all of the relief requested and this Plaintiff's claims are not moot." Dkt. No. 72 at 25. The plaintiff reads more into the court's language than the court intended. In the plaintiff's earliest pleadings—the first motion for injunctive relief, the "corrected" motion for injunctive relief, the "amended" motion for injunctive relief—the plaintiff failed to identify a date by which he needed the court to act. The first time he identified such a date was in his brief in opposition to a motion to reassign another case—and then, the reference was oblique. In his opposition brief, the plaintiff stated, "With the College of Electors scheduled to meet December 8, there could never be a clearer case of 'justice delayed is justice denied.'" Dkt. No. 18 at 1. From that, the court deduced that the plaintiff needed the court to act by the date the College of Electors was scheduled to meet. But the College of Electors was not scheduled to meet December 8—it was (and is) scheduled to meet December 14. So the court set a briefing schedule that would give the defendants a chance to respond, but would complete briefing ahead of the event the plaintiff deemed important—the

electoral meeting and vote. That was not a decision by this court—implicit or explicit—on the mootness of the plaintiff's claims.

The plaintiff also asserts that the "cutoff for election-related challenges, at least in the Seventh Circuit, appears to be the date that the electors meet, rather than the date of certification." Dkt. No. 72 at 24. He cites Swaffer v. Deininger, No. 08-CV-208, 2008 WL 5246167 (E.D. Wis. Dec. 17, 2008). Swaffer is not a Seventh Circuit case, and the court is not aware of a Seventh Circuit case that establishes a "cutoff for election-related challenges." And the plaintiff seems to have made up the "quote" in his brief that purports to be from Swaffer. The plaintiff asserts that these words appear on page 4 of the Swaffer decision: "even though the ***election*** has passed, the meeting of electors obviously has not, so plaintiff's claim here is hardly moot." Dkt. No. 72 at 24-25. The court has read page 4 of Swaffer—a decision by this court's colleague, Judge J.P. Stadtmueller—three times and cannot find these words. In fact, Swaffer did not involve a challenge to a presidential election and it did not involve electors. Mr. Swaffer sought to challenge a Wisconsin statute requiring individuals or groups promoting or opposing a referendum to file a registration statement and take other actions. Swaffer, 2008 WL 5246167, at *1. The defendants argued that the election (in which the plaintiff had taken steps to oppose a referendum on whether to allow liquor sales in the Town of Whitewater) was over and that Swaffer's claims thus were moot. Id. at 2. Judge Stadtmueller disagreed, finding that because Swaffer alleged that he intended

to violate the statutes at issue in the future, a credible threat of prosecution remained. Id. at 3.

Some of the relief the plaintiff requests may not be moot. For example, he asks for an immediate order seizing voting machines, ballots and other materials relating to the physical mechanisms of voting. And there remain five days until the electors vote—as the events of this year have shown, anything can happen. But most of the relief the plaintiff seeks is beyond this court's ability to redress absent the mythical time machine.

3. *Conclusion*

The plaintiff does not have Article III standing to sue in federal court for the relief he seeks.

C. Other Arguments

Standing is the *sine qua non* of subject matter jurisdiction. Absent standing, the court does not have jurisdiction to consider the plaintiff's claims on the merits. Arguably, it has no jurisdiction to consider the other bases the defendants and *amici* assert for why the court should dismiss the case. At the risk of producing dicta (and spilling even more ink on a topic that has received an ocean's worth by now), the court will briefly address some of the other bases for the sake of completeness.

1. *Eleventh Amendment Immunity*

The defendants argue that the plaintiff's claims are barred by the Eleventh Amendment. Dkt. No. 59 at 15; Dkt. No. 54 at 10. The Eleventh Amendment "bars most claims in federal court against a state that does not

consent to suit." Carmody v. Bd. of Trs. of Univ. of Ill., 893 F.3d 397, 403 (7th Cir. 2018) (citations omitted). States are immune from suit in federal court "unless the State consents to the suit or Congress has abrogated their immunity." Tucker v. Williams, 682 F.3d 654, 658 (7th Cir. 2012) (citing Seminole Tribe v. Florida, 517 U.S. 44 (1996)). This includes suits brought in federal court against nonconsenting states by their own citizens. See, *e.g.*, Edelman v. Jordan, 415 U.S. 651, 663 (1974); Hans v. Louisiana, 134 U.S. 1, 15 (1890) ("Can we suppose that, when the eleventh amendment was adopted, it was understood to be left open for citizens of a state to sue their own state in the federal courts, while the idea of suits by citizens of other states, or of foreign states, was indignantly repelled?").

The plaintiff has sued the Governor of Wisconsin, Tony Evers, in his official capacity; the Wisconsin Elections Commission and each member of the WEC in his or her official capacity. Before going too much further down the Eleventh Amendment road, the court notes that the vehicle for the plaintiff to bring his constitutional claims—his claims under the Elector Clause, the Elections Clause, the Equal Protection Clause and the Due Process Clause—is 42 U.S.C. §1983. Section 1983 prohibits a "person" acting under color of state law from violating another's civil rights. The Wisconsin Elections Commission is not a "person." It is an arm of the state of Wisconsin, Wis. Stat. §5.05, and "states are not suable 'persons' under 42 U.S.C. § 1983." Phillips v. Baxter, 768 F. App'x 555, 559-560 (7th Cir. 2019) (citing Sebesta v. Davis, 878 F.3d 226, 231 (7th Cir. 2017)). See also, Will v. Mich. Dept. of State Police, 491 U.S. 58,

64 (1989) ("a State is not a person within the meaning of § 1983"). "Section 1983 provides a federal forum to remedy many deprivations of civil liberties, but it does not provide a federal forum for litigants who seek a remedy against a State for alleged deprivations of civil liberties." Will, 491 U.S. at 66. The WEC is not the proper defendant for the plaintiff's constitutional claims.

The plaintiff faces the same problem with his claims against the individual defendants, all of whom are state officials whom he sues in their official capacities.[5]

> Obviously, state officials literally are persons. But a suit against a state official in his or her official capacity is not a suit against the official but rather is a suit against the official's office. *Brandon v. Holt*, 469 U.S. 464, 471 . . . (1985). As such, it is no different from a suit against the State itself. See, *e.g.*, *Kentucky v. Graham*, 473 U.S. 159, 165-66 . . . (1985); *Monell* [*v. New York City Dept. of Social Services*, 436 U.S. 658], at 690 [(1978)].

Id. at 71. Arguably, *none* of the defendants are subject to suit under 42 U.S.C. §1983, which means that even if the plaintiff had standing, the court would have to dismiss Counts I, II and III of the amended complaint.

Circling back to the defendants' Eleventh Amendment argument, "The Eleventh Amendment extends to state agencies and departments and, subject to the *Ex Parte* Young doctrine, to state employees acting in their official capacities." Nelson v. LaCrosse Cty. Dist. Atty. (State of Wis.), 301 F.3d 820,

[5] Had the plaintiff sued the individual defendants in their *personal* capacities, he could have sought relief against them under 42 U.S.C. §1983, assuming he had standing.

827 n.7 (7th Cir. 2002) (citing Pennhurst State Sch. & Hosp. v. Halderman, 465 U.S. 89, 123-24 (1984)).

There are three exceptions to Eleventh Amendment immunity: (1) congressional abrogation, Nuñez v. Ind. Dep't of Child Servs., 817 F.3d 1042, 1044 (7th Cir. 2016) (citing Alden v. Maine, 527 U.S. 706, 754-55 (1999); (2) "a state's waiver of immunity and consent to suit," id. (citing College Savings Bank v. Fla. Prepaid Postsecondary Educ. Expense Bd., 527 U.S. 666, 675 (1999)); and (3) a suit "against state officials seeking only prospective equitable relief," id. (citing *Ex parte* Young, 209 U.S. 123, 159-60 (1908)). None of the exceptions apply here.

Congress did not abrogate the sovereign immunity of the states when it enacted 42 U.S.C. §1983. Will, 491 U.S. at 66. Wisconsin has not waived its immunity from civil actions under §1983. See Shelton v. Wis. Dep't of Corr., 376 Wis. 2d 525, *2 (Table) (Ct. App. 2017) (citing Boldt v. State, 101 Wis. 2d 566, 584-85 (1981)). And the *Ex parte* Young doctrine does not apply when a plaintiff asserts a claim—regardless of the relief requested—against a state official based on *state* law. Pennhurst, 465 U.S. at 106 ("A federal court's grant of relief against state officials on the basis of state law, whether prospective or retroactive, does not vindicate the supreme authority of federal law. On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law."). "In determining whether the *Ex parte* Young doctrine avoids an Eleventh Amendment bar to suit, a court need only conduct a 'straightforward

inquiry' into whether the complaint alleges an ongoing violation of federal law and seeks relief properly characterized as prospective." Verizon Md., Inc. v. Pub. Serv. Comm'n of Md., 535 U.S. 635, 636 (2002) (quoting Idaho v. Coeur d'Alene Tribe of Idaho, 521 U.S. 261, 296 (1997); McDonough Assocs., Inc. v. Grunloh, 722 F.3d 1043, 1051 (7th Cir. 2013)).

Count IV of the amended complaint alleges "[w]ide-spread ballot fraud," a *state*-law claim. The Eleventh Amendment bars that claim against the defendants in their official capacities. The Eleventh Amendment also bars the plaintiff's federal claims to the extent that the plaintiff seeks retrospective relief. The Supreme Court has refused to extend the *Ex Parte* Young doctrine to claims for retrospective relief. Green v. Mansour, 474 U.S. 64, 68 (1985) (citing Pennhurst, 465 U.S. at 102-103). The amended complaint seeks (1) a "temporary restraining order instructing Defendants to de-certify the results of the General Election for the Office of President," dkt. no. 9 at 47; (2) "an order instructing the Defendants to certify the results of the General Election for Office of the President in favor of President Donald Trump," id.; (3) "a temporary restraining order" prohibiting the tabulation of unlawful votes," id.; (4) an order preserving voting equipment and data, id.; (5) "the elimination of the mail ballots from counting in the 2020 election," id. at 48; (6) the disqualification of Wisconsin's electors from participating in the 2020 election, id.; and (7) an order directing Wisconsin's electors to vote for President Donald Trump, id. As the court already has noted, with the possible exception of the

request for an order preserving voting equipment and data, the relief the plaintiff requests is retrospective.

The plaintiff disagrees—he characterizes the certification of the election results as "ongoing violations of federal law . . . ongoing violations of the Electors and Elections Clauses, the Equal Protection and Due Process Clauses, as well as likely violations of federal law including the Voting Rights Act and the Help America Vote Act." Dkt. No. 72 at 25-26. The plaintiff has not brought claims under the latter two statutes and saying that a completed event is an ongoing violation doesn't make it so.

2. *Exclusive Remedy/Exhaustion/Abstention*

Defendant Evers moves to dismiss because Wisconsin provides a remedy to address irregularities or defects during the voting or canvassing process: Wis. Stat. §9.01(11). Four days ago, the Wisconsin Supreme Court held that §9.01(6) requires that a party aggrieved after a recount must appeal by filing suit in circuit court. Trump v. Evers, No. 2020AP1971-OA, Order at *2 (Wis. Dec. 3, 2020). In a concurring opinion, Justice Hagedorn noted that Wis. Stat. §9.01(11) provides that §9.01 is the exclusive judicial remedy for an aggrieved candidate. Defendant Evers points out that President Trump has lawsuits pending in state circuit courts and argues that those cases raise many of the claims the plaintiff raises here. Dkt. No. 59 at 11. He argues that the process detailed in Wis. Stat. §9.01 is designed to allow an aggrieved candidate to resolve election challenges promptly, and that for this court to permit the

plaintiff to circumvent that process "would eviscerate Wisconsin's careful process for properly and quickly deciding election challenges." Id. at 11-12.

Of course, the plaintiff has no redress under Wis. Stat. §9.01, because he is not a "candidate" in the sense of that statute. But Evers argues that there was a form of state-law relief available to the plaintiff. He asserts that the plaintiff should have filed a complaint with the Wisconsin Elections Commission under Wis. Stat. §5.06. Dkt. No. 59 at 13. That statute allows a voter dissatisfied with the Wisconsin election process to file a written, sworn complaint with the elections board. Wis. Stat. §5.06(1). The statute states that no voter may "commence an action or proceeding to test the validity of any decision, action or failure to act on the part of any election official" without first filing a complaint under §5.06(1). Wis. Stat. §5.06(2). Evers points out that the plaintiff has not demonstrated that he followed this procedure and thus that the plaintiff did not exhaust his remedies before coming to federal court. Dkt. No. 59 at 14.

The plaintiff does not directly respond to the exhaustion argument. He simply maintains that he has a right to bring his constitutional claims in federal court, argues that there is no evidence that the statute Evers cites is an exhaustion requirement and asserts that the court has federal question jurisdiction under 28 U.S.C. §1331 and supplemental jurisdiction over any state-law claims under 28 U.S.C. §1367.[6] Dkt. No. 72 at 27-28. He neatly

[6] The court could exercise supplemental jurisdiction over state-law claims only if there remained federal claims to which those state-law claims related. As the court has noted, it likely would have been required to dismiss the federal

sidesteps the question of why he did not follow a procedure that would have allowed him to direct his concerns to the entity in charge of enforcing the state's election laws and in a way that likely would have brought those concerns to that entity's attention long before the election results were certified.

Because the court has concluded that the plaintiff does not have standing, and because the plaintiff has sued defendants who either are not suable under §1983 or are protected by Eleventh Amendment immunity, the court will not accept the invitations of the defendants and *amici* to wade into the waters of the various types of abstention. If this court does not have subject matter jurisdiction, there is no case or controversy from which it should abstain. The court agrees with the parties, however, that the relief the plaintiff requests—asking a federal judge to order a state governor to decertify the election results for an entire state and direct that governor to certify a different outcome—constitutes "an extraordinary intrusion on state sovereignty from which a federal court should abstain under longstanding precedent." Dkt. No. 57 at 28.

3. *Laches*

The defendants argue that the equitable defense of laches requires dismissal, because the plaintiff "inexplicably waited until after the election, after the canvassing, after the recount, after the audit, after results were

---

claims because the plaintiff asserted them through §1983 against state officials in their official capacities, which in turn would have required dismissal of any state claims for lack of subject matter jurisdiction.

certified, and indeed until the eve of the electoral college vote, to bring his claim of state law violations and widespread fraud . . . .” Dkt. No. 52 at 11. See also, Dkt. No 59 at 17 (“the doctrine of laches bars [the plaintiff’s] claims because he has unreasonably delayed bringing his claims to the detriment not only of Defendants, but also of the nearly 3.3 million voters in Wisconsin who voted in this last election under the good-faith belief that they were following the correct procedures to have their votes counted.”).

The doctrine of laches “addresses delay in the pursuit of a right when a party must assert that right in order to benefit from it.” Hot Wax, Inc. v. Turtle Wax, Inc., 191 F.3d 813, 820 (7th Cir. 1999). “For laches to apply in a particular case, the party asserting the defense must demonstrate: (1) an unreasonable lack of diligence by the party against whom the defense is asserted and (2) prejudice arising therefrom.” Id. (citing Cannon v. Univ. of Health Scis./The Chicago Med. Sch., 710 F.2d 351, 359 (7th Cir. 1983)). “Timeliness must be judged by the knowledge of the plaintiffs as well as the nature of the right involved.” Jones v. v. Markiewicz-Qualkinbush, 842 F.3d 1053, 1061 (7th Cir. 2016).

“The obligation to seek injunctive relief in a timely manner in the election context is hardly a new concept.” Id. at 1060-61. In fact, the Seventh Circuit has held that such “claims must be brought expeditiously . . . to afford the district court sufficient time in advance of an election to rule without disruption of the electoral cycle.” Id. at 1061 (internal quotation marks and citations omitted).

The amended complaint asserts that the alleged problems with the Dominion voting machine software "have been widely reported in the press and have been subject to investigation." Dkt. No. 9 at ¶12. It cites to exhibits from January and August of 2020. Dkt. No. 9 at 5 n.1. It cites to the WEC's May 13, 2020 directive to clerks that they should not reject the ballots of "indefinitely confined" absentee voters. Id. at ¶40. It cites an October 18, 2016 memorandum issued by the WEC instructing clerks on how to handle absentee envelope certifications that did not bear the address of the witness. Id. at ¶44. It cites October 19, 2020 instructions by the WEC to clerks about filling in missing ballot information. Id. at ¶45.

Defendant Evers points out that the plaintiff's own allegations demonstrate that he has known about the Dominion voting machine issues since long before the election. Dkt. No. 59 at 17-18. He argues that the WEC guidance about which the plaintiff complains came in directives issued in October 2016, May 2020 and October 2020. Id. He asserts that the plaintiff has made no effort "to offer a justifiable explanation for why he waited until weeks after the election to challenge" these issues. Id. at 18. The WEC defendants advise the court that the issue regarding "indefinitely confined" voters was litigated in state court almost eight months ago. Dkt. No. 54 at 9 (citing Pet. For Original Action dated March 27, 2020, Supreme Court of Wisconsin, No. 2020AP000557-OA). They assert that the plaintiff "waited to challenge widely-known procedures until after millions of voters cast their ballots in reliance on those procedures." Id. at 6. They state that "[i]f the doctrine of laches means

anything, it is that Plaintiff here cannot overturn the results of a completed and certified election through preliminary relief in this late-filed case." Id.

The plaintiff first responds that laches is a defense and shouldn't be raised on a motion to dismiss. Dkt. No. 72 at 22. He then claims that he could not have known the bases of any of these claims until after the election. Id. at 22-23. He says that because Wisconsin election officials did not "announce or publicize their misconduct," and because, he alleges, they "prevented Republican poll watchers from observing the ballot counting and handling," it took him time to gather the evidence and testimony he attached to the amended complaint. Id. at 23. Finally, he alleges that the delay post-November 3, 2020 is attributable to the defendants' failure to timely complete the election count. Id. He insists that he filed this suit at the earliest possible moment—the day after the certification. Id.

The court has determined that the plaintiff does not have standing. That means that the court does not have jurisdiction to assess the plaintiff's credibility, and it will refrain from doing so.

4. *Failure to state a claim upon which relief can be granted*

Both defendants asked the court to dismiss the case for failure to state a claim under Fed. R. Civ. P. 12(b)(6). Because the court does not have subject matter jurisdiction, it will not address the sufficiency of the substantive claims in the amended complaint.

5. *Requests for injunctive relief*

For the same reason, the court cannot address the merits of the plaintiff's request for preliminary injunctive relief.

V. Conclusion

This court's authority to grant relief is confined by the limits of the Constitution. Granting the relief the plaintiff requests would take the court far outside those limits, and outside the limits of its oath to uphold and defendant the Constitution. The court will grant the defendants' motion to dismiss.

The court **GRANTS** Defendant Governor Tony Evers's Motion to Dismiss Plaintiff's Amended Complaint. Dkt. No. 51.

The court **GRANTS** Defendant Wisconsin Elections Commission and Its Members' Motion to Dismiss. Dkt. No. 53.

The court **DENIES AS MOOT** Plaintiff's Corrected Motion for Declaratory, Emergency, and Permanent Injunctive Relief. Dkt. No. 6.

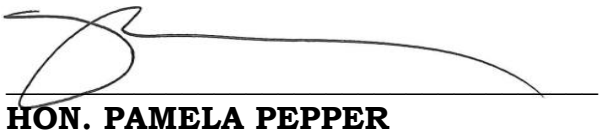
The court **DENIES AS MOOT** Plaintiff's Amended Motion for Temporary Restraining Order and Preliminary Injunction to be Considered in an Expedited Manner Dkt. No. 10.

The court **DISMISSES** the Amended Complaint for Declaratory, Emergency, and Permanent Injunctive Relief. Dkt. No. 9.

The court **ORDERS** that this case is **DISMISSED.**

Dated in Milwaukee, Wisconsin this 9th day of December, 2020.

BY THE COURT:



HON. PAMELA PEPPER
Chief United States District Judge

IN THE UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff,

CASE NO. 2:20-cv-1771

v.

WISCONSIN ELECTIONS COMMISSION, and its members ANN S. JACOBS, MARK L. THOMSEN, MARGE BOSTELMAN, JULIE M. GLANCEY, DEAN KNUDSON, ROBERT F. SPINDELL, JR., in their official capacities, GOVERNOR TONY EVERS, in his official capacity,

Defendants.

PLAINTIFF'S NOTICE OF APPEAL

Notice is hereby given that William Feehan, Plaintiff in the above named case, hereby appeals to the United States Court of Appeals for the Seventh Circuit from the District Court's Order dated December 9, 2020, ECF Dkt. No.83, dismissing his Amended Complaint for Declaratory, Emergency, and Permanent Injunctive Relief, Dkt. No. 9, and denying as moot his Corrected Motion for Declaratory, Emergency, and Permanent Injunctive Relief, Dkt. No. 6, and Amended Motion for Temporary Restraining Order and Preliminary Injunction to be Considered in an Expedited Manner, Dkt. No. 10.

Dated December 10, 2020.

12/04/2020	35		NOTICE of Appearance by Sidney Powell on behalf of All Plaintiffs. Attorney(s) appearing: Sidney Powell (Powell, Sidney)
12/04/2020	36		TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/4/2020 re 34 MOTION for Leave to File Excess Pages filed by Tony Evers: The defendant seeks leave to file a brief in excess of the thirty pages allowed by Civil L.R. 7(f) because he proposes to both oppose the plaintiff's amended motion for injunctive relief and support his own, not yet filed motion to dismiss in the same pleading. The court appreciates any party's effort to streamline litigation, but would prefer that the defendant file separate briefs opposing the plaintiff's amended motion and supporting his own. This will avoid confusion when the plaintiff responds. The court **DENIES** the defendant's motion for leave to file excess pages. **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/04/2020	37		ORDER signed by Chief Judge Pamela Pepper on 12/4/2020 allowing James Gesbeck to file *amicus curiae* brief by 5:00 PM on 12/7/2020. (cc: all counsel, via mail to James Gesbeck)(cb)
12/05/2020	38		TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/5/2020 re 22 MOTION to Intervene filed by Democratic National Committee signed by

			Chief Judge Pamela Pepper on 12/5/2020: Under Civil L.R. 7(b), the plaintiff's response is due by December 25, 2020; because December 25 is a federal holiday, the court **ORDERS** that the plaintiff's response is due by December 28, 2020. **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/05/2020	39		TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/05/2020 re 33 MOTION to Intervene filed by James Gesbeck: Under Civil L.R. 7(h), the plaintiff's response is due by Friday, December 11, 2020. **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/05/2020	40		Expedited MOTION to Intervene by Democratic National Committee. (Umberger, Michelle)
12/06/2020	41		ORDER signed by Chief Judge Pamela Pepper on 12/6/2020. 40 Movant DNC's expedited motion to intervene GRANTED to extent that court has expedited its ruling on original motion to intervene. 22 Movant DNC's original motion to intervene DENIED. Movant DNC may file *amicus curiae* brief by 5:00 PM on 12/7/2020. (cc: all counsel)(cb)
12/06/2020	42		BRIEF in Support filed by William Feehan re 10 Emergency MOTION to Amend/Correct Docket # 6: PLAINTIFFS CORRECTED MOTION FOR DECLARATORY, EMERGENCY, AND PERMANENT INJUNCTIVE RELIEF *Amended Brief*. (Dean, Michael)
12/06/2020	43		MOTION To File Separate Reply Briefs by William Feehan. (Dean, Michael)
12/06/2020	44		MOTION To Hold Consolidated Evidentiary Hearing/Trial by William Feehan. (Dean, Michael)
12/07/2020	45		TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/7/2020 re 43 MOTION To File Separate Reply Briefs filed by William Feehan: The court **GRANTS** the plaintiff's motion for leave to file separate reply briefs. If the defendants file a single opposition brief, the plaintiff must file one reply to that brief. If the defendants file separate opposition briefs, the plaintiff may file a reply for each opposition brief. The plaintiff also may file a separate reply for each brief filed by an amicus. (In other words, the plaintiff could file up to four reply briefs if the defendants file separate briefs and each amicus files a brief.) If the defendants file a separate motion to dismiss, the plaintiff may file an opposition brief of up to thirty pages under Civil L.R. 7(b). **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/07/2020			NOTICE of Hearing: Status Conference set for 12/8/2020 at 11:00 AM by telephone before Chief Judge Pamela Pepper. The parties are to appear by calling the court's conference line at 888−557−8511 and entering access code 4893665#. (cc: all counsel)(cb)

COMMISSIONER DEAN KNUDSON,
ROBERT F. SPINDELL, JR. and TONY EVERS,

Defendants.

ORDER GRANTING DEFENDANTS' MOTIONS TO DISMISS (DKT. NOS. 51, 53), DENYING AS MOOT PLAINTIFF'S AMENDED MOTION FOR INJUNCTIVE RELIEF (DKT. NO. 6) AND DISMISSING CASE

At 8:24 a.m. on Tuesday, December 1, 2020—twenty-eight days after the November 3, 2020 general Presidential election, thirteen days after President Donald J. Trump petitioned for a recount in Milwaukee and Dane Counties and one day after the Wisconsin Elections Commission and the Governor certified that Joseph R. Biden and Kamala D. Harris had received the highest number of votes following that recount—two plaintiffs filed this lawsuit in federal court for the Eastern District of Wisconsin. Although state law governs the election process, the plaintiffs brought the suit in a federal court, asking that federal court to order state officials to decertify the election results that state officials had certified the day before, order the Governor not to transmit to the Electoral

College the certified results he'd transmitted the day before and order the Governor to instead transmit election results that declared Donald Trump to be "the winner of this election."

The election that preceded this lawsuit was emotional and often divisive. The pleadings that have been filed over the past week are passionate and urgent. People have strong, deep feelings about the right to vote, the freedom and opportunity to vote and the value of their vote. They should. But the legal question at the heart of this case is simple. Federal courts have limited jurisdiction. Does a federal court have the jurisdiction and authority to grant the relief this lawsuit seeks? The answer is no.

Federal judges do not appoint the president in this country. One wonders why the plaintiffs came to federal court and asked a federal judge to do so. After a week of sometimes odd and often harried litigation, the court is no closer to answering the "why." But this federal court has no authority or jurisdiction to grant the relief the remaining plaintiff seeks. The court will dismiss the case.

I. Background

According to defendant the Wisconsin Elections Commission's November 18, 2020 canvass results, 3,297,352 Wisconsin residents voted in the November 3, 2020 general election for President. https://elections.wi.gov/sites/elections.wi.gov/files/Statewide%20Results%20All%20Offices%20%28pre-Presidential%20recount%29.pdf. Of those, 49.45%—1,630,673—voted for Biden for President and Harris for Vice-President. Id. Biden and Harris received

approximately 20,600 more votes than Donald J. Trump for President and Michael R. Pence for Vice-President. Id.

Under Wis. Stat. §9.01(1)(a)(1), any candidate in an election where more than 4,000 votes were cast for the office the candidate seeks and who trails the leading candidate by no more than 1 percent of the total votes cast for that office may petition for a recount. On November 18, 2020, Donald J. Trump filed a recount petition seeking a recount of "all ballots in all wards in every City, Village, Town and other voting unit in Dane and Milwaukee Counties." https://elections.wi.gov/sites/elections.wi.gov/files/2020-11/WEC%20-%20Final%20Recount%20Order_0.pdf. The Wisconsin Elections Commission granted that petition and ordered a recount "using the ballot count method selected per Wis. Stat. § 5.90(1) unless otherwise ordered by a court per Wis. Stat. § 5.90(2)." Id. The WEC ordered the recount to be completed by 12:00 p.m. on December 1, 2020. Id.

The partial recount was completed on November 29, 2020. https://elections.wi.gov/elections-voting/recount. On November 30, 2020, the chair of the Wisconsin Elections Commission signed the statement of canvass certifying that Joseph R. Biden and Kamala D. Harris received the greatest number of votes and certified their electors. https://elections.wi.gov/sites/elections.wi.gov/files/2020-11/Jacobs%20-%20Signed%20Canvass%20for%20President%20-%20Vice%20President.pdf. The same day—November 30, 2020—Wisconsin Governor Tony Evers announced that he had signed the Certificate of Ascertainment for the electors for Biden and Harris.

https://content.govdelivery.com/accounts/WIGOV/bulletins/2aef6ff. The web site for the National Archives contains the Certificate of Ascertainment signed by Evers on November 30, 2020, certifying that out of 3,298,041 votes cast, Biden and Harris and their electors received 1,630,866 votes, while Trump and Pence and their electors received 1,610,184 votes. https://www.archives.gov/files/electoral-college/2020/ascertainment-wisconsin.pdf.

On December 1, 2020, Donald J. Trump filed a petition for an original action in the Wisconsin Supreme Court. Trump v. Evers, Case No. 2020AP001971-OA (available at https://wscca.wicourts.gov). On December 3, 2020, the court denied leave to commence an original petition because under Wis. Stat. §9.01(6), appeals from the board of canvassers or the Wisconsin Elections Commission must be filed in circuit court. Dkt. No. 59-7. The same day—December 3, 2020—Donald J. Trump filed lawsuits in Milwaukee and Dane Counties. Trump v. Biden, Case No. 2020CV007092 (Milwaukee County Circuit Court; Trump v. Biden, Case No. 2020CV002514 (Dane County Circuit Court) (both available at https://wcca.wicourts.gov). Those cases have been consolidated and are scheduled for hearing on December 10, 2020 at 1:30 (or for December 11, 2020 at 9:00 a.m. if the parties are litigating in another court).

Meanwhile, on December 2, 2020, Donald J. Trump filed suit in federal court for the Eastern District of Wisconsin, suing the defendants in this case and others. Trump v. Wisconsin Elections Commission, *et al.*, Case No. 20-cv-

1785-BHL (E.D. Wis.). There is an evidentiary hearing scheduled for December 10, 2020 at 9:00 a.m. by videoconference. Id. at Dkt. No. 45.

II. Procedural History of the Case

On December 1, 2020—the day after Governor Evers signed the Certificate of Ascertainment—William Feehan and Derrick Van Orden filed a complaint in the federal court for the Eastern District of Wisconsin. Dkt. No. 1. Feehan identified himself as a resident of La Crosse, Wisconsin, a registered voter and "a nominee of the Republican Party to be a Presidential Elector on behalf of the State of Wisconsin." Id. at ¶23. Van Orden was identified as a resident of Hager City, Wisconsin and the 2020 Republican nominee for Wisconsin's Third Congressional District Seat for the U.S. House of Representatives. Id. at ¶26. The complaint alleged that "Mr. Van Orden 'lost' by approximately 10,000 votes to the Democrat incumbent," and stated that "[b]ecause of the illegal voting irregularities as will be shown below, Mr. Van Orden seeks to have a new election ordered by this court in the Third District, with that election being conducted under strict adherence with the Wisconsin Election Code." Id. at ¶27.

The complaint alleged "massive election fraud, multiple violations of the Wisconsin Election Code, *see e.g.,* Wis. Stat. §§5.03, *et seq.,* in addition to the Election and Electors Clauses and Equal Protection Clause of the U.S. Constitution" based on "dozens of eyewitnesses and the statistical anomalies and mathematical impossibilities detailed in the affidavits of expert witnesses." Dkt. No. 1 at ¶1. The plaintiffs alleged four causes of action: (1) violation of the

Elections and Electors Clauses and 42 U.S.C. §1983; (2) violation of the Equal Protection Clause of the Fourteenth Amendment, 42 U.S.C. §1983 and the "invalid enactment of regulations & disparate treatment of absentee vs. mail-in ballots"; (3) denial of the Fourteenth Amendment due process right to vote and 42 U.S.C. §1983; and (4) "wide-spread ballot fraud." Id. at ¶¶106-138. The plaintiffs asked for the following emergency relief:

> 1. An order directing Governor Evers and the Wisconsin Elections Commission to de-certify the election results:
>
> 2. An order enjoining Governor Evers from transmitting the currently certified election results [sic] the Electoral College;
>
> 3. An order requiring Governor Evers to transmit certified election results that state that President Donald Trump is the winner of the election;
>
> 4. An immediate emergency order to seize and impound all servers, software, voting machines, tabulators, printers, portable media, logs, ballot applications, ballot return envelopes, ballot images, paper ballots, and all "election materials" referenced in Wisconsin Statutes §9.01(1)(b)11 related to the November 3, 2020 Wisconsin election for forensic audit and inspection by the Plaintiffs;
>
> 5. An order that no votes received or tabulated by machines that were not certified as required by federal and state law be counted;
>
> 6. A declaratory judgment declaring that Wisconsin's failed system of signature verification violates the Electors and Elections Clause by working a de facto abolition of the signature verification requirement;
>
> 7. A declaratory judgment declaring that currently certified election results violate the Due Process Clause, U.S. Const. Amend. XIV;
>
> 8. A declaratory judgment declaring that mail-in and absentee ballot fraud must be remedied with a Full Manual Recount or statistically valid sampling that properly verifies the signatures on absentee ballot envelopes and that invalidates the certified results if

the recount or sampling analysis shows a sufficient number of ineligible absentee ballots were counted;

9. A declaratory judgment declaring absentee ballot fraud occurred in violation of Constitutional rights, Election laws and under state law;

10. A permanent injunction prohibiting the Governor and Secretary of State from transmitting the currently certified results to the Electoral College based on the overwhelming evidence of election tampering;

11. Immediate production of 48 hours of security camera recording of all rooms used in the voting process at the TCF Center[1] for November 3, 2020 and November 4, 2020;

12. Plaintiffs further request the Court grant such relief as is just and proper including but not limited to, the costs of this action and their reasonable attorney fees and expenses pursuant to 42 U.S.C. §1988.

Id. at 50.

With the complaint, the plaintiffs filed a motion for declaratory, emergency, and permanent injunctive relief, dkt. no. 2, and memorandum in support of that motion, dkt. no. 3. The motion stated that the specific relief the plaintiff requested was set out in an attached order, dkt. no. 2 at 1, but there was no order attached. The memorandum asked the court to grant the motion and enter the proposed order, dkt. no. 3 at 10; again, no proposed order was provided.

Later that day, the plaintiffs filed a corrected motion for declaratory, emergency, and permanent injunctive relief. Dkt. No. 6. The plaintiff did not file a memorandum in support of this motion but did file a proposed order. Dkt.

[1] The plaintiff may be referring to the TCF convention center in Detroit, Michigan; the court is unaware of a "TCF Center" in Wisconsin.

No. 1. The relief described in the proposed order was almost identical to the relief requested in the complaint, with a notable exception. Instead of the request for an order requiring production of forty-eight hours of security camera footage from the TCF Center, the plaintiffs asked for an order prohibiting "any wiping or alteration of data or other records or materials" from voting machines, tabulations machines, servers, software and printers, and any alteration or destruction of ballot applications, ballot return envelopes, ballot images, paper ballots, registration lists, poll lists or other election materials, "across the state of Wisconsin." Dkt. No. 6-1 at 7-8.

Two days later, plaintiff Freehan filed an amended complaint removing Derrick Van Orden as a plaintiff. Dkt. No. 9. It differed from the original complaint only in the removal of Van Orden as a plaintiff.

Along with the amended complaint, the plaintiff filed a motion for temporary restraining order and preliminary injunction "to be considered in an expedited manner." Dkt. No. 10. The plaintiff did not file a memorandum in support of the motion; his main purpose in filing the amended motion appears to have been to ask the court to rule on the motion quickly. The plaintiff attached a proposed briefing schedule, suggesting that the court should require the defendants to respond by 8:00 p.m. on Friday, December 4, 2020 and require him to file his reply by 8:00 p.m. on Saturday, December 5, 2020; he proposed to submit the matter on briefs without argument. Dkt. No. 10-1. The defendants objected to this severely truncated schedule. Dkt. Nos. 25

(defendant Evers), 26 (defendants Wisconsin Election Commission and its members).

Construing the amended motion as a Civil L.R. 7(h) expedited, non-dispositive motion for an expedited briefing schedule, the court granted the request on December 4, 2020, setting a schedule that, while not as expedited as the plaintiff requested, gave the parties a short leash. Dkt. No. 29.

Wisconsin voter James Gesbeck filed a motion to intervene, dkt. no. 14, and later an expedited motion to intervene, dkt. no. 33. The Democratic National Committee (DNC) also sought to intervene. Dkt. No. 22. The court denied both requests, dkt. nos. 41 (DNC), 74 (Gesbeck), but allowed both to file *amicus curiae* briefs by the December 7, 2020 deadline it had set for the defendants to oppose the plaintiff's motion for injunctive relief, dkt. nos. 37 (Gesbeck), 41 (DNC).

Recall that the plaintiff had not filed a memorandum in support of the December 1, 2020 corrected motion for injunctive relief or in support of the December 3, 2020 amended motion. On Sunday, December 6, 2020, the plaintiff filed an amended memorandum in support of the motion. Dkt. No. 42. In the first paragraph, the plaintiff indicated that he filed the amended memorandum to "avoid possible confusion from removal of Mr. Van Orden is [sic] plaintiff." Id. at 1. He said that the memorandum was identical to the original memorandum "except for amending references to plaintiffs to refer to Mr. Meehan [sic] only and correcting several inadvertent references to the State of Georgia." Id.

On Sunday, December 6, the plaintiff also filed a motion asking the court to schedule an evidentiary hearing "on the merits" for Wednesday, December 9, 2020 at 9:00 a.m. Dkt. No. 44. Although the plaintiff had not asked for a hearing in any prior motion, and had represented in the amended motion that he was submitting the matter on the briefs without argument, the plaintiff explained that he had changed his position based on the court's December 4, 2020 order. Id. at ¶4. The court denied the motion in a telephonic hearing on December 8, 2020, explaining that before it could reach the merits of the motion for injunctive relief, it must resolve issues regarding justiciability. Dkt. Nos. 70, 71.

In opposing the plaintiff's amended motion for injunctive relief, defendants Wisconsin Election Commission and its members argued that the case has jurisdictional and procedural defects that require dismissal. Dkt. No. 52 at 5. They asserted that the plaintiff lacks Article III standing, id. at 6, that the doctrine of laches bars consideration of his claims, id. at 8 and that the Eleventh Amendment shields them from the relief he seeks, id. at 10. They asserted that the complaint fails to state a claim for relief under the Election or Electors Clauses, id. at 11, or under the Equal Protection or Due Process Clauses, id. at 13, and they contended that the plaintiff's purported evidence fails to meet basic evidentiary standards, id. at 20.

In his brief opposing injunctive relief, defendant Governor Evers argued that there is no evidence of fraud in Wisconsin's election results, dkt. no. 55 at 10, that the plaintiff's witnesses and experts lack qualifications and are

unreliable, id. at 12, and that the plaintiff has failed to state valid claims, id. at 22. Evers also argued that an adequate remedy at law exists because the recount procedures under Wis. Stat. §9.01 unambiguously constitute the "exclusive remedy" for challenging election results. Id. at 55. With respect to the balancing of harms, Evers argued that the requested relief would prejudice the defendants and "retroactively deprive millions of Wisconsin voters of their constitutional right to vote in the 2020 presidential election." Id. at 32.

James Gesbeck, filing as friend of the court, opposed the motion for injunctive relief on the grounds that the plaintiff has not established subject matter jurisdiction and that the court should defer to the Wisconsin courts and Wisconsin's procedural mechanism for resolving disputed elections. Dkt. No. 47 at 11, 12. Gesbeck applied the balancing analysis for injunctive relief, asserting that relief in this court would moot the Wis. Stat. §9.01 challenge pending in the Wisconsin courts. Id. at 17. He argued that this, in turn, would put the "insurmountable weight of the Federal Government on the election result in Wisconsin and would be unbalancing the scale created by the system of checks and balances that have been maintained since the Constitution was adopted." Id. at 17.

Amicus DNC opposed the motion on many of the same grounds as the other defendants. Dkt. No. 57. The DNC argued that the plaintiff lacks standing, that the doctrine of laches bars the plaintiff's claims, that the defendants are immune from suit under the Eleventh Amendment, that principles of federalism and comity require abstention, and that the plaintiff

fails to state a claim upon which relief can be granted. Dkt. No. 57. It asserted that the plaintiff cannot establish irreparable harm and has an adequate remedy of law. Id. at 36.

The defendants have filed motions to dismiss the case. The WEC and its members seek dismissal for failure to state a claim under Federal Rule of Civil Procedure 12(b)(6). Dkt. No. 53. Defendant Evers seeks dismissal for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1), failure to plead fraud with particularity under Fed. R. Civ. P. 9(b) and failure to state a claim under Fed. R. Civ. P. 12(b)(6).

The Wisconsin State Conference of the NAACP and three of its members (Dorothy Harrell, Wendell J. Harris, Jr. and Earnestine Moss) sought leave to file an *amicus* brief on the question of whether the court should dismiss the case. Dkt. No. 56. The court granted that motion. Dkt. No. 69.

III. Procedural Posture

From the outset, the plaintiff has sought to have the claims in the complaint resolved through a motion for injunctive relief under Fed. R. Civ. P. 65. The relief he requests in the second iteration of his motion for injunctive relief is the same relief he requests in the lawsuit itself. As defendant Evers points out in his motion to dismiss, the plaintiff's December 6, 2020 motion for an evidentiary hearing (which the court has denied) "makes clear that what [the plaintiff] seeks—without any discovery or basic adversarial development of evidence—is a trial and final adjudication on the merits." Dkt. No. 51 at 2.

Evers points to Fed. R. Civ. P. 12(i), which states that "[i]f a party so moves, any defense listed in Rule 12(b)(1)-(7)—whether made in a pleading or by motion—and a motion under Rule 12(c) must be heard and decided before trial unless the court orders a deferral until trial." Because Evers has raised defenses under Rule 12(b)(1) and (b)(6), and because in asking for a hearing the plaintiff sought what would have been a trial on the merits of the causes of action raised in the complaint, the court must resolve the defenses before moving to the merits.

As the court stated in the hearing on December 8, that requirement is more than a procedural nicety. The defendants and the *amici* have raised questions about this federal court's authority to decide the claims alleged in the amended complaint. If this court does not have jurisdiction to hear and decide those claims, any decision it might make regarding the merits of the claims would be invalid. For that reason, the court considers the motions to dismiss before considering the plaintiff's request for injunctive relief.

IV. The Motions to Dismiss

A. Legal Standards

1. *Rule 12(b)(1)—Lack of Subject Matter Jurisdiction*

In evaluating a motion to dismiss for lack of subject matter jurisdiction under Fed. R. Civ. P. 12(b)(1), "the court must first determine whether a factual or facial challenge has been raised." Silha v. ACT, Inc., 807 F.3d 169, 173 (7th Cir. 2015) (citing Apex Dig., Inc. v. Sears, Roebuck & Co., 572 F.3d 440, 443 (7th Cir. 2009). A *factual* challenge alleges that even if the pleadings are

sufficient, no subject matter jurisdiction exists. A *facial* challenge alleges that the complaint is deficient—that the plaintiff has not sufficiently alleged subject matter jurisdiction. Id. The difference matters—a court reviewing a factual challenge "may look beyond the pleadings and view any evidence submitted to determine if subject matter exists," while a court reviewing a facial challenge "must accept all well-pleaded factual allegations as true and draw all reasonable inferences in favor of the plaintiff." Id.

2. *Rule 12(b)(6)—Failure to State a Claim*

A motion to dismiss for failure to state a claim under Rule 12(b)(6) challenges the legal sufficiency of the complaint. A complaint must include "a short and plain statement of the claim showing that the pleader is entitled to relief." Fed. R. Civ. P. 8(a)(2). The complaint must contain enough facts, accepted as true, to "state a claim for relief that is plausible on its face." Ashcroft v. Iqbal, 556 U.S. 662, 678 (2009) (quoting Bell Atlantic Corp. v. Twombly, 550 U.S. 544, 570 (2007)). "A claim has facial plausibility when the plaintiff pleads factual content that allows a court to draw the reasonable inference that the defendant is liable for the misconduct alleged." Id. (citing Twombly, 550 U.S. at 556). "[T]he plausibility determination is a context-specific task that requires the reviewing court to draw on its judicial experience and common sense." W. Bend Mut. Ins. Co. v. Schumacher, 844 F.3d 670, 676 (7th Cir. 2016).

3. *42 U.S.C. § 1983*

To state a claim for a civil rights violation under 42 U.S.C. §1983, a plaintiff must allege that someone deprived him of a right secured by the Constitution or the laws of the United States and that whoever deprived him of that right was acting under the color of state law. D.S. v. E. Porter Cty. Sch. Corp., 799 F.3d 793, 798 (7th Cir. 2015) (citing Buchanan–Moore v. Cty. of Milwaukee, 570 F.3d 824, 827 (7th Cir. 2009)).

B. Subject Matter Jurisdiction

"Federal courts are courts of limited jurisdiction." Kokkonen v. Guardian Life Ins. Co. of America, 511 U.S. 375, 377 (1994). Subject matter jurisdiction has to do with "the courts' statutory or constitutional *power* to adjudicate the case." Steel Co. v. Citizens for a Better Environment, 523 U.S. 83, 89 (1998) (emphasis in the original). "Article III, §2, of the Constitution extends the 'judicial Power' of the United States only to 'Cases' and 'Controversies.'" Id. at 102. The defendants raise a factual challenge to the court's subject matter jurisdiction, arguing that regardless of the pleadings, subject matter jurisdiction does not exist. The court may look outside the four corners of the complaint in considering that challenge.

1. *Standing*

Article III standing is an "essential component of Article III's case-or-controversy requirement," and therefore a "threshold jurisdictional question." Apex Dig., Inc., 572 F.3d at 443 (citing Lujan v. Defenders of Wildlife, 504 U.S. 555, 560 (1992)). "[N]o principle is more fundamental to the judiciary's proper

role in our system of government than the constitutional limitation of federal-court jurisdiction to actual cases or controversies." Raines v. Byrd, 521 U.S. 811, 818 (1997). "Standing to sue is part of the common understanding of what it takes to make a justiciable case." Id. "Standing is an element of subject-matter jurisdiction in a federal civil action . . . ." Moore v. Wells Fargo Bank, N.A., 908 F.3d 1050, 1057 (7th Cir. 2018).

> The "irreducible constitutional minimum of standing contains three requirements. *Lujan v. Defenders of Wildlife*, [504 U.S. 555], at 560 [1992)]. First and foremost, there must be (and ultimately proved) an "injury in fact"—a harm suffered by the plaintiff that is "concrete" and "actual or imminent, not 'conjectural' or 'hypothetical.'" *Whitmore v. Arkansas*, [495 U.S. 149], at 149 [1990] (quoting *Los Angeles v. Lyons*, 461 U.S. 95, 101-102 . . . (1983)). Second, there must be causation—a fairly traceable connection between the plaintiff's injury and the complained-of conduct of the defendant. *Simon v. Eastern Ky. Welfare Rights Organization*, 426 U.S. 26, 41-42 . . . (1976). And third, there must be redressability—a likelihood that the requested relief will redress the alleged injury. *Id.*, at 45-46 . . .; see also *Warth v. Seldin*, 422 U.S. 490, 505 . . . (1975). This triad of injury in fact, causation, and redressability constitutes the core of Article III's case-or-controversy requirement, and the party invoking federal jurisdiction bears the burden of establishing its existence. See *FW/PBS, Inc. v. Dallas*, 493 U.S. 215, 231 . . . (1990).

Steel Co., 523 U.S. at 102-104.

Regarding the "injury in fact" leg of the triad, the injury must be "particularized," such that it "affect[s] the plaintiff in a personal and individual way." Spokeo, Inc. v. Robins, ___ U.S. ___, 136 S. Ct. 1540, 1548 (2016) (citations omitted). The injury also must be "concrete"—it must be "real," not "abstract." Id. A plaintiff cannot show a particularized and concrete injury by showing "that he has merely a general interest common to all members of the public." *Ex parte* Levitt, 302 U.S. 633, 634 (1937). A plaintiff may not use a

"federal court as a forum in which to air his generalized grievances about the conduct of government . . . ." United States v. Richardson, 418 U.S. 166, 174 (1974) (quoting Flast v. Cohen, 392 U.S. 83, 106 (1942)).

As for the redressability leg of the triad, "[r]elief that does not remedy the injury suffered cannot bootstrap a plaintiff into federal court; that is the very essence of the redressability requirement." Steel Co., 523 U.S. at 107. The plaintiff must show that it is "likely," not merely "speculative," that the injury the plaintiff alleges will be "redressed by a favorable decision." Lujan, 504 U.S. at 561 (quoting Simon, 426 U.S. at 38).

In addition to the Article III case-or-controversy requirement, there is a prudential limitation in Fed. R. Civ. P. 17(a), requiring that "[e]very action must be prosecuted in the name of the real party in interest," Fed. R. Civ. P. 17(a), and "requir[ing] that the complaint be brought in the name of the party to whom that claim 'belongs' or the party who 'according to the governing substantive law, is entitled to enforce the right.'" Rawoof v. Texor Petroleum Co., Inc., 521 F.3d 750, 756 (7th Cir. 2008) (quoting Oscar Gruss & Son, Inc. v. Hollander, 337 F.3d 186, 193 (2d Cir. 2003)); see also RK Co. v. See, 622 F.3d 846, 850 (7th Cir. 2010) ("the real party in interest rule is only concerned with whether an action can be maintained in the plaintiff's name," and is "similar to, but distinct from, constitutional ... standing"). The real party in interest is "the one who by the substantive law, possesses the right sought to be enforced, and not necessarily the person who will ultimately benefit from the recovery." Act II Jewelry, LLC v. Wooten, 301 F. Supp. 3d 905, 910-911 (N.D.

Ill. 2018) (quoting Checkers, Simon & Rosner v. Lurie Corp., 864 F.2d 1338, 1343 (7th Cir. 1988) (internal citations omitted)). The purpose of the rule is to "protect the defendant against a subsequent action by the party actually entitled to recover." RK Co., 622 F.3d at 850 (citing Fed. R. Civ. P. 17(a) advisory committee note (2009)).

The amended complaint alleges that the plaintiff has standing "as a voter and as a candidate for the office of Elector under Wis. Stat. §§ 5.10, *et seq* (election procedures for Wisconsin electors)." Dkt. No. 9 at 8. The defendants argue that the plaintiff lacks standing in either capacity. Dkt. No. 43 at 4-5; Dkt. No. 59 at 8-9.

a. Standing as a voter

The amended complaint does not assert that the plaintiff voted in the 2020 general Presidential election in Wisconsin. It says that he is a registered voter, but it does not affirmatively state that he voted in the election the results of which he asks the court to decertify. His counsel asserts in the brief in opposition to the defendants' motion to dismiss—filed eight days after the original complaint and five days after the amended complaint—that the plaintiff "voted for President Trump in the 2020 General Election." Dkt. No. 72 at 17. For the first time at the motion to dismiss stage, the plaintiff provided his own declaration, in which he attests that he voted for President Donald J. Trump in the November 3, 2020 election. Dkt. No. 72-1.

The plaintiff claims that the defendants failed to comply "with the requirements of the Wisconsin Election Code and thereby diluted the lawful

ballots of the Plaintiff and of other Wisconsin voters and electors in violation of the United States Constitution guarantee of Equal Protection." Dkt. No. 9 at ¶116. He alleges that the defendants enacted regulations or issued guidance that, in intent and effect, favored Democratic absentee voters over Republican voters, and that these regulations and this guidance enable and facilitated voter fraud. Id. The plaintiff also asserts that he has a right to have his vote count and claims that a voter is injured if "the important of his vote is nullified." Id. at ¶127.

Several lower courts have addressed the plaintiff's theory that a single voter has standing to sue as a result of his vote being diluted by the possibility of unlawful or invalid ballots being counted. The district court for the Middle District of North Carolina catalogued a few of those decisions, all finding that the harm was too speculative and generalized—not sufficiently "concrete"—to bestow standing. These courts concluded that the vote dilution argument fell into the "generalized grievance" category. In Moore v. Circosta, the court wrote:

> Indeed, lower courts which have addressed standing in vote dilution cases arising out of the possibility of unlawful or invalid ballots being counted, as Plaintiffs have argued here, have said that this harm is unduly speculative and impermissibly generalized because all voters in a state are affected, rather than a small group of voters. See, e.g., Donald Trump for President, Inc. v. Cegavske, Case No. 2:20-CV-1445 JCM (VCF), __ F. Supp. 3d __, __, 2020 WL 5626974, at *4 (D. Nev. Sept. 18, 2020) ("As with other generally available grievances about the government, plaintiffs seek relief on behalf of their member voters that no more tangibly benefits them than it does the public at large.") (internal quotations and modifications omitted); Martel v. Condos, Case No. 5:20-cv-131, ___ F. Supp. 3d ___, ___, 2020 WL 5755289, at *4 (D. Vt. Sept. 16, 2020) ("If every voter suffers the same incremental dilution of the franchise caused by some third-party's fraudulent vote, then these voters have experienced a generalized injury."); Paher v. Cegavske, 457 F. Supp.

> 3d 919, 926-27 (D. Nev. 2020) ("Plaintiffs' purported injury of having their votes diluted due to ostensible election fraud may be conceivably raised by any Nevada voter."); Am. Civil Rights Union v. Martinez-Rivera, 166 F. Supp. 3d 779, 789 (W.D. Tex. 2015) ("[T]he risk of vote dilution [is] speculative and, as such, [is] more akin to a generalized grievance about the government than an injury in fact.")
>
> Although "[i]t would over-simplify the standing analysis to conclude that no state-wide election law is subject to challenge simply because affects all voters," Martel, __ F. Supp.3d at __, 2020 WL 5755289, at *4, the notion that a single person's vote will be less valuable as a result of unlawful or invalid ballots being cast is not a concrete and particularized injury necessary for Article III standing. Compared to a claim of gerrymandering, in which the injury is specific to a group of voters based on their racial identity or the district in which they live, all voters in North Carolina, not just Individual Plaintiffs, would suffer the injury Individual Plaintiffs allege. This court finds this injury to generalized to give rise to a claim of vote dilution . . . .

Moore v. Circosta, Nos. 1:20CV911, 1:20CV912, 2020 WL 6063332, at *14,

The court agrees. The plaintiff's alleged injuries are injuries that any Wisconsin voter suffers if the Wisconsin election process were, as the plaintiff alleges, "so riddled with fraud, illegality, and statistical impossibility that this Court, and Wisconsin's voters, courts, and legislators, cannot rely on, or certify, any numbers resulting from this election." Dkt. No. 9 at ¶5. The plaintiff has not alleged that, as a voter, he has suffered a particularized, concrete injury sufficient to confer standing.

The plaintiff argues that it is incorrect to say that his standing is based on a theory of vote dilution. Dkt. No. 72 at 19. He then proceeds to opine that he has shown in great detail how his vote and the votes of others who voted for Republican candidates was diluted. Id. at 19-20. He says the vote dilution did not affect all Wisconsin voters equally, asserting that it had a negative impact

on those who voted for Republican candidates and a positive impact on those who voted for Democratic candidates. Id. at 20. He asserts that he also has shown that the defendants sought to actively disenfranchise voters for Republican candidates. Id. These are the same arguments he made in the amended complaint and they still show no more than a generalized grievance common to any voter. Donald J. Trump carried some Wisconsin counties; the voters who voted for Joseph R. Biden in those counties could make the same complaints the plaintiff makes here.

The plaintiff says that his interests and injury are "identical to that of President Trump," and cites to Bush v. Gore, 531 U.S. 98 (2000), which he characterizes as holding that "then-candidate George W. Bush of Texas had standing to raise the equal protection rights of Florida voters that a majority of the Supreme Court deemed decisive." Id. at 21 (quoting Hawkins v. Wayne Twp. Bd. of Marion Cty., Ind, 183 F. Supp. 2d 1099, 1103 (S.D. Ind. 2002)). The court is stymied by the plaintiff's assertion that his interests and injury are identical to that of President Trump. As the court will explain in the next section, contrary to his assertions, the plaintiff is not a "candidate" in the way that President Trump was a candidate for office. President Trump's interest is in being re-elected, while the plaintiff has said that his interest is in having his vote count and not be diluted. If his interest is solely in getting President Trump re-elected, as opposed to having his vote be counted as part of a valid election process, the court is aware of no constitutional provision that gives him the right to have his candidate of choice declared the victor.

Nor does the decision in Bush v. Gore say what the plaintiff claims it says. As far as the court can tell, the word "standing" does not appear in the majority opinion. In the Indiana decision the plaintiff cites, then-district court judge David Hamilton wrote: "If candidate Hawkins did not have standing to raise equal protection rights of voters, it would be difficult to see how then-candidate George W. Bush of Texas had standing to raise equal protection rights of Florida voters . . . in *Bush v. Gore*." Hawkins, 183 F. Supp.2d at 1103. But the Supreme Court in Bush v. Gore never explained how candidate Bush had standing, and even if it had, the plaintiff is not a candidate.

Nor has the plaintiff demonstrated redressability. He complains that his vote was diluted and that he wants his vote to count. But he asks the court to order the results of the election de-certified and then to order defendant Evers to certify the election for Donald J. Trump. Even if this *federal* court had the authority to order the governor of the *state* of Wisconsin to certify the results of a national presidential election for any candidate—and the plaintiff has presented *no* case, statute or constitutional provision providing the court with that authority—doing so would further invalidate and nullify the plaintiff's vote. The plaintiff wants Donald J. Trump to be certified as the winner of the Wisconsin election *as a result of the plaintiff's vote*. But what he asks is for Donald J. Trump to be certified the winner *as a result of judicial fiat*. That remedy does not redress the plaintiff's alleged injury. Even the plaintiff concedes in his brief in opposition to dismissal that "[d]efendant Evers can . . . provide partial redress in terms of the requested injunctive relief, namely, by

refusing to certify or transmit the election results, and providing access to voting machines, records and other 'election materials.'" Dkt. No. 72 at 21. The plaintiff is wrong in that regard, as the court will explain when it discusses the related doctrine of mootness; the point is that even from the plaintiff's perspective, the remedy he seeks will not fully redress the injury he claims.

Circling back to Article III's "case or controversy" requirement, the Supreme Court has held that "[t]he remedy must of course be limited to the inadequacy that produced the injury in fact that the plaintiff has established." DaimlerChrysler Corp. v. Cuno, 547 U.S. 332, 353 (2006) (quoting Lewis v. Casey, 518 U.S. 343, 357 (1996)). In other words, "[a] plaintiff's remedy must be tailored to redress the plaintiff's particular injury." Gill v. Whitford, ___ U.S. ___, 138 S. Ct. 1916, 1934 (2018) (citing Cuno, 547 U.S. at 353). Even if the plaintiff had alleged a particularized, concrete injury and even if the relief he seeks would redress that injury, that relief is not tailored to the alleged injury. As the Michigan court explained in King v. Whitmer, Case No. 20-13134 at Dkt. No. 62, page 25 (E.D. Mich. Dec. 7, 2020), "Plaintiffs' alleged injury does not entitle them to seek their requested remedy because the harm of having one's vote invalidated or diluted is not remedied by denying millions of others *their* right to vote."

The plaintiff's status as a registered voter does not give him standing to sue.

b. Standing as a nominee for elector

The amended complaint alleges that the plaintiff has standing to bring the suit "as a candidate for the office of Elector under Wis. Stat. §§ 5.10, et seq." Dkt. No. 9 at ¶26. The amended complaint cites to "Wis. Stat. §§5.10, et seq," but the court is not sure what the "*et seq.*"—"and what follows"—contributes to the plaintiff's belief that he has standing. Wis. Stat. §5.10 is followed by Wis. Stat. §5.15, which concerns the "Division of municipalities into wards," as well as other sections concerning polling places and voting machines. The court assumes the plaintiff meant to reference only Wis. Stat. §5.10.

Wis. Stat. §5.10 states:

> Although the names of the electors do not appear on the ballot and no reference is made to them, a vote for the president and vice president named on the ballot is a vote for the electors of the candidates for whom an elector's vote is cast. Under chs. 5 to 12, all references to the presidential election, the casting of votes and the canvassing of votes for president, or for president and vice president, mean votes for them through their pledged presidential electors.

Relying on this section, the amended complaint directs the court's attention to Carson v. Simon, 978 F.3d 1051, 1057 (8th Cir. 2020).[2] In Carson,

[2] The complaint also cites two Supreme Court cases: McPherson v. Blacker, 146 U.S. 1, 27 (1892) and Bush v. Palm Beach Cty. Canvassing Bd., 531 U.S. 70, 76 (2000) (*per curiam*). Neither address the Article III standing of an elector. In McPherson, the Court reviewed the Michigan supreme court's decision on the constitutionality of the Michigan statute governing selection of electors. While the parties who brought the suit in state court were nominees for presidential electors, the Court did not address their standing (or lack of it). The petitioner in Bush was the then-Republican candidate, George W. Bush, who was challenging the Florida supreme court's interpretation of its election statutes; again, the Court did not address (and had no need to address) the standing of an elector to sue.

two certified nominees of the Republican Party to be presidential electors sued the Minnesota secretary of state, challenging a consent decree that "essentially ma[de] the statutorily-mandated absentee ballot receipt deadline inoperative." Id. at 1054. As a result of the decree, the secretary of state had directed election officials "to count absentee ballots received up to a week after election day, notwithstanding Minnesota law." Id. The potential electors sought an injunction in federal court, but the district court found they lacked standing. Id.

The Eighth Circuit reversed, finding that the potential electors had standing as candidates "because the plain text of Minnesota law treats prospective presidential electors as candidates." Id. at 1057. The court found that candidates suffered particularized and concrete injury from an inaccurate vote tally. Id. at 1058.

The plaintiff urges this court to reach the same conclusion. An Eighth Circuit decision is not binding on this court, but the question is whether the reasoning in that decision is persuasive. A member of the panel in Carson dissented from the majority opinion and expressed doubt about the potential electors' standing. Circuit Judge Jane Kelley wrote:

> . . . I am not convinced the Electors have Article III standing to assert claims under the Electors Clause. Although Minnesota law at times refers to them as "candidates," see, e.g., Minn. Stat. § 204B.03 (2020), the Electors are not candidates for public office as that term is commonly understood. Whether they ultimately assume the office of elector depends entirely on the outcome of the state popular vote for president. Id. § 208.04 subdiv. 1 ("[A] vote cast for the party candidates for president and vice president shall be deemed a vote

> for that party's electors.") They are not presented to and chosen by the voting public for their office, but instead automatically assume that office based on the public's selection of entirely different individuals. But even if we nonetheless assume the Electors should be treated like traditional political candidates for standing purposes, I question whether these particular candidates have demonstrated the "concrete and particularized" injury necessary for Article III standing. Lujan v. Defs. of Wildlife, 504 U.S. 555, 560 . . . (1992). To the contrary, their claimed injury—a potentially "inaccurate vote tally" . . .—appears to be "precisely the kind of undifferentiated, generalized grievance about the conduct of government: that the Supreme Court has long considered inadequate for standing. Lance v. Coffman, 549 U.S. 437, 442 . . . (2007) (examining standing in the context of a claim under the Elections Clause). Because the Electors, should they in fact assume that office, must swear an oath to mark their Electoral College ballots for the presidential candidate who won the popular vote, Minn. Stat. § 208.43 (2015), it is difficult to discern how they have more of a "particularized stake," Lance, 549 U.S. at 442 . . . , in Minnesota conducting fair and transparent elections than do the rest of the state's voters.

Id. at 1063.

Judge Kelly's reasoning is the more persuasive. Under Wisconsin law, a vote for the candidates of president and vice president is a vote for the electors of those candidates. Wis. Stat. § 5.65(3)(a). When the electors meet, they must vote for the candidates of the party that nominated the electors. Wis. Stat. §7.75(2). Like Minnesota electors, Wisconsin electors may be referred to as "candidates" by statute but they are not traditional political candidates presented to and chosen by the voting public. Their interest in seeing that every valid vote is correctly counted and that no vote is diluted is no different than that of an ordinary voter. And the court has concluded, as did Judge Kelly, that the plaintiff's status as a voter does not give him standing.

The amended complaint does not mention the Elections Clause or the Electors Clause of the Constitution in relation to standing. In his brief in

opposition to the motions to dismiss, the plaintiff alleges that he has standing under "Electors and Elections Clause." Dkt. No. 72 at 17. He asserts that the Eighth Circuit found in Carson that electors had "both Article III and Prudential standing under the Electors and Elections Clauses." Id. The plaintiff reads Carson differently than does this court. The Carson majority did not mention the Electors or Elections Clause in its discussion of Article III standing. The entire discussion of Article III standing was based on Minnesota law. See Carson, 978 F.3d at 1-57-1058. In its discussion of *prudential* standing, the Carson majority stated that "[a]lthough the Minnesota Legislature may have been harmed by the Secretary's usurpation of its constitutional right under the Elector Clause, the Electors have been as well." Id. at 1058-59.

This court has found that the plaintiff does not have Article III standing, but even if had not, it disagrees that the Elector Clause[3] provides prudential standing to electors. Article II, Section 1, Clause 2 of the Constitution—known as the "Elector Clause"—states that "[e]ach State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of

[3] The plaintiff cites the "Elector and Elections Clause" or "Clauses" in the same breath but does not discuss the text of either. It is not clear how the plaintiff sees the Elections Clause—Article II, Sec. 1, cl. 3—as providing him with standing and the plaintiff has not developed that argument. The court notes only that in Lance v. Coffman, the Supreme Court found that plaintiffs whose only alleged injury was that the Elections Clause had not been followed did not have standing because they alleged "precisely the kind of undifferentiated, generalized grievance about the conduct of government that we have refused to countenance in the past." Lance, 549 U.S. at 442.

Trust or Profit under the United States, shall be appointed an Elector." The clause confers on the *state* the right to appoint electors and confers on the *legislature* the right to decide the way those electors will be appointed. It confers no right on the *electors* themselves. Just a few months ago, the Supreme Court stated as much in Chiafalo v. Washington, ___ U.S. ___, 140 S. Ct. 2316, 2328 (July 6, 2020), in the context of considering whether a state could penalize an elector for breaking his pledge and voting for someone other than the candidate who won his state's popular vote:[4] "Article II and the Twelfth Amendment give States broad powers over electors, and give electors themselves no rights." The Court went on to say,

> Early in our history, States decided to tie electors to the presidential choices of others, whether legislatures or citizens. Except that legislatures no longer play a role, that practice has continued for more than 200 years. Among the devices States have long used are pledge laws, designed to impress on electors their role as agents of others. A State follows in the same tradition if, like [the state of] Washington, it chooses to sanction an elector for breaching his promise. Then, too, the State instructs its electors that they have no ground for reversing the vote of millions of its citizens. That direction accords with the Constitution—as well as with the trust of a Nation that here, We the People rule.

Id.

The plaintiff's status as a nominee to be a Republican elector does not give him Article III or prudential standing.

[4] Wisconsin's "pledge law"—Wis. Stat. §7.75(1)—does not impose a penalty on a "faithless elector."

2. *Mootness*

Mootness "has sometimes been called 'the doctrine of standing set in a time frame.'" Chi. Joe's Tea Room, LLC v. Vill. of Broadview, 894 F.3d 807, 812-13 (7th Cir. 2018) (quoting Friends of the Earth, Inc. v. Laidlaw Envtl. Services (TOC), Inc., 528 U.S. 167, 189 (2000)). A case becomes moot "'when the issues presented are no longer "live" or the parties lack a legally cognizable interest in the outcome.'" Already, LLC v. Nike, Inc., 568 U.S. 85, 91 (2013) (quoting Murphy v. Hunt, 455 U.S. 478, 481 (1982) (per curiam)). "Mootness strips a federal court of subject-matter jurisdiction." Id. at 815 (citing DJL Farm LLC v. EPA, 813 F.3d 1048, 1050 (7th Cir. 2016). This is because "[a] case that becomes moot at any point during the proceedings is 'no longer a "Case" or "Controversy" for purposes of Article III.'" United States v. Sanchez-Gomez, __ U.S. __, 138 S. Ct. 1532, 1537 (2018) (quoting Already, LLC, 568 U.S. at 91).

The amended complaint states that the plaintiff brought this suit "to prohibit certification of the election results for the Office of President of the United States in the State of Wisconsin . . . ." Dkt. No. 9 at ¶27. The plaintiff asks the court to prohibit from occurring an event that already has occurred—an event that occurred the day before he filed this lawsuit and nine days before the court issues this order. He asks the court to enjoin defendant Evers from transmitting the certified election results, id. at ¶142—an event that already has occurred. He asks the court to order that certain votes not be counted, id., when the vote counting has been over since November 29.

The plaintiff himself demonstrates the mootness problem in his brief in opposition to dismissal. He states that defendant Evers can provide partial redress for his alleged injuries "by refusing to certify or transmit the election results." Dkt. No. 72 at 21. But Evers already has certified and transmitted the elections results—he cannot refuse to do that which he already has done.

At the December 8 hearing, the plaintiff argued that there remains a live controversy because the electors have not yet voted and will not do so until Monday, December 14, 2020. Dkt. No. 70. This argument ignores the fact that several of the events that dictate which slate of nominees are certified to vote already have taken place and had taken place at the time the plaintiff filed his complaint. The votes have been counted. In two counties, they've been counted twice. The WEC chair has signed the canvass and certified electors for Biden/Harris. The governor has signed the Certificate of Ascertainment and the National Archive has that certificate.

In his brief in opposition to dismissal, the plaintiff points to this court's own order earlier in this case, determining that the plaintiff had not demonstrated why the December 8, 2020 "safe harbor" deadline under 3 U.S.C. §5 was the date by which the plaintiff needed the court to issue a decision to preserve his rights. Dkt. No. 72 at 25 (citing Dkt. No. 29 at 7). The court noted in that order that the plaintiff's brief in opposition to a motion to reassign another case erroneously referred to December 8 as the date that the College of Electors was scheduled to meet. Dkt. No. 29 at 7. The court pointed out that that was incorrect, and that December 8 was the deadline by which the state

would have to make its final determination of any election dispute in order to avoid congressional challenge. Id. The court then said, "Because the electors do not meet and vote until December 14, 2020, the court will impose a less truncated briefing schedule than the one the plaintiff proposes . . . ." Dkt. No. 29.

The plaintiff says that "[i]mplicit in this Court's determination" is the assumption that "this Court can still grant some or perhaps all of the relief requested and this Plaintiff's claims are not moot." Dkt. No. 72 at 25. The plaintiff reads more into the court's language than the court intended. In the plaintiff's earliest pleadings—the first motion for injunctive relief, the "corrected" motion for injunctive relief, the "amended" motion for injunctive relief—the plaintiff failed to identify a date by which he needed the court to act. The first time he identified such a date was in his brief in opposition to a motion to reassign another case—and then, the reference was oblique. In his opposition brief, the plaintiff stated, "With the College of Electors scheduled to meet December 8, there could never be a clearer case of 'justice delayed is justice denied.'" Dkt. No. 18 at 1. From that, the court deduced that the plaintiff needed the court to act by the date the College of Electors was scheduled to meet. But the College of Electors was not scheduled to meet December 8—it was (and is) scheduled to meet December 14. So the court set a briefing schedule that would give the defendants a chance to respond, but would complete briefing ahead of the event the plaintiff deemed important—the

electoral meeting and vote. That was not a decision by this court—implicit or explicit—on the mootness of the plaintiff's claims.

The plaintiff also asserts that the "cutoff for election-related challenges, at least in the Seventh Circuit, appears to be the date that the electors meet, rather than the date of certification." Dkt. No. 72 at 24. He cites Swaffer v. Deininger, No. 08-CV-208, 2008 WL 5246167 (E.D. Wis. Dec. 17, 2008). Swaffer is not a Seventh Circuit case, and the court is not aware of a Seventh Circuit case that establishes a "cutoff for election-related challenges." And the plaintiff seems to have made up the "quote" in his brief that purports to be from Swaffer. The plaintiff asserts that these words appear on page 4 of the Swaffer decision: "even though the ***election*** has passed, the meeting of electors obviously has not, so plaintiff's claim here is hardly moot." Dkt. No. 72 at 24-25. The court has read page 4 of Swaffer—a decision by this court's colleague, Judge J.P. Stadtmueller—three times and cannot find these words. In fact, Swaffer did not involve a challenge to a presidential election and it did not involve electors. Mr. Swaffer sought to challenge a Wisconsin statute requiring individuals or groups promoting or opposing a referendum to file a registration statement and take other actions. Swaffer, 2008 WL 5246167, at *1. The defendants argued that the election (in which the plaintiff had taken steps to oppose a referendum on whether to allow liquor sales in the Town of Whitewater) was over and that Swaffer's claims thus were moot. Id. at 2. Judge Stadtmueller disagreed, finding that because Swaffer alleged that he intended

to violate the statutes at issue in the future, a credible threat of prosecution remained. Id. at 3.

Some of the relief the plaintiff requests may not be moot. For example, he asks for an immediate order seizing voting machines, ballots and other materials relating to the physical mechanisms of voting. And there remain five days until the electors vote—as the events of this year have shown, anything can happen. But most of the relief the plaintiff seeks is beyond this court's ability to redress absent the mythical time machine.

3. *Conclusion*

The plaintiff does not have Article III standing to sue in federal court for the relief he seeks.

C. Other Arguments

Standing is the *sine qua non* of subject matter jurisdiction. Absent standing, the court does not have jurisdiction to consider the plaintiff's claims on the merits. Arguably, it has no jurisdiction to consider the other bases the defendants and *amici* assert for why the court should dismiss the case. At the risk of producing dicta (and spilling even more ink on a topic that has received an ocean's worth by now), the court will briefly address some of the other bases for the sake of completeness.

1. *Eleventh Amendment Immunity*

The defendants argue that the plaintiff's claims are barred by the Eleventh Amendment. Dkt. No. 59 at 15; Dkt. No. 54 at 10. The Eleventh Amendment "bars most claims in federal court against a state that does not

consent to suit." Carmody v. Bd. of Trs. of Univ. of Ill., 893 F.3d 397, 403 (7th Cir. 2018) (citations omitted). States are immune from suit in federal court "unless the State consents to the suit or Congress has abrogated their immunity." Tucker v. Williams, 682 F.3d 654, 658 (7th Cir. 2012) (citing Seminole Tribe v. Florida, 517 U.S. 44 (1996)). This includes suits brought in federal court against nonconsenting states by their own citizens. See, *e.g.*, Edelman v. Jordan, 415 U.S. 651, 663 (1974); Hans v. Louisiana, 134 U.S. 1, 15 (1890) ("Can we suppose that, when the eleventh amendment was adopted, it was understood to be left open for citizens of a state to sue their own state in the federal courts, while the idea of suits by citizens of other states, or of foreign states, was indignantly repelled?").

The plaintiff has sued the Governor of Wisconsin, Tony Evers, in his official capacity; the Wisconsin Elections Commission and each member of the WEC in his or her official capacity. Before going too much further down the Eleventh Amendment road, the court notes that the vehicle for the plaintiff to bring his constitutional claims—his claims under the Elector Clause, the Elections Clause, the Equal Protection Clause and the Due Process Clause—is 42 U.S.C. §1983. Section 1983 prohibits a "person" acting under color of state law from violating another's civil rights. The Wisconsin Elections Commission is not a "person." It is an arm of the state of Wisconsin, Wis. Stat. §5.05, and "states are not suable 'persons' under 42 U.S.C. § 1983." Phillips v. Baxter, 768 F. App'x 555, 559-560 (7th Cir. 2019) (citing Sebesta v. Davis, 878 F.3d 226, 231 (7th Cir. 2017)). See also, Will v. Mich. Dept. of State Police, 491 U.S. 58,

64 (1989) ("a State is not a person within the meaning of § 1983"). "Section 1983 provides a federal forum to remedy many deprivations of civil liberties, but it does not provide a federal forum for litigants who seek a remedy against a State for alleged deprivations of civil liberties." Will, 491 U.S. at 66. The WEC is not the proper defendant for the plaintiff's constitutional claims.

The plaintiff faces the same problem with his claims against the individual defendants, all of whom are state officials whom he sues in their official capacities.[5]

> Obviously, state officials literally are persons. But a suit against a state official in his or her official capacity is not a suit against the official but rather is a suit against the official's office. *Brandon v. Holt*, 469 U.S. 464, 471 . . . (1985). As such, it is no different from a suit against the State itself. See, *e.g.*, *Kentucky v. Graham*, 473 U.S. 159, 165-66 . . . (1985); *Monell* [*v. New York City Dept. of Social Services*, 436 U.S. 658], at 690 [(1978)].

Id. at 71. Arguably, *none* of the defendants are subject to suit under 42 U.S.C. §1983, which means that even if the plaintiff had standing, the court would have to dismiss Counts I, II and III of the amended complaint.

Circling back to the defendants' Eleventh Amendment argument, "The Eleventh Amendment extends to state agencies and departments and, subject to the *Ex Parte* Young doctrine, to state employees acting in their official capacities." Nelson v. LaCrosse Cty. Dist. Atty. (State of Wis.), 301 F.3d 820,

[5] Had the plaintiff sued the individual defendants in their *personal* capacities, he could have sought relief against them under 42 U.S.C. §1983, assuming he had standing.

827 n.7 (7th Cir. 2002) (citing Pennhurst State Sch. & Hosp. v. Halderman, 465 U.S. 89, 123-24 (1984)).

There are three exceptions to Eleventh Amendment immunity: (1) congressional abrogation, Nuñez v. Ind. Dep't of Child Servs., 817 F.3d 1042, 1044 (7th Cir. 2016) (citing Alden v. Maine, 527 U.S. 706, 754-55 (1999); (2) "a state's waiver of immunity and consent to suit," id. (citing College Savings Bank v. Fla. Prepaid Postsecondary Educ. Expense Bd., 527 U.S. 666, 675 (1999)); and (3) a suit "against state officials seeking only prospective equitable relief," id. (citing *Ex parte* Young, 209 U.S. 123, 159-60 (1908)). None of the exceptions apply here.

Congress did not abrogate the sovereign immunity of the states when it enacted 42 U.S.C. §1983. Will, 491 U.S. at 66. Wisconsin has not waived its immunity from civil actions under §1983. See Shelton v. Wis. Dep't of Corr., 376 Wis. 2d 525, *2 (Table) (Ct. App. 2017) (citing Boldt v. State, 101 Wis. 2d 566, 584-85 (1981)). And the *Ex parte* Young doctrine does not apply when a plaintiff asserts a claim—regardless of the relief requested—against a state official based on *state* law. Pennhurst, 465 U.S. at 106 ("A federal court's grant of relief against state officials on the basis of state law, whether prospective or retroactive, does not vindicate the supreme authority of federal law. On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law."). "In determining whether the *Ex parte* Young doctrine avoids an Eleventh Amendment bar to suit, a court need only conduct a 'straightforward

inquiry' into whether the complaint alleges an ongoing violation of federal law and seeks relief properly characterized as prospective." Verizon Md., Inc. v. Pub. Serv. Comm'n of Md., 535 U.S. 635, 636 (2002) (quoting Idaho v. Coeur d'Alene Tribe of Idaho, 521 U.S. 261, 296 (1997); McDonough Assocs., Inc. v. Grunloh, 722 F.3d 1043, 1051 (7th Cir. 2013)).

Count IV of the amended complaint alleges "[w]ide-spread ballot fraud," a *state*-law claim. The Eleventh Amendment bars that claim against the defendants in their official capacities. The Eleventh Amendment also bars the plaintiff's federal claims to the extent that the plaintiff seeks retrospective relief. The Supreme Court has refused to extend the *Ex Parte* Young doctrine to claims for retrospective relief. Green v. Mansour, 474 U.S. 64, 68 (1985) (citing Pennhurst, 465 U.S. at 102-103). The amended complaint seeks (1) a "temporary restraining order instructing Defendants to de-certify the results of the General Election for the Office of President," dkt. no. 9 at 47; (2) "an order instructing the Defendants to certify the results of the General Election for Office of the President in favor of President Donald Trump," id.; (3) "a temporary restraining order" prohibiting the tabulation of unlawful votes," id.; (4) an order preserving voting equipment and data, id.; (5) "the elimination of the mail ballots from counting in the 2020 election," id. at 48; (6) the disqualification of Wisconsin's electors from participating in the 2020 election, id.; and (7) an order directing Wisconsin's electors to vote for President Donald Trump, id. As the court already has noted, with the possible exception of the

request for an order preserving voting equipment and data, the relief the plaintiff requests is retrospective.

The plaintiff disagrees—he characterizes the certification of the election results as "ongoing violations of federal law . . . ongoing violations of the Electors and Elections Clauses, the Equal Protection and Due Process Clauses, as well as likely violations of federal law including the Voting Rights Act and the Help America Vote Act." Dkt. No. 72 at 25-26. The plaintiff has not brought claims under the latter two statutes and saying that a completed event is an ongoing violation doesn't make it so.

2. *Exclusive Remedy/Exhaustion/Abstention*

Defendant Evers moves to dismiss because Wisconsin provides a remedy to address irregularities or defects during the voting or canvassing process: Wis. Stat. §9.01(11). Four days ago, the Wisconsin Supreme Court held that §9.01(6) requires that a party aggrieved after a recount must appeal by filing suit in circuit court. Trump v. Evers, No. 2020AP1971-OA, Order at *2 (Wis. Dec. 3, 2020). In a concurring opinion, Justice Hagedorn noted that Wis. Stat. §9.01(11) provides that §9.01 is the exclusive judicial remedy for an aggrieved candidate. Defendant Evers points out that President Trump has lawsuits pending in state circuit courts and argues that those cases raise many of the claims the plaintiff raises here. Dkt. No. 59 at 11. He argues that the process detailed in Wis. Stat. §9.01 is designed to allow an aggrieved candidate to resolve election challenges promptly, and that for this court to permit the

plaintiff to circumvent that process "would eviscerate Wisconsin's careful process for properly and quickly deciding election challenges." Id. at 11-12.

Of course, the plaintiff has no redress under Wis. Stat. §9.01, because he is not a "candidate" in the sense of that statute. But Evers argues that there was a form of state-law relief available to the plaintiff. He asserts that the plaintiff should have filed a complaint with the Wisconsin Elections Commission under Wis. Stat. §5.06. Dkt. No. 59 at 13. That statute allows a voter dissatisfied with the Wisconsin election process to file a written, sworn complaint with the elections board. Wis. Stat. §5.06(1). The statute states that no voter may "commence an action or proceeding to test the validity of any decision, action or failure to act on the part of any election official" without first filing a complaint under §5.06(1). Wis. Stat. §5.06(2). Evers points out that the plaintiff has not demonstrated that he followed this procedure and thus that the plaintiff did not exhaust his remedies before coming to federal court. Dkt. No. 59 at 14.

The plaintiff does not directly respond to the exhaustion argument. He simply maintains that he has a right to bring his constitutional claims in federal court, argues that there is no evidence that the statute Evers cites is an exhaustion requirement and asserts that the court has federal question jurisdiction under 28 U.S.C. §1331 and supplemental jurisdiction over any state-law claims under 28 U.S.C. §1367.[6] Dkt. No. 72 at 27-28. He neatly

[6] The court could exercise supplemental jurisdiction over state-law claims only if there remained federal claims to which those state-law claims related. As the court has noted, it likely would have been required to dismiss the federal

sidesteps the question of why he did not follow a procedure that would have allowed him to direct his concerns to the entity in charge of enforcing the state's election laws and in a way that likely would have brought those concerns to that entity's attention long before the election results were certified.

Because the court has concluded that the plaintiff does not have standing, and because the plaintiff has sued defendants who either are not suable under §1983 or are protected by Eleventh Amendment immunity, the court will not accept the invitations of the defendants and *amici* to wade into the waters of the various types of abstention. If this court does not have subject matter jurisdiction, there is no case or controversy from which it should abstain. The court agrees with the parties, however, that the relief the plaintiff requests—asking a federal judge to order a state governor to decertify the election results for an entire state and direct that governor to certify a different outcome—constitutes "an extraordinary intrusion on state sovereignty from which a federal court should abstain under longstanding precedent." Dkt. No. 57 at 28.

3. *Laches*

The defendants argue that the equitable defense of laches requires dismissal, because the plaintiff "inexplicably waited until after the election, after the canvassing, after the recount, after the audit, after results were

---

claims because the plaintiff asserted them through §1983 against state officials in their official capacities, which in turn would have required dismissal of any state claims for lack of subject matter jurisdiction.

certified, and indeed until the eve of the electoral college vote, to bring his claim of state law violations and widespread fraud . . . .” Dkt. No. 52 at 11. See also, Dkt. No 59 at 17 (“the doctrine of laches bars [the plaintiff’s] claims because he has unreasonably delayed bringing his claims to the detriment not only of Defendants, but also of the nearly 3.3 million voters in Wisconsin who voted in this last election under the good-faith belief that they were following the correct procedures to have their votes counted.”).

The doctrine of laches “addresses delay in the pursuit of a right when a party must assert that right in order to benefit from it.” Hot Wax, Inc. v. Turtle Wax, Inc., 191 F.3d 813, 820 (7th Cir. 1999). “For laches to apply in a particular case, the party asserting the defense must demonstrate: (1) an unreasonable lack of diligence by the party against whom the defense is asserted and (2) prejudice arising therefrom.” Id. (citing Cannon v. Univ. of Health Scis./The Chicago Med. Sch., 710 F.2d 351, 359 (7th Cir. 1983)). “Timeliness must be judged by the knowledge of the plaintiffs as well as the nature of the right involved.” Jones v. v. Markiewicz-Qualkinbush, 842 F.3d 1053, 1061 (7th Cir. 2016).

“The obligation to seek injunctive relief in a timely manner in the election context is hardly a new concept.” Id. at 1060-61. In fact, the Seventh Circuit has held that such “claims must be brought expeditiously . . . to afford the district court sufficient time in advance of an election to rule without disruption of the electoral cycle.” Id. at 1061 (internal quotation marks and citations omitted).

The amended complaint asserts that the alleged problems with the Dominion voting machine software "have been widely reported in the press and have been subject to investigation." Dkt. No. 9 at ¶12. It cites to exhibits from January and August of 2020. Dkt. No. 9 at 5 n.1. It cites to the WEC's May 13, 2020 directive to clerks that they should not reject the ballots of "indefinitely confined" absentee voters. Id. at ¶40. It cites an October 18, 2016 memorandum issued by the WEC instructing clerks on how to handle absentee envelope certifications that did not bear the address of the witness. Id. at ¶44. It cites October 19, 2020 instructions by the WEC to clerks about filling in missing ballot information. Id. at ¶45.

Defendant Evers points out that the plaintiff's own allegations demonstrate that he has known about the Dominion voting machine issues since long before the election. Dkt. No. 59 at 17-18. He argues that the WEC guidance about which the plaintiff complains came in directives issued in October 2016, May 2020 and October 2020. Id. He asserts that the plaintiff has made no effort "to offer a justifiable explanation for why he waited until weeks after the election to challenge" these issues. Id. at 18. The WEC defendants advise the court that the issue regarding "indefinitely confined" voters was litigated in state court almost eight months ago. Dkt. No. 54 at 9 (citing Pet. For Original Action dated March 27, 2020, Supreme Court of Wisconsin, No. 2020AP000557-OA). They assert that the plaintiff "waited to challenge widely-known procedures until after millions of voters cast their ballots in reliance on those procedures." Id. at 6. They state that "[i]f the doctrine of laches means

anything, it is that Plaintiff here cannot overturn the results of a completed and certified election through preliminary relief in this late-filed case." Id.

The plaintiff first responds that laches is a defense and shouldn't be raised on a motion to dismiss. Dkt. No. 72 at 22. He then claims that he could not have known the bases of any of these claims until after the election. Id. at 22-23. He says that because Wisconsin election officials did not "announce or publicize their misconduct," and because, he alleges, they "prevented Republican poll watchers from observing the ballot counting and handling," it took him time to gather the evidence and testimony he attached to the amended complaint. Id. at 23. Finally, he alleges that the delay post-November 3, 2020 is attributable to the defendants' failure to timely complete the election count. Id. He insists that he filed this suit at the earliest possible moment—the day after the certification. Id.

The court has determined that the plaintiff does not have standing. That means that the court does not have jurisdiction to assess the plaintiff's credibility, and it will refrain from doing so.

4. *Failure to state a claim upon which relief can be granted*

Both defendants asked the court to dismiss the case for failure to state a claim under Fed. R. Civ. P. 12(b)(6). Because the court does not have subject matter jurisdiction, it will not address the sufficiency of the substantive claims in the amended complaint.

5. *Requests for injunctive relief*

For the same reason, the court cannot address the merits of the plaintiff's request for preliminary injunctive relief.

V. Conclusion

This court's authority to grant relief is confined by the limits of the Constitution. Granting the relief the plaintiff requests would take the court far outside those limits, and outside the limits of its oath to uphold and defendant the Constitution. The court will grant the defendants' motion to dismiss.

The court **GRANTS** Defendant Governor Tony Evers's Motion to Dismiss Plaintiff's Amended Complaint. Dkt. No. 51.

The court **GRANTS** Defendant Wisconsin Elections Commission and Its Members' Motion to Dismiss. Dkt. No. 53.

The court **DENIES AS MOOT** Plaintiff's Corrected Motion for Declaratory, Emergency, and Permanent Injunctive Relief. Dkt. No. 6.

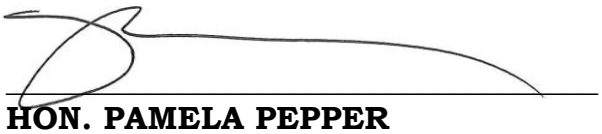
The court **DENIES AS MOOT** Plaintiff's Amended Motion for Temporary Restraining Order and Preliminary Injunction to be Considered in an Expedited Manner Dkt. No. 10.

The court **DISMISSES** the Amended Complaint for Declaratory, Emergency, and Permanent Injunctive Relief. Dkt. No. 9.

The court **ORDERS** that this case is **DISMISSED.**

Dated in Milwaukee, Wisconsin this 9th day of December, 2020.

BY THE COURT:



HON. PAMELA PEPPER
Chief United States District Judge

UNITED STATES DISTRICT COURT
EASTERN DISTRICT OF WISCONSIN

WILLIAM FEEHAN,

Plaintiff,

JUDGMENT IN A CIVIL CASE

v.

Case No. 20-cv-1771-pp

WISCONSIN ELECTIONS COMMISSION, ANN S. JACOBS, MARK L. THOMSEN, MARGE BOSTELMANN, JULIE M. GLANCEY, DEAN KNUDSON, ROBERT F. SPINDELL, JR., and TONY EVERS,

Defendants.

☐ **Jury Verdict.** This case came before the court for a trial by jury. The parties have tried the issues, and the jury has rendered its verdict.

☑ **Decision by Court.** This case came before the court, the court has decided the issues, and the court has rendered a decision.

THE COURT ORDERS AND ADJUDGES that judgment is entered in favor of the defendants and against the plaintiff.

THE COURT ORDERS that this case is **DISMISSED**.

Approved and dated in Milwaukee, Wisconsin this 9th day of December, 2020.

BY THE COURT:

HON. PAMELA PEPPER
Chief United States District Judge

GINA M. COLLETTI
Clerk of Court

Re: Feehan, et al. v. Wisconsin Elections Commission, et al.
USDC Case No.: 20-C-1771

Dear Counsel:

The Notice of Appeal to the U.S. Court of Appeals for the Seventh Circuit was filed on December 10, 2020. If a transcript is necessary, you will need to complete the "7th Circuit Transcript Information Sheet" and the "Transcript Request Form". Both forms are available on our website at http://wied.uscourts.gov by clicking on Forms and selecting the "Transcript Request Form" and "Seventh Circuit Transcript Information Sheet" link.

The District Court will ensure that the record is complete and made available electronically to the Court of Appeals within 14 days of filing the notice of appeal. Any confidential record or exhibit that is not available electronically will be prepared and held by the District Court until requested by the Court of Appeals. Counsel must review the docket sheet within 21 days of filing the notice of appeal to ensure that the record is complete.

Motions to correct or modify, supplement, or strike a pleading from the record must first be filed with the District Court. The District Court's ruling on the motion will become part of the record and notice of the decision will be sent to the Court of Appeals.

If a Docketing Statement, as required by Circuit Rule 3(c), was not filed with the Notice of Appeal, it should be filed directly with the Clerk of Court for the U.S. Court of Appeals for the Seventh Circuit. If you have any questions, please feel free to call.

Very truly yours,

GINA M. COLLETTI
Clerk of Court

By: /s/ L M Forseth
Deputy Clerk

12/04/2020	34	MOTION for Leave to File Excess Pages by Tony Evers. (Mandell, Jeffrey)
12/04/2020	35	NOTICE of Appearance by Sidney Powell on behalf of All Plaintiffs. Attorney(s) appearing: Sidney Powell (Powell, Sidney)
12/04/2020	36	TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/4/2020 re 34 MOTION for Leave to File Excess Pages filed by Tony Evers: The defendant seeks leave to file a brief in excess of the thirty pages allowed by Civil L.R. 7(f) because he proposes to both oppose the plaintiff's amended motion for injunctive relief and support his own, not yet filed motion to dismiss in the same pleading. The court appreciates any party's effort to streamline litigation, but would prefer that the defendant file separate briefs opposing the plaintiff's amended motion and supporting his own. This will avoid confusion when the plaintiff responds. The court **DENIES** the defendant's motion for leave to file excess pages. **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/04/2020	37	ORDER signed by Chief Judge Pamela Pepper on 12/4/2020 allowing James Gesbeck to file *amicus curiae* brief by 5:00 PM on 12/7/2020. (cc: all counsel, via mail to James Gesbeck)(cb)
12/05/2020	38	TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/5/2020 re 22 MOTION to Intervene filed by Democratic National Committee signed by Chief Judge Pamela Pepper on 12/5/2020: Under Civil L.R. 7(b), the plaintiff's response is due by December 25, 2020; because December 25 is a federal holiday, the court **ORDERS** that the plaintiff's response is due by December 28, 2020. **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/05/2020	39	TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/05/2020 re 33 MOTION to Intervene filed by James Gesbeck: Under Civil L.R. 7(h), the plaintiff's response is due by Friday, December 11, 2020. **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)
12/05/2020	40	Expedited MOTION to Intervene by Democratic National Committee. (Umberger, Michelle)
12/06/2020	41	ORDER signed by Chief Judge Pamela Pepper on 12/6/2020. 40 Movant DNC's expedited motion to intervene GRANTED to extent that court has expedited its ruling on original motion to intervene. 22 Movant DNC's original motion to intervene DENIED. Movant DNC may file *amicus curiae* brief by 5:00 PM on 12/7/2020. (cc: all counsel)(cb)
12/06/2020	42	BRIEF in Support filed by William Feehan re 10 Emergency MOTION to Amend/Correct Docket # 6: PLAINTIFFS CORRECTED MOTION FOR DECLARATORY, EMERGENCY, AND PERMANENT INJUNCTIVE RELIEF *Amended Brief*. (Dean, Michael)
12/06/2020	43	MOTION To File Separate Reply Briefs by William Feehan. (Dean, Michael)
12/06/2020	44	MOTION To Hold Consolidated Evidentiary Hearing/Trial by William Feehan. (Dean, Michael)
12/07/2020	45	TEXT ONLY ORDER signed by Chief Judge Pamela Pepper on 12/7/2020 re 43 MOTION To File Separate Reply Briefs filed by William Feehan: The court **GRANTS** the plaintiff's motion for leave to file separate reply briefs. If the defendants file a single opposition brief, the plaintiff must file one reply to that brief. If the defendants file separate opposition briefs, the plaintiff may file a reply for each opposition brief. The plaintiff also may file a separate reply for each brief filed by an amicus. (In other words, the plaintiff could file up to four reply briefs if the defendants file separate briefs and each amicus files a brief.) If the defendants file a separate motion to dismiss, the plaintiff may file an opposition brief of up to thirty pages under Civil L.R. 7(b). **NOTE: There is no document associated with this text−only order.** (cc: all counsel)(Pepper, Pamela)

12/07/2020		NOTICE of Hearing: Status Conference set for 12/8/2020 at 11:00 AM by telephone before Chief Judge Pamela Pepper. The parties are to appear by calling the court's conference line at 888−557−8511 and entering access code 4893665#. (cc: all counsel)(cb)
